

MEET THE

FOCUS MiCROWAVES

GROUP

Since 1989 FOCUS Microwaves solutions helped designers of power and low-noise amplifiers to shorten their design cycles and allowed them to gain a competitive edge.

Since 2015 we tackle this task with a group of three excelling companies each in its own area of expertise.

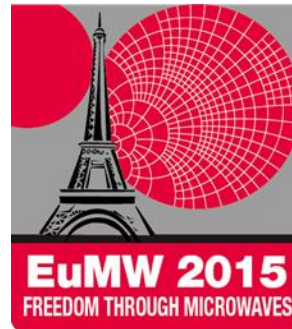

The GROUP of three market leaders ensures even greater level of innovation, development and support through the merging of their resources and vast combined experience.

FOCUS MiCROWAVES

- ✓ Passive and Active Load Pull systems
- ✓ Noise parameters characterization
- ✓ Impedance tuning 10MHz – 140GHz
- ✓ Test fixtures, Cal Kits

mesuro

leaders in RF device characterization solutions

- ✓ Non-linear model generation solutions
- ✓ High speed wide-band active tuning
- ✓ WaveForm Engineering solutions
- ✓ Measurement services

AURIGA PIV Tech.

- ✓ Pulsed IV/RF Characterization Systems
- ✓ High performance Bias-Tees
- ✓ Systems up to 1200V
