

ET PC/104 Extractor Tool Usage Guide

Item: HW-PC104-EXT

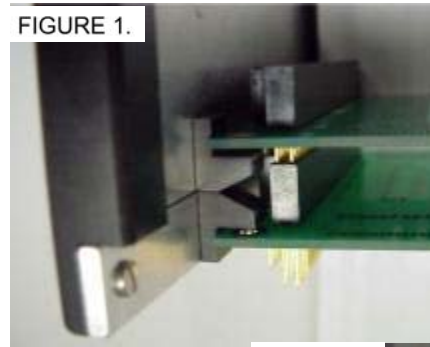

Rev A. 11/2/05

The Emulation Technology, Inc. PC/104 extractor tool, model HW-PC104-EXT, is the best tool on the market to separate PC/104 module boards. Although the separation of PC/104 modules is possible by hand, it is a delicate and tedious operation that could result in damage to the long pins of the connectors. This industrial grade extractor tool has been designed to enable the user to quickly and safely separate the PC/104 boards. Built of high quality aluminum and stainless steel with plastic shielding, the HW-PC104-EXT ensures long-term and reliable use in an industrial environment.

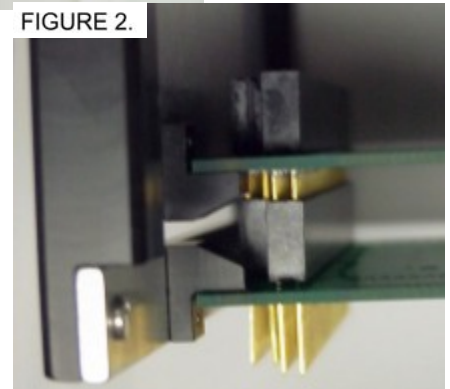

Instructions

1. The HW-PC104-EXT is very easy to use. Simply place the plastic blocks of the tool between the two boards (Figure 1).

2. Then squeeze the HW-PC104-EXT's handle, which will pull the blocks apart and thus separate the boards (Figures 2 & 3).

The travel of the HW-PC104-EXT's handle is controlled by a stop allowing a displacement of .500".
