WIRE PROTECTOR SYSTEM

OVERVIEW

For wire protection system, the wire guard is pushed down by turning the screw clock-wise. The terminal is fixed in the housing and there is no lift system.

RISING CLAMP SYSTEM

OVERVIEW

For rising clamp system, the clamp is lifted by turning the screw clock-wise. The wire is clamped between the clamp and the terminal. It is a more robust and secure wire connection.

SCREW PLUGGABLE SYSTEM

OVERVIEW

For screw pluggable system, the plug uses the screw structure to contact.

SPRING CLAMP PLUGGABLE SYSTEM

OVERVIEW

For spring clamp pluggable system, the plug uses a spring clamp to contact.

SPRING CLAMP SYSTEM

OVERVIEW

For spring clamp system, the terminal is fixed on the PCB. It uses spring clamp to contact. Easy for user to install wire.

ACCESSORIES

OVERVIEW

There is a variety of accessories available. Ranging from assorted shells to installation tooling.

BARRIER TERMINAL BLOCKS

OVERVIEW

There is a variety of barrier terminal blocks available. The pitch sizes range from 7.62mm to 16.00mm.
