

In addition to the many sizes that FIT Bearings regularly sells and stocks, FIT is capable of finding sources for just about any bearing and seal needs you may have. FIT Bearings' vast experience in sourcing products is briefly outlined on the following pages. Sizes available and normal minimums are shown where available. Minimum quantities are based on the size of the product; in general, the larger the size, the lower the minimum. Some of the products will be in stock from time to time when we are stocking for other accounts. So even if your requirement does not meet our published minimums, give us a try; we will be happy to work with you. For additional information, please consult a FIT Bearings sales representative.

SOURCING			
Bearing	Available	Minimum Requirement	Display
