

FEINMETALL
Contact Technologies

RELIABLE CONTACTS ARE OUR BUSINESS

1964 → FOUNDATION FEINMETALL GMBH 1974 → PRODUCTION OF THE FIRST SPRING CONTACT PROBES

1998 → FOUNDATION CZECH REPUBLIC ASSEMBLY PLANT 2006 → NEW BRANCHES

“Competence and quality in precision engineering and micromechanics – that’s been our motto for years.”

Your partner for contact solutions

Good contacts are important. Not only in interpersonal communication, but in the technical field as well. FEINMETALL is a leading provider of contact solutions, in particular for testing electrical and electronic components. Our product portfolio includes test probes, test fixtures and probe cards with the finest structures for semiconductor test. In addition to our standard program, we also develop customized solutions for our customers to meet their specific requirements.

We are an independent, midsize company with great innovative capacity. Our 360 employees do everything in their power to help our customers become successful with our products. That is our objective and our incentive.

Wolfgang Bürkle
CEO of FEINMETALL GmbH

1985 → LAUNCH OF ViProbe® FOR WAFER TESTING 1986 → PRODUCTION OF THE FIRST TEST FIXTURES

IN THE UNITED STATES AND ASIA 2011 → EXPANSION IN MEXICO AND CHINA

• OUR CORE COMPETENCY

Precision engineering and micromechanics at the highest level

State-of-the-art contacting require the finest structures. Our engineers and technicians develop products in fields where others have long since given up. Even contacts, drills and wiring the diameter of a hair are not a problem for us. We are able to integrate the finest mechanics into thin test probes. We know our customers' applications and enjoy taking on challenges. From the automotive industry to the electronics sector, our customers can rely on the quality and performance of our products.

FEINMETALL has been one of the most innovative midsize companies in Germany for decades. State-of-the-art manufacturing methods, highly specialized machinery and professional quality management are guarantees for successful products, and hence satisfied customers.

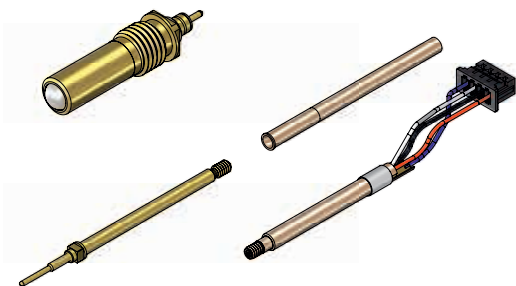

SPRING CONTACT PROBES

The variety inspires

Our business is supplying the optimal contact probe for every application. Regardless of standard contact probes or individual customized solutions, used with high currents or high frequencies, for printed circuit board contacting or wiring harness testing: FEINMETALL offers the right solution – either with a product that's already in our portfolio or with a customized solution.

In-depth knowledge of our customers' applications, high quality standards, flexibility in implementing customer requirements and short delivery times are the things that distinguish us from others.

Our numerous patents demonstrate the strength of our innovation. At FEINMETALL, we focus on the individual technical support and consultation of our customers – a subtle but important difference.

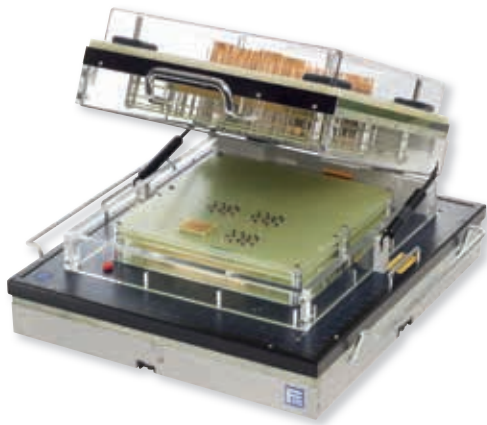

A woman with long brown hair, wearing a white lab coat and a small green earring, is focused on her work. She is using a black heat gun to apply heat to a green printed circuit board (PCB) mounted inside a black test fixture. The fixture is open, revealing internal components and wiring. The background shows a clean, well-lit industrial or laboratory environment with various pieces of equipment and large windows. A red banner at the bottom of the image contains the text "TEST FIXTURES".

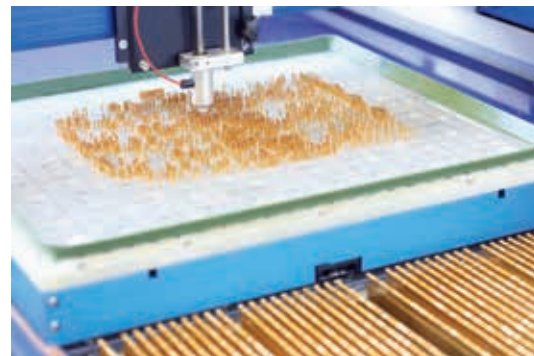

TEST FIXTURES

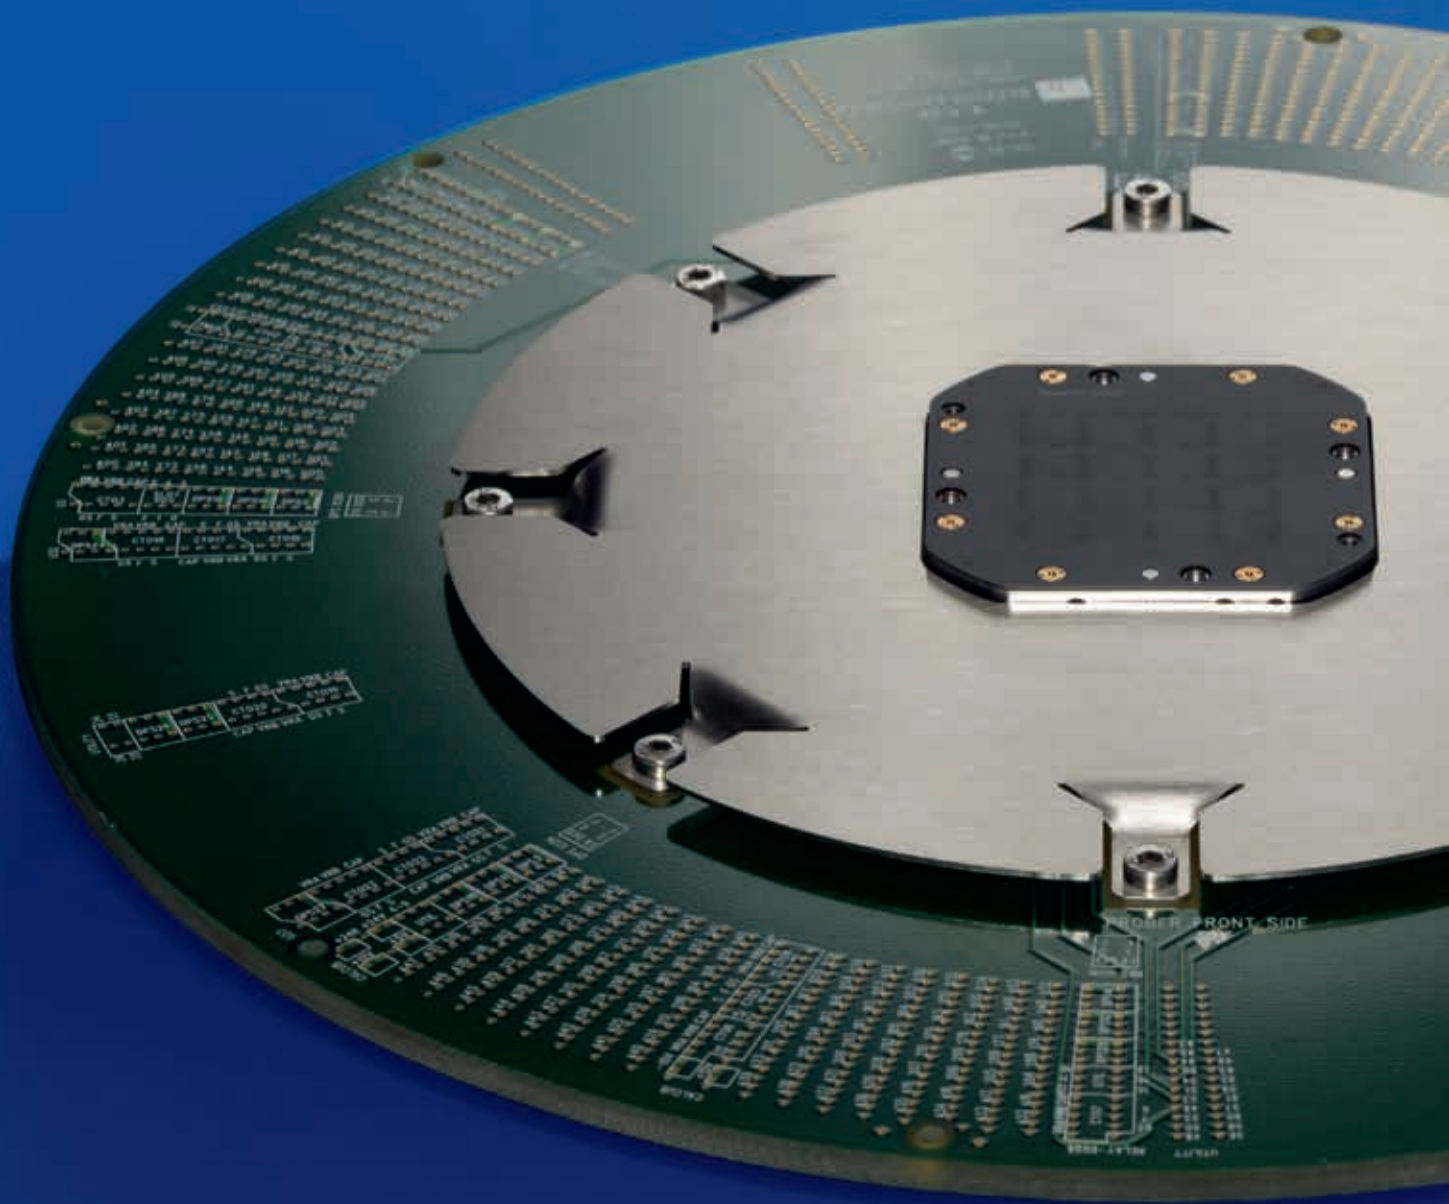

You're in good hands

Developing test fixtures requires a high degree of competence, flexibility and experience. Production ramp ups adhere to tight schedules, and at the end of the chain are our test fixtures. While the customer's production department waits for the test equipment, our specialists work fervently on complex test fixtures. Implementing the highest degree of functional reliability and diverse test requirements within a short period of time is applied now.

FEINMETALL's highly-skilled engineers and technicians are there to support you and are optimally trained for these requirements. Clever basic concepts and system components, the use of state-of-the-art 3D CAD tools and experience in customized project work – all lead to satisfied customers.

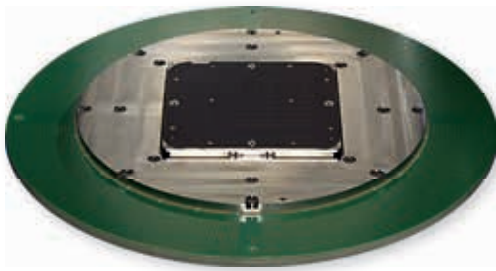

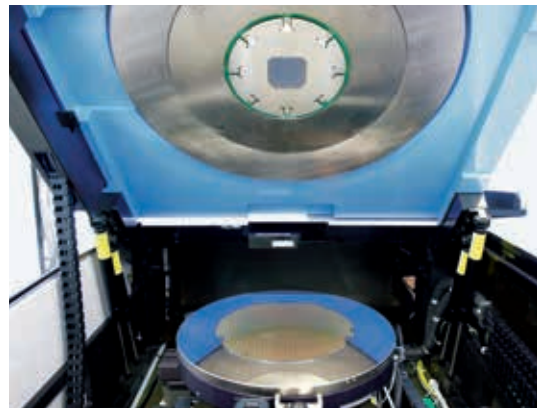

PROBE CARDS

The fascination of fine structures

Lightning-speed development in semiconductor technology is a major challenge for all companies that are active in this field. Today, FEINMETALL is at the technological cutting edge of wafer contacts. The vertical probe cards sold under the ViProbe® brand are among the leading products on the market. This success can be attributed to highly specialized development and engineering teams that make the apparently impossible, possible. We find a solution even for the most difficult contact applications.

The semiconductor industry is an international one, which is why FEINMETALL is present at the most important locations. Service and manufacturing sites in Asia, Europe and the USA ensure that we are physically close to our customers and markets. Top quality, streamlined processes and excellent on-site service as well as very service-friendly products continue to impress our customers!

TEAMWORK

An exciting work environment

Our employees are the most important foundation of our success. It is only through their competence and dedication that we are often a step ahead and successful in the market. FEINMETALL offers its employees attractive working conditions:

- positive working atmosphere
- flat hierarchies
- good opportunities for personal growth

Our employees' training and further qualification is of strategic importance to us. In addition to the classic education paths and new professions education, we offer students of the dual universities of Baden-Württemberg the opportunity for practical, hands-on studies as well as future job security. But FEINMETALL also supports employees who have already established careers and have amassed a lot of experience in advancing their skills and knowledge. This is the only way we can ensure a high degree of technical competency and our advancement.

POSITIONED ACROSS THE GLOBE

FEINMETALL GMBH | HERRENBERG, GERMANY

FEINMETALL-OCT | HSINCHU COUNTY, TAIWAN

FEINMETALL CZ | NOVE MESTO NAD METUJI, CZECH REPUBLIC

Internationally experienced

FEINMETALL is an international high-tech company and we act accordingly. We always have a finger on the pulse of the market and are available to our customers on site with seven locations in Europe, Asia and the USA. Our international partners are always up-to-date on all the current technology. We ensure this with on-site training or our in-house courses. Working together with various cultures is routine for us.

You can rely on our international logistics. We provide high delivery performance and secure transport worldwide. Optimized processes and special customs certifications ensure that the FEINMETALL products get to where they need to be quickly.
