

We at the Fukiage Factory of Fuji Electric FA Components and Systems have been manufacturing a number of power distribution and FA components by using our excellent technology and reliability since 1943.

TECHNO WAVE FUKIAGE is a communication space to show new styles of power distribution and control equipment. You are welcome to visit the Fukiage Factory, the center of manufacturing, technology, and development, where you can come into contact with cutting-edge products and feel the new waves of the age.

Information

Opening times

10:00 ~ 16:00

TECHNO WAVE
FUKIAGE

A new wave starts here

We create cutting-edge technologies that contribute to the future.

TECHNO WAVE FUKIAGE is a communication space where you can see, touch and experience the business and history of Fuji Electric; new styles of power distribution and control equipment; and technology and manufacturing.

●F-Globe

The globe "F-Globe" reaching to a vaulted ceiling represents a complex of the businesses and technologies of Fuji Electric. Also, the zone introduces you to a wide variety of businesses provided by Fuji Electric in your daily life by showing the History of Fuji Electric on a large monitor in a fascinating manner. The current power usage of the Fukiage Factory is also shown by using a large signage system.

●Fuji Electric Archives

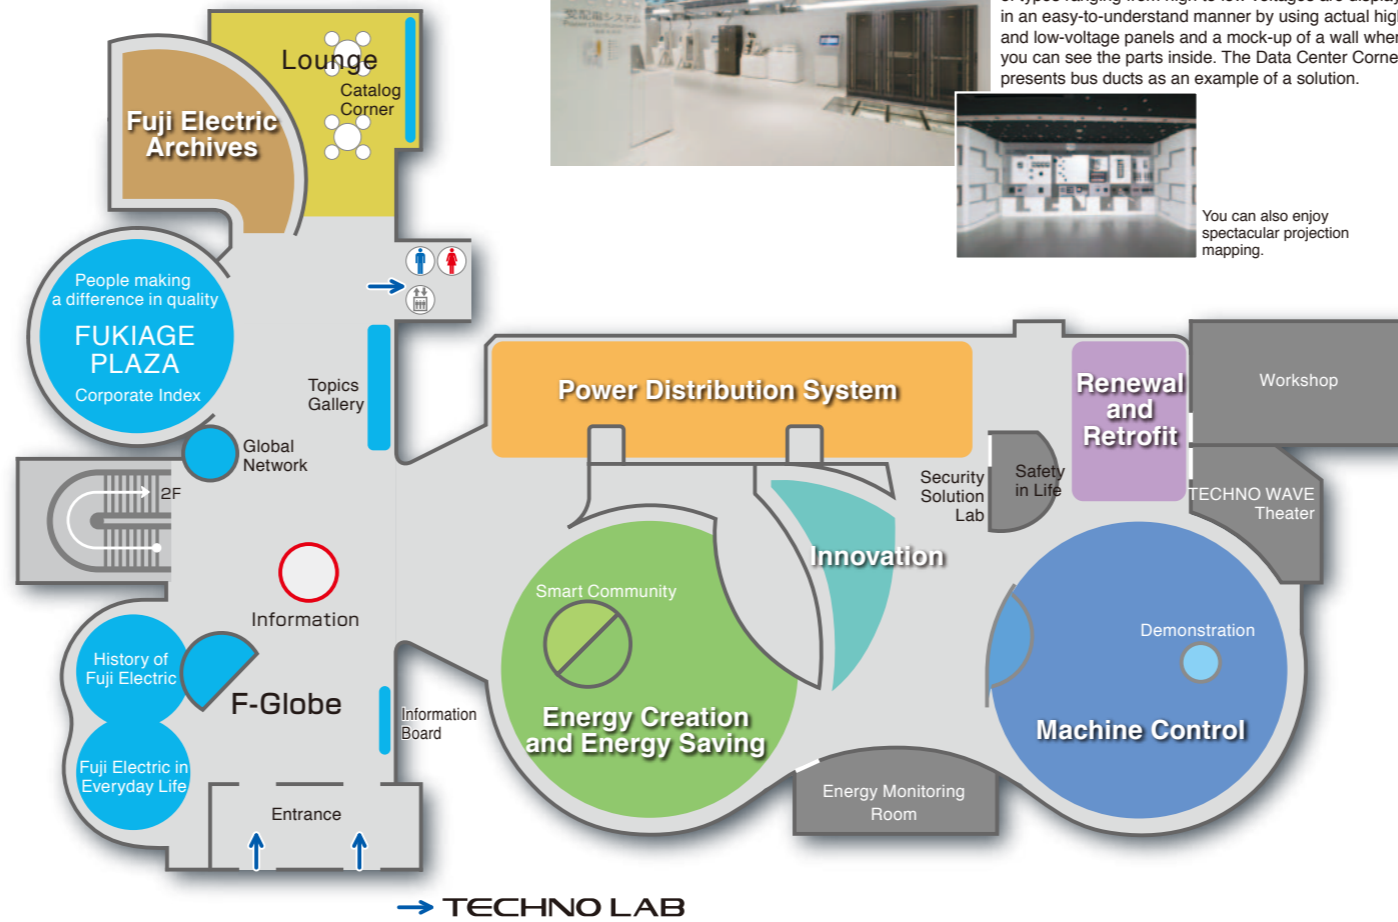

The history of Fuji Electric, the Fukiage Factory and power distribution and control equipment is presented together with old products.

●FUKIAGE PLAZA

It shows the manufacturing activities and the craftsmen who support manufacturing in the Fukiage Factory.

Welcome Zone
This zone introduces our company.

Products & Technology Zone
This zone introduces our products, solutions and technologies.

●Energy Creation and Energy Saving

Smart community is introduced by using the latest 3D projection mapping. Our approaches to renewable energy including energy-saving technologies and DC circuit breakers are also presented.

●Simulated Central Monitoring Room

A large monitor shows real-time data of Fuji Electric's 12 business locations in Kanto (the Tokyo area and six surrounding prefectures) through the power monitoring system to offer a simulated experience of power monitoring.

●Machine Control

Various component products that support machine control are displayed including magnetic contactors, operation switches and inverters. Operation procedures, operating principles and so forth can be checked by using various demonstration machines.

●Renewal and Retrofit

The video theater and exhibits show you our activities regarding core technology that supports product development and production. This corner also allows you to gain an insight into renewal technology.

●Innovation

New technologies and products that are one step ahead of the times are presented. In the Security Solution Lab, a dark room, and other places, you can experience a monitoring system using a security camera.

After a tour, have a relaxed time at FUKIAGE FORUM on the second floor.

The new TECHNO LAB offers a tour of the manufacturing process and evaluation test (reservation required).
