

Expect MORE

Introducing HelmView™ – with
MORE screen size,
MORE features and
MORE on-screen action

You want MORE?
HelmView fully integrates:

- ◆ Engine statistics
- ◆ Transmission
- ◆ NMEA2000 devices
...plus GPS!

FW Murphy's original PowerView set a new standard for translating engine health statistics and diagnostic codes into a simple-to-read display. Now the next generation – the HelmView – is here.

The HelmView's expanded graphical LCD screen features rich full-color graphics with all the room you need for more engine parameters, more detailed diagnostic messages – even instructions on how to correct engine faults.

HelmView is also plug-and-go compatible with all major gas and diesel engine manufacturers. You can install it into almost any vessel without worrying about compatibility.
