

Commerical/Industrial Products

What Every You're Looking For In Commercial Or Industrial Engineered Elastomers – Call Kirkhill-TA

To find a reliable partner to develop and manufacture your commercial or industrial product in rubber or an elastomer, to your expectations, quality standards and within budget – Look to Kirkhill-TA. If you call Kirkhill-TA early in the design cycle of your next product you will discover a custom rubber / elastomer designer and manufacturer that will meet and exceed your expectations. From material formulation through design and production, Kirkhill-TA experts provide the value-added advice, service and support that will help assure the success of your project. Need proof? Just ask a sales representative for the long list of manufacturers of sporting goods, marine products, toys, medical equipment, pharmaceutical products, home and garden products as well as food service industry products that are long time, repeat Kirkhill-TA customers.

Kirkhill-TA commercial/industrial engineered elastomer capabilities include:

- ▶ Molding
- ▶ Extrusion
- ▶ Calendering
- ▶ Sponge

Molding

- Compression, transfer and injection molding
- Rubber -to-metal bonding
- Dual durometers available
- Solid and hollow sections
- Metal and fabric inserts
- Multi-colored products
- Parts up to 36" wide x 140" long

Extrusion

- All polymers
- Continuous cured long length
- Microwave, hot salt, oil and air vulcanization systems
- Colors available
- Dual durometer
- Cross-head capabilities
- Cross-sections up to 15 lbs./ft.

Calendering

- All polymers
- From .015 to .025" thickness and widths to 58"
- Smooth or fabric finish
- Cloth inserted up to 58" widths
- Multi-colored products
- Laminated two-polymer sheets
- Calendered sponge

Sponge

- Molded shapes and sheets
- Closed cell extrusions
- Full range of colors
- Silicone, Neoprene, Natural Rubber, EPDM, Hypalon, Nitrile

Fire Barrier Products

- Fire proof sealants
- Thermal insulating materials

Specialty Clamping Devices

- Clamps
- Line blocks
- Grommets

Call Kirkhill-TA today and put our engineered elastomers and manufacturing experts on your team. Our experts will help reduce your product's time to market, while controlling costs, for overall customer satisfaction.
