

Proximity Magnetic Sensors Cylindrical Housing FM Series

- Cylindrical and plastic, brass or nickel plated brass housing
- M10, M12, Ø 9.3 diameter
- NO, NC or CO output functions
- Front side switching

Product Description

The cylindrical proximity magnetic sensors of the FM series are available in different versions with plastic or brass housing, different dimensions and output contacts. The models can be

mounted directly on ferromagnetic supports as well; in this situation a reduction in the operating distance may occur due to a loss of magnetic field.
