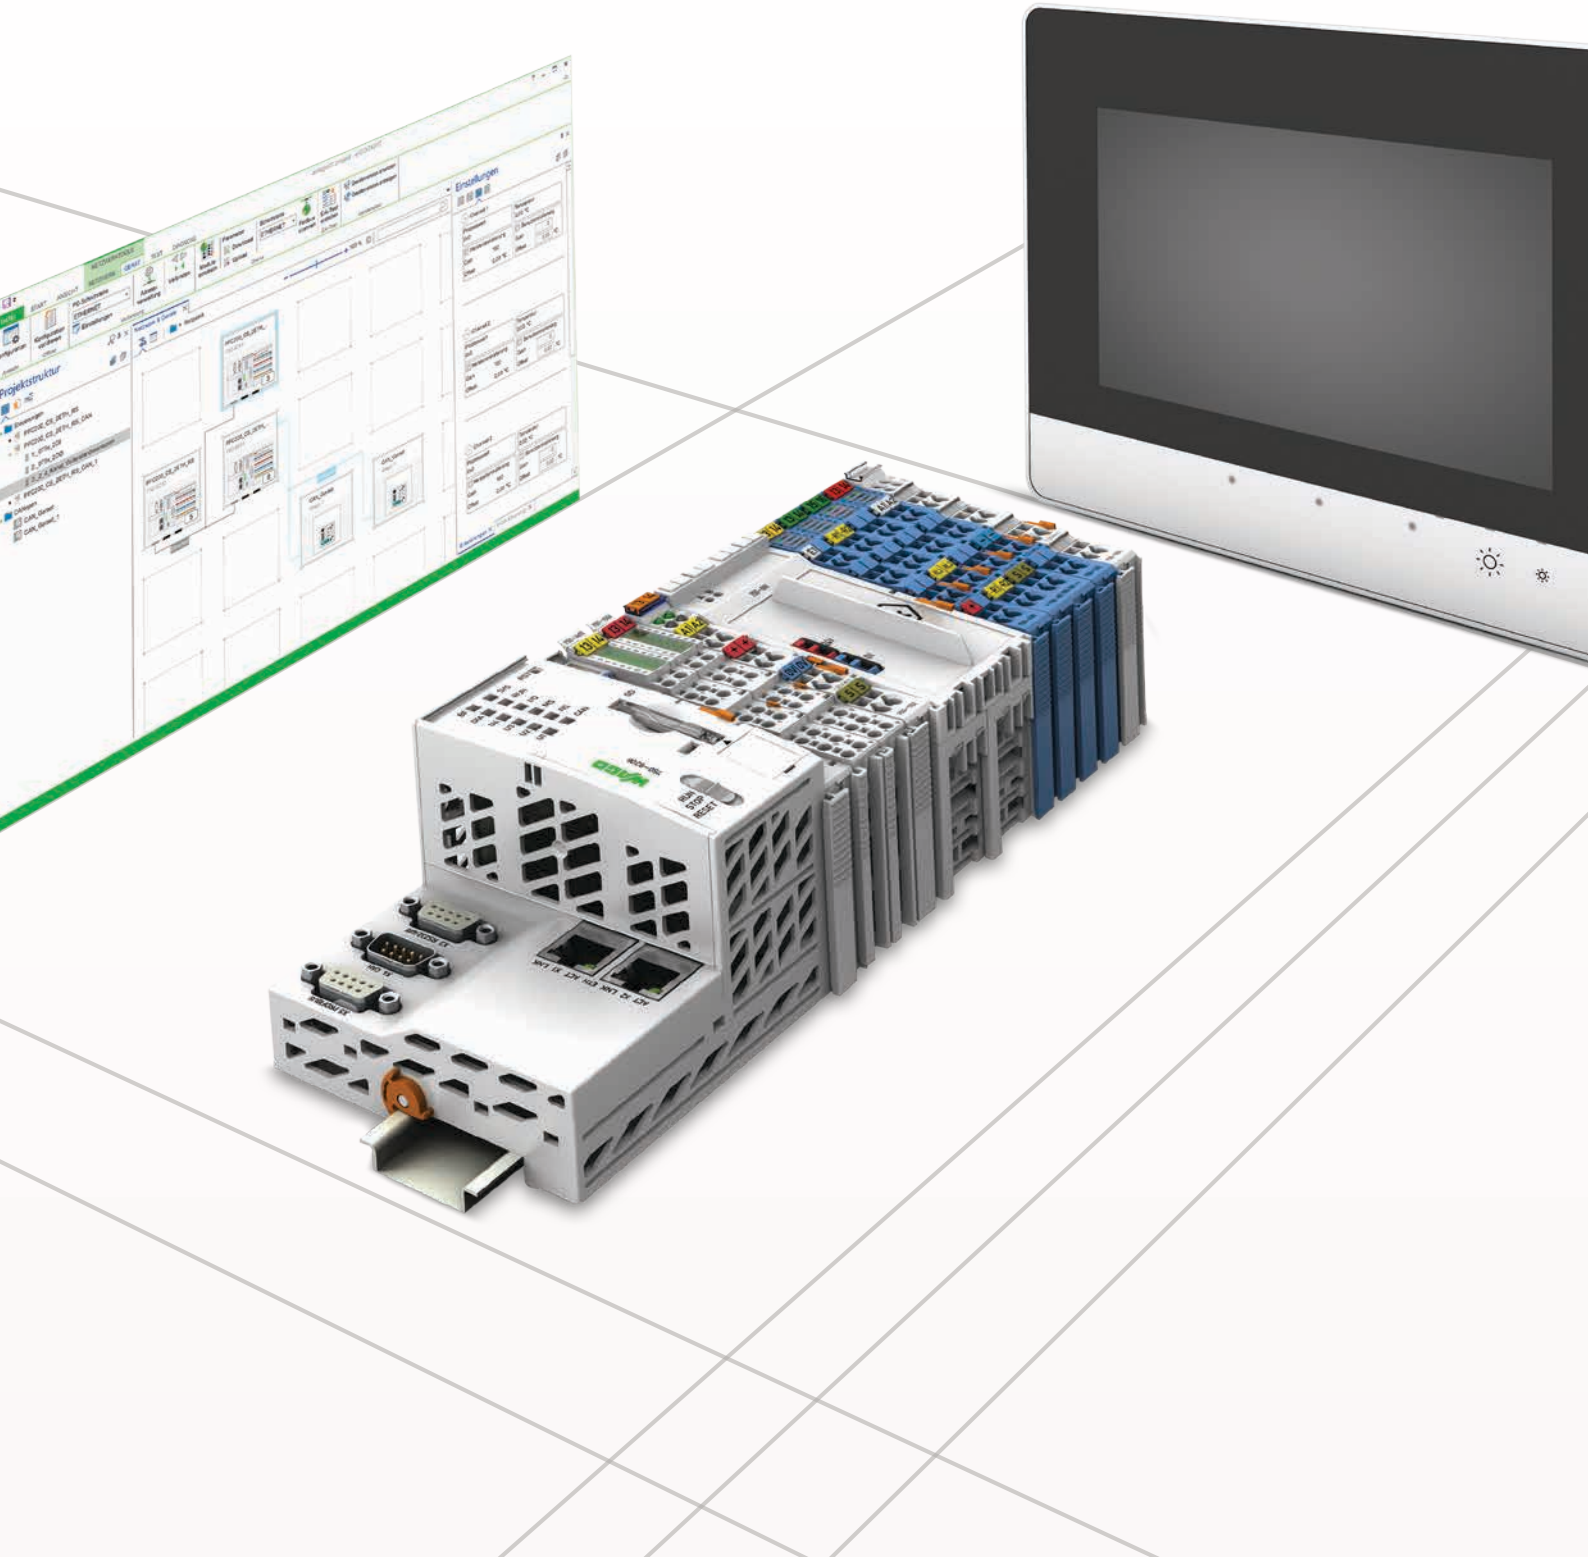
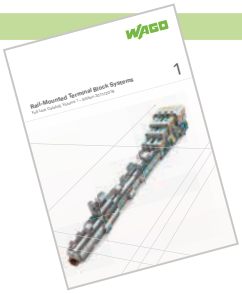
Automation Technology

Full Line Catalog, Volume 3 – Edition 2017/2018

3



WAGO Full Line Catalogs



Volume 1, Rail-Mounted Terminal Block Systems

- Rail-Mounted Terminal Blocks
- Rail-Mounted Terminal Blocks with Pluggable Connector (X-COM®-SYSTEM)
- Patchboard Systems
- Terminal Strips
- PUSH WIRE® Connectors for Junction Boxes
- Lighting Connectors
- Shield Connecting System

Volume 2, PCB Terminal Blocks and Connectors

- PCB Terminal Blocks
- SMD PCB Terminal Blocks
- *MULTI CONNECTION SYSTEM (MCS)*
- Pluggable PCB Terminal Blocks
- Feedthrough Terminal Blocks
- Specialty Connectors
- Empty Housings

Volume 3, Automation Technology

- Software
- Operating & Monitoring
- Controllers
- Modular I/O-SYSTEM, IP20/IP67
- Industrial Switches
- Radio Technology, *TO-PASS*® Telecontrol Technology
- IP67 Sensor/Actuator Boxes, IP67 Cables and Connectors

Volume 4, Interface Electronic

- Relay and Optocoupler Modules
- *JUMPFLEX*® Signal Conditioners and Isolation Amplifiers
- Current and Energy Measurement Technology
- *EPSITRON*® Power Supply System
- Interface Modules and System Wiring
- Overvoltage Protection
- Empty Housings

Volume 5, *WINSTA*® – The Pluggable Connection System

- Pluggable Connectors
- Snap-In Device Connectors
- Pluggable PCB Connectors
- Distribution Connectors
- Cable Assemblies
- Flat Cable Systems
- Distribution Boxes

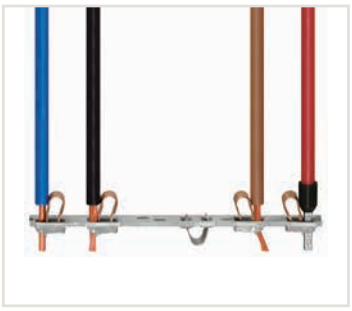
Volume 6, Marking

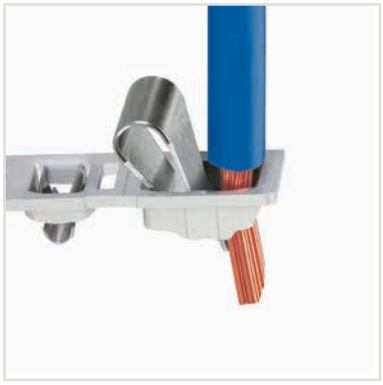
- Terminal Block Marking
- Cable and Conductor Marking
- Device Marking
- Printer
- Software
- Marker Carriers

Volume 3, Automation Technology

Operating WAGO Connection Technologies
Please follow the applicable product-specific termination instructions:

PUSH-IN CAGE CLAMP®





The universal connection with an additional advantage: Push-in connection
Terminate solid and stranded, as well as ferruled conductors, by simply pushing them in – no operating tool needed.

Termination for all conductor types:
- Open clamping unit
- Insert the conductor
- Release clamp – done!

Push-in CAGE CLAMP® terminates the following copper conductors:
solid

stranded

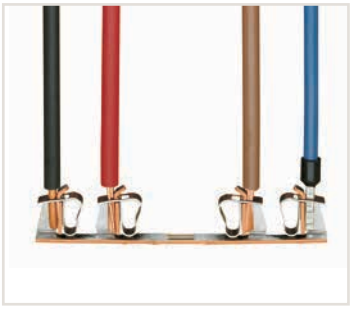
fine-stranded, also with tinned single strands

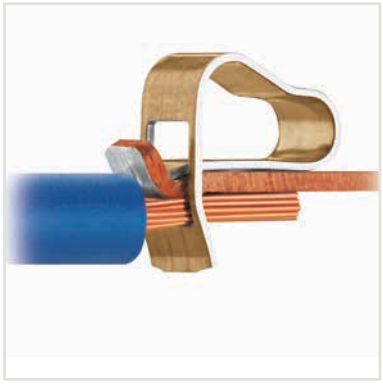
fine-stranded, tip-bonded

fine-stranded, with ferrule (gastight crimped)

fine-stranded, with pin terminal (gastight crimped)

CAGE CLAMP®





The universal connection for solid, stranded and fine-stranded conductors

Termination:
- Open clamping unit
- Insert the conductor
- Release clamp – done!

CAGE CLAMP® terminates the following copper conductors:
solid

stranded

fine-stranded, also with tinned single strands

fine-stranded, tip-bonded

fine-stranded, with ferrule (gastight crimped)

fine-stranded, with pin terminal (gastight crimped)

Operating WAGO Connection Technologies
Please follow the applicable product-specific termination instructions:

POWER CAGE CLAMP®

POWER CAGE CLAMP terminates the following copper conductors:
solid

stranded

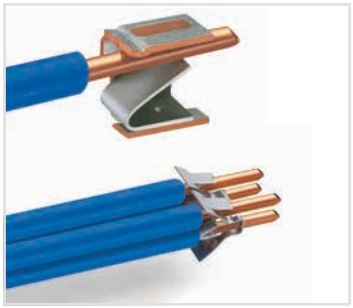
fine-stranded, also with tinned single strands

fine-stranded, with ferrule (gastight crimped)

The universal connection for conductors larger than 35 mm² (2 AWG)

Termination:
- Open clamp by turning an Allen wrench counter-clockwise
- Press the integrated latch to open clamping unit for hands-free wiring
- Insert the conductor
- A small counter-clockwise rotation closes the clamp, securing conductor

PUSH WIRE®



PUSH WIRE® terminates the following copper conductors:
solid

PUSH WIRE® connection for solid and stranded conductors (depending on the model used)

Termination:
Tool-free, twist-free terminations for solid and rigid stranded conductors – simply push into unit

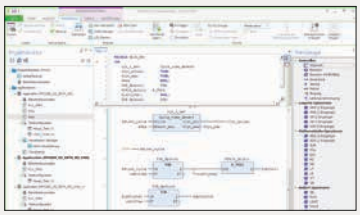
WAGO Automation Technology

Software

Engineering Software

- PC-based software
- Customized tools for every automation task

Runtime Software



- Standard machine component
- Comprehensive, fully tested software modules for controlling, regulating, operating & monitoring

Mobile Software (Apps)

- Machine operation and monitoring on tablet and smartphone

Operation & Monitoring

PERSPECTO® Control Panels

- Merging of control and visualization
- 8.9–38.1 cm (3.5–15")

2

e!DISPLAY 7300T – Web Panels

- High-performance HMI display for Web-based visualization
- 10.9–25.7 cm (4.3–10.1")
- Visualization from CODESYS 2 and *e!COCKPIT* (based on CODESYS 3)

Controllers

PFC100/PFC200 Controllers

3.1

- Maximum performance in a minimum space
- Also programmable in high-level languages based on Linux®
- Security packages with SSH and SSL/TLS
- Runtime system for CODESYS 2 (only PFC200) and 3

PFC200 XTR Controllers

3.2

The advantages of the PFC Controller combined with the characteristics for extreme environments:
- High processing speed
- Multiple interfaces
- eXTRemely robust and maintenance-free

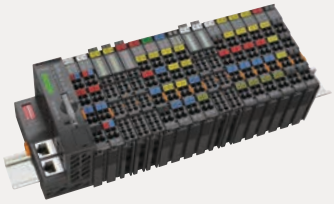
I/O-Systems

I/O-System – 750 and 753 Series

4

- Highly versatile
- More than 500 modules available
- Functional safety
- Ex i

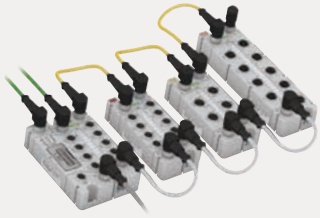
I/O-System – 750 XTR Series



5

For demanding applications where the following are critical:
- Extreme temperature stability
- Immunity to interference and impulse-voltage withstand
- Vibration and shock resistance

I/O-System – *SPEEDWAY*



6

- Uncompromising protection, even in the harshest environments outside the control cabinet
- Degree of protection: IP67
- Fully encapsulated

Infrastructure

Industrial Switches

7

- Copper cables
- Fiber optic cables
- Ring redundancy

Radio Technology

8

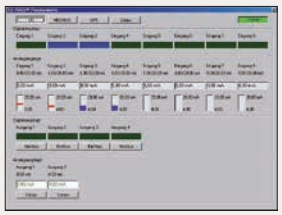
- *Bluetooth*®
- WLAN
- EnOcean®

TO-PASS® Telecontrol Technology

9

For applications that go beyond site boundaries
- Telecontrol technology based on GSM/GPRS

Software Solutions (Applications)



- Reusable, customizable solutions

1

1 – Software

2

2 – Operating & Monitoring

750 Controllers

3.3

- Controllers for all prominent fieldbus systems
- Programmable to IEC 61131-3
- Ideally combination with the WAGO 750 I/O-SYSTEM modules

750 XTR Controllers

3.4

For demanding applications in which the following are critical:
- Extreme temperature stability
- Immunity to electromagnetic interference and impulse voltages
- Vibration and shock resistance

3

3 – Controllers

I/O-Systems

Sensor/Actuator Boxes

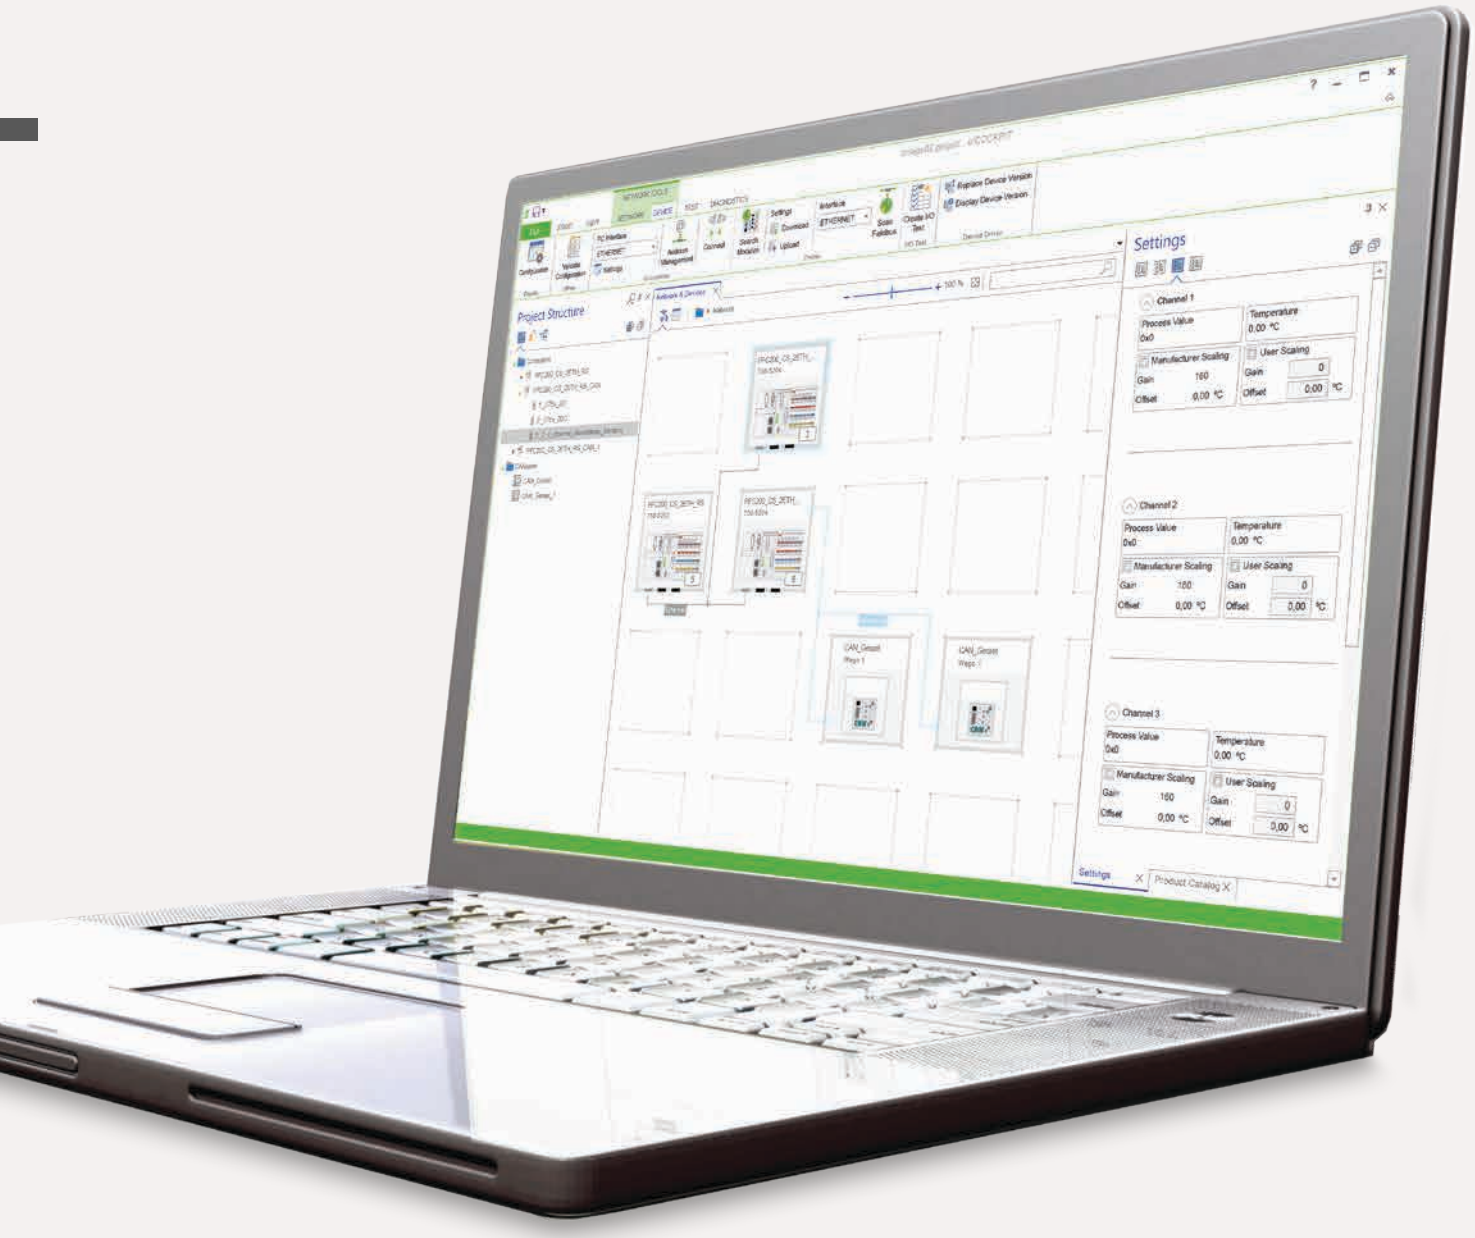
10

- M8 and M12 sensor/actuator boxes
- Machine-mounted passive signal recording and output
- Fully encapsulated

Accessories Tools

11

Infrastructure



Software

Engineering Software

- PC-based software
- Customized tools for every automation task

Runtime Software

- Standard machine component
- Comprehensive, tested software modules for control, regulation, operation & monitoring

Software Factors into Success

Projects in production, process and building automation are characterized by increasingly short implementation times, ever more complex structures and the increasing role of software as part of the overall solution. In fact, software is becoming an essential factor that influences the success of a project.

Engineering software is used for both machine and system development, as well as the implementation of building automation projects. Runtime software controls the devices at operating time.

Customized Software Tools

Significant challenges must be overcome to develop, operate and maintain modern machines and systems, as well as program, configure and commission applications for building automation. Customized software tools are available as needed for every task — embedded in integrated engineering or as a stand-alone tool for a set of dedicated functions.

CODESYS as an Integrated Environment

All WAGO controllers are equipped with the high-performing CODESYS industry standard. This allows software development in IEC 61131-3 PLC programming languages (ST, FBD, LD, IL, SFC and CFC). As a trusted programming environment, CODESYS guides developers, allowing them to reuse and further develop existing projects without relearning software. This means that modern paradigms, such as Object-Oriented Programming (OOP), or modern visualization technologies are available.

Pre-made Software Solutions

Pre-made software solutions or applications simplify automation. Such solutions involve reusable software that can be used for the specific application by making simple adjustments. This approach saves time and money.

Open to Proven Standards

The software is open to well-established standards, making it an investment in the future. The software supports all prominent fieldbuses, for example. Thus, WAGO components can be seamlessly integrated into engineering software via standardized device description files. In addition, connecting controllers to fieldbus systems via WAGO engineering software is an easy task — opening up all the advantages of existing field devices.
Ultimately, WAGO software is based on modern IT standards and development methods — guaranteeing long-term viability.

Extensive Import and Export Functionality

The software tools are impressive with their ability to exchange project data with external software tools involved in the development process, which prevents costly, error-prone double entry.

Industry-Specific Configurators

Whether industry, process or building automation, every sector and industry has specific requirements. Therefore, plug-ins specifically customized for the needs of individual industries are available in addition to the common software base. These plug-ins can be used, for example, to measure energy or easily configure a DALI network.

Advantages:

- Customized software for every automation task
- Extensive import functions from external design tools
- Plug-ins for industry-specific development environments
- Comprehensive software solutions for various industries
- Simple and secure licensing

Software
General Product Information

Software for Mechanical Engineering

Software is used in every phase of machine and system automation — from design to successful machine operation.

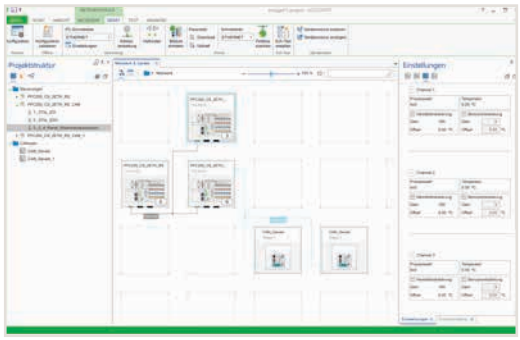
Design	Software Development	Commissioning	Machine Operation
• CAD and ECAD • Component selection	• Configuration • Parameterization • Programming • Simulation • Visualization	• Testing • Diagnostics	• Updating • (Remote) maintenance • Monitoring • Controlling, regulating, operating and monitoring

Engineering Software

Quickly implementing complex machine functions is critical in modern mechanical engineering applications. PC-based engineering software supports all development activities. The focus is on simple configuration, timely programming and efficient commissioning of automation network components.

Engineering tools are typically not permanently linked to the machine — they only communicate with the machine during startup and maintenance.

Design | Software Development | Commissioning | Machine Operation

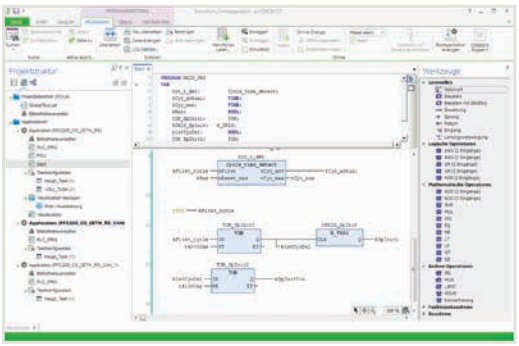


Runtime Software

The machine is controlled by runtime software that determines behavior, while enabling both operation and current status monitoring for the user. It also transmits operating data to higher-level systems. With comprehensive, tried-and-tested software function blocks (IEC libraries), development goals are reached more quickly.

Unlike engineering software, runtime software operates continuously — it is a part of the machine and ensures correct operation.

Design | Software Development | Commissioning | Machine Operation



Mobile Software (Apps)

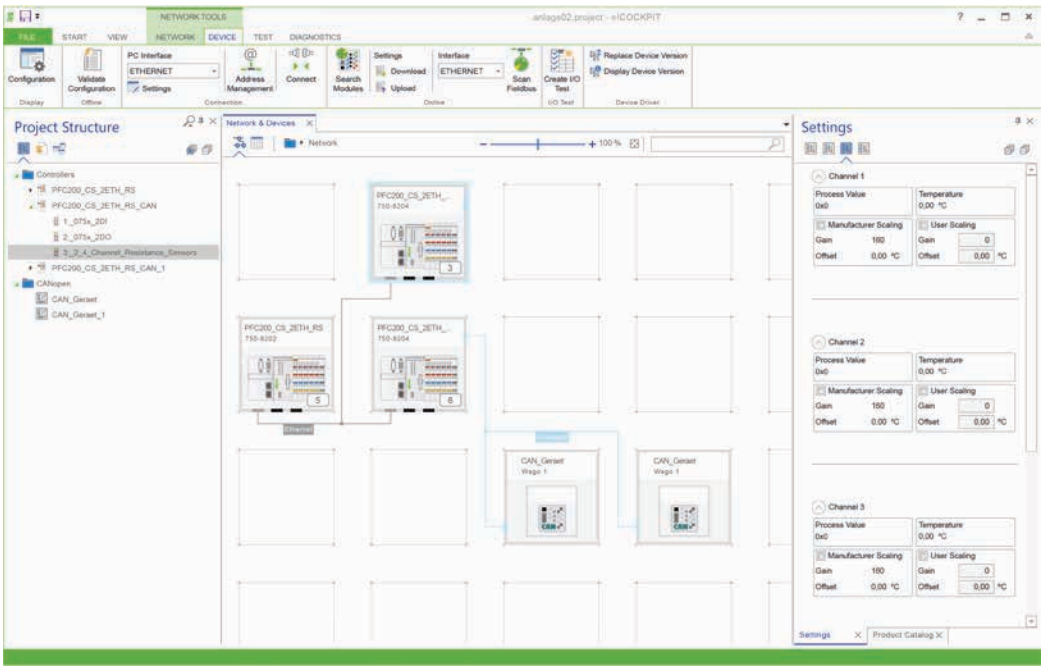
Software on mobile devices can also be productive in the industrial environment. The software allows users, for example, to quickly and easily operate and monitor automation processes from a smartphone or tablet — from anywhere.

Mobile software typically communicates only with the machine's controller for a specific application.

Design | Software Development | Commissioning | Machine Operation

1

e!COCKPIT
Engieneering Software, based on CODESYS 3



Preparing machines and systems for faster startup: *e!COCKPIT* the new engineering software shortens development time for automation projects while impressing with a modern and clearly laid out user interface. At the software's core is CODESYS 3, which provides the simple and versatile creation of applications.

Ensuring a project's long-term viability through sustainable cost savings hinges on a user's ability to quickly adapt to new software that offers a high degree of reusability. This sharpens your competitive edge by reducing your time to market.

WAGO set out to fulfill these exact requirements by developing its own engineering software: *e!COCKPIT*. This integrated development environment supports every automation task from hardware configuration, programming, simulation and visualization up to commissioning — all in one software package.

Use the programming tool to cover all important automation bases while simultaneously engineering particularly complex projects quickly and easily.

e!COCKPIT		
License type	Number PCs	Item No.
Workstation license	2	2759-0101/1110-2002
Multi-user license	5	2759-0101/1110-2005
Multi-user license	10	2759-0101/1110-2010
Multi-user license	15	2759-0101/1110-2015
Multi-user license	20	2759-0101/1110-2020
Site license	unlimited	2759-0101/1110-3000
Buy-out license	unlimited	2759-0101/1110-4000

Workstation license:
Can be installed on up to two PCs (e.g., notebook & desktop)

Multi-user license:
Can be installed up to the number specified

Site license:
Allows the installation of an unlimited number of licenses at one location

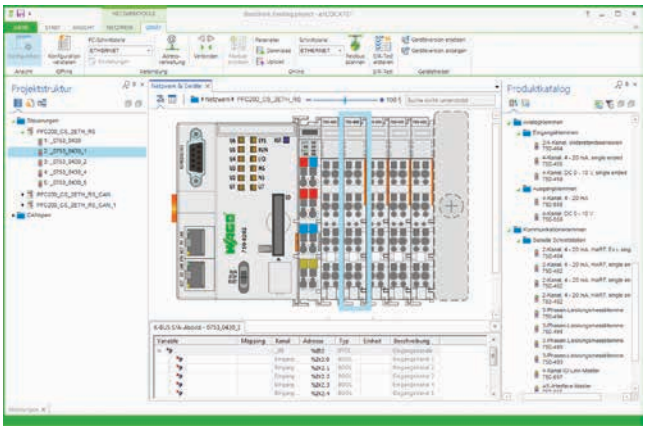
Buy-out license:
Allows the installation of an unlimited number of licenses in one company at all company sites in that country. In addition the software may be used in all products produces by the company that contain WAGO automation technology and therefore form a functional unit.

Supported operating systems	Windows 7 (32- and 64-bit), Windows 8, Windows 8.1 (32- and 64-bit)
System requirements	
Processor	Core2Duo
Memory	2 GB
Hard disk storage	1024 MB (min.)
Graphics resolution	1,366 x 768 px
Supported devices	Controllers based on CODESYS 3,; I/O modules (750/753)
Supported fieldbuses	CANopen, MODBUS TCP/UDP, MODBUS RTU, PROFIBUS
Supported device descriptions	DTP, EDS, GSD
Connectivity	TCP, USB, OPC, CODESYS network variables, CODESYS DataServer
Programming languages acc. to IEC 61131-3	ST, KOP, FBS, AWL, AS, CFC
Import/export formats	CODESYS 3 project files (*.project)
Delivery type	Installation file (download)
Data sheet and further information, see:	wago.com/ecockpit

Internet connection may be required for license activation.

Windows® is a registered trademark of Microsoft Corporation.

USB communication cable
see Page 30



Configuration and Parameterization

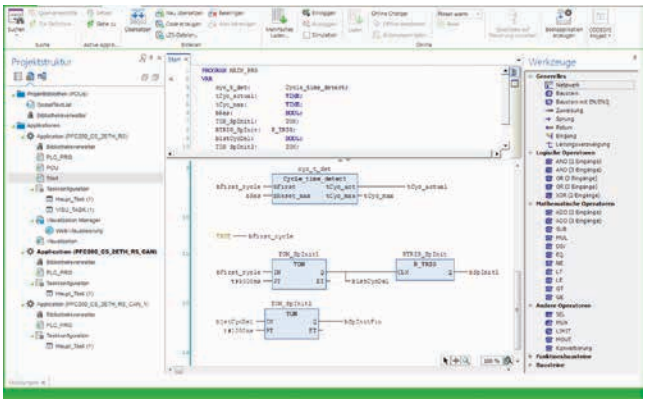
The integrated *e!COCKPIT* configurators provide modern operating tools and workspaces, such as:

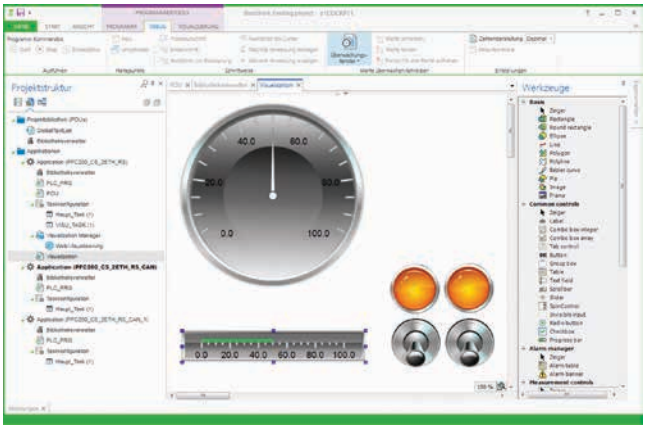
- Graphical network topology: Complex dependencies between network participants and their current states are easily and intuitively accessed.
- Drag & Drop: Simplifies interaction with devices.
- Copy & Paste: Individual devices or whole network branches can be duplicated quickly.
- Batch processing: Parameter values are set simultaneously for several devices.

Programming

e!COCKPIT offers multiple software development options:

- IEC 61131-3 PLC programming languages: Structured Text (ST), Ladder Diagram (LD), Function Block Diagram (FBD), Instruction List (IL), Sequential Function Chart (SFC), Continuous Function Chart (CFC).
- For flexibility, all programming languages can be combined with one another.
- Created programs can be easily debugged on the engineering PC via simulation.
- New paradigms such as object-oriented programming are included.





Visualization

Advanced user interfaces for operating and monitoring machines are standard. Today, HMI-based design is a critical factor that influences the purchase of an entire automation line. e!COCKPIT employs Drag & Drop to streamline the design of modern user interfaces. The integrated visualization editor provides:

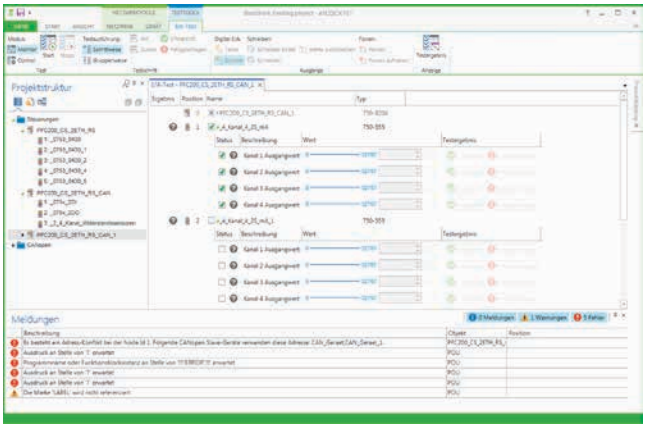
- Access to IEC program variables.
- Closed simulation of HMI and PLC program on the engineering PC.
- Guaranteed language independence via Unicode character set.
- Current standards such as HTML 5 or CSS.

Diagnostics

Being acutely aware of the automation network's current status is an absolute must for the rapid detection and elimination of errors — be it during development in the office or directly on the machine during commissioning.

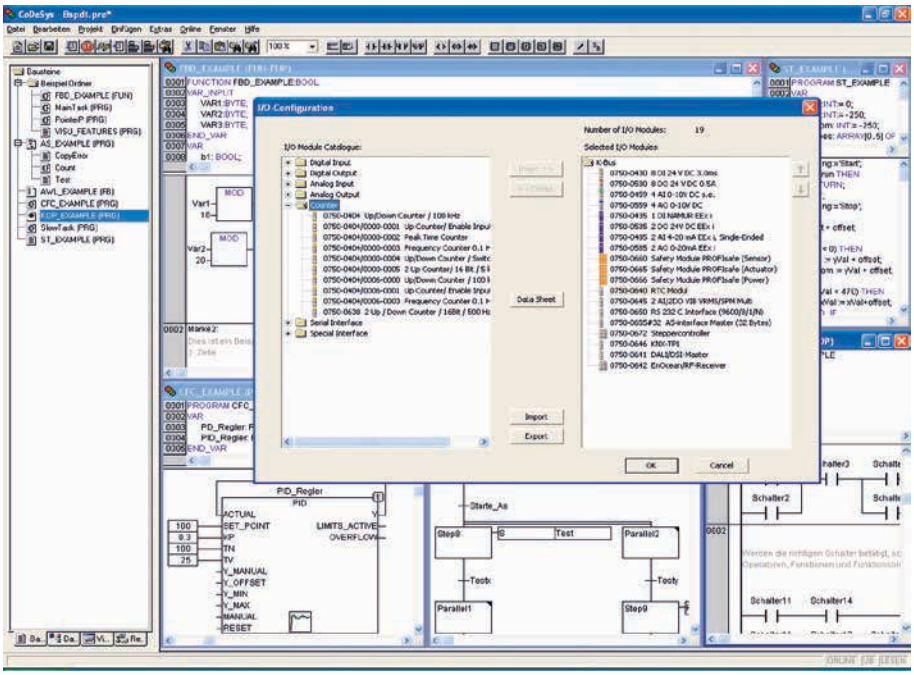
e!COCKPIT provides comprehensive diagnostic capabilities:

- Individual views always display the controllers' status information, for example, both graphically and in tabular form.
- To keep project on time, error messages are transmitted directly and clearly.
- The structured wiring test function systematically identifies wiring errors.



1

WAGO-I/O-*PRO*
Engieneering Software, based on CODESYS 2



WAGO-I/O-*PRO* is a programming and visualization tool for control programs. This software is used to develop PLC applications for WAGO-I/O-SYSTEM 750 Programmable Fieldbus Controllers.

WAGO-I/O-*PRO* runs in line with the IEC 61131-3 standard. This standard describes the requirements of a programming system. The IL, SFC, LD, FBD and ST programming languages are supported. The optimal programming language can be chosen for each application.

With extensive programming functions, the software readily meets the increasing requirements of control program development (e.g., reusability and modularization).

- Highly efficient translation between programming languages
- Automatic declaration of variables
- Library management

Integrated test and diagnostic functions also streamline and accelerate the implementation of processes for PLC projects.
- Online status indication in program code
- Offline simulation
- Integrated process visualization
- Recording and graphical presentation of project variables

WAGO-I/O-*PRO* also offers the option of programming products from other manufacturers within the CODESYS automation alliance in addition to the standard programmable CODESYS automation alliance products from WAGO.

WAGO-I/O-*PRO*		
Version	Delivery type	Item No.
RS-232 Set	CD-ROM and serial Communication Cable	759-333
USB Set	CD-ROM and USB Communication Cable	759-333/000-923
CD	CD-ROM	759-911

Supported operating systems	Windows XP (SP3 or later), Windows 7
System requirements	
Processor	1-GHz or higher, with 32-bit (x86) or 64-bit (x64)
Memory	min. 1 GB RAM
Hard disk storage	min. 300 MB
Graphics resolution	min. 1024 x 786
Other system requirements	Open serial interface; CD-ROM and Mouse required
Delivery type	Installation file (download)

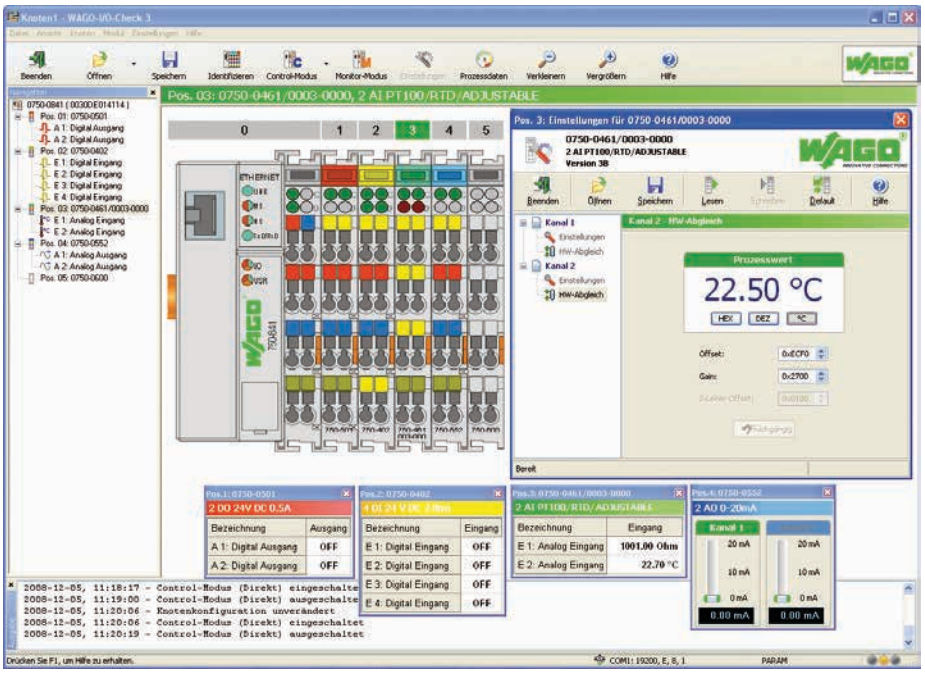
Serial/USB Communication Cable
see Page 30

WAGO-I/O-*CHECK*



WAGO-I/O-CHECK is an easy-to-use Windows application for operating and displaying a WAGO-I/O-SYSTEM 750 node without connecting the node to a fieldbus system.
The software reads the configuration from the node and displays it as an on-screen graphic. The graphic can be printed together with a configuration list as documentation.

With WAGO-I/O-CHECK, it is possible to display and determine the process data of the bus modules. The field wiring, including all sensors and actuators, can thus be checked before startup.

Application-specific settings, such as the baud rate or sensor types, can be made with select interface, Pt100 and thermocouple modules.

For communicating between WAGO-I/O-CHECK and the node, the coupler must be connected at a PC's vacant serial or USB port using the communication cable supplied in the kit with the system.

WAGO-I/O-*CHECK*

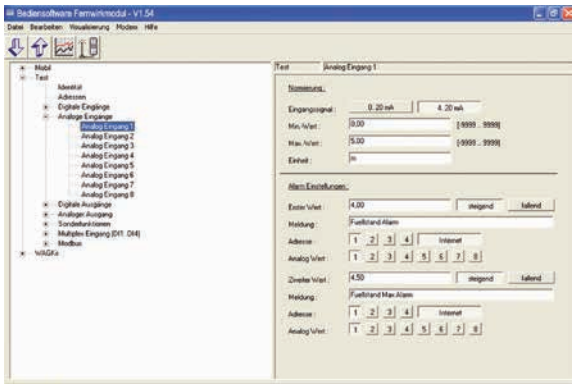
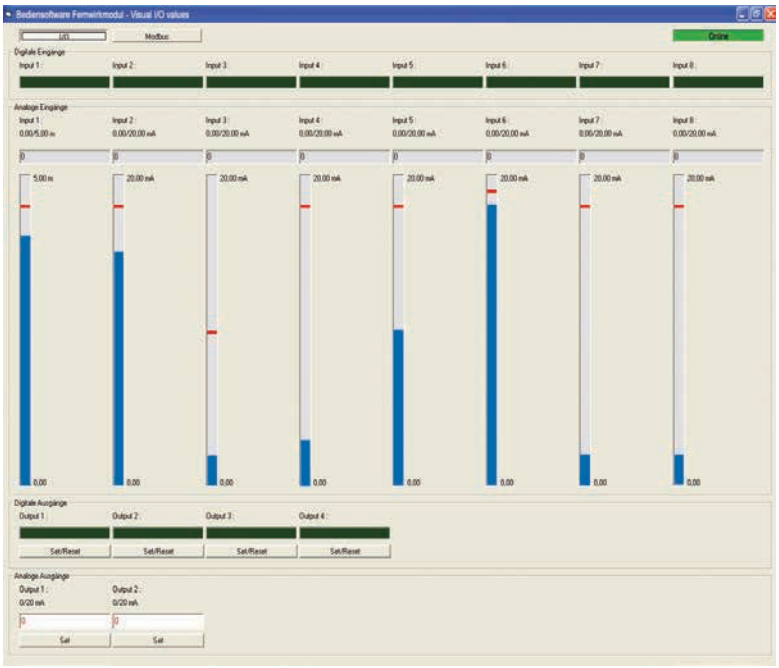
RS-232 Set	CD-ROM and serial Communication Cable	759-302
USB Set	CD-ROM and USB Communication Cable	759-302/000-923
CD	CD-ROM	759-920

Supported operating systems	Windows XP (SP3 or later), Windows 7
System requirements	
Processor	1-GHz or higher, with 32-bit (x86) or 64-bit (x64)
Memory	min. 1 GB RAM
Hard disk storage	min. 150 MB
Graphics resolution	min. 1024 x 786
Other system requirements	CD-ROM and Mouse required
Delivery type	Installation file (download)
Data sheet and further information, see:	wago.com/759-302

Windows® is a registered trademark of Microsoft Corporation.

TO-PASS® Configurator





Software for configuring *TO-PASS*® Telecontrol Modules.

Compatible with Windows XP and Windows 7.
Communication with modules via RS-232 port, USB port (via USB adapter, included in accessories) or external GSM modem.

- Easy module parameterization without programming experience
- Display current process values
- Line diagram for both data and event loggers
- Test module's GSM signal strength
- Documentation and archival of configuration data
- "Fast Copy" function for the multiplication of configuration data
- German and English language interfaces

TO-PASS® Configurator		
Version	Delivery type	Item No.
CD	CD-ROM	759-930

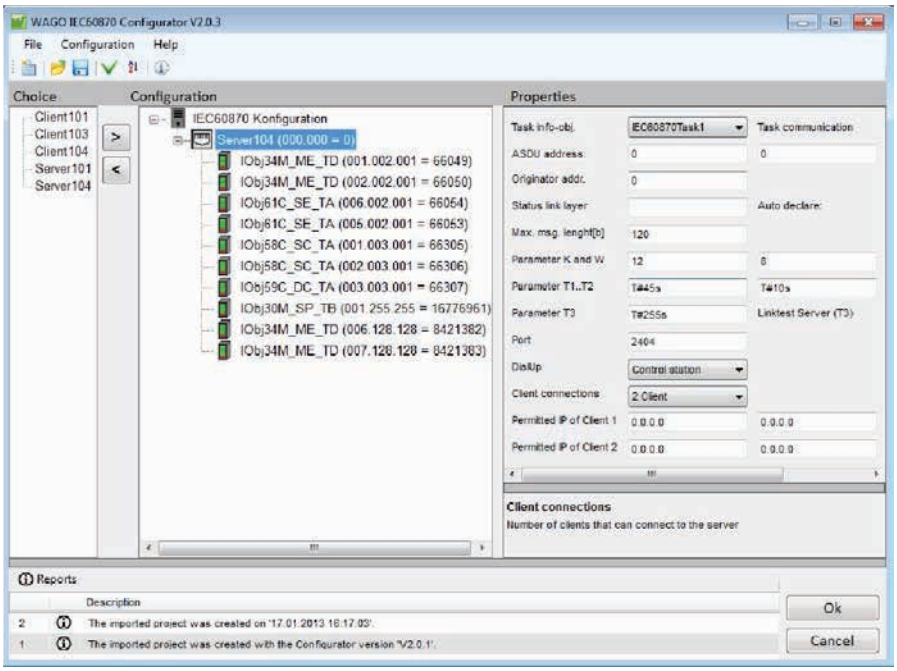
Supported operating systems	Windows XP Professional, Windows 7
System requirements	
Processor	Pentium mind. 500 MHz or faster
Memory	min. 512 MB (Windows XP); min. 1 GB (Windows 7)
Hard disk storage	min. 5 MB
Graphics resolution	min. 1024 x 768
Other system requirements	Open serial or USB interface; Configuration cable, CD-ROM and Mouse required
Delivery type	Installation file (download)
Data sheet and further information, see:	wago.com/759-930

Windows® is a registered trademark of Microsoft Corporation.

USB Adapter
see Page 30

IEC 60870 Configurator

Configuration dialog integrated in WAGO-I/O-PRO v2.3 for IEC 60870-5-101/103/104 communication parameterization



IEC 60870 configuration dialog

The IEC 60870 Configurator is part of the WAGO-I/O-PRO v2.3 software. The configurator fully supports the IEC 60870-5-101/103/104 specific functions of all WAGO telecontrollers.

The configurator sets up IEC 60870 objects, while configuring data exchange to the PLC application or I/O modules. Import and export functions in CSV format allow configured data to be transmitted to other engineering tools.

The IEC 60870-5-101 and 104 protocols are supported on both client and server sides, while the IEC 60870-5-103 protocol is exclusively supported on the client side. This permits the creation of gateways that convert one protocol into another, e.g., allowing protection devices to be read out via IEC 60870-5-103 and data to be transmitted to the network control system via IEC 60870-5-104.

Various options are available for the time synchronization of telecontrol substations (server). Time synchronization can be performed either via the IEC 60870 protocol with object 103 or via (S)NTP. Using the WAGO 750-640 Module, clock time can also be synchronized via DCF77 or GPS.

IEC-60870-5-101/104 information objects can be used to monitor the direction of single, double and step messages. Bit patterns, counter values, as well as normalized, scaled and floating-point measurement values can also be used. All information objects can be transmitted with or without a time stamp. This also applies to information objects in control direction.

An IEC 60870-5-104 server can simultaneously maintain up to four connections to the control system (client).

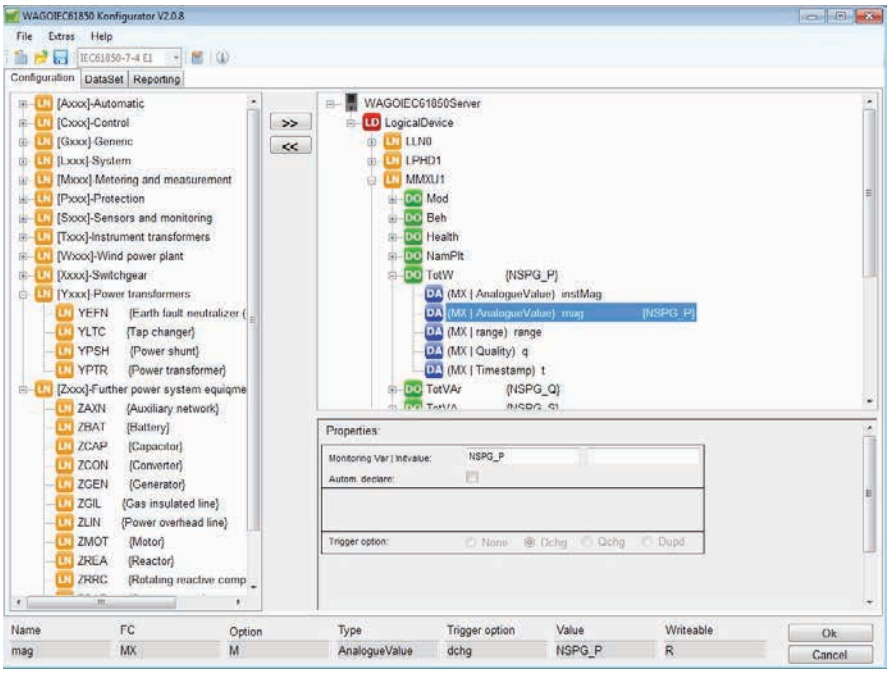
IEC 60870 Configurator
Integrated in WAGO-I/O-*PRO* v2.3

System requirements	WAGO-I/O-*PRO* Version 2.3.9.40 or higher
Function	IEC 60870-5-101 Server and Client IEC 60870-5-103 Client IEC 60870-5-104 Server and Client
Supported controllers	
PFC200 Controller	750-8202/025-001 750-8206/025-001
PFC200 XTR Controller	750-8202/040-001 750-8206/040-001
750 Controller	750-872 750-880/025-001 750-880/025-002
750 XTR Controller	750-880/040-001

Software WAGO-I/O-*PRO* V2.3
see Page 12

IEC 61850 Configurator

Configuration dialog integrated in WAGO-I/O-PRO v2.3 for IEC 61850 communication parameterization



IEC 61850 configuration dialog

The IEC 61850 Configurator is part of the WAGO-I/O-PRO v2.3 software. The configurator fully supports the IEC 61850-specific functions of the WAGO tele-controllers.

The configurator sets up IEC 61850 objects, while configuring data exchange to the PLC application or I/O modules. Import and export functions in IEC 61850 SCL exchange format allow configured data to be transmitted to other engineering tools.

On the server side, the IEC 61850 Protocol is supported for MMS* communication to the control system. The controllers can also be operated as a GOOSE publisher or subscriber. This permits the creation of gateways that convert one protocol into another, e.g., allowing data from protection devices to be received via IEC 61850 Client and transmitted to the network control system via IEC 60870-5-104 Protocol.

Time synchronization is performed via SNTP, NTP, DCF77 and GPS (750-640 Module is also required for GPS).
Various options are available for the time synchronization of telecontrol substations (server). Synchronization can be performed via (S)NTP or clock time can be synchronized via DCF77 or GPS using the WAGO 750-640 Module.

The IEC 61850 MMS server can simultaneously maintain up to five connections to the control system (client).

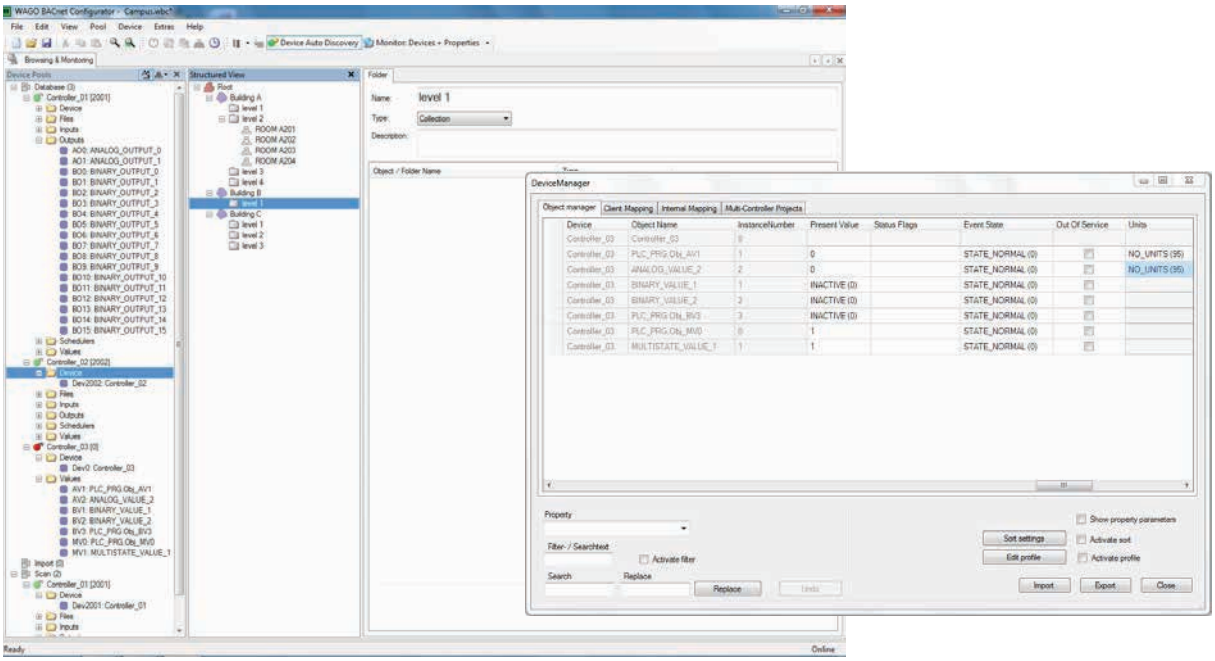
The IEC 61850 Client processes data from up to 10 servers with each 32 requests.

*MMS = Manufacturing Messaging Specification

IEC 61850 Configurator
Integrated in WAGO-I/O-*PRO* v2.3

System requirements	WAGO-I/O-*PRO* Version 2.3.9.47 or higher
Function	IEC 61850 Server and Client
Object types	IEC 61850-7-4 and IEC 61400-25
Data sets	static and dynamic
Reporting	buffered and unbuffered
Supported controllers IEC 61850 Server	
750 Controller	750-872
Supported controllers IEC 61850 Server and Client	
PFC200 Controller	750-8202/025-001 750-8202/025-002 750-8206/025-001 750-8207/025-001
PFC200 XTR Controller	750-8202/040-001 750-8206/040-001
750 Controller	750-880/025-001 750-880/025-002
750 XTR Controller	750-880/040-001

WAGO BACnet Configurator



WAGO's BACnet Configurator is an independent commissioning, configuration and management software.
The configurator fully supports the BACnet-specific functions of WAGO's 750-829, 750-830 and 750-831 BACnet Controllers.

The configurator creates and configures WAGO BACnet Controllers and sets up data exchange between the IEC application and BACnet objects. Import and export functions allow further processing of the configuration data.

For integration into existing BACnet networks, the BACnet devices available can be scanned, displayed in a browser and data exchange can be implemented for WAGO devices.

Among the configurator's capabilities are the logical structuring of the project and network, addressing of the controller and client/server configuration in every WAGO BACnet Controller.

The devices, objects and configuration data are displayed in a logical, structured network and browser view.
Depending on the function used, both online and offline operation is possible.

The configurator displays all configuration data. To edit BACnet objects, the configurator offers specific table views in which the corresponding properties of the object can be modified. Typical table editing functions, e.g., search/replace, sort, filter and show/hide, are available. The user can upload the updated configuration data to one or more controllers and save as a project.

The configurator provides a browser to view the BACnet object properties and modify current parameters (communicate value changes, write property values, utilize BACnet services, etc.).
Additionally, a Transaction Log window is available for client services.

WAGO BACnet Configurator
The WAGO BACnet Configurator can be downloaded for free at: www.wago.com

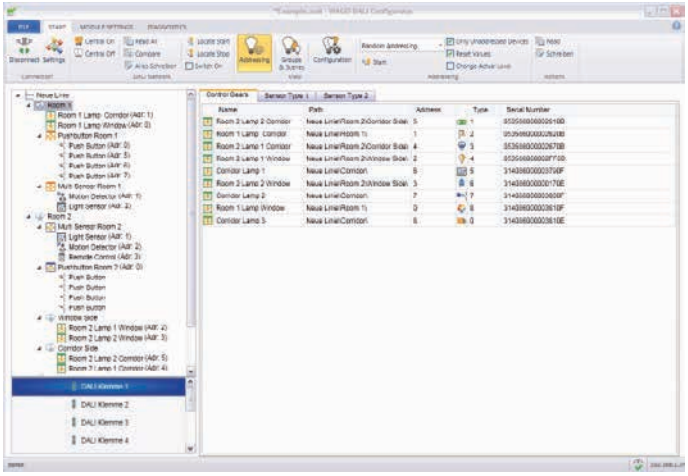
Supported operating systems	Windows XP (SP3 or later), Windows 7

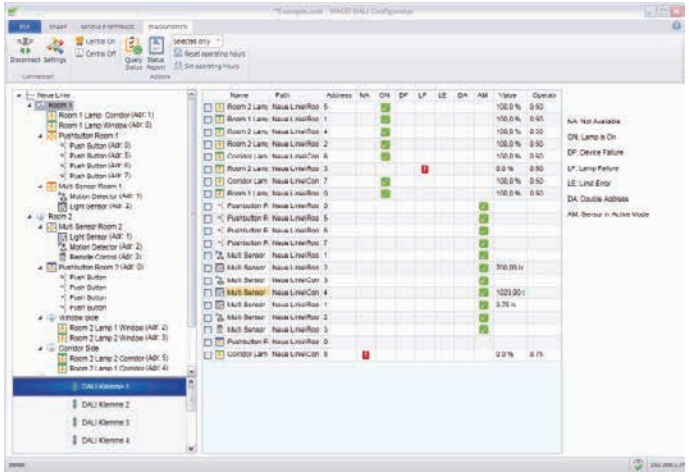
Windows® is a registered trademark of Microsoft Corporation.

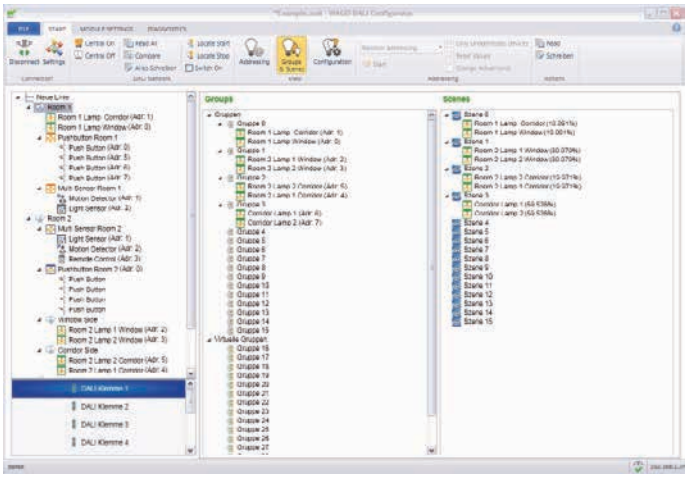
Software WAGO-I/O-*CHECK*
see Page 13

Software WAGO-I/O-*PRO* V2.3
see Page 12

DALI Configurator







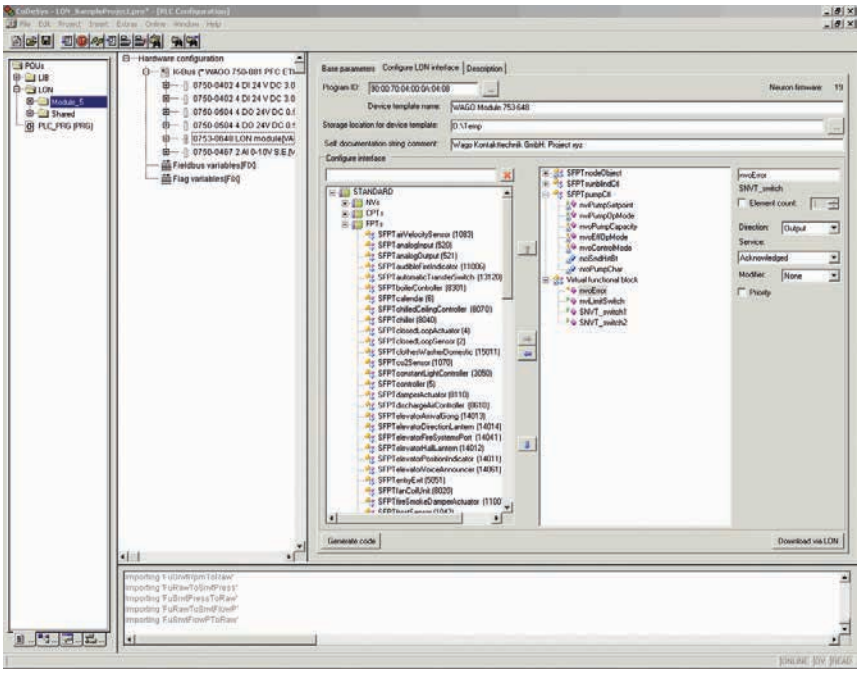
The DALI Configurator simplifies commissioning of a DALI network via 753-647 DALI Multi-Master Module. The configurator is available as a stand-alone Windows application or for use with WAGO-I/O-CHECK software.

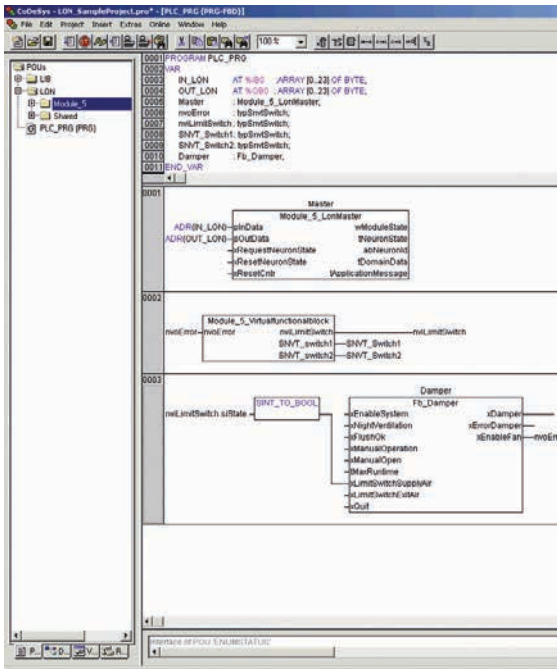
It provides the following functions: easy commissioning, configuration, service, support and maintenance of a DALI network. Comprehensive backup & restore features, as well as an offline configuration option for the entire DALI network (including ECGs and sensors) are available.

DALI Configurator
The DALI Configurator is available as part of WAGO-I/O-CHECK (Version 3.5.1 or higher) or as a stand-alone application (www.wago.com).

Features	Stand-alone software or for use with WAGO-I/O-*CHECK*
Commissioning function	Addressing, Scene and group formation, Control gear configuration, Offline configuration (option), Import and export functions, Project documentation
Service, support and maintenance functions	Backup & Restore, Status messages from defective ECGs/lamps, Double-address identification, Operating hours display, Diagnostics report
Windows-compliant user interface	Multiple selection for time-optimized configuration, Provides clear network view in a tree-like structure, Supports different commissioning workflows

LON® Configurator





The LON® Configurator is an integral part of the WAGO-I/O-PRO IEC 61131-3 programming environment. The configurator supports both the 753-648 LON® Module's LonWorks® network interface configuration and WAGO-I/O-PRO project integration.

Network variables of any type can be defined. In addition to standard network variable types (SNVTs) and standard configuration property types (SCPTs), user-defined types (UNVTs/UCPTs) and LonMark® functional profiles (FPTs) are also supported. Network variables are defined using the types and objects of the LonMark® resources installed on your computer.

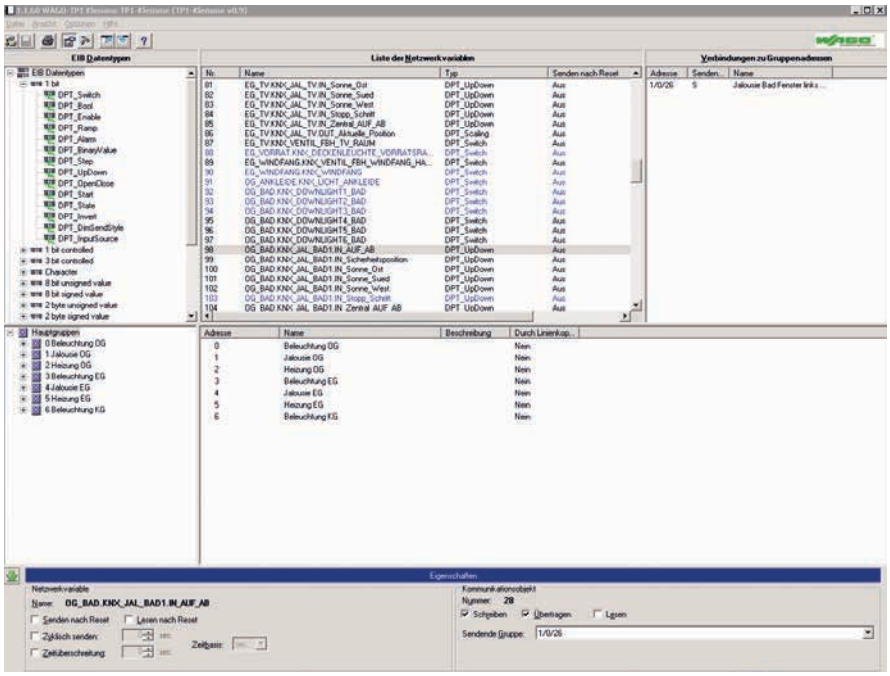
IEC 61131-3 function blocks are automatically created in the IEC application, simplifying operation. The function blocks represent the LON® network interface in the IEC application. When starting the control unit, both the network variable interface and configuration data are automatically downloaded into the I/O module.
An external interface file (XIF) is created for offline configuration in a network management tool.

LON® Configurator
The LON® Configurator is available as part of WAGO-I/O-PRO (Version 2.3.9.34 or higher)

- Integral part of the WAGO-I/O-PRO programming software
- Defines and implements a LON® network interface
- Automatically generates IEC 61131-3 function blocks to represent the LON® network interface within an IEC application
- Downloads both network interfaces and configuration data when starting the control unit
- Checks configuration
- Generates XIF files

Software WAGO-I/O-*PRO* V2.3
see Page 12

WAGO ETS Plug-in



The WAGO ETS Plug-In is a WAGO ETS product database extension that allows the use of WAGO devices, such as the 753-646 KNX/EIB/TP1 Module, 750-889 KNX IP Controller and KNXnet/IP Router (consisting of KNX/EIB/TP1 Module and KNX IP Controller).

The software's enhanced structure offers intuitive navigation, providing both new and experienced ETS users with exceptional usability.

The WAGO ETS Plug-In provides three clear user interfaces for various devices. Depending on the mode selected, either the KNX/EIB/TP1 Module, KNX IP Controller or the KNXnet/IP Router (IP Controller with KNX/EIB/TP1 Module in first position) are supported.

In the graphical interfaces, device parameters are easy to configure and only the options pertaining to the selected device are displayed.

During software development, creating a convenient and time-saving graphical user interface was heavily emphasized — and this is beneficial when assigning communication objects to group addresses.
Two different Drag & Drop options and a context menu with an automatic filter function are available, enabling users to select their preferred method.

WAGO ETS Plug-in
The WAGO ETS Plug-In can be downloaded for free at: www.wago.com

Supported operating systems	Windows XP, Windows 7
Miscellaneous	The plug-in requires the ETS product database.
Configuration	
KNX/EIB/TP1 Module	Loading/assignment of IEC variables (communication objects) Creation/configuration of group addresses
Controller KNX IP	Assigning IP addresses Downloading the IEC application into the controller Loading/assignment of IEC variables (communication objects) Creation/configuration of group addresses
KNXnet/IP Router	Assigning IP addresses Setting a routing multicast address Filtering/transmitting telegrams

Runtime Software — Libraries
e!COCKPIT (based on CODESYS 3)

1

Runtime Software Controls the Machine
Machines and systems are controlled by runtime software that determines behavior, while enabling both operation and current status monitoring for the user. It also transmits operating data to higher-level systems.
Unlike engineering software, runtime software operates continuously — it is a part of the machine and ensures correct operation.

Ready-to-Use Function Blocks Save Development Time
Comprehensive, tried-and-tested software function blocks (IEC libraries) expedite development. Thus, e!COCKPIT is supplemented with comprehensive IEC libraries.

Essentially, the libraries are divided into three abstraction layers:
- The solution layer primarily contains complete, easy-to-use software solutions for production, building and process automation.
- The application layer contains technology functions, e.g., communication, that are ideal for convenient application.
- The system layer provides experts with complete system access.

The upper layers are separated by compatibility levels. Essentially, this enables software to be developed independently of the hardware it will be used on. This provides the greatest degree of flexibility in selecting the right device for the right application, while retaining a uniform software base. It also provides investment security.

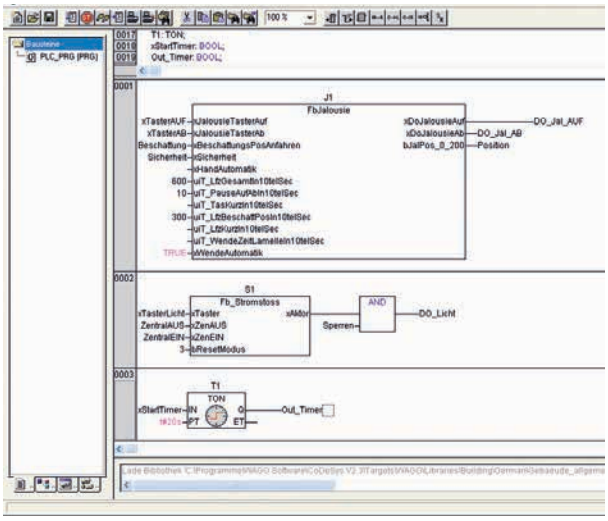
see Page 12

Runtime-Software — Libraries
WAGO-I/O-*PRO* (based on CODESYS 2)

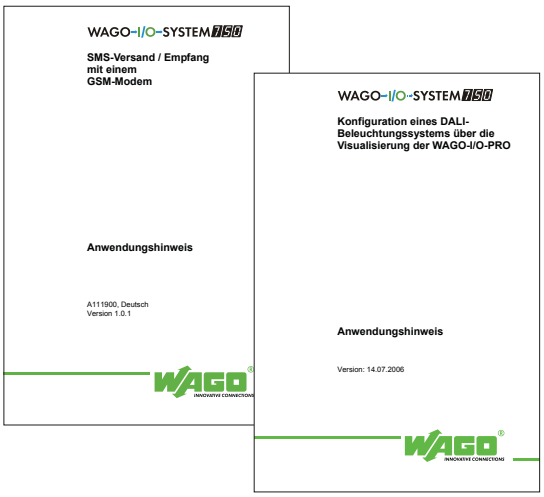


Room applications

Integrated in WAGO-I/O-*PRO*

The library contains custom function blocks for building automation; these accelerate the programming of building applications.

- Lighting
- Dimmers
- Lighting scenes
- Lighting control
- Sun protection
- Shading
- And other applications



Application Notes

Download: Current application notes can be downloaded at: www.wago.com

The application notes contain function blocks (FB) for communication applications.

- KNX/EIB
- DALI
- EnOcean radio technology
- MODBUS
- M-Bus
- MP-Bus
- SMI
- LonWorks®
- Email
- SMS
- And other applications

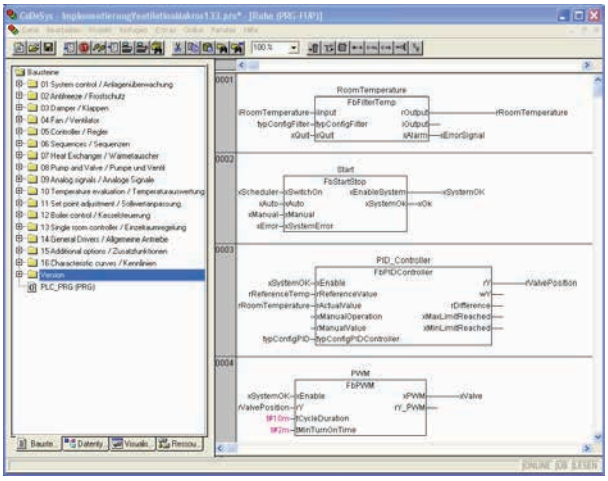

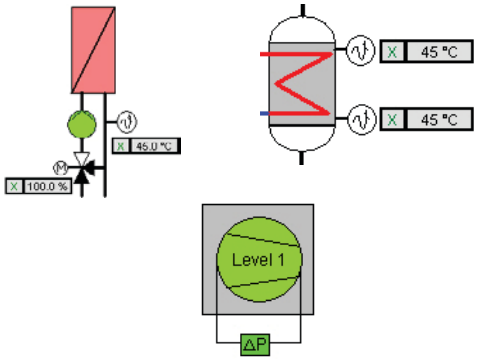

Graphical elements for HVAC applications

HVAC

Integrated in WAGO-I/O-*PRO*

The library contains function blocks (FB) to create automation applications for complex heating, ventilation and air-conditioning systems (HVAC).

These include: fault monitoring, starter circuits, monitoring frost protection systems, fan control (stepped/continuous), air mixture valve control, air heater/cooler control, cascade control of room/feed air temperature, free night cooling, summer/winter compensators, enthalpy calculations, PID controllers, filter monitoring, blockage protection, heating circuit control, heat recovery control, boiler control (stepped/continuous), boiler sequence, domestic hot water control, start/stop optimization, humidification and dehumidification (climate) and more.

WAGO WebVisu App
for mobile system operation/monitoring

1

Using the WAGO WebVisu App, you can access CODESYS 2 WebVisu websites on mobile devices. The desired system or machine can then be operated and monitored at any time. Up to 100 controllers can be predefined for direct and quick access via the URL.

WAGO WebVisu App is available for free as an iOS version for iPhones and iPads in the Apple “App Store”, and as an Android version for smartphones and tablets in the “Google Play” store.

Note: An overview of the supported WAGO controllers, operating manuals and application notes can be found on our website or at www.wago.com/webvisu.

QR Code for WebVisu App

Simply scan the QR code with your mobile device and you are automatically directed to the WebVisu App in the “App Store” or “Google Play”.

TO-PASS® Web Portal

WEB portal for visualizing and archiving measured values and messages

The TO-PASS® product family is designed for wireless communication of signals and messages. Connection is established via the GSM global mobile radio network. Beyond other communication channels (e.g., email, SMS or fax), the devices can also transmit data to a Web server. This allows the creation of a permanent GPRS connection that's similar to a dedicated line.

The process image (i.e., states and values of all digital and analog inputs of a TO-PASS® telecontrol module) is transmitted to the Web server with a time stamp at a configurable interval and then stored in the database. Standard data loggers and the cumbersome process of reading out data are no longer necessary. Controlling and managing data is simplified by using an Internet browser via: http://www.to-pass.com.
With the base module, a user receives a designated area on the Web portal. Access is protected with a username and password. Depending on the expansion level (starter, standard, unlimited), a varying number of devices can log into the portal.

The data recorder function allows digital, analog and MODBUS data from connected devices to be recorded and displayed from 90 minutes to 512 days. Data can also be exported in CSV format.

The "Admin" option is an addition to the base module. It allows the user to assign additional usernames with passwords, as well as customers and devices with different access authorizations.
The "Alarm" option is an addition to the base module. It allows the module to display and administer alarms generated from analog, digital and MODBUS values. Using analog values, up to four limit values can be configured for each measurement. An alarm list allows all alarms to be displayed and acknowledged.
This option also allows the user to configure the recipients and the time that an alarm will be sent to them via SMS or e-mail.

The usage rights for the base module with "Admin" and "Alarm" options must be purchased once. Afterward, just a low flat-rate fee will be charged monthly.

TO-PASS® Web Portal	
Version	Item No.
Basic Unlimited (unlimited number of devices)	761-700
Basic Starter (max. 5 devices)	761-700/000-005
Basic Standard (max. 20 devices)	761-700/000-020
Monthly User Fees	761-701
Admin Unlimited (unlimited number of devices)	761-702
Admin. Starter (max. 5 devices)	761-702/000-005
Admin. Standard (max. 20 devices)	761-702/000-020
Alarm Unlimited (unlimited number of devices)	761-703
Alarm Starter (max. 5 devices)	761-703/000-005
Alarm Standard (max. 20 devices)	761-703/000-020
Individual	761-704

Software functionality	User administration via user name and password; Device activation via Internet; Configuration of measured values via Internet; History of measured values: unlimited number of data sets; Display of measured values: Table and graphical display; Evaluation of measured values: Graphical evaluation of measured values; Export of measured values: CSV format (MS Excel compatible)
Topology	No. of devices unlimited
Other required software	Microsoft® Internet Explorer with Internet access

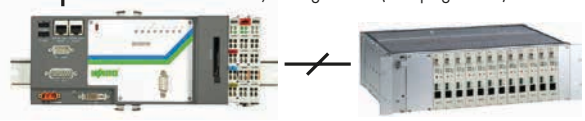
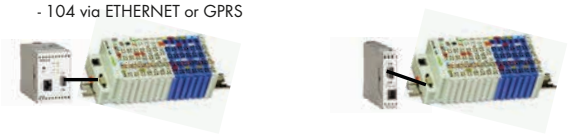
WAGO Telecontrol Gateway

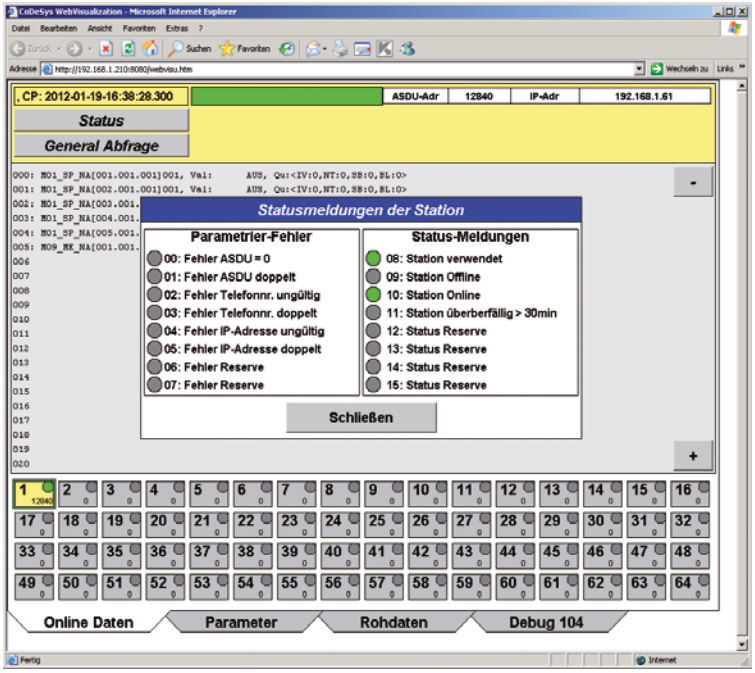
Connection to control system acc. to IEC 60870-5-101/-104

Max. 12 RS-232/-485 I/O modules and ISDN/analog modem (19'' plug-in card)



Max. 64 substations can be connected via fieldbus controller acc. to IEC 60870-5:
- 101 via analog, GSM or ISDN dial-up connections
- 103 via RS-485 I/O module
- 104 via ETHERNET or GPRS





Parameter setting and diagnostics via Web server

WAGO Telecontrol Gateway (WTG), in connection with the controllers mentioned below, is a gateway software for communication between a maximum of 64 telecontrol substations (IEC 60870-5-101/-103/-104) and a control system equipped with an interface (IEC 60870-5-101/-104).

This gateway is ideal for connecting both telecontrol substations and for control system applications restricted by a transmission protocol or the number of connections.
In addition to data transfer bundling, the WAGO Telecontrol Gateway also supports coordination of incoming and outgoing analog, GSM or ISDN dial-up connections to substations.

Accessories for WAGO Telecontrol Gateway:
I/O-IPC-C10 Telecontrol: 758-874/000-130 or Controller 750-8202/025-001
RS-232/485 Module, WAGO-I/O-SYSTEM: 750-652
End Module, WAGO-I/O-SYSTEM: 750-600
19" rack, INSYS: 11-02-05-01-01.006
19" plug-in card (ISDN modem), INSYS: 11-02-05-03-01.003
Alternative: 19" plug-in card (analog modem), INSYS: 11-02-05-02-03.003

Telecontrol substation with ISDN dial-up modem:
WAGO Telecontroller: 750-872; additional 750/753 Series I/O Modules, if necessary
End Module, WAGO-I/O-SYSTEM: 750-600
RS-232 Null Modem Cable: 761-9011
ISDN modem (DIN-rail mount), INSYS ISDN-TA 4.0: 11-02-01-02-00.018

Telecontrol substation with an analog dial-up modem
WAGO Telecontroller: 750-872; additional 750/753 Series I/O Modules, if necessary
End Module, WAGO-I/O-SYSTEM: 750-600
RS-232 Null Modem Cable: 761-9011
Analog modem (DIN-rail mount), INSYS modem 56k 4.2: 11-02-01-01-40.039

Telecontrol substation with GSM connection
WAGO Telecontroller: 750-872; additional 750/753 Series I/O Modules, if necessary
End Module, WAGO-I/O-SYSTEM: 750-600
RS-232 Null Modem Cable: 761-9011
GSM modem (DIN-rail mount), INSYS GSM 4.3: 11-02-01-03-01.042
Magnetic foot antenna for INSYS GSM 4.3: 31-01-01.007

Telecontrol substation with DSL/ETHERNET connection:
WAGO Telecontroller: 750-872
Alternative: WAGO Telecontroller: 750-880/025-001
Additional 750/753 Series I/O Modules, if necessary
End Module, WAGO-I/O-SYSTEM: 750-600

Operation and Monitoring

e!DISPLAY 7300T Web Panels

- High-performance HMI display for Web-based visualization
- 10.9–25.7 cm (4.3–10.1")
- Visualization from CODESYS 2 and *e!COCKPIT* (based on CODESYS 3)

PERSPECTO® Control Panels

- Merging of control and visualization
- 8.9–38.1 cm (3.5–15")

PFC100/PFC200 Controllers

- Maximum performance in a minimum space
- Also programmable in high-level languages based on Linux®
- Security packages with SSH and SSL/TLS
- Runtime system for CODESYS 2 (only PFC200) and 3

Section 3.1 ►

PFC200 XTR Controllers

The advantages of the PFC Controller combined with the characteristics for extreme environments:

- High processing speed
- Multiple interfaces
- eXTReme robust and maintenance-free

Section 3.2 ►►

750 Series Controllers

- Controllers for all prominent fieldbus systems
- Programmable to IEC 61131-3
- Ideally combinable with the WAGO 750 I/O-SYSTEM modules

Section 3.3 ►►►

750 XTR Controllers

For demanding applications in which the following are critical:

- Extreme temperature stability
- Immunity to electromagnetic interference and impulse voltages
- Vibration and shock resistance

Section 3.4 ►►►►

Operation and Monitoring
Contents

M: Master, S: Slave

Operation and Monitoring
General Product Information

Operate, observe, visualize, diagnose in production and process industry: WAGO Web and control panels for small to medium-sized control and visualization tasks feature perfect usability and with the quickly created visualizations, set the focus on time savings.

Web Visualization

Displaying a visualization in a Web browser makes flexible options available. In addition to the Web Panels, visualizations can be displayed on nearly any device with a browser including smartphones and tablets; where needed, by using the WebVisu app.

Web Panels with an Aesthetic Design and Extra Performance

The *e!DISPLAY* HMI panel merges a sleek design and some of the industry's most powerful software: With *e!DISPLAY*, you can shape the high-tech image of your machine or system by displaying high-quality visualizations from both *e!COCKPIT* (CODESYS 3) and CODESYS 2 engineering software. The Web-based management feature of WAGO's controllers may also be operated using the stylish Web Panels. The modern design also packs new technology, such as HTML5, for programming via e!COCKPIT. A Java runtime for CODESYS 2 WebVisu is also on board.

Easy To Use — Set Brightness Directly on the Display

WAGO's *e!DISPLAY* Web Panel has a resistive touch screen, flanked by three status LEDs that indicate operating status and provide operational feedback. For Web Panel configuration and commissioning, an easy-to-customize configuration interface is available: All important settings are quickly and intuitively performed via Web-based management, like connecting to one or more WAGO controllers.
Furthermore, sensors can automatically adjust the brightness of *e!DISPLAY* based on a room's ambient lighting conditions. For quick and easy custom settings, the display brightness can also be manually adjusted via a front-mount button.

Energy-Saving Sensors on the Web Panel Ensure Safety

e!DISPLAY has an integrated proximity sensor. This allows the visualization to be automatically re-displayed from the energy-saving standby function and screensaver. A motion sensor simultaneously detects ambient lighting levels for brightness control.

Quick installation via unique mounting design

The *e!DISPLAY* Web Panel directly latches onto the switch cabinet via mounting clips for quick and easy tool-free installation. With special clamping elements, the IP65 degree of protection can be achieved for the front of the display. This design flexibility makes *e!DISPLAY* extremely versatile and suitable for a wide variety of applications. The VESA mount allows installation on a swivel arm or stand outside of the control panel.

Seamless Integration into the WAGO Product Range

The more harmonious component integration is, the better performance and reliability will be. *e!DISPLAY* provides visualizations via the e!COCKPIT engineering software (CODESYS V3) and CODESYS V2. A high-performance solution when combined with the PFC100 and PFC200 controllers

Control Panel with Target Visualization

In addition to visualization, the control panel also offers a PLC runtime. The result is a full-fledged automation device. It provides configurable functions for operation and monitoring, and can independently process control tasks.

The control panel's PLC function is based on the IEC-61131 compatible CODESYS environment and can be programmed in five different languages. In addition to pure programming, the programming system built on the CODESYS international standard allows offline simulation, fieldbus configuration, recipe management and much more. There is also a Webserver.

Fully Integrated Visualization

Complete integration of the visualization system in a control system allows direct integration of variables.
In addition, created masks can easily be reused in various controller configurations.

Advantages:

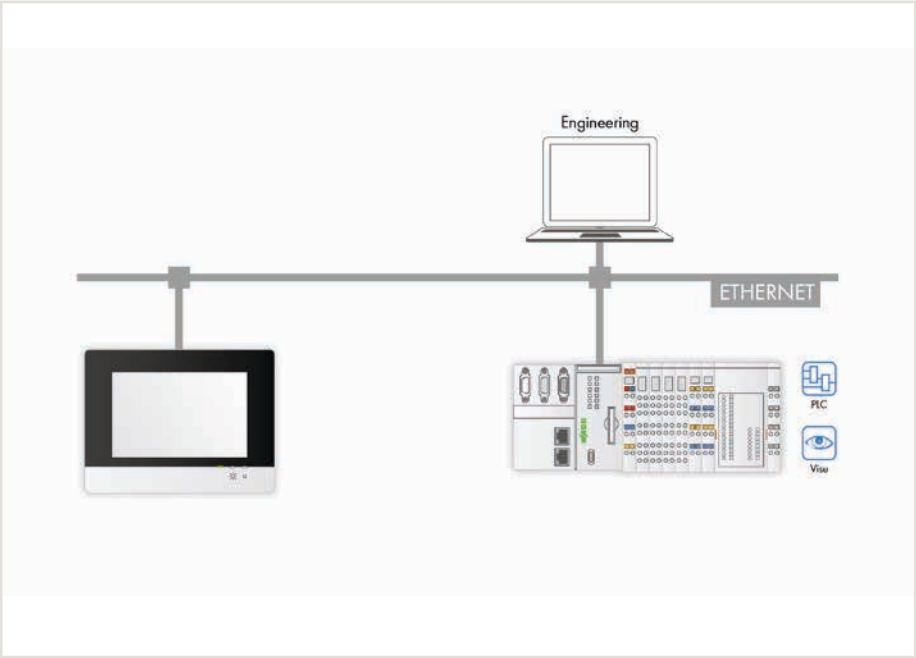
e!DISPLAY
- Aesthetic design with enhanced performance
- Easy to use — set brightness directly on the device
- Energy-saving sensors ensure safety.
- Quick installation via unique mounting design

PERSPECTO®
- Multiple interfaces
- IEC-61131-compatible control functionality

Operation and Monitoring
Versions

e!DISPLAY 7300T,
Web Panel

Specifically configured as a Web browser, the Web Panel directly connects to controllers with integrated Web visualization. The *e!COCKPIT* (CODESYS 3) and CODESYS 2.3 Web visualizations have been specifically optimized for the Web Panel.



PERSPECTO® CP,
Control Panel CP with Target Visualization

The Control Panel (CP) with Target Visu (TV) features full CODESYS runtime. With the WAGO-I/O-PRO development environment (based on CODESYS-2), applications and visualizations can be created and completely programmed. Existing CODESYS projects can be almost entirely converted and upgraded.

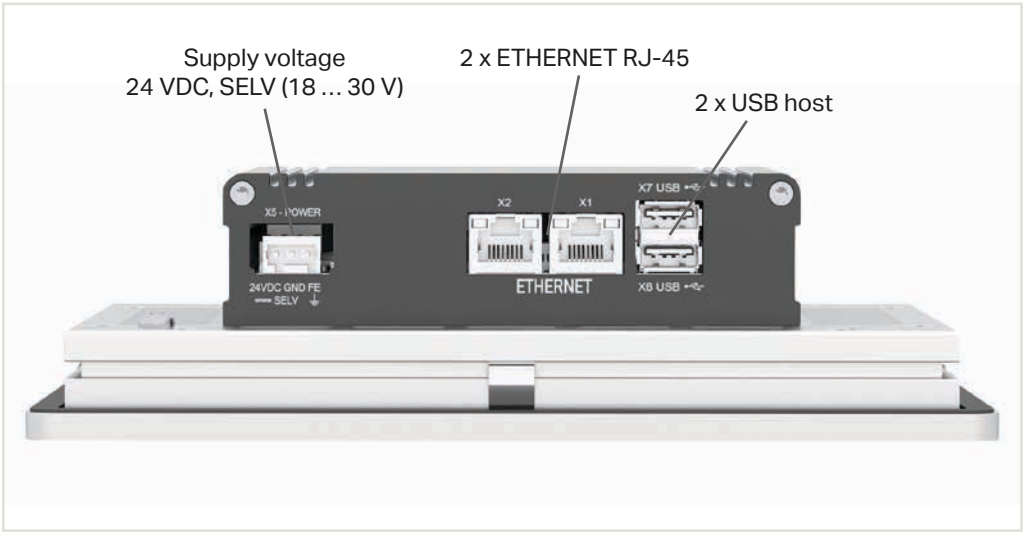
y = Screen size
0 = 10.9 cm (4.3"); 1 = 14.5 cm (5.7");
2 = 18 cm (7.0"); 3 = 25.7 cm (10.1")

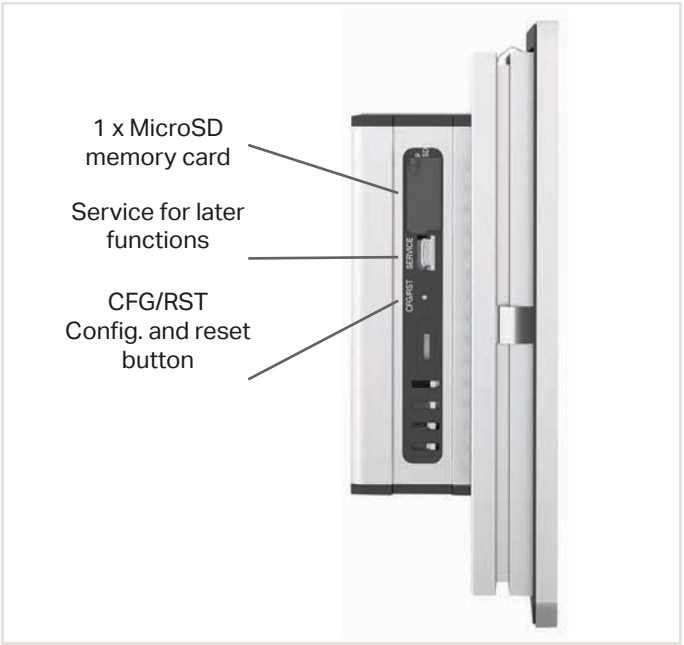
***PERSPECTO®* Control Panel = 3yyy**
yyy = Screen size (035–150 = 3.5"–15")

Operation and Monitoring
e!DISPLAY 7300T Interfaces and Types

Two ETHERNET interfaces connect the Web Panel to the controller on which the Web visualization will be displayed via a Web server.
A mouse and keyboard can be connected to the two USB interfaces, or an external USB memory.



The interface and control element features are not dependent on screen diagonals; they are the same for all devices.



Operation and Monitoring
e!DISPLAY 7300T Application and Installation Instructions

Two brightness adjustment keys are located directly on the front of the device, along with three diagnostics LEDs.

Mounting

e!DISPLAY directly latches onto the switch cabinet via mounting spring clips for quick and easy tool-free installation. Achieve the IP65 degree of protection for the front of the display with additional clamping screws. This design flexibility makes *e!DISPLAY* extremely versatile and suitable for a wide variety of applications. The VESA mount (VESA 75 standard, 75 mm hole spacing) allows universal mounting accessories to be conveniently used outside of the switch cabinet.

MicroSD memory card, SLC-NAND, 2 GB, temperature range −40 … 90 °C

Item Description	Memory Card microSD
Version	SLC-NAND 2GB T85°C
Item No.	**758-879/000-3102**
Technical Data	
Memory	2 Gb (SLC)
Write/read cycles max.	17 Mb/s / 20 Mb/s
MTBF	4,000,000 hrs.
Service life	2,000,000 program/operating cycles
Ambient temperature (operation)	−40 … +60 °C
Ambient temperature (storage)	−40 … +60 °C
Relative humidity	95 % non-condensing
Dimensions W x H x D	15 x 11 x 1 mm
Vibration resistance	15 G
Shock resistance	50 G
Data transmission rate	Up to 20 Mb/s

SD memory card, SLC-NAND, 2 Gb, temperature range −40 … 85 °C

Item Description	Memory Card SD
Version	SLC-NAND 2GB T85°C
Item No.	**758-879/000-001**
Technical Data	
Memory	2 Gb (SLC)
Write/read cycles max.	16 Mb/s / 22 Mb/s
MTBF	4,000,000 hrs.
Service life	2,000,000 program/operating cycles
Ambient temperature (operation)	-45 … +90 °C
Ambient temperature (storage)	-45 … +90 °C
Relative humidity	95 % non-condensing
Dimensions W x H x D	24 x 32 x 2.1 mm
Vibration resistance	15 G
Shock resistance	50 g operating, 1000 g not operating
Data transmission rate	Up to 22 Mb/s

CF memory card, SLC-NAND

Item Description	Memory Card CF
Version	SLC-NAND
Item No.	**758-879/000-000**
Technical Data	
Memory	1 Gb (SLC)
Write/read cycles max.	Single: 20 Mbytes/s (max) / 10 Mbytes/s (max), Dual: 40 Mbytes/s (max) / 20 Mbytes/s (max)
MTBF	300,000 hrs.
Service life	2,000,000 program/operating cycles
Ambient temperature (operation)	−40 … +85 °C
Ambient temperature (storage)	-55 … +95 °C
Relative humidity	95 % non-condensing
Dimensions W x H x D	42.8 x 36.4 x 3.3 mm
Vibration resistance	Per IEC 60068-2-6
Shock resistance	Per IEC 60068-2-27
Data transmission rate

Controller

PFC100/PFC200 Controller

- Maximum performance in a minimum space
- Also programmable in high-level languages based on Linux®
- Security packages with SSH and SSL/TLS
- Runtime system for CODESYS 2 (only PFC200) and 3

Section 3.1 ►

750 Series Controllers

- Controllers for all prominent fieldbus systems
- Programmable to IEC 61131-3
- Ideal combination with the WAGO 750 I/O-SYSTEM modules

Section 3.3 ►►►

PERSPECTO® Control Panels

- Merging of control and visualization
- 8.9–38.1 cm (3.5–15")

◄ Section 2

PFC200 XTR Controllers

The advantages of the PFC Controller combined with the characteristics for extreme environments:

- High processing speed
- Multiple interfaces
- eXTRemely robust and maintenance-free

Section 3.2 ►►

750 XTR Controllers

For demanding applications in which the following are critical:

- Extreme temperature stability
- Immunity to electromagnetic interference and impulse voltages
- Vibration and shock resistance

Section 3.4 ►►►►

Controller
Overview

3

Advantages:

- Fieldbus-independent — Supports all standard fieldbus protocols and ETHERNET standards
- Scalable performance — Fieldbus controllers, control panels, PFC100 and PFC200
- Programming per IEC 61131-3
- Flexible platform adapts to diverse applications and environments
- Combinable with the WAGO 750 I/O-SYSTEM — modular, compact, versatile

PFC100/PFC200 Controller
General Product Information

PFC100/PFC200: Maximum Performance in a Minimum Space

As a member of the WAGO control family, the PFC100 and PFC200 Controllers with e!RUNTIME excel with high processing speed and multiple interfaces for parallel communication. All versions feature two ETHERNET ports and — depending on the model — additional interfaces. The CANopen, PROFIBUS DP and MODBUS TCP/UDP/RTU protocols provide a flexible connection to fieldbus systems and external input/output devices. These fieldbus systems can be easily configured directly in WAGO's easy-to-use *e!COCKPIT* development environment.
The ETHERNET interfaces with an integrated switch also support all major IT protocols. In addition to multiple interfaces, the PFC100/PFC200 offers ample memory for your applications thanks to the internal flash memory and an integrated interface for memory cards.

Telecontrol technology

Standardized telecontrol protocols according to IEC 60870-5, IEC 61850, IEC 61400-25 or DNP3 ensure use of the PFC Controllers in telecontrol technology.

Link between Process Data and IT Application

The PFC100/PFC200 ideally combines real-time requirements with IT functionality. It supports both MODBUS/TCP and ETHERNET/IP for use in industrial environments. HTTP, SNTP, SNMP, FTP, BootP, DHCP, DNS, telnet, SSH and other protocols simplify integration into IT environments.
Integrated Web pages and Web-based visualization provide IT applications with real-time process data. Furthermore, the PLC incorporates library functions for email, SOAP, ASP, IP configuration, ETHERNET sockets and file system.

Security on Board

The topics of ETHERNET communication and security are closely linked. To provide PFC Controller users with a high level of security, mechanisms for secure connections such as VPN, integrated firewall, HTTPS, FTPS, SSH and SSL/TLS are standard.

Modular Expandability

With the WAGO 750 I/O-SYSTEM, the PFC100/PFC200 can be expanded to almost any input/output interface. A modular, DIN-rail-mount design permits easy installation, expansion and modification of the I/O module without tools. The straightforward design prevents installation errors. In addition, proven CAGE CLAMP® technology offers fast, vibration-proof and maintenance-free connections that are independent of operator skill. Depending on the I/O module's granularity, field peripherals can be directly wired using 1-, 2-, 3- or 4-wire technology.

Maximum Reliability and Ruggedness

The PFC100/PFC200 is engineered and tested for use in the most demanding environments (e.g., temperature cycling, shock/vibration loading and ESD, etc.) according to the highest standards. Spring pressure connection technology guarantees continuous operation. Integrated QA measures in the production process and 100 % function testing ensure consistent quality.

Open-Source Software

The firmware used in the controllers was created based on open-source software.
The software packages used and their licenses are available from the download area under www.wago.com; please observe the rules stated there.
The controller firmware itself is available as a Board Support Package (BSP). If you are interested, simply contact our Technical Support AUTOMATION unit.

Advantages:

- Programming per IEC 61131-3
- Applications with higher-level languages
- Linux® real-time operating system
- Robust and maintenance-free
- Integrated Cyber-Security Packages

PFC100/PFC200 Controller
Versions

Extended Temperature Range

Industrial automation technology is typically operated in temperatures ranging from 0 … 55 °C. However, there are applications like telecontrol technology that require an extended temperature range. These version are available in an extended temperature range of −20 … +60 °C.

ECO

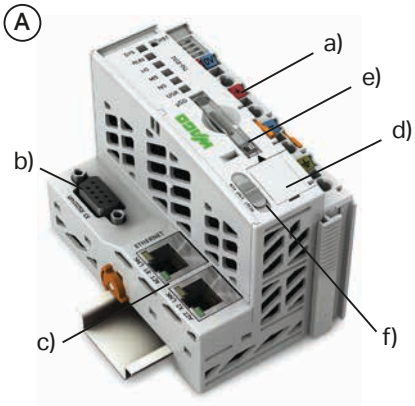
The ECO version of the PFC200 limits the number of stackable I/O modules to four.

Telecontrol Technology

The telecontrol technology versions of the PFC200 are distinguished by the integrated, standardized telecontrol technology:

- IEC 60870-5
- IEC 61850
- IEC 61400-25
- DNP3

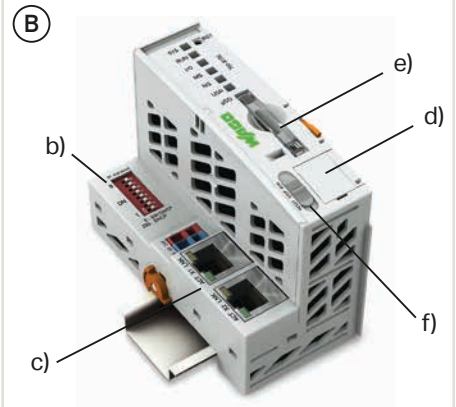
Interfaces and Types



- Includes supply module (a)
- Technical differences on the connection level (b)
- ETHERNET 2 x RJ-45 (c)
- Service interface (d)

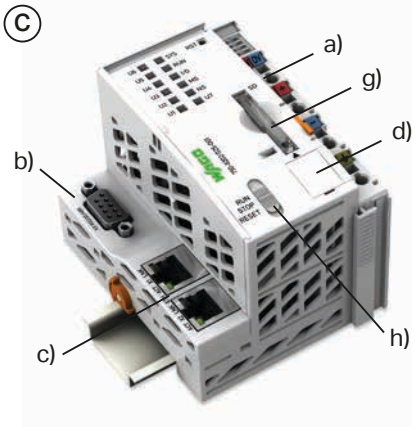
Housing Design (A)

- microSD card slot for external storage media (e)
- Stop/start switch (f)
- W x H x D (mm) 61.5 x 71.9 x 100



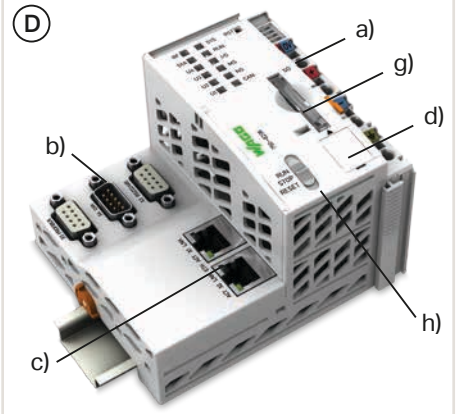
Housing Design (B)

- microSD card slot for external storage media (e)
- Stop/start switch (f)
- W x H x D (mm) 49.5 x 71.9 x 96.8



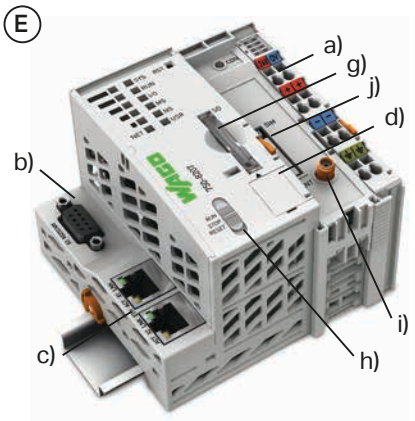
Housing Design (C)

- SD card slot for external storage media (g)
- Stop/start switch (h)
- W x H x D (mm) 78.6 x 71.9 x 100



Housing Design (D)

- SD card slot for external storage media (g)
- Stop/start switch (h)
- W x H x D (mm) 112 x 71.9 x 100



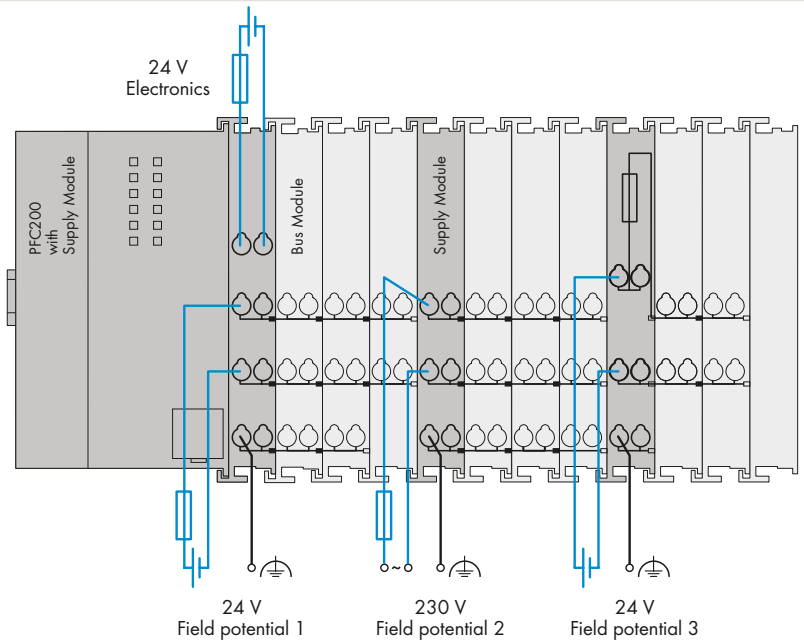
Housing Design (E)

- SD card slot for external storage media (g)
- Stop/start switch (h)
- GSM antenna connection (i)
- SIM card slot (j)
- W x H x D (mm) 102.5 x 71.9 x 100

PFC100/PFC200 Controller
Installation Instructions

Supply Modules

Power is always channeled to the internal electronics power supply via the controller. The power supply to the field-side supply is electrically isolated. The division enables a separate supply for sensors and actuators. The I/O modules' connections automatically lead to transferring the supply voltages. Bus supply modules with diagnostics enable additional monitoring of the power supply. This ensures a flexible, user-specific supply design for a station. The current supply to the electronics is limited by a maximum value. If the sum of the internal current demand of all the I/O modules should exceed this value, an additional bus supply module is necessary. Even in this case, power supply to the field-side supply of 10 A may not be exceeded. However, different bus supply modules allow a new power supply, formation of potential groups and the implementation of emergency stop concepts.



Notes

Additional steps must be implemented specifically for the location the I/O-System is installed:

- Specific power and field-side power supply filters (750-624 or 750-626) are required for marine and onshore/offshore applications.
- A specific supply module (750-606) is required to operate intrinsically safe Ex i modules.
- Additionally, both a bus supply module and a field-side power supply filter are recommended when operating intrinsically safe Ex i modules for marine and onshore/offshore applications.
- As part of operating safety-related I/O modules, PELV/SELV power supply units must be used for 24 VDC supply of electronics and field. In addition, specific power and field-side power supply filters must be provided (750-626).

Please refer to the manual for details about the power supply's design.

PFC100/PFC200 Controller
Standards and Rated Conditions

General Specifications	
System supply voltage	24 VDC (−25 … +30 %)*; *For all shipbuilding certified couplers
Input current typ. at rated load (24 V)	550 mA, 750-8100: 300 mA
Ambient temperature (operation)	0 … +55 °C
Ambient temperature (operation) for versions with an extended temperature range	−20 … +60 °C
Ambient temperature (storage)	−25 … +85 °C
Ambient temperature (storage) for versions with an extended temperature range	−40 … +85 °C
Relative humidity	95 % non-condensing
Relative humidity for versions with an extended temperature range	Max. 95 %, short-term condensation per Class 3K6 / IEC EN 60721-3-3 and E DIN 40046-721-3, taking a temperature range of −20 … +60 °C into consideration (except wind-driven precipitation, water and ice formation)
Operating altitude	Without temperature derating: 0–2000 m; with temperature derating: 2000–5000 m (0.5 K / 100 m); max.: 5000 m
Pollution degree	2 per IEC 61131-2
Vibration resistance	0.5 g (4 g for all shipbuilding certified controllers) per IEC 60068-2-6
Shock resistance	15 g per IEC 60068-2-27
EMC immunity to interference	Per EN 61000-6-2 / shipbuilding applications
EMC emission of interference	Per EN 61000-6-3 / shipbuilding applications
Protection type	IP20
Mounting position	Any
Mounting type	35 mm DIN rail
Housing material	Polycarbonate, polyamide 6.6
Exposure to pollutants	Per IEC 60068-2-42 and IEC 60068-2-43
Permissible SO2 contaminant concentration at a relative humidity < 75 %	25 ppm
Permissible H2S contaminant concentration at a relative humidity < 75 %	10 ppm
Wire connection	CAGE CLAMP®
Conductor sizes strip lengths	0.08–2.5 mm² / 28–14 AWG 8–9 mm / 0.31–0.35 inch
Current carrying capacity of the power jumper contacts	10 A

Approvals

PFC200 XTR Controllers

PFC100/PFC200 Controller

- Maximum performance in a minimum space
- Also programmable in high-level languages based on Linux®
- Security packages with SSH and SSL/TLS
- Runtime system for CODESYS 2 (only PFC200) and 3

◄ Section 3.1

750 Series Controllers

- Controllers for all prominent fieldbus systems
- Programmable to IEC 61131-3
- Ideal combination with the WAGO 750 I/O-SYSTEM modules

Section 3.3 ►

PERSPECTO® Control Panels

- Merging of control and visualization
- 8.9–38.1 cm (3.5–15")

◄◄ Section 2

PFC200 XTR Controllers

The advantages of the PFC Controller combined with the characteristics for extreme environments:

- High processing speed
- Multiple interfaces
- eXTRemely robust and maintenance-free

750 XTR Controllers

For demanding applications in which the following are critical:

- Extreme temperature stability
- Immunity to electromagnetic interference and impulse voltages
- Vibration and shock resistance

Section 3.4 ►►

PFC200 XTR Controllers
General Product Information

PFC200 XTR:

Taking it to the eXTReme — The Standard for 750 XTR

With the dark gray XTR version of the PFC200 Controller, you profit from the unique added value featured by this fast and highly communicative multi-talent for applications under extreme environmental conditions.

The PFC200 XTR Controller excels with high processing speed and multiple interfaces for parallel communication. All versions feature two ETHERNET ports and — depending on the model — additional interfaces. The CANopen, PROFIBUS DP and MODBUS TCP/UDP/RTU protocols provide a flexible connection to fieldbus systems and external input/output devices. These fieldbus systems can be easily configured directly in WAGO's easy-to-use *e!COCKPIT* development environment. The ETHERNET interfaces with an integrated switch also support all major IT protocols. In addition to multiple interfaces, the PFC200 XTR offers ample memory for your applications, provided by the internal flash memory and an integrated interface for SD/SDHC cards.

The WAGO 750 XTR I/O-SYSTEM features outstanding characteristics: It is extremely temperature-resistant, immune to interference, as well as insensitive to vibrations and impulse voltages.
This is what makes it the first choice for demanding applications.

Marine Systems and Onshore/Offshore Industry

International approvals coupled with industry-specific features permit use in shipbuilding and other harsh sectors. Addressing requirements specific to industry and operating environment has enabled use on marine diesels and in the EMC-sensitive area of a vessel's bridge. Because the requirements are significantly greater for immunity to interference or emission of interference and mechanical performance in these sensitive areas, the system can readily meet the needs of other industries.

Link between Process Data and IT Application — Even under eXTReme Conditions

The PFC200 XTR ideally combines real-time requirements with IT functionality. It supports both MODBUS/TCP and ETHERNET/IP for use in industrial environments. HTTP, SNTP, SNMP, FTP, BootP, DHCP, DNS and other protocols simplify integration into IT environments. Integrated Web pages and Web-based visualization provide IT applications with real-time process data. Furthermore, the PLC incorporates library functions for email, SOAP, ASP, IP configuration, ETHERNET sockets and file system.

Security on Board

The topics of ETHERNET communication and security are closely linked. To provide PFC Controller users with a high level of security, mechanisms for secure connections such as HTTPS, FTPS, SSH and SSL/TLS are standard.

Worldwide Approvals

International approvals for industrial automation, building technology, shipbuilding and onshore/offshore applications guarantee worldwide use even under harsh operating conditions, e.g., Germanischer Lloyd, Det Norske Veritas, American Bureau of Shipping, Korean Register of Shipping, Nippon Kaiji Kyokai, Registro Italiano Navale and Polski Rejestr Stratkow.

Superior Reliability in Extreme Climates

Regardless of freezing cold, extreme heat and high humidity, the WAGO 750 XTR I/O-SYSTEM is engineered for absolute dependability in virtually any weather. The XTR version of the PFC200 is unfazed by both freezing cold down to −40 °C and scorching heat up to +70 °C. And this applies equally to both start-up and continual operation. The maximum approved operating altitude of 5,000 m is another highlight. Even in the thin air of a mountain-top station, the system impressively demonstrates its high performance and availability.

Additional Protection against Interference Pulses

The WAGO 750 XTR I/O-SYSTEM provides greater isolation up to 5 kV of impulse voltage, lower EMC emission of interference and higher insensitivity to EMC interference. These strengths add up to trouble-free operation.

High Mechanical Performance

Automation systems must be particularly vibration-resistant, especially when installed close to vibration-prone and shock-generating system components. Powerful motors and power circuit breakers are just two examples from a wide range of applications. The WAGO 750 XTR I/O-SYSTEM continues to set new standards here. Count on long-lasting, trouble-free operation and industry-topping levels of safety — even in the most severe applications, such as tunnel boring machines.

Modular Expandability

With the WAGO 750 XTR I/O-SYSTEM, the PFC200 can be expanded to almost any input/output interface. Using the same standard platform has given the XTR the same proven advantages.

Open-Source Software

The firmware used in the controllers was created based on open-source software. The software packages used and their licenses are available from the download area under www.wago.com; please observe the rules stated there.
The controller firmware itself is available as a Board Support Package (BSP).
If you are interested, simply contact our Technical Support AUTOMATION unit.

Advantages:

- Controls for eXTReme environmental conditions
  - Needs no climate control
  - Application in unshielded areas
  - Application in vibration- or shock-generating system parts
- Programming per IEC 61131-3
- Can be combined with high-level languages
- Linux® real-time operating system
- Robust and maintenance-free
- Integrated IT security standards

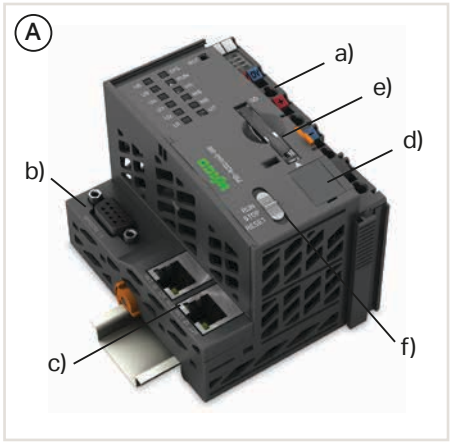
PFC200 XTR Controllers
Versions

Telecontrol Technology

The telecontrol technology versions of the PFC200 are distinguished by the integrated, standardized telecontrol technology:
- IEC 60870-5
- IEC 61850
- IEC 61400-25
- DNP3

The increased requirements for dielectric strength and interference immunity according to EN 60870-2-1 are also completely fulfilled.

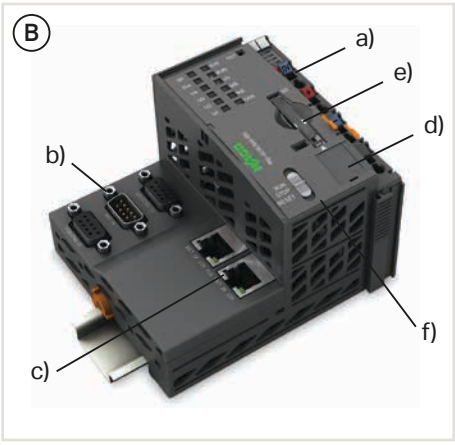
Interfaces and Types



- Includes supply module (a)
- Technical differences on the connection level (b)
- ETHERNET 2 x RJ-45 (c)
- Service interface (d)
- SD card slot for external storage media (e)
- Stop/start switch (f)

Housing Design (A)
- W x H x D (mm) 78.6 x 71.9 x 100

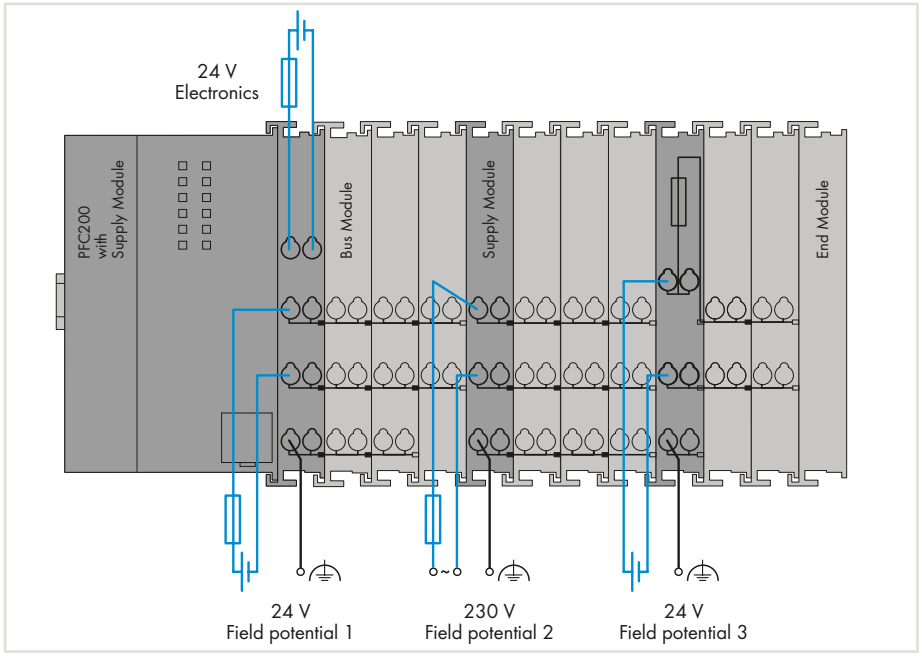
Housing Design (B)
- W x H x D (mm) 112 x 71.9 x 100



PFC200 XTR Controllers
Installation Instructions

Supply Modules

Power is always channeled to the internal electronics power supply via the controller. The power supply to the field-side supply is electrically isolated. The division enables a separate supply for sensors and actuators. The I/O modules' connections automatically lead to transferring the supply voltages. Bus supply modules with diagnostics enable additional monitoring of the power supply. This ensures a flexible, user-specific supply design for a station. The current supply to the electronics is limited by a maximum value. If the sum of the internal current demand of all the I/O modules should exceed this value, an additional bus supply module is necessary. Even in this case, power supply to the field-side supply of 10 A may not be exceeded. However, different bus supply modules allow a new power supply, formation of potential groups and the implementation of emergency stop concepts.



Notes

Additional steps must be implemented specifically for the location the I/O-System is installed:

- Specific power and field-side power supply filters (750-624/040-001 or 750-626/040-000) are ready for marine and onshore/offshore applications, as well as in telecontrol and rail technology.

Please refer to the manual for details about the power supply's design.

Mixed Operation

Mixed operation (standard/XTR I/O modules) within a node is possible when groups of modules are electrically isolated on the field side, i.e., electrically isolated power supply. The combination may be useful, for example, when there are only increased requirements for dielectric strength and immunity to interference, but the ambient temperature is not critical.

Item Number Key

Explanation of the components of an item number key

Item No. : 750-82xx/040-000

02: 2 x ETHERNET, RS-232/-485
06: 2 x ETHERNET, RS-232/-485, CAN, PROFIBUS-DP slave

.../040-000: Standard
.../040-001: Telecontrol

PFC200 XTR Controllers
Standards and Rated Conditions

General Specifications	
System supply voltage	24 VDC (−25 … +30 %) Specified values for ambient temperature under laboratory conditions +15 °C… +35 °C Derating for −40 … +55 °C: 24 V (−25 … +20 %)*. Derating for +55 … +70 °C: 24 V (−25 … +10 %)*. *Including 15 % residual ripple (lower limit −27.5 %)
Input current typ. at rated load (24 V)	550 mA
Ambient temperature (operation)	−40 … +70 °C
Ambient temperature (storage)	−40 … +85 °C
Relative humidity	Max. 95 %, short-term condensation per Class 3K7 / IEC EN 60721-3-3 and E DIN 40046-721-3 (except wind-driven precipitation, water and ice formation)
Operating altitude	Without temperature derating: 0–2000 m; with temperature derating: 2000–5000 m (0.5 K / 100 m); max.: 5000 m
Pollution degree	2 per IEC 61131-2
Vibration resistance	Per IEC 60068-2-6 (acceleration: 5 g), EN 60870-2-2, IEC 60721-3-1, -3, EN 50155, EN 61373
Shock resistance	Per IEC 60068-2-27 (15 g/11 ms/half-sine/1,000 shocks; 25 g/6 ms/1,000 shocks), EN 50155, EN 61373
EMC immunity to interference	Per EN 61000-6-1, -2, EN 61131-2, marine applications, EN 50121-3-2, -4, -5, EN 60255-26, EN 60870-2-1, EN 61850-3, IEC 61000-6-5, IEEE 1613, VDEW: 1994
EMC emission of interference	Per EN 61000-6-3, -4, EN 61131-2, EN 60255-26, marine applications, EN 60870-2-1, EN 61850-3, EN 50121-3-2, -4, -5
Protection type	IP20
Mounting position	Horizontal (standing/lying) or vertical
Mounting type	35 mm DIN rail
Housing material	Polycarbonate, polyamide 6.6
Exposure to pollutants	Per IEC 60068-2-42 and IEC 60068-2-43
Permissible SO2 contaminant concentration at a relative humidity < 75 %	25 ppm
Permissible H2S contaminant concentration at a relative humidity < 75 %	10 ppm
Wire connection	CAGE CLAMP®
Conductor sizes strip lengths	0.08–2.5 mm² / 28–14 AWG 8–9 mm / 0.31–0.35 inch
Current carrying capacity of the power jumper contacts	10 A

750 Series Controllers
General Product Information

750 Series Controllers: Open — Flexible — Compact

WAGO controllers are suitable for various tasks in industry or process and building automation, e.g., measurement and production data acquisition. Based on the fieldbus couplers for all standard fieldbus systems, they are programmable to IEC 61131-3. Direct connection to a wide range of I/O modules from the WAGO 750 I/O-SYSTEM Series optimizes adaptation to the application.

Building Automation

Thanks to specific characteristics, the controllers for the BACnet/IP and KNX IP bus systems are optimized for building automation. The diverse portfolio of stackable I/O modules allows the integration of external systems such as lighting control (DALI), sun protection (SMI), wireless switches (EnOcean) and much more.

Marine Systems and Onshore/Offshore Industry

International approvals coupled with industry-specific features permit use in shipbuilding and other harsh sectors. Addressing requirements specific to industry and operating environment has enabled use on marine diesels and in the EMC-sensitive area of a vessel's bridge. Because the requirements are significantly greater for immunity to interference or emission of interference and mechanical performance in these sensitive areas, the system can readily meet the needs of other industries.

Telecontrol Technology

Standardized telecontrol protocols according to IEC 60870-5, IEC 61850 or
IEC 61400-25 and DNP3 ensure use of the 750 Series Controller in telecontrol technology.

Link between Process Data and IT Application

The controllers ideally combine real-time requirements with IT functionality. They support both MODBUS/TCP and ETHERNET/IP for use in industrial environments. HTTP, HTTPS, SNTP, SNMP, FTP, BootP, DHCP, DNS and other protocols simplify integration into IT environments. Integrated Web pages and Web-based visualization provide IT applications with real-time process data. Furthermore, the PLC incorporates library functions for email, SOAP, ASP, IP configuration, ETHERNET sockets and file system.

Worldwide Approvals

International approvals for building and industrial automation, as well as the process and marine industries, guarantee worldwide use — even under harsh operating conditions, including ATEX, BR-Ex, IECEx, UL508, UL ANSI/ISA and ship construction.

Modular Expandability

With the WAGO 750 XTR I/O-SYSTEM, the 750 Series Controllers can be expanded to almost any input/output interface. A modular, DIN-rail-mount design permits easy installation, expansion and modification of the I/O module without tools.
The straightforward design prevents installation errors. Field-side connection with the proven CAGE CLAMP® technology offers fast, vibration-proof and maintenance-free connections that are independent of operator skill. Depending on the I/O module's granularity, field peripherals can be directly wired using 1-, 2-, 3- or 4-wire technology.

Maximum Reliability and Ruggedness

The WAGO-I/O-SYSTEM is engineered and tested for use in the most demanding environments (e.g., temperature cycling, shock/vibration loading and ESD, etc.) according to the highest standards. Spring pressure connection technology guarantees continuous operation. Integrated QA measures in the production process and 100 % function testing ensure consistent quality.

Advantages:

- Controllers for all prominent fieldbus systems
- Include industry-specific features
- Programmable via CODESYS per IEC 61131-3
- Expandable with the comprehensive WAGO 750 I/O-SYSTEM product range
- Extensive IT integration possibilities
- Tested and approved worldwide
- Maintenance-free

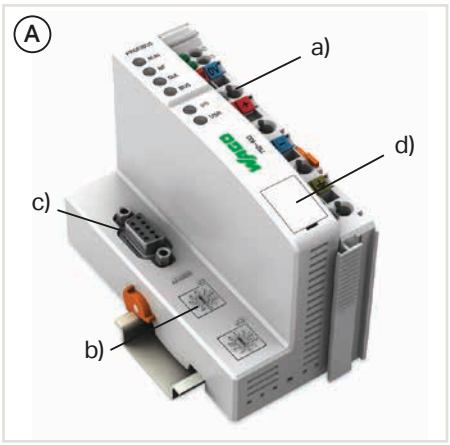
750 Series Controllers
Versions

Extended Temperature Range

Industrial automation technology is typically operated in temperatures ranging from 0 … 55 °C. However, there are applications that require an extended temperature range. Select fieldbus controllers are available in an extended temperature range of −20 … +60 °C.

For extreme cases — when even the extended temperature range is not sufficient — the WAGO 750 XTR I/O-SYSTEM is available.

Interfaces and Types



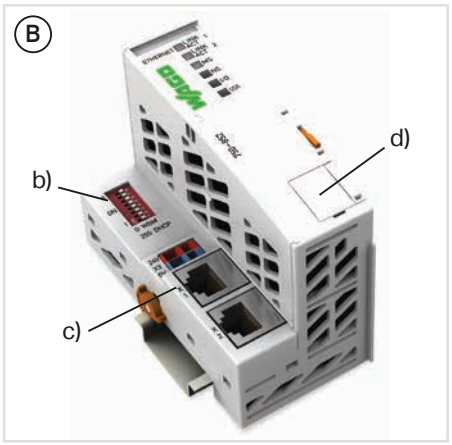
- Technical differences on the connection level; optional addressing switch (b) and fieldbus interface (c)
- Service interface (d)

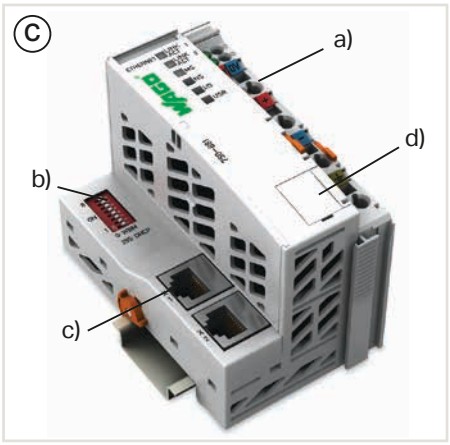
Housing Design (A)

- Includes supply module (a)
- W x H x D (mm) 50.5 x 71.1 x 100

Housing Design ECO (B)

- W x H x D (mm) 49.5 x 71.9 x 96.8



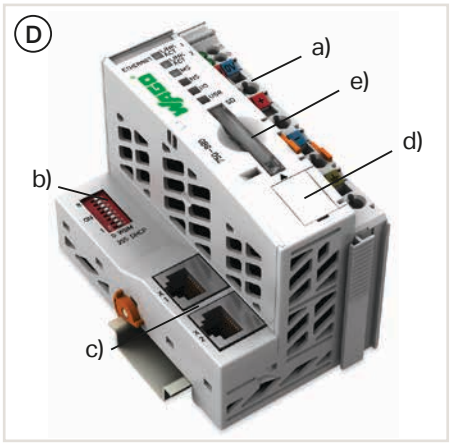


Housing Design (C)

- Includes supply module (a)
- W x H x D (mm) 61.5 x 71.9 x 100

Housing Design (D)

- Includes supply module (a)
- SD card slot for external storage media (e)
- W x H x D (mm) 61.5 x 71.9 x 100



Item Number Key

0x, 1x:	16-bit CPU	INTERBUS, DeviceNet, MODBUS
2x, 3x:		BACnet, PROFIBUS, CANopen
4x:		ETHERNET
5x:	32 Bit	ETHERNET ECO
7x, 8x:	32-bit multitasking	ETHERNET, telecontrol protocols, media redundancy, KNX IP

.../025−000: Extended temperature range of −20 … +60 °C

750 Series Controllers
Installation Instructions

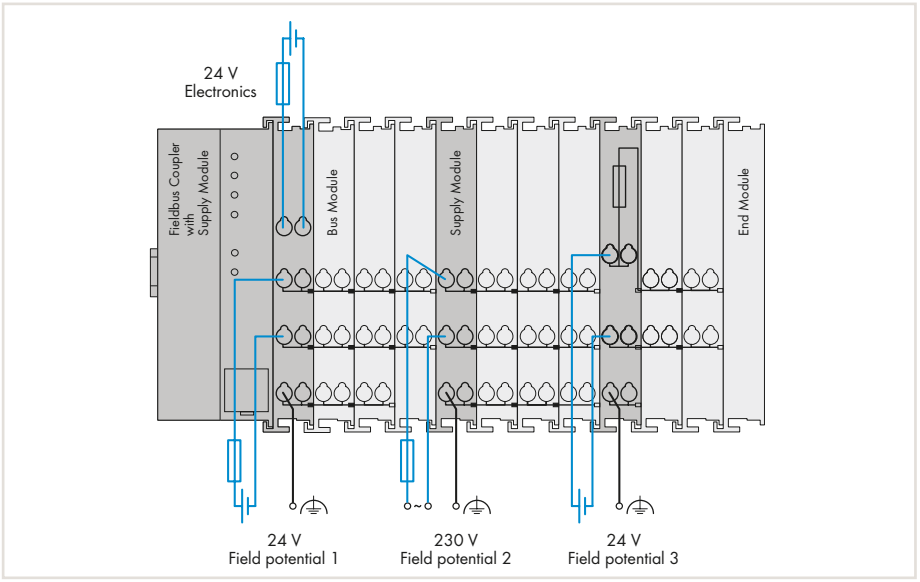
Supply Modules

Power is always channeled to the internal electronics power supply via the controller. The field-side power supply is electrically isolated via the bus supply module on the controller or a separate internal system supply module. The division enables a separate supply for sensors and actuators. Snapping the I/O modules together automatically routes the supply voltages (system power supply 5 VDC via the data contacts and field supply via the optional power jumper contacts). Bus supply modules with diagnostics enable additional monitoring of the power supply. This ensures a flexible, user-specific supply design for a station.
The current supply to the electronics is limited by a maximum value. This value is dependent on the controller used. If the sum of the internal current demand of all the I/O modules should exceed this value, an additional bus supply module is necessary. Even in this case, power supply to the field-side supply of 10 A may not be exceeded. However, different bus supply modules allow a new power supply, formation of potential groups and realization of emergency stop concepts.

Interference-Free in Safety-Related Applications

To safely and easily perform cost-effective, centralized deactivation of complete actuator groups safely, the actuator's power supply can be switched off using a safety switching device. This can either be performed for each individual actuator or by turning off the power supply to a group of control outputs.
In the event of failure, ensure that no interference from other current or power circuits occurs — even when the control voltage is switched off — so the defined safety function properties (logic and time response) remain unchanged.

Some modules are designed to provide interference-free safety functionality. These modules comply with safety requirements up to Category 4 of DIN EN ISO 13849-1:2007. Safety category and performance level depend solely on the safety components and their wiring.



Notice:

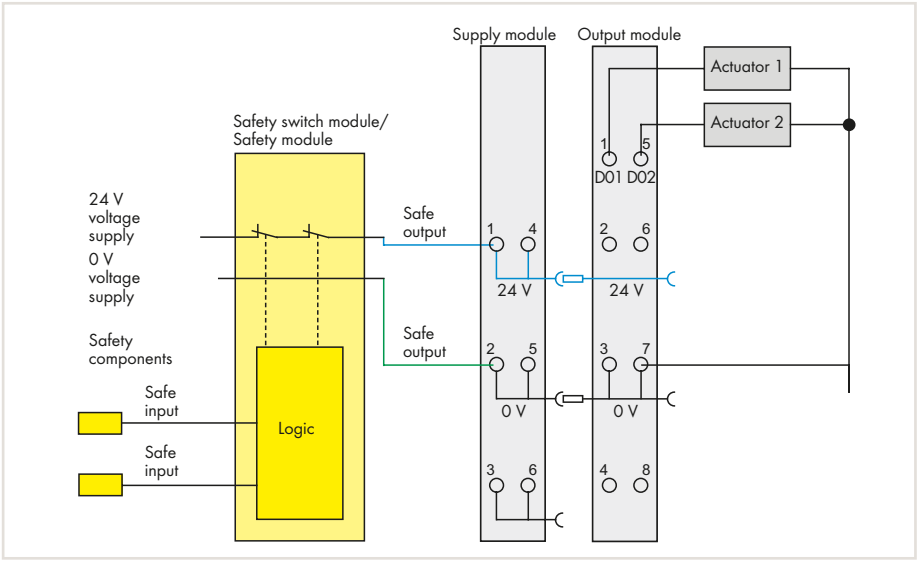
Interference-free WAGO I/O modules are not a component of the safety function and do not replace the safety switching device! When using the components in safety functions, the corresponding notes must be observed in the relevant manual.

Notes

Additional steps must be implemented specifically for the location the I/O-System is installed:

- Specific power and field-side power supply filters (750-624 or 750-626) are required for marine and onshore/offshore applications.
- A specific supply module (750-606) is required to operate intrinsically safe Ex i modules.
- Additionally, both a bus supply module and a field-side power supply filter are recommended when operating intrinsically safe Ex i modules for marine and onshore/offshore applications.
- As part of operating safety-related I/O modules, PELV/SELV power supply units must be used for 24 VDC supply of electronics and field. In addition, specific power and field-side power supply filters must be provided (750-626).

Please refer to the manual for details about the power supply's design.



Example: 2-channel, double-pole power supply disconnection

750 Series Controllers
Standards and Rated Conditions

General Specifications	
System supply voltage	24 VDC (−25 … +30 %)*; *For all shipbuilding certified couplers
Ambient temperature (operation)	0 … +55 °C
Ambient temperature (operation) for versions with an extended temperature range	−20 … +60 °C
Ambient temperature (storage)	−25 … +85 °C
Ambient temperature (storage) for versions with an extended temperature range	−40 … +85 °C
Relative humidity	95 % non-condensing
Relative humidity for versions with an extended temperature range	Max. 95 %, short-term condensation per Class 3K6 / IEC EN 60721-3-3 and E DIN 40046-721-3, taking a temperature range of −20 … +60 °C into consideration (except wind-driven precipitation, water and ice formation)
Operating altitude	Without temperature derating: 0–2000 m; with temperature derating: 2000–5000 m (0.5 K / 100 m); max.: 5000 m
Pollution degree	2 per IEC 61131-2
Vibration resistance	0.5 g (4 g for all shipbuilding certified controllers) per IEC 60068-2-6
Shock resistance	15 g per IEC 60068-2-27
EMC immunity to interference	Per EN 61000-6-2 / shipbuilding applications
EMC emission of interference	Per EN 61000-6-3, EN 61000-6-4, marine applications
Protection type	IP20
Mounting position	Any
Mounting type	On 35 mm DIN rail
Housing material	Polycarbonate, polyamide 6.6
Exposure to pollutants	Per IEC 60068-2-42 and IEC 60068-2-43
Permissible SO2 contaminant concentration at a relative humidity < 75 %	25 ppm
Permissible H2S contaminant concentration at a relative humidity < 75 %	10 ppm
Wire connection	CAGE CLAMP®
Conductor sizes; strip lengths for standard controllers: ECO controllers:	 0.08–2.5 mm²/28–14 AWG; 8–9 mm / 0.31–0.35 inch 0.08–1.5 mm² / 28–16 AWG; 5–6 mm / 0.2–0.24 inch
Current carrying capacity of the power jumper contacts	10 A

750 XTR Controllers

PFC100/PFC200 Controller

- Maximum performance in a minimum space
- Also programmable in high-level languages based on Linux®
- Security packages with SSH and SSL/TLS
- Runtime system for CODESYS 2 (only PFC200) and 3

◄◄◄ Section 3.1

750 Series Controllers

- Controllers for all prominent fieldbus systems
- Programmable to IEC 61131-3
- Ideal combination with the WAGO 750 I/O-SYSTEM modules

◄ Section 3.3

PERSPECTO® Control Panels

- Merging of control and visualization
- 8.9–38.1 cm (3.5–15")

◄◄◄◄ Section 2

PFC200 XTR Controllers

The advantages of the PFC Controller combined with the characteristics for extreme environments:

- High processing speed
- Multiple interfaces
- eXTRemely robust and maintenance-free

◄◄ Section 3.2

750 XTR Controllers

For demanding applications in which the following are critical:

- Extreme temperature stability
- Immunity to electromagnetic interference and impulse voltages
- Vibration and shock resistance

750 XTR Controllers
General Product Information

750 XTR Controllers:
From Standard to eXTReme — Standard for 750 XTR

The 750 XTR Controllers are easily recognized by their dark gray housings. Profit from the unique added value this system brings to extreme environments or applications.

The WAGO 750 XTR I/O-SYSTEM features outstanding characteristics: It is extremely temperature-resistant, immune to interference, as well as insensitive to vibrations and impulse voltages.
This is what makes it the first choice for demanding applications including:

- Marine systems and onshore/offshore industry
- Renewable energy systems (wind turbines, solar systems and biogas plants)
- Transformer stations and power distribution systems
- Petrochemical industry
- Water and wastewater industry
- Custom machines
- Railway applications

3.4

Marine Systems and Onshore/Offshore Industry

International approvals coupled with industry-specific features permit use in shipbuilding and other harsh sectors. Addressing requirements specific to industry and operating environment has enabled use on marine diesels and in the EMC-sensitive area of a vessel's bridge. Because the requirements are significantly greater for immunity to interference or emission of interference and mechanical performance in these sensitive areas, the system can readily meet the needs of other industries.

Telecontrol Technology

Standardized telecontrol protocols according to IEC 60870-5, IEC 61850 or
IEC 61400-25 and DNP3 ensure use of the 750 XTR Controller in telecontrol technology. In addition, increased requirements for dielectric strength according to EN 60870-2-1 are met.
The result is a tailor-made solution for demanding telecontrol applications that readily meets all requirements.

Link between Process Data and IT Application — Even under eXTReme Conditions

The controllers ideally combine real-time requirements with IT functionality. They support both MODBUS/TCP and ETHERNET/IP for use in industrial environments. HTTP, SNTP, SNMP, FTP, BootP, DHCP, DNS and other protocols simplify integration into IT environments. Integrated Web pages and Web-based visualization provide IT applications with real-time process data. Furthermore, the PLC incorporates library functions for email, SOAP, ASP, IP configuration, ETHERNET sockets and file system.

Modular Expandability

With the WAGO 750 XTR I/O-SYSTEM, the controllers can be expanded to almost any input/output interface. Using the same standard platform has given the XTR the same proven advantages.

Worldwide Approvals

International approvals for industrial automation, building technology, shipbuilding and onshore/offshore applications guarantee worldwide use even under harsh operating conditions, e.g., Germanischer Lloyd, Det Norske Veritas, American Bureau of Shipping, Korean Register of Shipping, Nippon Kaiji Kyokai, Registro Italiano Navale and Polski Rejestr Stratkow.

Superior Reliability in Extreme Climates

Regardless of freezing cold, extreme heat and high humidity, the WAGO 750 XTR I/O-SYSTEM is engineered for absolute dependability in virtually any weather. The XTR version of the 750 Series Controller is unfazed by both freezing cold down to −40 °C and scorching heat up to +70 °C. And this applies equally to both start-up and continual operation. The maximum approved operating altitude of 5,000 m is another highlight. Even in the thin air of a mountain-top station, the system impressively demonstrates its high performance and availability.

Additional Protection against Interference Pulses

The WAGO 750 XTR I/O-SYSTEM provides greater isolation up to 5 kV of impulse voltage, lower EMC emission of interference and higher insensitivity to EMC interference.
These strengths add up to trouble-free operation.

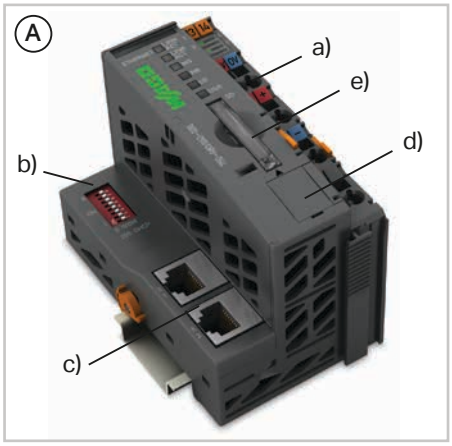
High Mechanical Performance

Automation systems must be particularly vibration-resistant, especially when installed close to vibration-prone and shock-generating system components. Powerful motors and power circuit breakers are just two examples from a wide range of applications. The WAGO 750 XTR I/O-SYSTEM continues to set new standards here. Count on long-lasting, trouble-free operation and industry-topping levels of safety — even in the most severe applications, such as tunnel boring machines.

Advantages:

- Controls for eXTReme environmental conditions
  - Needs no climate control
  - Application in unshielded areas
  - Application in vibration- or shock-generating system part
- Extensive IT integration possibilities
- Expandable with the comprehensive WAGO 750 XTR I/O-SYSTEM product range
- Maintenance-free
- Vibration-proof, fast and maintenance-free CAGE CLAMP® spring connections

750 XTR Controllers
Interfaces and Types



- Includes supply module (a)
- Technical differences on the connection level; addressing switch (b) and fieldbus interface (c)
- Service interface (d)

Housing design (A)

- SD card slot for external storage media (e)
- W x H x D (mm) 61.5 x 71.9 x 100

Housing design ECO (B)

- W x H x D (mm) 50.5 x 71.1 x 100

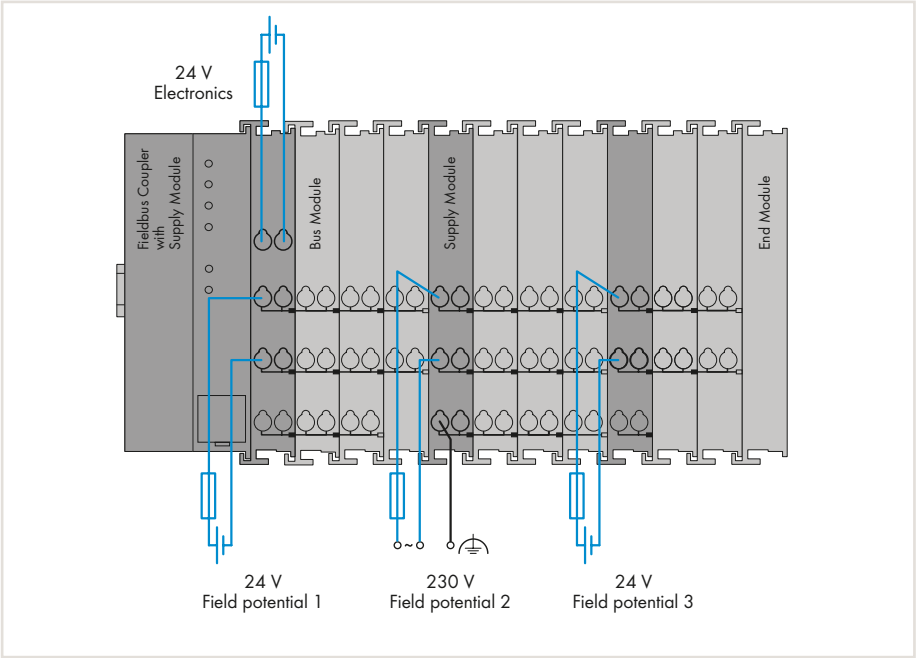
750 XTR Controllers
Installation Instructions

Supply Modules

Power is always channeled to the internal electronics power supply via the controller. The power supply to the field-side supply is electrically isolated. The division enables a separate supply for sensors and actuators. The I/O modules' connections automatically lead to transferring the supply voltages. Bus supply modules with diagnostics enable additional monitoring of the power supply. This ensures a flexible, user-specific supply design for a station.
The current supply to the electronics is limited by a maximum value. This value is dependent on the controller used. If the sum of the internal current demand of all the I/O modules should exceed this value, an additional bus supply module is necessary. Even in this case, power supply to the field-side supply of 10 A may not be exceeded. However, different bus supply modules allow a new power supply, formation of potential groups and the implementation of emergency stop concepts.



Interference-Free in Safety-Related Applications

To safely and easily perform cost-effective, centralized deactivation of complete actuator groups safely, the actuator's power supply can be switched off using a safety switching device. This can either be performed for each individual actuator or by turning off the power supply to a group of control outputs.
In the event of failure, ensure that no interference from other current or power circuits occurs — even when the control voltage is switched off — so the defined safety function properties (logic and time response) remain unchanged.

All modules are designed to provide interference-free safety functionality. These modules comply with safety requirements up to Category 4 of DIN EN ISO 13849-1:2007. Safety category and performance level depend solely on the safety components and their wiring.

Notice:

Interference-free WAGO I/O modules have no active influence on the safety function, they are not an active part of the safety application and are not a substitute for the safety switching device! When using the components in safety functions, the corresponding notes must be observed in the relevant manual.

Notes

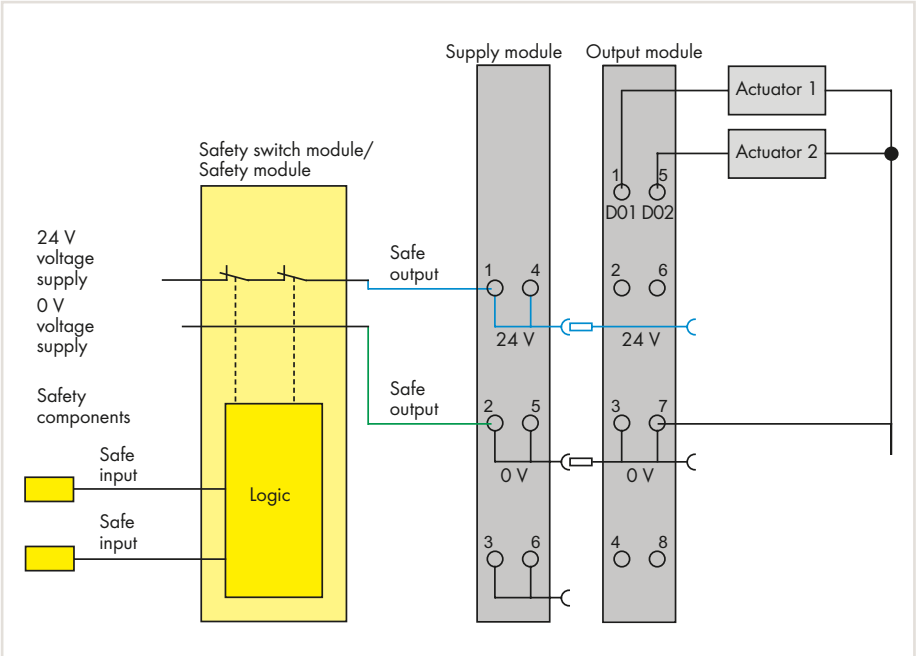
Additional steps must be implemented specifically for the location the I/O-System is installed:

- Specific power and field-side power supply filters (750-624/040-001 or 750-626/040-000) are required for marine and onshore/offshore applications, as well as in telecontrol and rail technology.

Please refer to the manual for details about the power supply's design.

Mixed Operation

Mixed operation (standard/XTR I/O modules) within a node is possible when groups of modules are electrically isolated on the field side, i.e., electrically isolated power supply. The combination may be useful, for example, when there are only increased requirements for dielectric strength and immunity to interference, but the ambient temperature is not critical.



750 XTR Controllers
Standards and Rated Conditions

General Specifications	
System supply voltage	24 VDC (−25 … +30 %) Specified values for ambient temperature under laboratory conditions +15 °C… +35 °C. Derating for −40 … +55 °C: 24 V (−25 … +20 %)*. Derating for +55 … +70 °C: 24 V (−25 … +10 %)*. *Including 15 % residual ripple (lower limit −27.5 %)
Ambient temperature (operation)	−40 … +70 °C
Ambient temperature (storage)	−40 … +85 °C
Relative humidity	Max. 95 %, short-term condensation per Class 3K7 / IEC EN 60721-3-3 and E DIN 40046-721-3 (except wind-driven precipitation, water and ice formation)
Operating altitude	Without temperature derating: 0–2000 m; with temperature derating: 2000–5000 m (0.5 K / 100 m); max.: 5000 m
Pollution degree	2 per IEC 61131-2
Dielectric strength	Per (EN 60870-2-1) Modules ≤ 50 V: 510 VAC / 775 VDC; Modules > 50 V: 2.5 kVAC / 3.5 kVDC Isolation: Rated impulse voltage Modules ≤ 50 V: 1 kV (Class VW1 per EN 60870-2-1) Modules > 50 V: 5 kV (Class VW3 per EN 60870-2-1) Surge: Modules ≤ 50 V: 1 kV (L – L) / 2 kV (L – E) Module > 50 V: 2 kV (L - L) / 4 kV (L – E)
Vibration resistance	Per IEC 60068-2-6 (acceleration: 5 g), EN 60870-2-2, IEC 60721-3-1, -3, EN 50155, EN 61373
Shock resistance	Per IEC 60068-2-27 (15 g/11 ms/half-sine/1,000 shocks; 25 g/6 ms/1,000 shocks), EN 50155, EN 61373
EMC immunity to interference	EN 61000-6-1, EN 61000-6-2, EN 61131-2 Marine applications, EN 50121-3-2, EN 50121-4 EN 50121-5, EN 60255-26, EN 60870-2-1 EN 61850-3, IEC 61000-6-5, IEEE 1613, VDEW: 1994
EMC emission of interference	EN 61000-6-3 and EN 61000-6-4, EN 61131-2 EN 60255-26, marine applications EN 60870-2-1 (industrial and residential areas) EN 61850-3 (industrial and residential areas) EN 50121-3-2, EN 50121-4, EN 50121-5
Protection type	IP20
Mounting position	Horizontal (standing/lying) or vertical
Mounting type	On 35 mm DIN rail
Housing material	Polycarbonate, polyamide 6.6
Exposure to pollutants	Per IEC 60068-2-42 and IEC 60068-2-43
Permissible SO_2 contaminant concentration at a relative humidity < 75 %	25 ppm
Permissible H_2S contaminant concentration at a relative humidity < 75 %	10 ppm
Wire connection	CAGE CLAMP®
Conductor sizes; strip lengths	0.25–2.5 mm² / AWG 24–14; 8–9 mm / 0.31–0.35 inch
Current carrying capacity of the power jumper contacts	10 A

I/O-System — 750 and 753 Series — One System for Every Application
General Product Information

One System for Every Application

The WAGO 750/753 I/O-SYSTEM is characterized by its universal application scope and extensive product portfolio. With more than 500 different modules, the versatility and flexibility is so great that virtually every requirement in a wide range of industries is covered.

Industrial Automation

The wide selection of I/O modules for various potential and signal types, as well as special functions, makes it possible to economically wire sensors/actuators — even in safety-related applications.

Building automation

The broad portfolio allows for flexible, cellar-to-ceiling solutions with conventional I/O modules, standardized industry-specific fieldbus protocols and subsystems for typical applications in lighting, shading, heating, ventilating and air conditioning (HVAC) and much more.

Marine and Onshore/Offshore Automation

International approvals coupled with industry-specific features permit use in shipbuilding and other harsh sectors. Addressing requirements specific to industry and operating environment has enabled use on marine diesels and in the EMC-sensitive area of a vessel's bridge. Because the requirements are significantly greater for immunity to interference or emission of interference and mechanical performance in these sensitive areas, the system can readily meet the needs of other industries.

Process automation

Even under the harshest environmental conditions, use is possible with special approvals. Potential hazardous area applications include oil and gas production, the chemical industry and power generation. The I/O-System can be installed in Zone 2/22 with its intrinsically safe I/O modules, making it possible to connect sensors/actuators in Zones 1/21 and 0/20.

Maximum Fieldbus Independence

The system's modularity is also reflected in its support for numerous fieldbus systems and ETHERNET standards. Depending on the application, it is possible to choose between fieldbus couplers and communication modules for different protocols.

Easy to Use

A modular, DIN-rail-mount design permits easy installation, expansion and modification of the I/O module without tools. The streamlined design prevents installation errors. In addition, proven CAGE CLAMP® technology offers fast, vibration-proof and maintenance-free connections that are independent of operator skill. Depending on the I/O module's granularity, field peripherals can be directly wired using 1-, 2-, 3- or 4-wire technology.

Worldwide Approvals

International approvals for building and industrial automation, as well as the process and marine industries, guarantee worldwide use, even under more rigorous operating conditions including ATEX, BR-Ex, IECEx, UL508, UL ANSI/ISA and ship construction.

Extremely Compact

WAGO's patented mechanical design leads to extremely compact I/O nodes. In fact, select I/O modules can accommodate up to 16 channels in a 12 mm (1/2") wide housing.

- Finely granular I/O modules for node customization.
- Space-saving design permits high integration density and direct connection.

Maximum Reliability and Ruggedness

The WAGO-I/O-SYSTEM is engineered and tested for use in the most demanding environments in accordance with the highest standards, e.g., those required in marine applications. The system is distinguished from other products that are solely intended for industrial use because of:

- Greatly increased vibration rating.
- Significantly greater immunity to interference (ESD).
- Lower emission of interference.
- Larger voltage fluctuation range.
- Greater strength for continuous operation in upper temperature ranges.

In addition, CAGE CLAMP® spring pressure connections ensure superior reliability.
Integrated QA measures in the production process and 100 % function testing ensure consistent quality.

Clear Identification

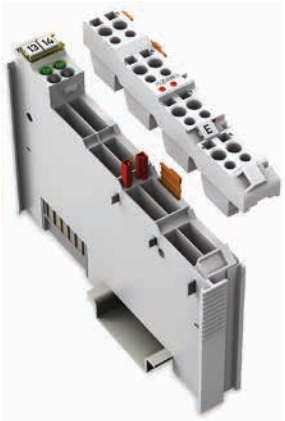
I/O module functionality is identified via marker carriers (integrated or as option). Terminal assignment and technical data are printed onto the side of the I/O module. The WAGO WSB marker system also allows module- and channel-related identification.

Advantages:

- Fieldbus-independent — Support all standard fieldbus protocols & ETHERNET standards
- Flexible platform adapts to diverse applications and environments
- Tested and approved worldwide
- Wide range of accessories for marking system and connection technology
- Vibration-proof, fast and maintenance-free CAGE CLAMP® connections

750 and 753 I/O-System
Versions

Pluggable Connector



The pluggable connections of the WAGO 753 I/O-SYSTEM allow quick and safe replacement. Optional coding pins prevent inserting the pluggable connector in the wrong I/O module. Replacing and connecting the I/O module requires no further action and eliminates possible errors — permanent wiring.
Alternatively, field wiring is possible via interface modules that can be connected to the I/O-System using a ribbon cable (see “Types”).

Extended Temperature Range

Industrial automation technology is typically operated in temperatures ranging from 0 … 55 °C. However, there are applications that require an extended temperature range.
For these applications, WAGO offers a line of WAGO 750 I/O-SYSTEM products for temperatures ranging from
−20 … +60 °C.
For extreme applications, where even this extended temperature range is not sufficient, the WAGO 750 XTR I/O-SYSTEM is available.

Functional Safety

In the European Union, the machinery directive defines the requirements for machine and system safety. This ensures a uniform standard for the protection of “life and limb” for people within a machine’s operating area.

The required risk assessment is based on harmonized standards (e.g., EN 13849) that identify existing risks and required risk reduction (SIL or PL quality). Based on the risk assessment, safety functionality can be implemented, e.g., by presence detection or protection zone violations using secure switches or light arrays to immediately shutdown the “risk”. For this purpose, the safety signals are detected by the “yellow” safety modules and transmitted via “PROFIsafe” to the fail-safe PLC for further processing. The result is then executed via a safe actuator (output module, controller, etc.).

The unique safety characteristic values of the WAGO modules facilitate calculation of the final safety function up to Cat. 4/PLe according to EN 13849, or SIL3 according to EN 62061 or IEC 61511.

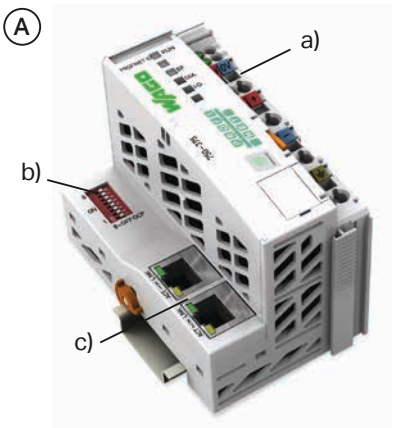
The mixed operation of safe and conventional I/O modules streamlines system configuration. For increased EMC immunity required according to the standard, WAGO offers compact filter modules for the power supply. Specific power supply features must be considered, which are described in detail in the corresponding manuals.

Use in Hazardous Areas

In many plants across the chemical and petrochemical industries, as well as in the production and process automation sectors, installations are operated that process explosive gas- or dust-air mixtures. For this reason, electrical equipment must be explosion-proof in order to avoid injuries to personnel and equipment damages.
The modules within the WAGO 750 I/O-SYSTEM are designed for use in both non-hazardous and hazardous areas. The direct application of fieldbus technology in hazardous areas is typically resource-intensive. When used in hazardous areas of Zone 2/22, the WAGO-I/O-SYSTEM 750 offers a safe, easy and economical connection to the sensors and actuators of Zones 0/20 and 1/21. The “blue” Ex i I/O modules were specially developed for this purpose. They form an intrinsically safe section that can be integrated into a standard fieldbus node, offering all the advantages of a state-of-the-art fieldbus technology. The WAGO 750 I/O-SYSTEM is also approved for mining applications.

750 and 753 I/O-System
Interfaces and Types

A



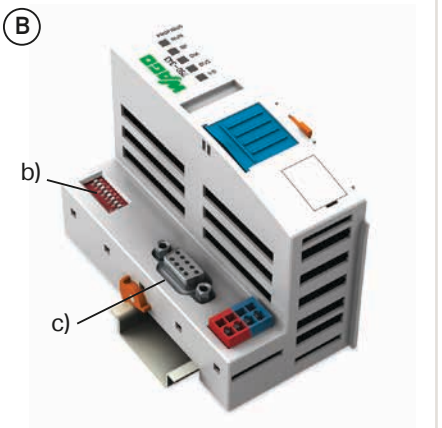
Housing Design Fieldbus Coupler (A)

- Including supply module (a) to power downstream I/O modules
- Technical differences on the connection level.
  Optional address switch (b) and fieldbus interface (c)
- W x H x D (mm) 50.5 x 71.1 x 100 or
- W x H x D (mm) 61.5 x 71.9 x 100

Housing Design Fieldbus Coupler ECO (B)

- Restriction on power supply and data width
- W x H x D (mm) 49.5 x 71.9 x 96.8

B



C

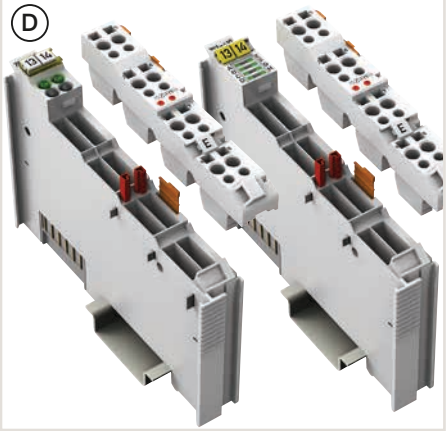
Housing Design 750 (C)

- 8 connection points (CAGE CLAMP®)
- W x H x D (mm) 12 x 69.8 x 100 (4 LEDs)
- W x H x D (mm) 12 x 67.8 x 100 (8 LEDs)

Housing Design 753 (D)

- Pluggable connector
- 8 connection points (CAGE CLAMP®)
- W x H x D (mm) 12 x 69.8 x 100 (4 LEDs)
- W x H x D (mm) 12 x 69 x 100 (8 LEDs)

D



E

Housing Design 750 (E)

- 16 connection points (push-in CAGE CLAMP®)
- W x H x D (mm) 12 x 69 x 100

Housing Design (F)

- For time-saving wiring between I/O-System and interface modules
- Ribbon cable connector for connection to 289 Series Interface Modules and JUMPFLEX® Interface Adapter
- W x H x D (mm) 12 x 74.1 x 100

F

G

Housing Design Double Width (G)

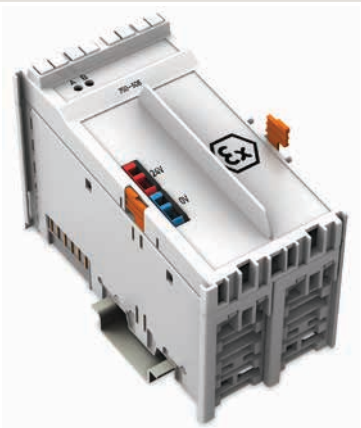
Some modules are integrated into a double housing to address specific technological needs. Despite utilizing the same standardized housing, these modules are twice as wide.

- W x H x D (mm) 24 x 69.8 x 100

Special Housing Design (H)

Some modules are integrated into a specialized housing with a specific width and pluggable connectors. The dimensions are specified on the respective catalog page.

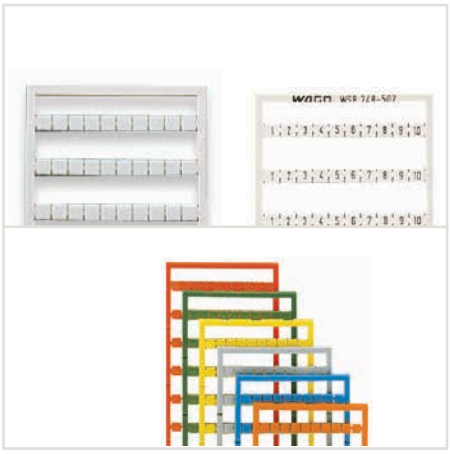
H



750 and 753 I/O-System
Markings and Mounting Accessories

Transparent group marker carriers indicate module type by color.

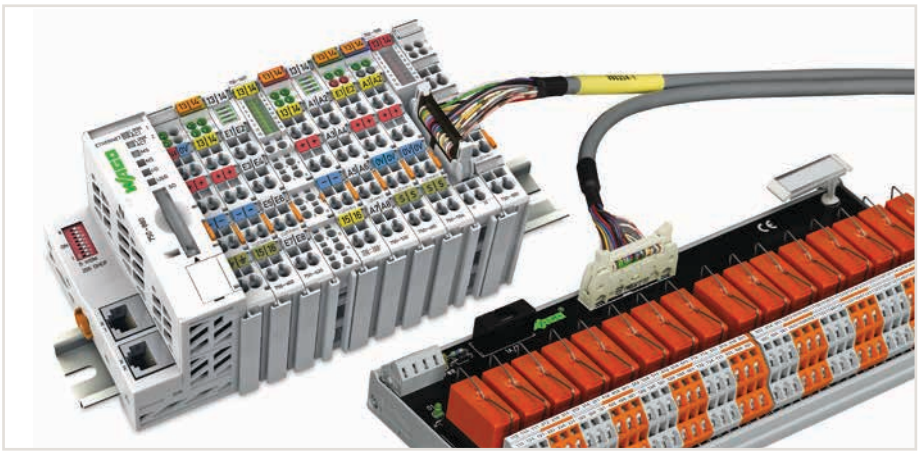
Removable group marker carriers are available for all 750 and 753 I/O modules with a maximum of four LEDs, as well as all fieldbus couplers with a supply module.



Mini-WSB quick marking system, blank, pre-marked and colored; suitable for all 750 and 753 I/O modules.

Marker carrier for one single I/O module, suitable for all 750 and 753 I/O modules; the marker carrier can be placed in the upper, Mini-WSB carrier plate.

Marker carrier for one I/O node; both versions (750-106 and 750-107) permit continuous marking regardless of the I/O module housing used.



Interface modules for system wiring

Interface cables

750 and 753 I/O-System
Application and Installation Instructions

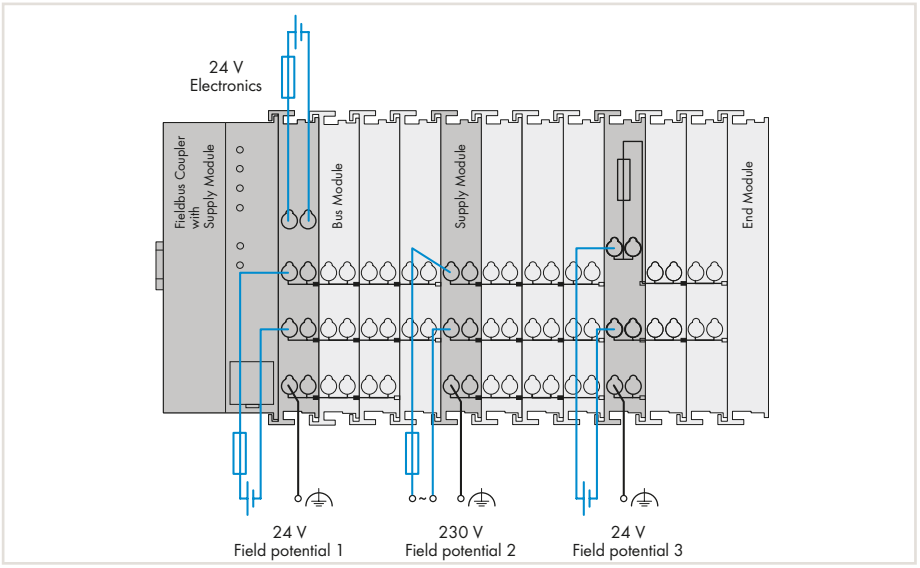
Supply Modules

Power is normally channeled to the internal electronics power supply by the fieldbus coupler. The field-side power supply is electrically isolated via the bus supply module on the fieldbus coupler or a separate internal system supply module. The division enables a separate supply for sensors and actuators. Snapping the I/O modules together automatically routes the supply voltages (system power supply 5 VDC via the data contacts and field supply via the optional power jumper contacts). Bus supply modules with diagnostics enable additional monitoring of the power supply. This ensures a flexible, user-specific supply design for a station. The current supply to the electronics is limited by a maximum value. This value depends on the fieldbus coupler used. If the sum of the internal current demand of all the I/O modules should exceed this value, an additional bus supply module is necessary. Even in this case, power supply to the field-side supply of 10 A may not be exceeded. However, different bus supply modules allow a new power supply, formation of potential groups and realization of emergency stop concepts.

Interference-Free in Safety-Related Applications

To easily and safely perform cost-effective, centralized deactivation of complete actuator groups safely, the actuator's power supply can be switched off using a safety switching device. This can either be performed for each individual actuator or by turning off the power supply to a group of control outputs. In the event of failure, ensure that no interference from other current or power circuits occurs — even when the control voltage is switched off — so the defined safety function properties (logic and time response) remain unchanged.

Some modules are designed to provide interference-free safety functionality. These modules comply with safety requirements up to Category 4 of DIN EN ISO 13849-1:2007. Safety category and performance level depend solely on the safety components and their wiring.



Notice:

Interference-free WAGO I/O modules are not a component of the safety function and do not replace the safety switching device! When using the components in safety functions, the corresponding notes must be observed in the relevant manual.

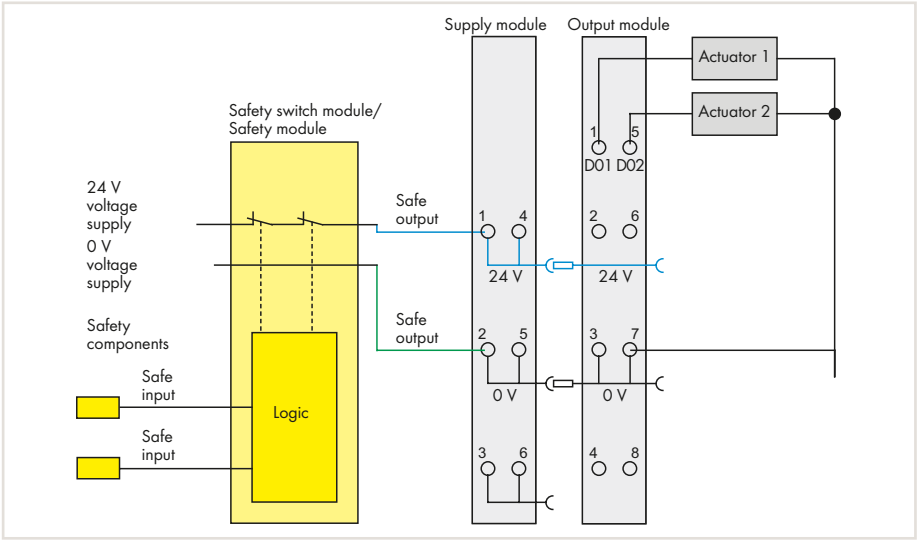
Notes

Additional steps must be implemented specifically for the location the I/O-System is installed:

- Specific power and field-side power supply filters (750-624 or 750-626) are required for marine and onshore/offshore applications.
- A specific bus supply module (750-606) is required to operate intrinsically safe Ex i modules.

- Additionally, both a bus supply module and a field-side power supply filter are recommended when operating intrinsically safe Ex i modules for marine and onshore/offshore applications.
- For the 24 VDC power supply of electronics and field, PELV/SELV power supply units are recommended. As part of safety-related applications, they are mandatory. The mixed operation of safe and conventional I/O modules streamlines system configuration. For increased EMC immunity required according to the standard, WAGO offers compact filter modules for the power supply.

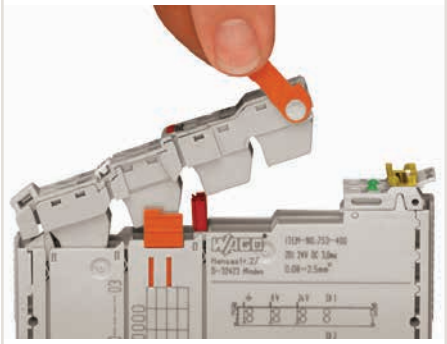
Please refer to the manual for details about the power supply's design.



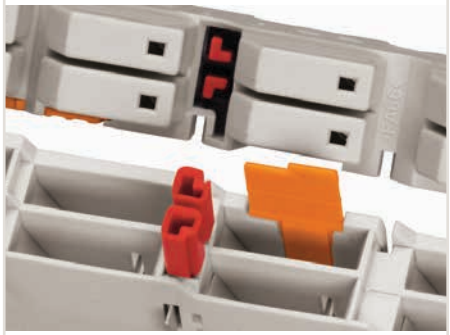
Example: Two-channel, double-pole power supply disconnection

750 and 753 I/O-System
Application and Installation Instructions

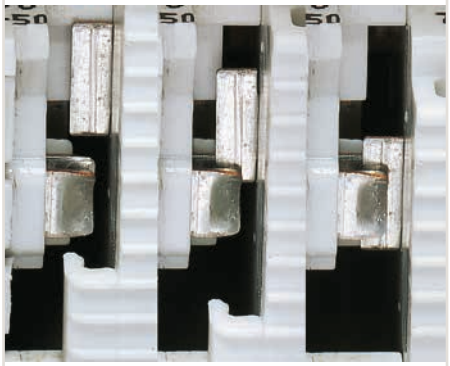
Attachment/release on the mounting rail



Releasing the pluggable connector



Optional protection against mismating pluggable connectors via coding elements



Secure, automatic connection of the power supply by self-cleaning power jumper contacts

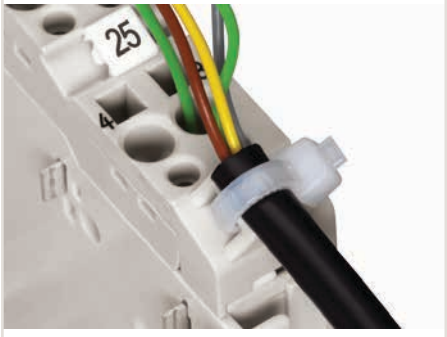
Notice:

For some I/O modules, not all power jumper contacts are made! An I/O module with three power jumper contacts (e.g., 2-channel digital input) cannot be snapped into place behind an I/O module in which not every contact is made.

To increase electromagnetic compatibility (EMC), some components are connected to the DIN-rail by a discharge contact. The DIN-rail must always have a low-resistance connection to the ground potential.

Wide range of accessories available for EMC-compliant installation, including shield connection

Secure, automatic connection of the data and electronics power supply by gold-plated pressure contacts



Securing the cable to the connector

Service interface for configuring the fieldbus coupler; connectivity via configuration cable or radio adapter

Fieldbus Coupler PROFIBUS DP

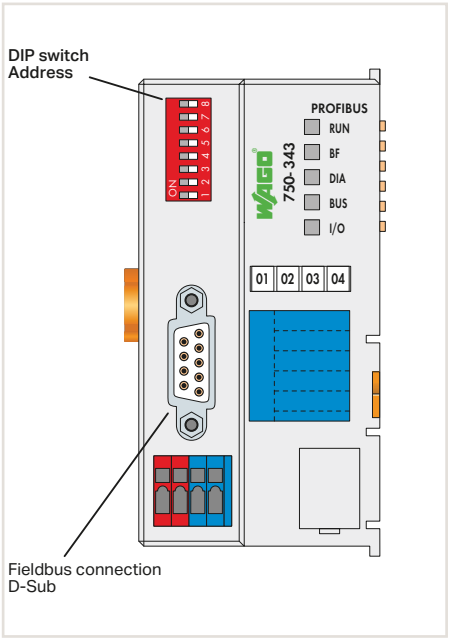
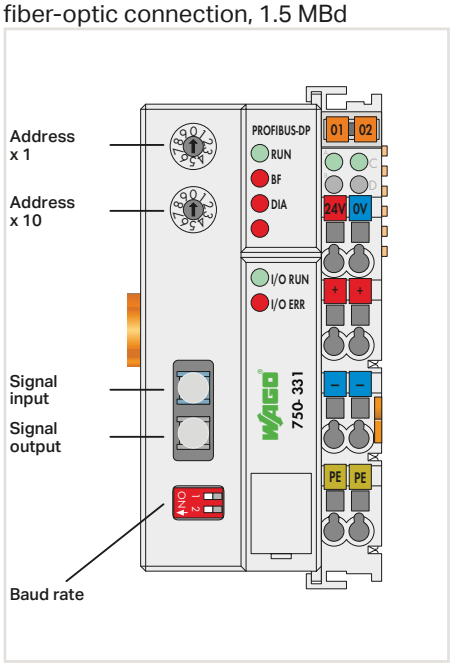
Figure: 750-343

Figure: 750-331

12 MBd, ECO



fiber-optic connection, 1.5 MBd



Item Description	FC PROFIBUS	FC PROFIBUS
Version	12MBd ECO	FOC 1.5MBd
Item No.	**750-343**	**750-331**
Technical Data		
Fieldbus	PROFIBUS	PROFIBUS
Protocols	PROFIBUS DP	PROFIBUS DP
Connection technology: Fieldbus input/output	D-Sub 9 socket	HP Simplex, FOC plug included with delivery
Number of fieldbus nodes on master max.	125 with repeater	10 in subring
Transmission medium	Copper cable per EN 50170	Fiber optic cable (APF fiber)
Baud rate	9.6 kBd … 12 MBd	93.75–1500 kBd
Number of I/O modules per node max.	63	64
Input and output process image (internal) max.	32 bytes	128 bytes
System supply voltage	24 VDC (–25 … +30 %)	24 VDC (–15 … +20 %)
Input current typ. at rated load (24 V)	260 mA	500 mA
Total current for system supply	650 mA	1650 mA
Ambient temperature (operation)	0 … +55 °C	0 … +55 °C
Dimensions W x H x D	49.5 x 71.9 x 96.8 mm	50.5 x 71.1 x 100 mm
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx	CE, KC, UL 508
Data sheet and further information, see:	wago.com/750-343	wago.com/750-331

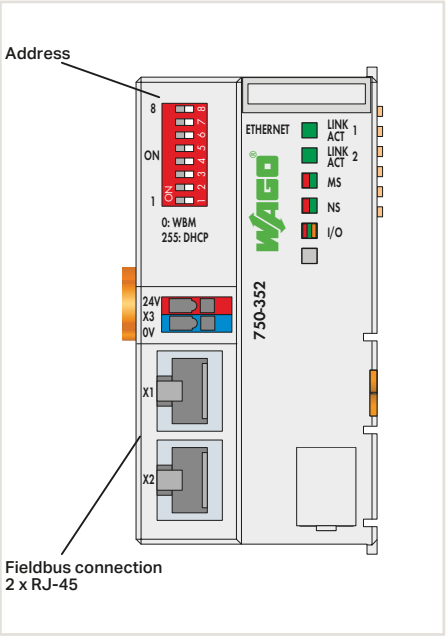
Fieldbus Coupler ETHERNET

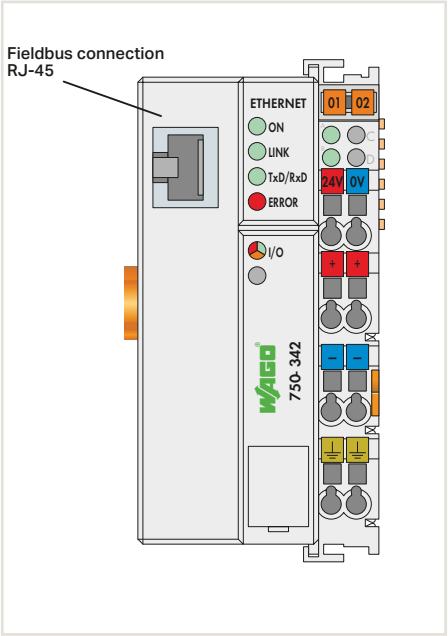
Figure: 750-352

Figure: 750-342

3rd Generation



1st Generation



Item Description	FC ETHERNET		FC ETHERNET
Version	G3	G3	G1
Item No.	**750-352**	**750-352/000-001**	**750-342**
Technical Data			
Fieldbus	EtherNet/IP, MODBUS/TCP		MODBUS/TCP
Protocols	EtherNet/IP*, MODBUS/TCP (UDP), HTTP, BootP, DHCP, DNS, FTP, SNMP		MODBUS/TCP, HTTP, BootP, MODBUS/UDP
Connection technology: Fieldbus input/output	2 x RJ-45		RJ-45
Bus segment length max.	100 m		100 m
Baud rate	10/100 Mbit/s		10 Mbit/s
Number of I/O modules per node max.	250		64
Input and output process image (internal) max.	1020 words		512 bytes
System supply voltage	24 VDC (−25 … +30 %)		24 VDC (−25 … +30 %)
Input current typ. at rated load (24 V)	280 mA		500 mA
Total current for system supply	700 mA		1800 mA
Ambient temperature (operation)	0 … +55 °C		0 … +55 °C
Dimensions W x H x D	49.5 x 71.9 x 96.8 mm		50.5 x 71.1 x 100 mm
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx		CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx
Data sheet and further information, see:	wago.com/750-352		wago.com/750-342

*On variants 750-352/000-001, ETHERNET/IP is activated as standard protocol.

Fieldbus Coupler EtherCAT

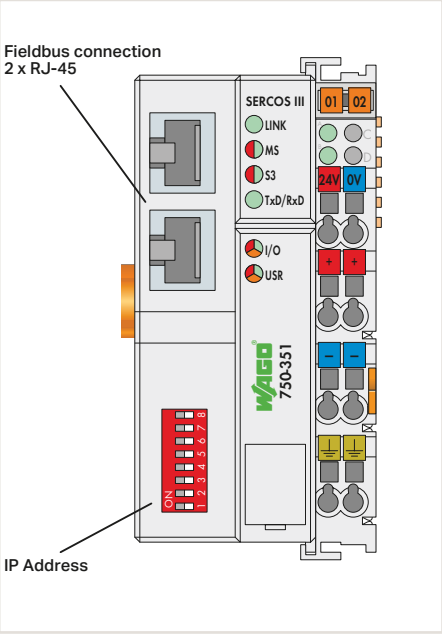
Fieldbus Coupler sercos



Item Description	FC sercos
Bestellnr.	**750-351**
Technical Data	
Fieldbus	sercos
Protocols	sercos, FSP-IO, TCP/IP, FTP, HTTP, BootP, DHCP, SNTP
Supported services	SVC, RTC, CC, IP, Ring break (GDP_Basic, SCP_VarCFG, SCP_Sync)
Connection technology: Fieldbus input/output	2 x RJ-45
SERCOS version	V1.1.1
IO profile	V1.1.1
Number of couplers (slaves) in sercos ring	512
Baud rate	100 Mbit/s, full duplex
Number of I/O modules per node max.	250
Input and output process image (internal) max.	2 KB (RTC and SVC)
System supply voltage	24 VDC (–25 … +30 %)
Input current typ. at rated load (24 V)	500 mA
Total current for system supply	1700 mA
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	50,5 x 71.1 x 100 mm
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx
Data sheet and further information, see:	wago.com/750-351

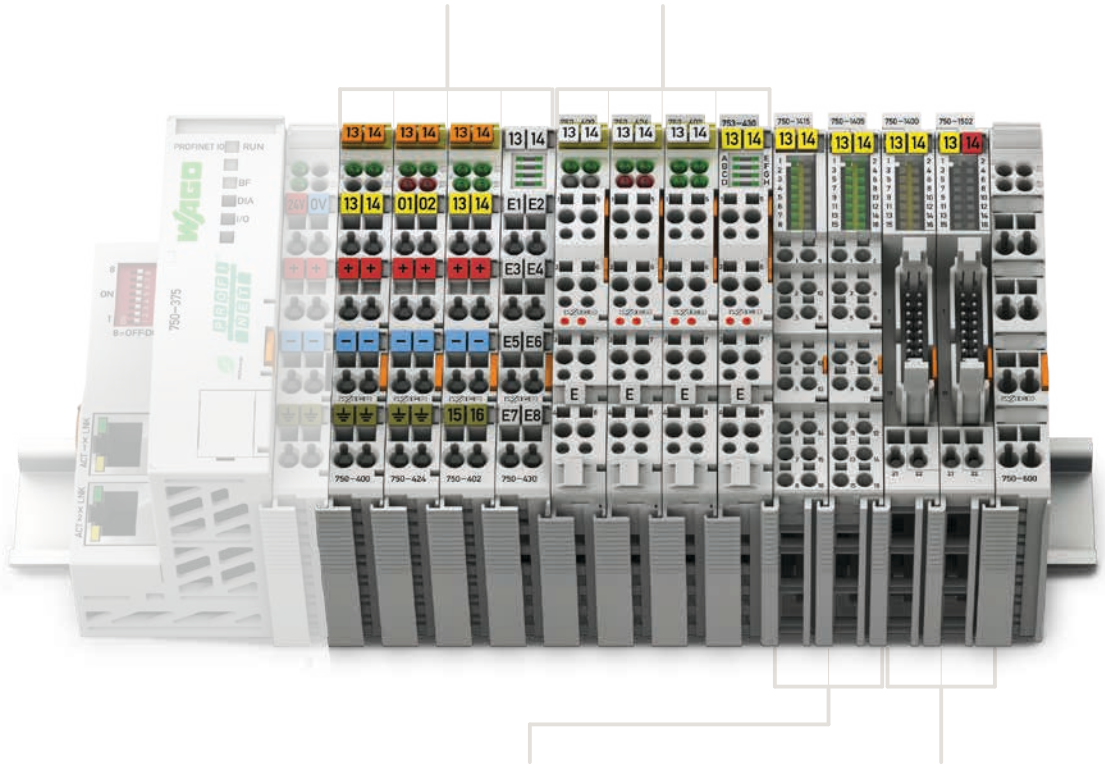
Digital Input Modules

750 Series housing design	
Dimensions W x H x D	Housing with 4 LEDs: 12 x 69.8 x 100 mm Housing with 8 LEDs: 12 x 67.8 x 100 mm
Height from upper edge of DIN rail	Housing with 4 LEDs: 62.6 mm Housing with 8 LEDs: 60.6 mm
Connection technology	CAGE CLAMP®
Conductor size	0.08 … 2.5 mm² / 28 … 14 AWG
Strip length	8 … 9 mm / 0.33 inch

753 Series housing design	
Dimensions W x H x D	Housing with 4 LEDs: 12 x 69.8 x 100 mm Housing with 8 LEDs: 12 x 69 x 100 mm
Height from upper edge of DIN rail	Housing with 4 LEDs: 62.6 mm Housing with 8 LEDs: 61.8 mm
Connection technology	CAGE CLAMP®
Conductor size	0.08 … 2.5 mm² / 28 … 14 AWG
Strip length	9 … 10 mm / 0.37 inch



750 Series housing design with push-in CAGE CLAMP® connectors (up to 16 connector points)	
Dimensions W x H x D	12 x 69 x 100 mm
Height from upper edge of DIN rail	61.8 mm
Connection technology	Push-in CAGE CLAMP®
Conductor size	Solid: 0.08 … 1.5 mm² / 28 … 16 AWG Fine-stranded: 0.25 … 1.5 mm² / 22 … 16 AWG
Strip length	8 … 9 mm / 0.33 inch

750 Series housing design, with ribbon cable connector	
Dimensions W x H x D	12 x 74.1 x 100 mm
Height from upper edge of DIN rail	66.9 mm
Connection technology	20-pole male connector + 2 x CAGE CLAMP®
Conductor size	0.08 … 2.5 mm² / 28 … 14 AWG
Strip length	8 … 9 mm / 0.33 inch

Plug		**753-110**
753 Series coding elements		**753-150**

The digital input module receives control signals from NAMUR proximity switches (per DIN EN 60947-5-6) from the field side.
Each channel of the sensors is supplied with a short-circuit-protected voltage of 8.2 V. A short circuit or a wire break is indicated by an error message via 1 bit in the processor image and a red LED.
The green LED indicates the input status:
• Signal current (0) LED off
• Signal current (1) LED on
Electrically isolated field and system levels

Accessories	Item no.
Plug	**753-110**
753 Series coding elements	**753-150**

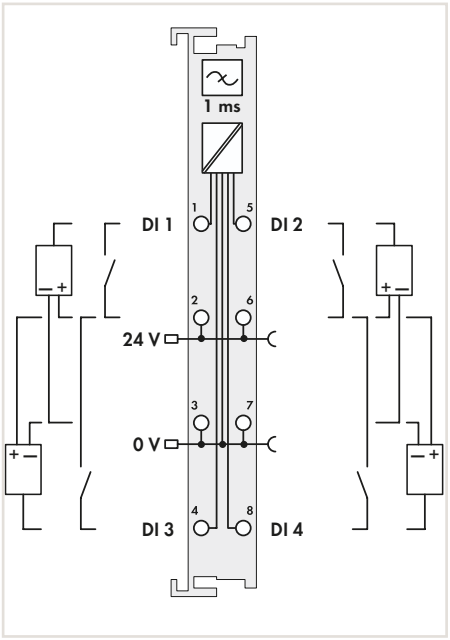
This I/O module incorporates a current loop, which makes it possible to monitor alarm contacts (window contacts) with a fixed resistance ratio (R1, R2), for intruder detection.
The I/O module indicates the status of the connected contact via LEDs and status bits in the processor image.

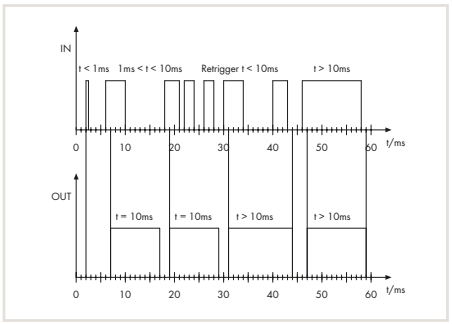
Digital Input, 24 VDC, Pulse Extension

4-channel digital input; 24 VDC;
Pulse extension

Figure: 750-422

Figure: 753-422





This I/O module extends input signals to at least 10 ms. Only signals ≥ 1 ms will be acquired. Input signals with a pulse duration > 10 ms are not extended (without dropoff delay).

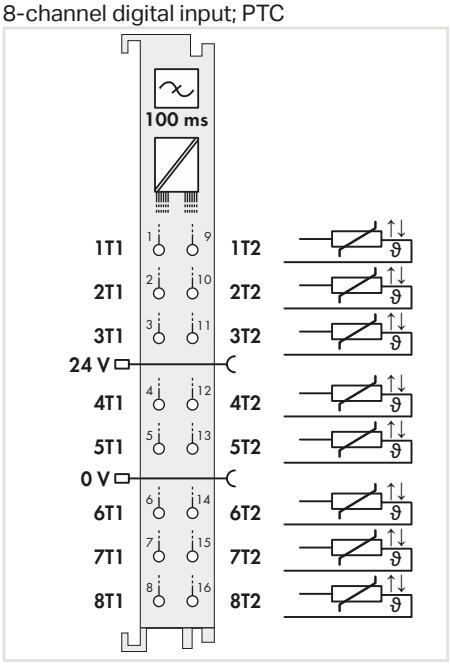
Digital Input, PTC

8-channel digital input; PTC



Item description	8DI
Version	PTC
Item no.	**750-1425**

Technical Data

Number of digital inputs	8
Type of signal	PTC, thermistor per DIN 44081/44082
Sensor	Sensor voltage: ≤ 2.5 V / ≤ 7.5 V (dependent on resistance value); Number of PTCs per channel: Max. 6 in a series; Operating value (status bit "1" to "0"): R ≥ 3 kΩ; Return value (status bit "0" to "1"): ≤ 1.5 kΩ; Hysteresis: R = 1.5 kΩ; Wire break value: R ≥ 8 kΩ; Short circuit value: R ≤ 20 Ω
Input filter (digital)	100 ms
Output current max.	0.001 A
Field supply voltage	24 VDC (–25 … +30 %), via power jumper contacts
Internal data width	8 bits
Isolation	500 V system/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69 x 100 mm
Approvals	CE, Marine, UL 508*, ANSI/ISA*, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-1425

*pending

The PTC module is used to connect PTC thermistors according to DIN 44081 and DIN 44082 for thermal monitoring (overload protection) of motors, machinery, bearings, etc. Up to six PTC thermistors can be connected in series per channel. If the nominal response temperature (ϑnat) is exceeded, a bit in the input processor image of the I/O module is set. In addition, wire breaks and short circuits are monitored for each channel; if an error occurs, a bit is also set in the input processor image. The I/O module is equipped with one green and one red status LED per channel to indicate excessive temperature or wiring errors.

Digital Output Modules

750 Series housing design

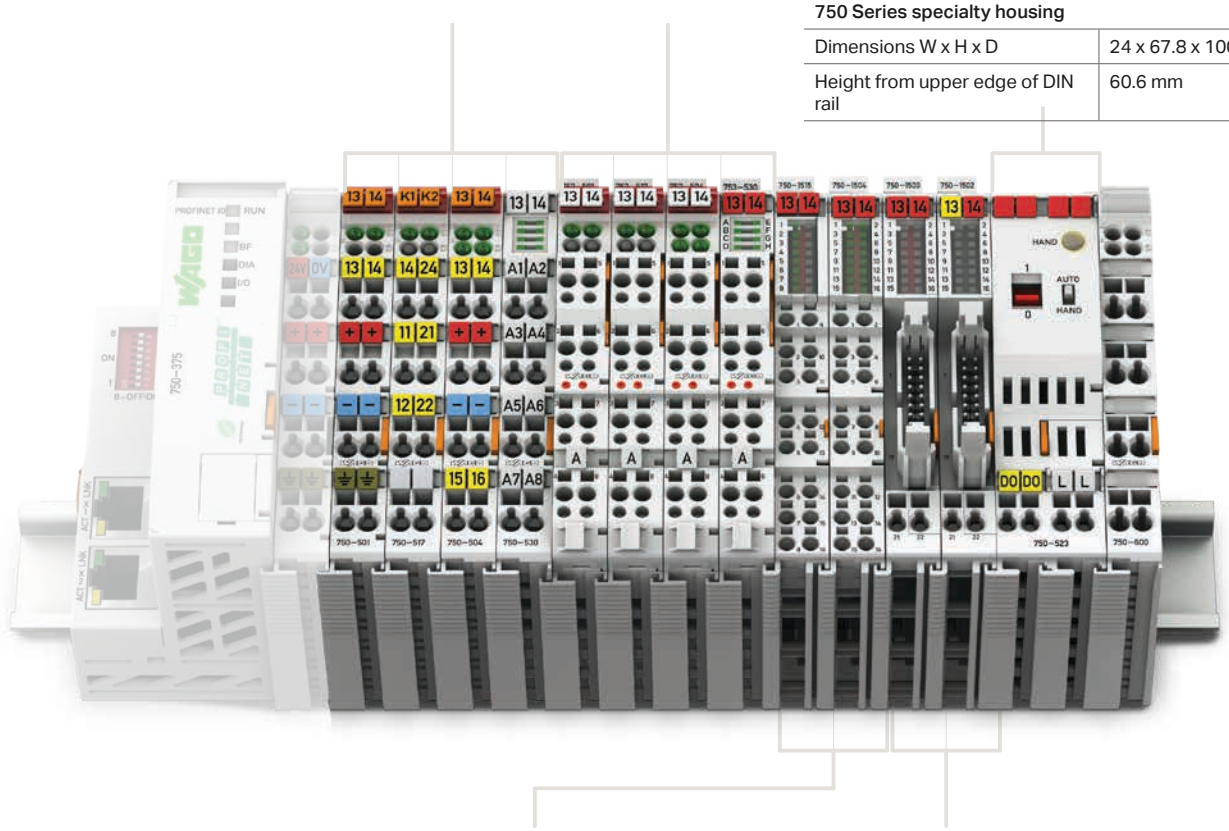
Dimensions W x H x D	Housing with 4 LEDs: 12 x 69.8 x 100 mm Housing with 8 LEDs: 12 x 67.8 x 100 mm
Height from upper edge of DIN rail	Housing with 4 LEDs: 62.6 mm Housing with 8 LEDs: 60.6 mm
Connection technology	CAGE CLAMP®
Conductor size	0.08 … 2.5 mm² / 28 … 14 AWG
Strip length	8 … 9 mm / 0.33 inch

753 Series housing design

Dimensions W x H x D	Housing with 4 LEDs: 12 x 69.8 x 100 mm Housing with 8 LEDs: 12 x 69 x 100 mm
Height from upper edge of DIN rail	Housing with 4 LEDs: 62.6 mm Housing with 8 LEDs: 61.8 mm
Connection technology	CAGE CLAMP®
Conductor size	0.08 … 2.5 mm² / 28 … 14 AWG
Strip length	9 … 10 mm / 0.37 inch

750 Series specialty housing

Dimensions W x H x D	24 x 67.8 x 100 mm
Height from upper edge of DIN rail	60.6 mm



750 Series housing design with push-in CAGE CLAMP® connectors (up to 16 connector points)

Dimensions W x H x D	12 x 69 x 100 mm
Height from upper edge of DIN rail	61.8 mm
Connection technology	Push-in CAGE CLAMP®
Conductor size	Solid: 0.08 … 1.5 mm² / 28 … 16 AWG Fine-stranded: 0.25 … 1.5 mm² / 22 … 16 AWG
Strip length	8 … 9 mm / 0.33 inch

750 Series housing design, with ribbon cable connector

Dimensions W x H x D	12 x 74.1 x 100 mm
Height from upper edge of DIN rail	66.9 mm
Connection technology	20-pole male connector + 2 x CAGE CLAMP®
Conductor size	0.08 … 2.5 mm² / 28 … 14 AWG
Strip length	8 … 9 mm / 0.33 inch

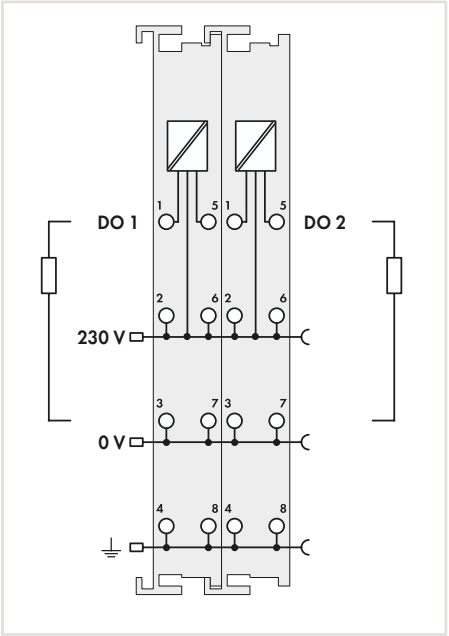
Digital Output, 230 VAC

2-channel digital output; 230 VAC;
Solid-state



Item description	2DO
Version	230 VAC SSR
Item no.	**750-522**

Technical Data	
Number of digital outputs	2
Type of signal	35 … 230 VAC
Output switching design	2 make contacts, solid-state load relay
Output current per channel	0,5 A
Actuator connection	2-conductor, 3-conductor, 4-conductor
Diagnostics	Overload
Field supply voltage	35 … 230 VAC, via power jumper contacts
Internal data width	2 bits in , 2 bits out
Isolation	3000 V System/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	24 x 69.8 x 100 mm
Approvals	CE, KC, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-522

Notice:
An additional bus supply module must be added for operation with 35 … 230 VAC!

When the U/D input is switched with +24 V, the counting direction is upward. When an input is not switched or is 0 V, the counting direction is downward.

Up counter: The counting is locked when the GATE input is open or 0 V is present. Counting is enabled with +24 V at the GATE input.

Peak-time counter: The count pulses at the CLOCK input are recorded over a pr–set period of 10 seconds.

753 Series coding elements	**753-150**

The digital impulse interface is suitable for connecting magnetostrictive distance measurement sensors with a start/stop interface. After receiving a read pulse, these sensors deliver a time-delayed reply impulse. The time delay is proportional to the sensor distance.
Each sensor may have up to four position transmitters (permanent magnets). Their position data can be accessed serially by the control and are stored in the process image of the fieldbus coupler as a 24-bit value.
Distance sensors with the following features can be used:

- Start/stop interface with RS-422 differential signals
- 24 V sensor supply
- Manufacturer, e.g., Balluff

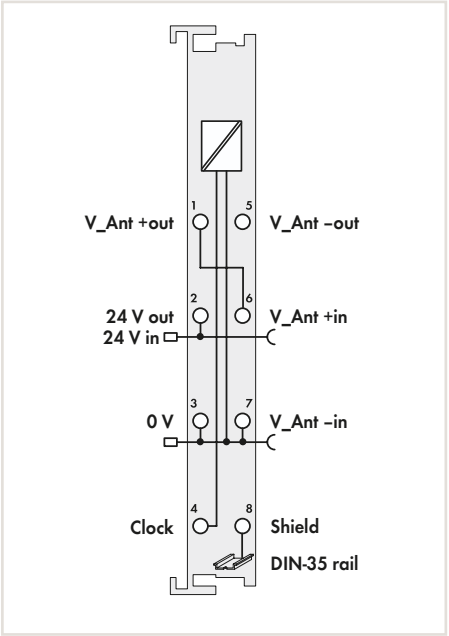
Real time clock Module

Real time clock Module

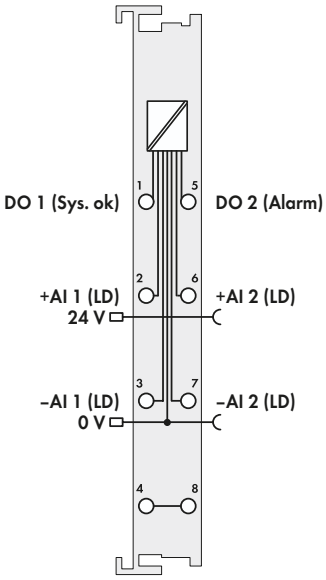


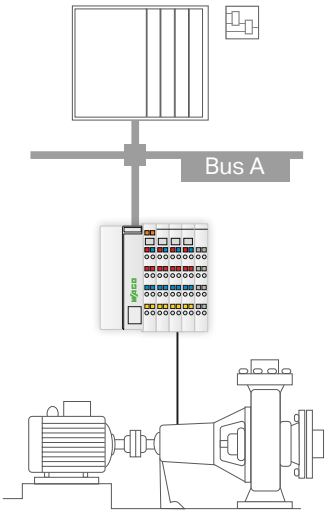
Item description	RTC Module
Item no.	**750-640**
Technical Data	
Drift (clock)	< 2 min./year
Buffer length	> 6 days
Timer	32 channels and switch points (32 x on/off)
Input filter	10 ms
Field supply voltage	24 VDC (–15 % ... +20 %), via power jumper contacts
Internal data width	1 x 40 bits data (in/out) (5 bytes user data); 1 x 8 bits control/status (optional)
Isolation	500 V system/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69.8 x 100 mm
Approvals	CE, KC, cULus UL 508, ANSI/ISA, Ex ATEX/IECEx
Data sheet and further information, see:	wago.com/750-640

The RTC module provides the higher-level control system with the actual time. The time is buffered and continues to run in the event of a power failure. When an external receiver is connected, the clock can be set using the time signal from DCF77, WWVB, or MSF.
By default, the module is set to receive DCF77 signals. The receiver can be supplied directly via the module.
Connecting an external receiver to operate the RTC module is not absolutely necessary.

2-channel vibration velocity/bearing condition monitoring VIB I/O

2-channel vibration velocity/bearing condition monitoring VIB I/O





Item description	2VIB VRMS/SPM Multi
Version	
Item no.	**750-645**

Technical Data

Encoder inputs	+AI1, -AI1, +AI2, -AI2
Number of inputs	2
Oscillating velocity (RMS)	0–100 mm/s
Shock impulse (SPM)	-10 … +80 dbSV
No. of outputs	2 (alarm and system OK)
Configuration	The alarm and warning threshold can be set in the process image or the engineering software.
Outputs	24 VDC, 0.5 A, short-circuit protected
Field supply voltage	24 VDC (–15 % … +20 %), via power jumper contacts
Isolation	500 V system/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 67.8 x 100 mm
Approvals	CE, KC, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-645

Accessories	**Item no.**
Tandem-Piezo acceleration sensor	750-925

This product is used for online monitoring of the machine vibration level. It records the two most important parameters required for condition analysis: vibration severity and roller bearing condition.
The severity of vibration is a measurement of the machine vibration energy and therefore, a suitable indicator for the vibration forces acting on the machine.
The roller bearing condition is evaluated on the basis of high-frequency shock impulse signals. Shock impulses are momentary impulses arising from mechanical damage to roller bearings or the bearing surfaces.
By recording the measurement results and evaluation in a trend curve, bearing damage can be detected at an early stage. A special Tandem-Piezo® acceleration sensor serves as encoder to facilitate simultaneous measurement of machine vibrations and high-frequency shock impulse signals.

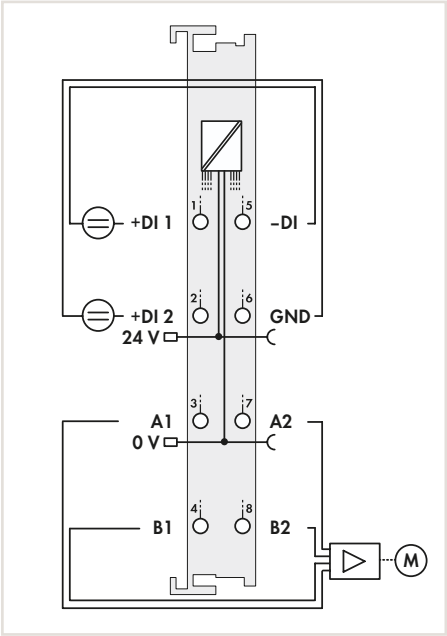
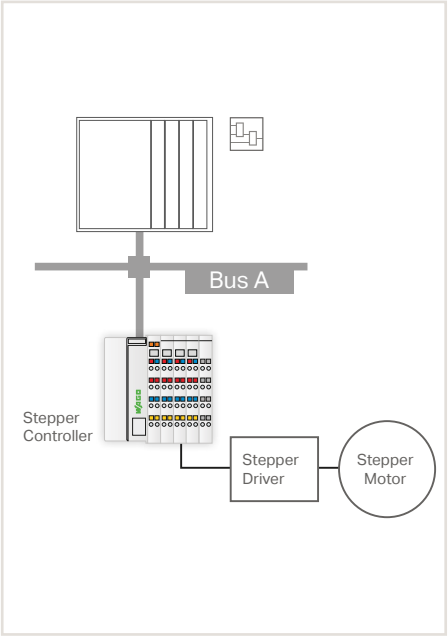
Stepper Controller

Stepper Controller; RS-422/24 VDC; 20 mA





Item description	Stepper Controller
Version	RS422/24 VDC 20mA
Item no.	**750-670**
Technical Data	
No. of outputs	1 channel (2 differential outputs A1, A2, B1, B2)
Signal voltage	5 VDC internal, 5– 24 VDC external
Load type	RS-422, TTL, optocoupler
Output current (max.)	30 mA, short-circuit-protected
Output frequency	200– 500 kHz
Number of inputs	2 x 24 VDC
Resolution	Path: 23 bits + sign bit; speed: 15 bits + 16 bits prescaler; acceleration: 15 bits + 16 bits prescaler
Field supply voltage	24 VDC (–25 % ... +30 %), via power jumper contacts
Internal data width	12 bytes in/out
Isolation	500 V system/field
Ambient temperature (operation)	0 ... +55 °C
Dimensions W x H x D	12 x 67.8 x 100 mm
Approvals	CE, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-670

The stepper controller is used to control different drive power sections with pulse/direction interface or incremental encoder input.

The 64-fold microstepping prevents step losses due to resonance in the acceleration phases and reduces wear on the mechanical parts. Adjustable current limits for stop, acceleration and constant speed help minimize motor power dissipation. Two configurable inputs for Start/Stop, limit switches, reference cams, Jog/Tip, etc., are evaluated directly and without any further delay by the internal software.

Versatile functions, such as positioning with different acceleration slopes, command tables, camshaft controller, auto referencing and other event-dependent properties provide this controller with a wide spectrum of possible uses.

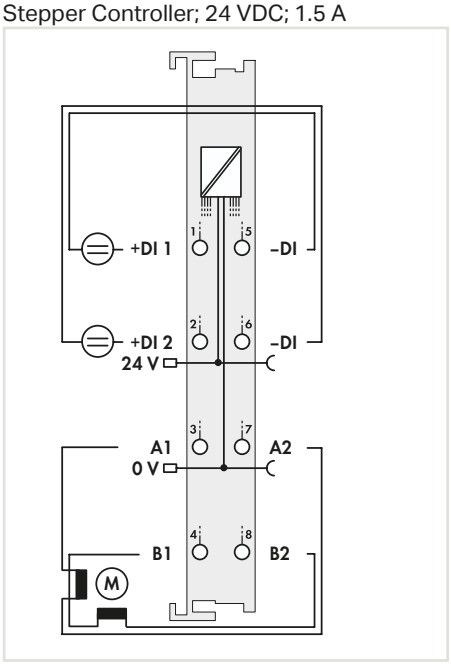
Operating modes:
Single positioning
Reference motion
Jog
Tip
Command table
Cam switch

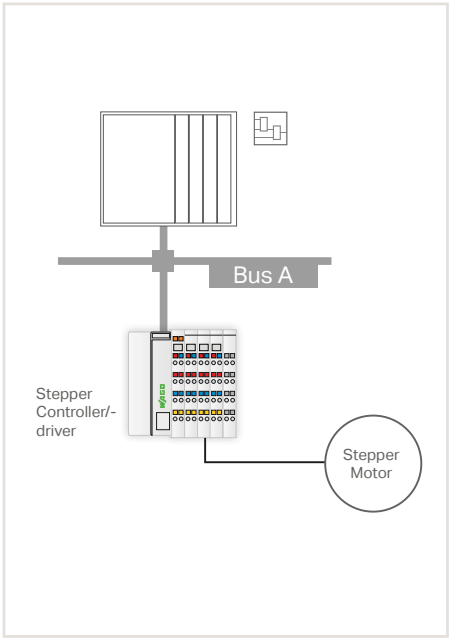
Functions, e.g.,:
Absolute/relative positioning
Setpoint change on the fly
Rotary axis

Additional operating modes:
Pulse width modulation
Frequency generator
Single-shot mode

Stepper Controller

Stepper Controller; 24 VDC; 1.5 A





Item description	Stepper Controller
Version	24 VDC 1.5A
Item no.	**750-671**

Technical Data	
No. of outputs	1 stepper motor (2 phases/bipolar)
Signal voltage	
Load type	
Output current (max.)	Up to 2 x 1.5 A peak value; 1 A eff.
Output frequency	7812 Hz
Duty cycle	
Number of inputs	2 x 24 VDC
Resolution	Path: 23 bits + sign bit; speed: 15 bits + 16 bits prescaler; acceleration: 15 bits + 16 bits prescaler
Field supply voltage	24 VDC (−25 % ... +30 %), via power jumper contacts
Internal data width	12 bytes in/out
Isolation	500 V system/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 67.8 x 100 mm
Approvals	CE, cULus ANSI/ISA, Ex ATEX/IECEx
Data sheet and further information, see:	wago.com/750-671

The stepper controller has an on-board power driver designed to control 2-phase stepper motors up to 24 V / 1.5 A.

The 64-fold microstepping prevents step losses due to resonance in the acceleration phases and reduces wear on the mechanical parts. Adjustable current limits for stop, acceleration and constant speed help minimize motor power dissipation. Two configurable inputs for Start/Stop, limit switches, reference cams, Jog/Tip, etc., are evaluated directly and without any further delay by the internal software.

Versatile functions, such as positioning with different acceleration slopes, command tables, camshaft controller, auto referencing and other event-dependent properties provide this controller with a wide spectrum of possible uses.

Operating modes:

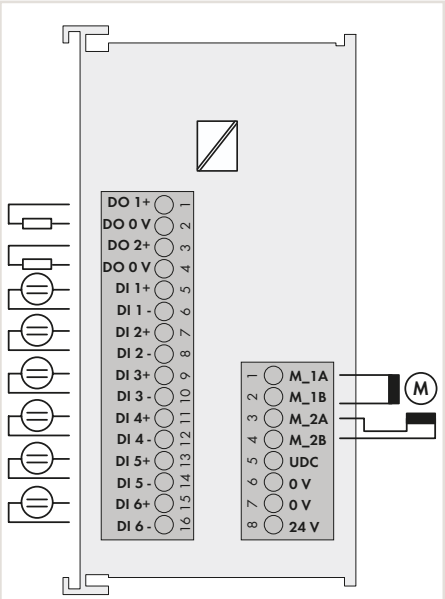
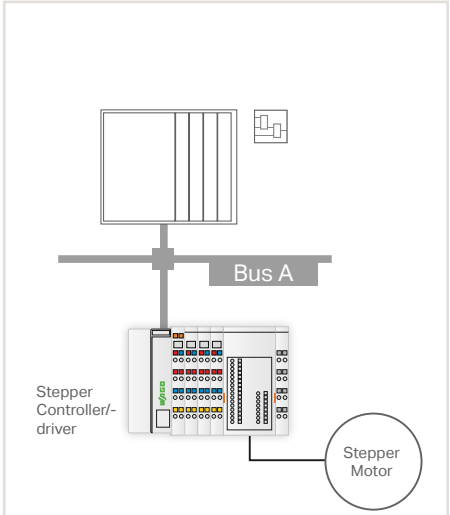
Stepper Controller

Stepper Controller; 70 VDC; 7.5 A





Item description	Stepper Controller
Version	70 VDC 7.5A
Item no.	**750-672**

Technical Data	
No. of outputs	1 stepper motor (2 phases)
Motor voltage	55 VDC, absolute upper limit: 71.5 V, absolute lower limit: 18 V
Output current (max.)	2 x 5.0 A (2 x 7.5 A transient)
Stepper frequency	7812 Hz
Number of digital outputs	2
Control voltage	24 VDC (−25 % ... +30 %)
Output current	0.5 A, short-circuit-protected
Output frequency	5 Hz
Number of digital inputs	2 x 24 VDC
Input filter	100 µs, software filter can be installed
Resolution	Path: 23 bits + sign bit; speed: 15 bits + 16 bits prescaler; acceleration: 15 bits + 16 bits prescaler
Internal data width	12 bytes in/out
Isolation	500 V system/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	48 x 69.8 x 100 mm
Approvals	CE, KC
Data sheet and further information, see:	wago.com/750-672

The stepper controller has an on-board power driver designed to control 2-phase stepper motors.

The 64-fold microstepping prevents step losses due to resonance in the acceleration phases and reduces wear on the mechanical parts. Adjustable current limits for stop, acceleration and constant speed help minimize motor power dissipation.

Six configurable inputs are directly processed by the internal software without delay. Two outputs can be linked with internal functions or freely allocated. Versatile functions enable a wide application range.

Inputs:
Start/stop
Limit switch (positive und negative direction)
Reference cam
Jog/tip (positive und negative direction)

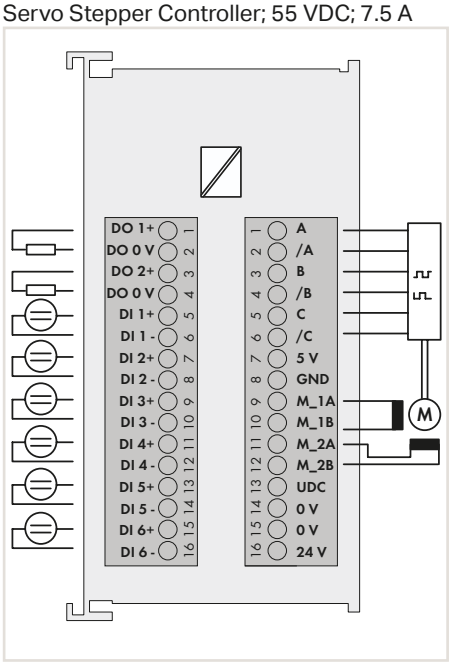
Outputs (default setting):
Target reached
Error

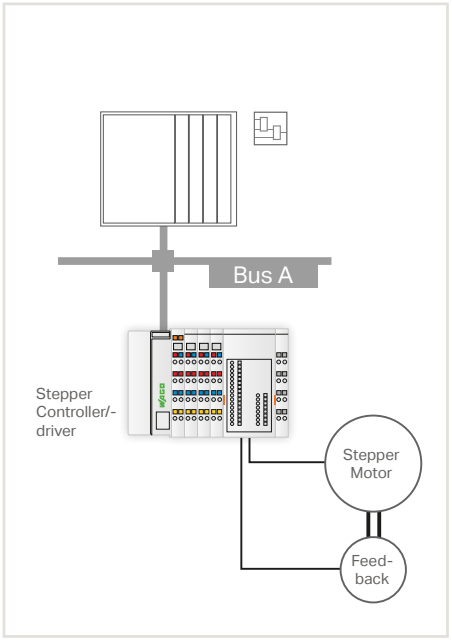
Operating modes:
Single positioning with different acceleration ramps
Reference motion
Jog
Tip
Command table
Cam switch

Functions, e.g.,:
Absolute/relative positioning
Setpoint change on the fly
Rotary axis

Servo Stepper Controller

Servo Stepper Controller; 55 VDC; 7.5 A





Item description	Servo Stepper Controller
Version	55 VDC 7.5A
Item no.	**750-673**

Technical Data

No. of outputs	1 stepper motor (2 phases)
Motor voltage	55 VDC, absolute upper limit: 71.5 V, absolute lower limit: 18 V
Output current (max.)	2 x 5.0 A (2 x 7.5 A transient)
Stepper frequency	7812 Hz
Number of digital outputs	2
Control voltage	24 VDC (–25 % ... +30 %)
Output current	0.5 A, short-circuit-protected
Output frequency	5 Hz
Number of digital inputs	2 x 24 VDC
Input filter	100 µs, software filter can be installed
Signal voltage	RS-485/-422 compatible
Sensor frequency	1 MHz
Sensor supply	5 VDC, 300 mA, short-circuit-protected
Quadrature decoder	4x evaluation
Counter modules	32 bits binary
Resolution	Path: 23 bits + sign bit; speed: 15 bits + 16 bits prescaler; acceleration: 15 bits + 16 bits prescaler
Internal data width	12 bytes in/out
Isolation	500 V system/field
Ambient temperature (operation)	0 ... +55 °C
Dimensions W x H x D	48 x 69.8 x 100 mm
Approvals	CE, KC
Data sheet and further information, see:	wago.com/750-673

The stepper servo has its own power stage and an incremental encoder evaluation for controlling 2-phase stepper motors.

The 64-fold microstepping prevents step losses due to resonance in the acceleration phases and reduces wear on the mechanical parts. Together with the incremental encoder, the integrated vector control contributes to efficient, dynamic rotation speed characteristics.

Six configurable inputs are directly processed by the internal software without delay. Two outputs can be linked with internal functions or freely allocated. Versatile functions enable a wide application range.

Inputs:
Start/stop
Limit switch (positive und negative direction)
Reference cam
Jog/tip (positive und negative direction)

Outputs (default setting):
Target reached
Error

Operating modes:
Single positioning with different acceleration ramps
Reference motion
Jog
Tip
Command table
Cam switch

Functions, e.g.,:
Absolute/relative positioning
Setpoint change on the fly
Rotary axis

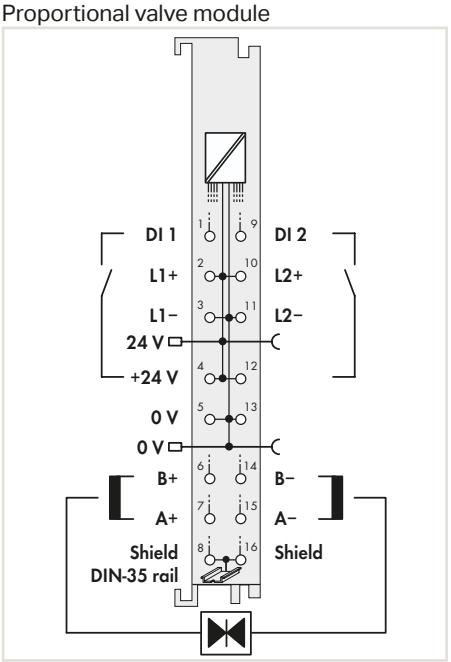
Data sheet and further information, see:	wago.com/750-636		wago.com/750-636	

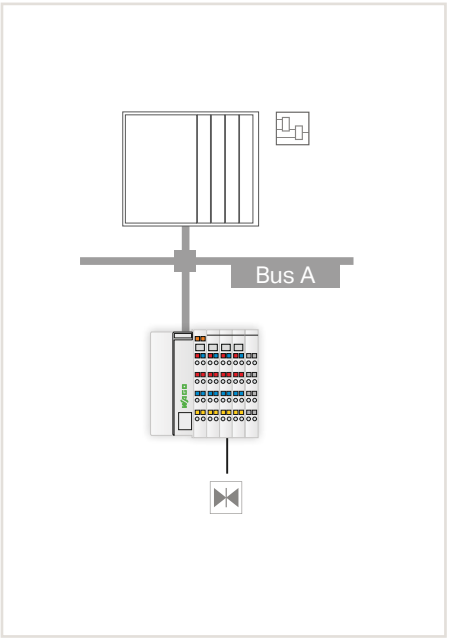
The DC Drive Controller is a single-channel, intelligent positioning controller for 24 VDC motors up to 5 A with incremental position feedback.
Three 24 V inputs record the limit switches and a preset signal.
An incremental encoder interface evaluates signals from the position transmitter and determines actual value.

As an option, the motor voltage can be supplied separately.

Proportional valve module

Proportional valve module





Item description	Proportional Valve Module
Item no.	**750-632**
Technical Data	
No. of outputs	2 bipolar outputs (A+, A- and B+, B-)
Output current (max.)	1-channel operation: 2 A (derating must be observed); 2-channel operation: 1.6 A per channel (derating must be observed)
Output type	H-bridge output with current-regulated PWM output (short-circuit-proof and thermal overload-proof for each channel)
Dither frequency	250 Hz, 125 Hz, 62.5–1 Hz (parameterizable)
PWM typical frequency	50 kHz
Nominal output voltage	24 VDC (–25 % ... +30 %)
Load type	Operating range: inductive (1– 600 mH), Internal load resistance (> 8 Ohm)
Number of digital inputs	2 (DI 1, DI 2), type 1 per IEC 61131, high-side switching
Field supply voltage	24 VDC (–25 % ... +30 %), via power jumper contacts
Internal data width	6 bytes (single-channel operating mode), 12 bytes (dual-channel operating mode)
Isolation	500 V system/field
Ambient temperature (operation)	0 ... +55 °C
Dimensions W x H x D	12 x 69 x 100 mm
Approvals	CE, Marine, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-632

The proportional valve module controls two single-coil valves or one valve.
It features two current-controlled PWM outputs with adjustable dither. Both unipolar and bipolar valve control are possible. Yet another operating mode involves controlling a valve with two unipolar coils. The module is single-channel in this operating mode! Characteristic curve adaptations, such as zero offset, dual gain compensation or range limitations, can be adjusted via parameters. The module functions can be internally triggered via digital outputs without any detours.

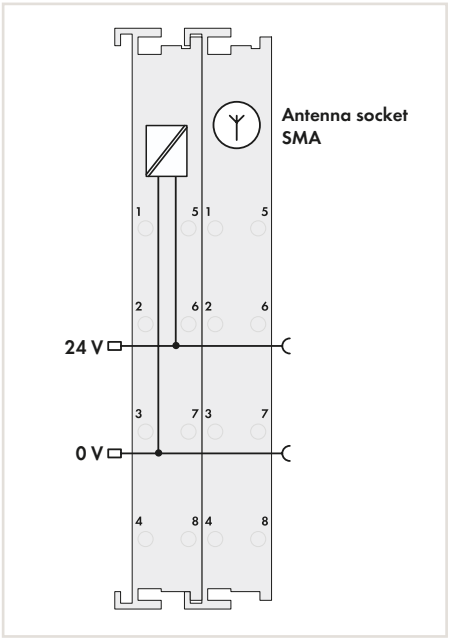
Bluetooth® RF Transceiver

Bluetooth® RF Transceiver



Item description	*Bluetooth*® RF-Transceiver
Item no.	**750-644**
Technical Data	
Antenna	External via SMA socket
Radio technology	*Bluetooth*® 2.0 + EDR
Topology	Piconet (1 master, max. 7 slaves)
Profiles	SPP, PAN
Frequency band	ISM band, 2402 … 2480 MHz
Transmitter power	Up to 20 dBm (*Bluetooth*® Class 1)
Receiver sensitivity	−94 dBm
Transmission range	Max. 1000 m free field, 100 m within buildings*
Power supply (*Bluetooth*®)	24 VDC via power jumper contacts
System supply voltage	5 VDC via data contacts
Internal data width	Configurable to 12, 24, 48 bytes, including 1 control/status byte
Diagnostics (via visual indicator)	Device status, connection status (radio connection quality, signal strength, interference)
Diagnostics (via process image)	Device status, connection status (radio connection quality, signal strength, interference), time monitoring
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	24 x 72 x 100 mm
Approvals	FCC approval (this device complies with Part 15 of FCC rules), *Bluetooth*® approval, CE, KC, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-644

Accessories	**Item no.**	Page
External antenna	**758-912**	405

The *Bluetooth*® Transceiver enables wireless exchange of process data with up to seven other devices using *Bluetooth*® 2.0 radio technology. Interoperability with *Bluetooth*® devices is provided via the *Bluetooth*® PAN and SPP profiles and is not restricted to any one manufacturer.
The module's extended diagnostic functions include cyclic and acyclic state information. For quick on-site diagnostics, main information on operational status and radio connection is also displayed via 8 LEDs.

* The specifications only apply when the antenna listed as an accessory is used.
The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

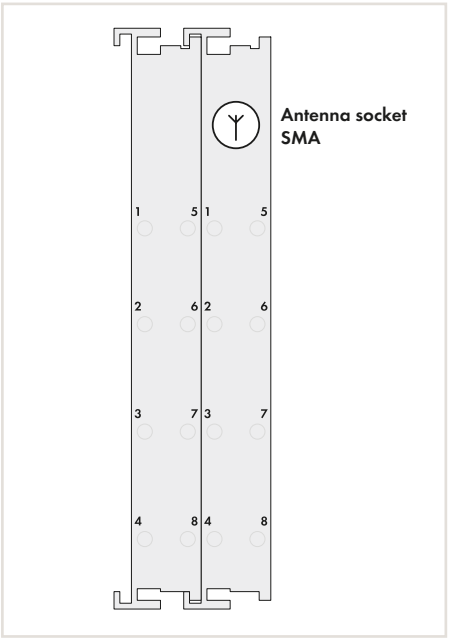
Radio Receiver EnOcean

Radio Receiver EnOcean



Item description	Radio Receiver EnOcean
Item no.	**750-642**
Technical Data	
Antenna	External via SMA socket
Frequency band	868.3 MHz
Transmission range	Up to 300 m in open field (30 m typical in buildings, see manual)*
Transmission protocol (radio telegram)	EnOcean
System supply voltage	5 VDC via data contacts
Internal data width	1 x 24 bits in/out (3 bytes user data), 1 x 8 bits control/status
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	24 x 72 x 100 mm
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx
Data sheet and further information, see:	wago.com/750-642

Accessories	Item no.	Page
External antenna	758-910	405

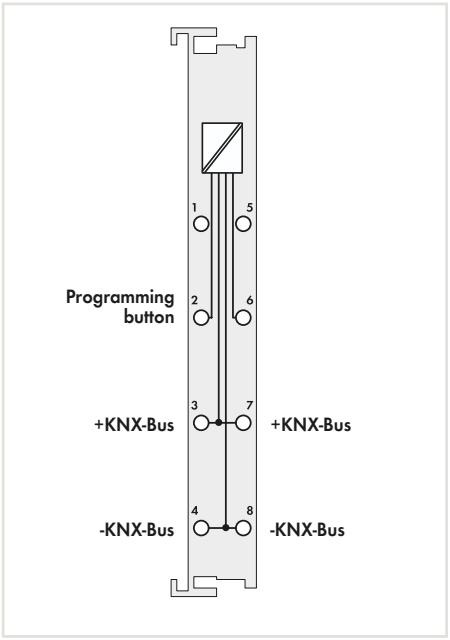
* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

This radio receiver receives radio telegrams from maintenance-free, battery-less and wireless switches and sensors based on EnOcean radio technology.
The energy required for switch or sensor operation is produced by converting one type of energy (heat, solar or mechanical energy) into usable electrical energy.
The LED (RSSI) indicates a sufficient input level.

Preprogrammed function blocks for WAGO Controllers make integration easy.

KNX/EIB/TP1 Interface

KNX/EIB/TP1 Interface



Item description	KNX/EIB/TP1 Interface
Item no.	**753-646**
Technical Data	
Pluggable connector	•
Specification	KNX/TP1-Bus: 1.0
Number of communication objects	253
Number of group addresses	254
Number of associations	254
Baud rate	9.6 kBd
Additional connections	Programming button
Applicability	On programmable fieldbus controller
Internal data width	24 bytes
Isolation	2500 V rms
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69 x 100 mm
Approvals	CE, KC, Marine, UL 508
Data sheet and further information, see:	wago.com/753-646

Accessories	Item no.
Plug	part of the delivery
753 Series coding elements	**753-150**

The KNX/EIB/TP1 I/O module connects to a KNX/EIB/TP1 network. The module supports two different functions:

1. Device mode:
With this module, all programmable fieldbus controllers relevant for building automation can be connected to a KNX/TP1 network. The module is a standard KNX device and is linked via ETS3/4 Professional Commissioning Tool.

An ETS3/4 plug-in is required so that data from the application program can be allocated to group addresses for the programming software.

2. Router mode:
When connected to a KNX/IP Controller (e.g., 750-849), the combination becomes a KNXnet/IPRouter. The module is switched to router mode automatically. An application program is not required for operation in router mode. Additional modules that are connected to a KNX IP controller are addressed in the device mode by the application.

The bus connections are internally bridged inside the plug, so the bus is not interrupted when the plug is pulled from the module. The plug is included with delivery.

Plug	part of the delivery	
753 Series coding elements	**753-150**	

*pending

This manufacturer-independent DALI standard (IEC 62386) ensures interoperability of DALI devices in lighting applications. This new standard replaces the analog 1– 10 V dimmer interface.

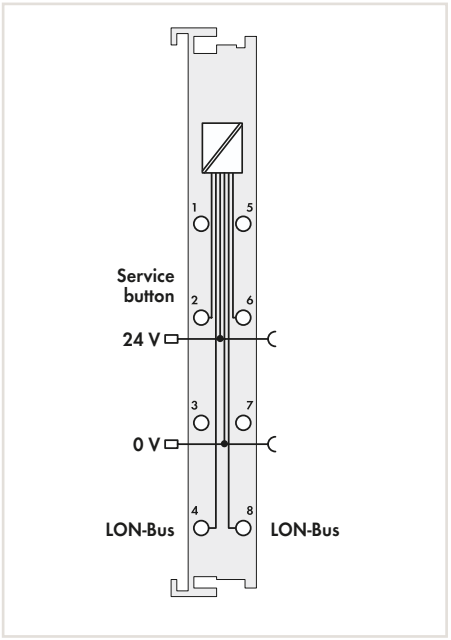
Each DALI Multi-Master module supports 64 addresses for electronic control gears (ECGs) and 64 addresses for DALI sensors. Each DALI ECG can be assigned to 16 groups and 16 scenes. The module also offers 16 additional virtual groups on the DALI bus.

DALI control devices can be seamlessly integrated with all other building systems. Several DALI masters can be connected to a single fieldbus node. The maximum number of modules within a controller depends on the memory requirements of the application. Function blocks prepared for DALI are available for programming fieldbus nodes.

Alternatively, an Easy Mode allows lighting functions to be easily controlled without any complicated PLC programming.

LON®-FTT Interface

LON®-FTT Interface



Item description	LON FTT Interface
Item no.	**753-648**
Technical Data	
Pluggable connector	•
Number of network variables	249
Number of aliases	127
Baud rate	78 kbit/s
Max. bus length	500 m (free topology) / 2700 m (bus)
Transmission medium	Twisted Pair – FTT
Additional connections	Service button
Applicability	On programmable fieldbus controller; max. 2 per controller
Internal data width	24 bytes
Isolation	500 V System/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69.8 x 100 mm
Approvals	CE, UL 508, ANSI/ISA
Data sheet and further information, see:	wago.com/753-648

Accessories	Item no.
Plug	part of the delivery
753 Series coding elements	**753-150**

The LON FTT Module complies with the ISO/IEC 14908 standard. It is a full-fledged and flexible LON device within LonWorks FT or LP networks. The module's network variable interface defines 249 network variables of any type and supports both LonMark objects and configuration properties.

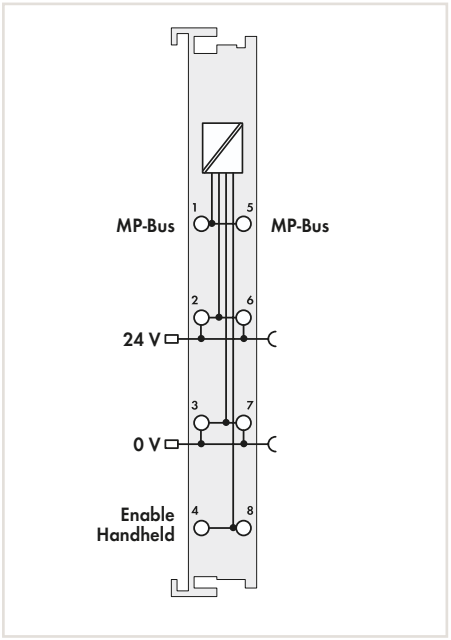
MP-Bus Master

MP-Bus Master



Item description	MP-Bus Master
Item no.	**750-643**
Technical Data	
Number of participants	Max. 8 slaves
Power supply (mp-bus)	24 VDC via power jumper contacts
Max. bus length	800 m
Applicability	On programmable fieldbus controller
Internal data width	8 bytes
Isolation	500 V System/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69.8 x 100 mm
Approvals	CE, KC, cULus UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-643

The module acts as a master for the MP bus (Multi-Point bus from Belimo/Switzerland) and allows the bus to be integrated into a higher level bus network such as ETHERNET or LONWORKS®. The MP bus controls HVAC actuators for dampers, regulator valves or VAV air volume controls.

Devices that are equipped with an MP bus connection can communicate with a higher-level control system via bus cable. The actuators have connections for active and passive sensors (temperature, humidity, ON/OF switch, etc.), and are accessible via MP-Bus. An MP bus master can manage up to 8 slaves (actuators) + 8 sensors (1 sensor per slave) via a common bus line, which considerably reduces the wiring effort involved for actuators and sensors.

AS Interface Master

Item description	AS-Interface Master	
Item no.	**750-655**	**753-655**
Technical Data		
Pluggable connector		•
Number of slaves	62	
Slave profiles	V3.0 with transaction types 1–5	
Cable length	100 m (with repeater 300 m)	
AS-i cycle time	0,3 … 10 ms	
System supply voltage	24 VDC via power jumper contacts	
Internal data width	12 … 48 bytes max., configurable, including 1 byte control/status	
Isolation	500 V System/field	
Ambient temperature (operation)	0 … +55 °C	
Dimensions W x H x D	12 x 67.8 x 100 mm	12 x 69 x 100 mm
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx	
Data sheet and further information, see:	wago.com/750-655	wago.com/753-655

Accessories	**Item no.**
Plug	**753-110**
753 Series coding elements	**753-150**

The 75x-655 AS-I Master Module connects AS-Interface systems to a higher-level fieldbus.
It acts as a master for the AS-Interface and via the fieldbus coupler, as a slave for the fieldbus. The AS-I functions are provided both cyclically and acyclically via the fieldbus.

Diagnostics, which go far beyond the AS-I specifications, simplify detection of both sporadic configuration errors and AS-I communication interference sources. An auto-installation mode allows an AS-Interface network to be created via sequential slave installation, with no addressing tool required.

Both signal transmission and operating status, as well as trouble-free internal data bus communication, are indicated via LEDs.

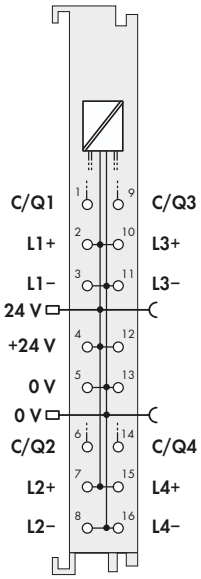
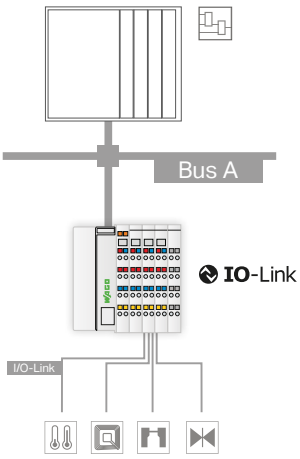
IO-Link Master

IO-Link Master

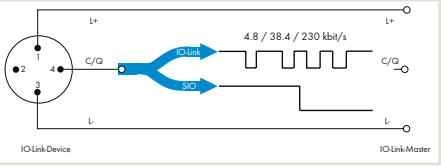




Item description	IO-Link Master
Item no.	**750-657**
Technical Data	
Number of I/O link ports	4
Baud rate	4.8 kbit/s, 38.4 kbit/s, 230.4 kbit/s
Cable length	20 m
System supply voltage	24 VDC via power jumper contacts
Internal data width	4 … 24 bytes
Isolation	500 V System/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69 x 100 mm
Approvals	CE, UL 508, ANSI/ISA
Data sheet and further information, see:	wago.com/750-657

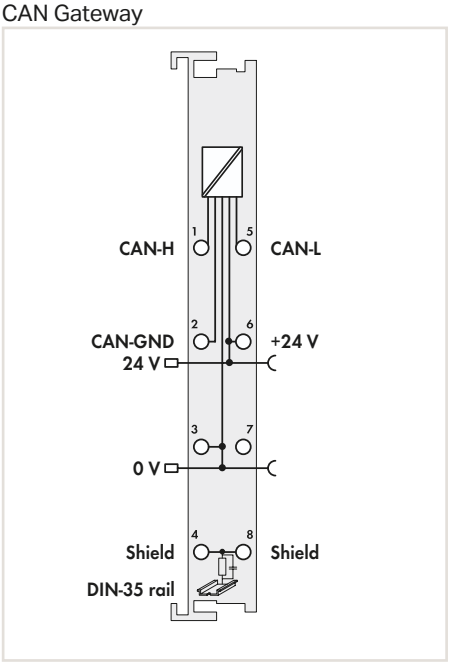
This product is used to simultaneously connect four different I/O-link devices or standard digital sensors/actuators. Process data and data blocks, as well as acyclic data for identification, configuration, parameterization and diagnostics can be communicated to the respective device via a 3-wire connection.

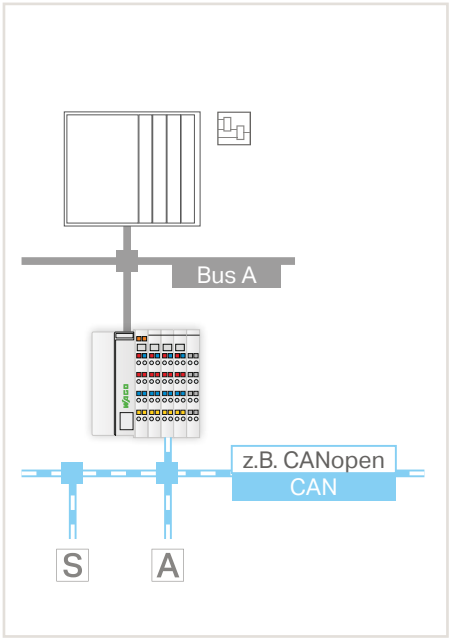
The functions and performance data are defined in device description files for master and devices; these are easy to customize via the engineering. If a device must be replaced, the configuration and parameterization can be automatically restored without maintenance personnel. Project design, installation and operation are simplified!



CAN Gateway

CAN Gateway





Item description	CAN Gateway
Item no.	**750-658**
Technical Data	
Number of CAN interfaces	1
Baud rate	10 kbit/s, 20 kbit/s, 50 kbit/s, 125 kbit/s, 250 kbit/s, 500 kbit/s, 800 kbit/s, (automatic baud rate)
Data formats	Per 2.0 A standard (11-bit ID, per 2.0 B extended (29-bit ID)
System supply voltage	24 VDC via power jumper contacts
Data transfer time	5 ms (at 32 bit I/O)
Internal data width	4 … 24 Byte
Isolation	500 V System/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 67,8 x 100 mm
Approvals	CE, Marine, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-658

With a CAN Gateway, a CAN bus can be installed as a sub-bus beneath a fieldbus coupler or fieldbus controller. It enables special sensors/actuators that are only available with the widely spread CAN bus to also be integrated under other bus systems. Function blocks allow the gateway to read and write higher-protocol telegrams (e.g., CANopen).

You can select from three different operating modes:

- Sniffer mode: Detailed analysis of the CAN bus through passive “snooping”
- Transparent mode: Active CAN subscriber that can send and receive any type of CAN telegram
- Mapped mode: Enables direct generation of CAN telegrams from the process image, or selective copying of process values from received CAN telegrams into the input process image (cyclic or event-based).

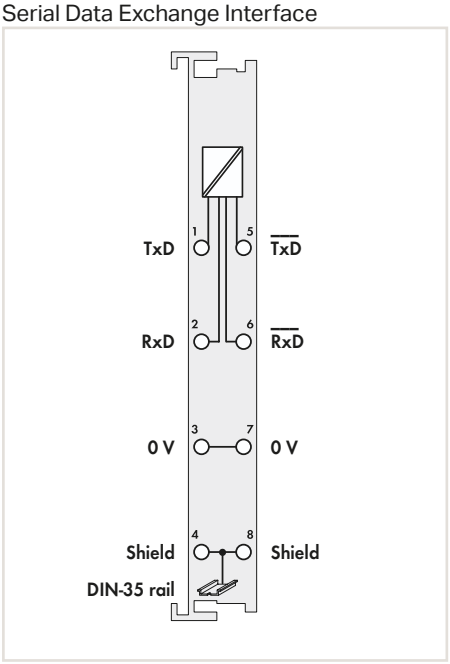
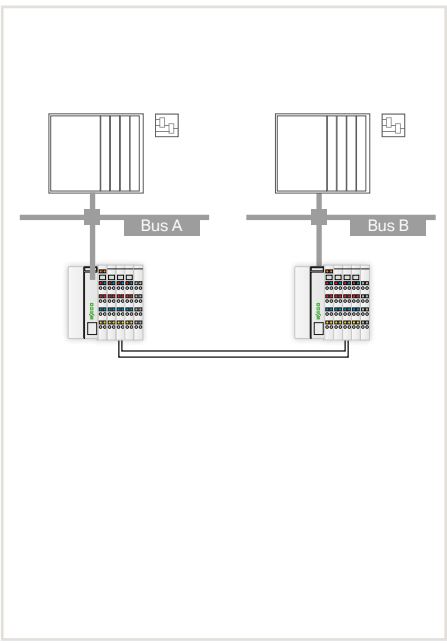
Serial Data Exchange Interface

Serial Data Exchange Interface





Item description	Data Exchange Interface
Item no.	750-654
Technical Data	
Transmission channels	1 TxD / 1 RxD, full-duplex
Baud rate	62500 baud (8 N 1)
Bit transfer	Via 2 twisted pairs with differential signals
Line impedance	120 Ω
Line length (max)	1000 m
Internal data width	1 x 32 bits in/out, 1 x 8 bits control/status
Isolation	500 V System/field
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69.8 x 100 mm
Approvals	CE, KC, Marine, UL 508
Data sheet and further information, see:	wago.com/750-654

The data exchange module allows the exchange of data between different fieldbus systems.
Two modules are a communication pair that is connected by means of two twisted wire pairs. Each module is part of a fieldbus node.
The data exchange is done in full duplex operation, independent of the fieldbus system used. The data of the output process image of the fieldbus coupler is transmitted to the communication partner. This module then transmits the data to the input process image of its fieldbus coupler and vice versa.
The LED "function" indicates a data exchange with the buscoupler. The status of the data transmission is indicated by the TxD and RxD LEDs.

Functional Safety

750/753 Series housing design

Dimensions W x H x D	750 series: 12 or 24 x 67.8 x 100 mm 753 series: 12 or 24 x 69 x 100 mm

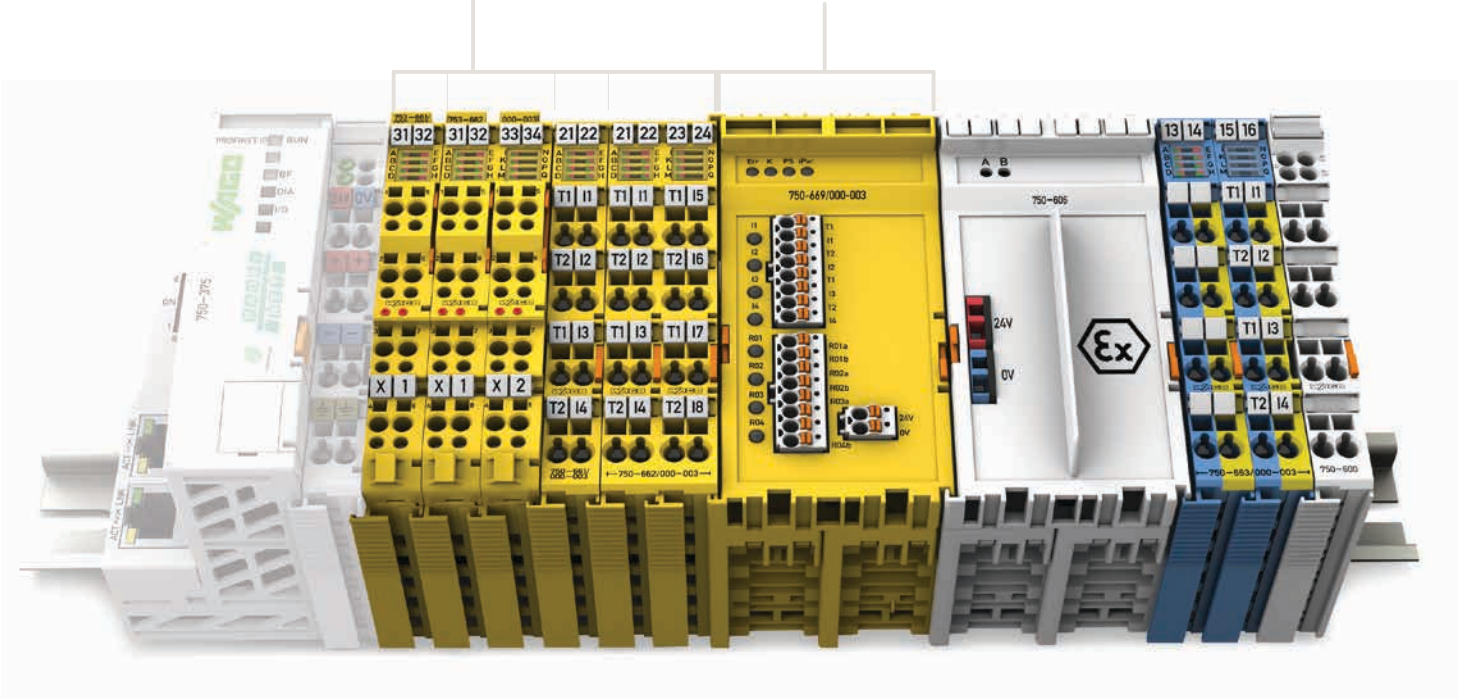
Wire connection	Push-in CAGE CLAMP®
Conductor size	0.05 … 1.5 mm² / 20 … 14 AWG
Strip length	8 … 9 mm / 0.33 in



Functional Safety

In the European Union, the machinery directive defines the requirements for machine and system safety. This ensures a uniform standard for the protection of “life and limb” for people within a machine’s operating area.

The required risk assessment is based on harmonized standards (e.g., EN 13849) that identify existing risks and required risk reduction (SIL or PL quality). Based on the risk assessment, safety functionality can be implemented, e.g., by presence detection or protection zone violations using secure switches or light arrays to immediately shut down the “risk”. For this purpose, the safety signals are detected by the “yellow” safety modules and transmitted via “PROFIsafe” to the fail-safe PLC for further processing. The result is then executed via a safe actuator (output module, controller, etc.).

The unique safety characteristic values of the WAGO modules facilitate calculation of the final safety function up to Cat. 4/PLe according to EN 13849, or SIL3 according to EN 62061 or IEC 61511.

This module enables a secure 2-channel switch-off (single fault protection) when the power outputs are used in a bipolar configuration. If a secure 1-channel switch-off is adequate, two independent switching channels are available.
The module is capable of safely shutting off the supply voltage of entire actuator groups which are connected to the conventional modules arranged to the right.
The 2-channel circuit types P-M and P-P as well as the 1-channel circuit types P, P or P, M are available.

This product combines intrinsic safety with functional safety and is specially conceived for reliable acquisition from potential-free, contact-based emergency stop switches, safety interlock switches, mode selectors, as well as safe sensors, that are located in hazardous environments. Thus, safety functions with safe sensors from Ex Zones 0 and 1 are attainable.

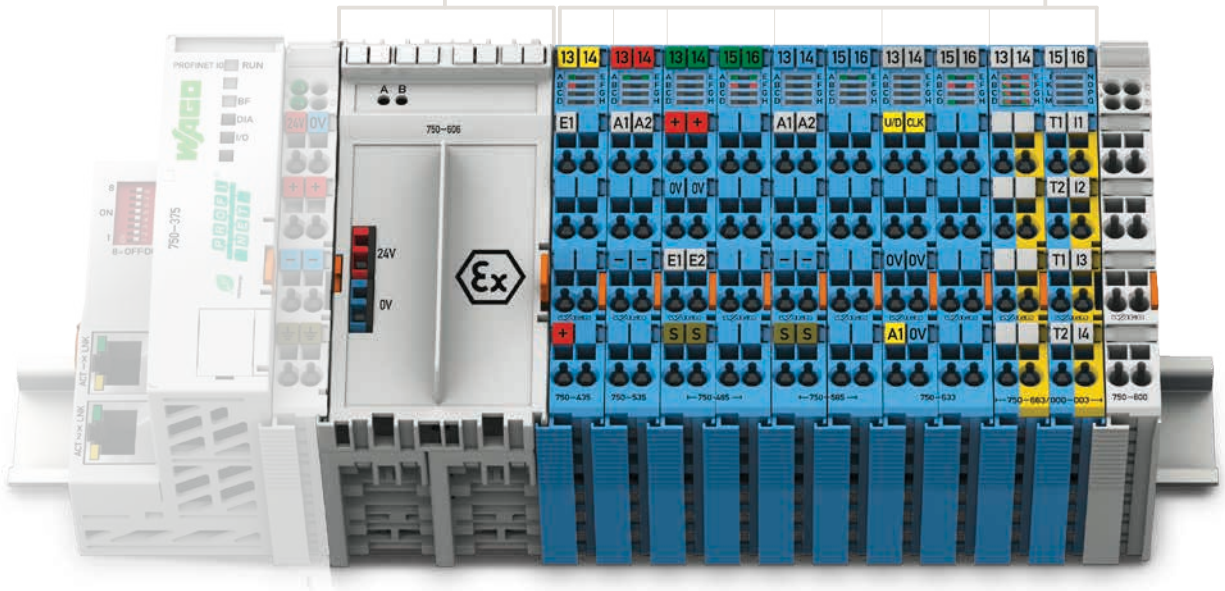
Strip length	8 … 9 mm / 0.33 inch



Use in Hazardous Areas

In many plants across the chemical and petrochemical industries, as well as in the production and process automation sectors, installations are operated that process explosive gas- or dust-air mixtures. For this reason, electrical equipment must be explosion-proof in order to avoid injuries to personnel and equipment damages.

The modules within the WAGO 750 I/O-SYSTEM are designed for use in both non-potentially explosive and potentially explosive hazardous areas. The direct application of fieldbus technology in potentially explosive areas is typically resource-intensive. When used in hazardous areas of Zone 2/22, the WAGO-I/O-SYSTEM 750 offers a safe, easy and economical connection to the sensors and actuators of Zones 0/20 and 1/21. The “blue“ Ex i I/O modules were specially developed for this purpose. They form an intrinsically safe section that can be integrated into a standard fieldbus node, offering all the advantages of a state-of-the-art fieldbus technology. The WAGO 750 I/O-SYSTEM is also approved for mining applications.

The supply modules monitors power supply to the downstream Ex i segment and separates the intrinsically safe from the non-intrinsically safe section of the WAGO-I/O-SYSTEM 750. Input and output sides are electrically isolated from each other.
General information (e.g., installation regulations) on explosion protection is available in the WAGO-I/O-SYSTEM 750 manuals!

Digital input, NAMUR, Intrinsically safe

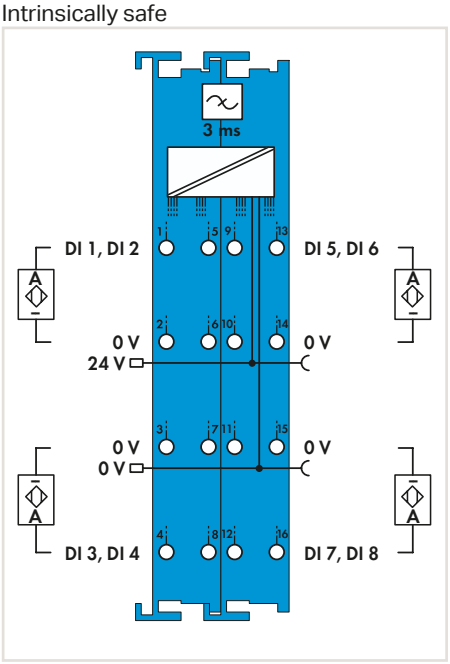
8-channel digital input; NAMUR; Intrinsically safe



Item description	8DI
Version	NAMUR Ex i
Item no.	**750-439**

Technical Data	
Number of digital inputs	8
Type of signal	NAMUR
Sensor connection	2-conductor
Input characteristic	High-side switching
Input filter (digital)	3 ms
Open-circuit voltage	8.2 VDC
Diagnostics	Short circuit, wire break
Sensor supply voltage	8.2 VDC, short-circuit-protected, isolated channels
Field supply voltage	24 VDC via power jumper contacts (provided via Ex i supply U_O = max. 27.3 V)
Internal data width	16 bits
Isolation	U_M = 375 V system/supply
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69.8 x 100 mm
Ex Guideline	EN/IEC 60079-0, -7, -11, -26, -31
Approvals	CE, Marine, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-439

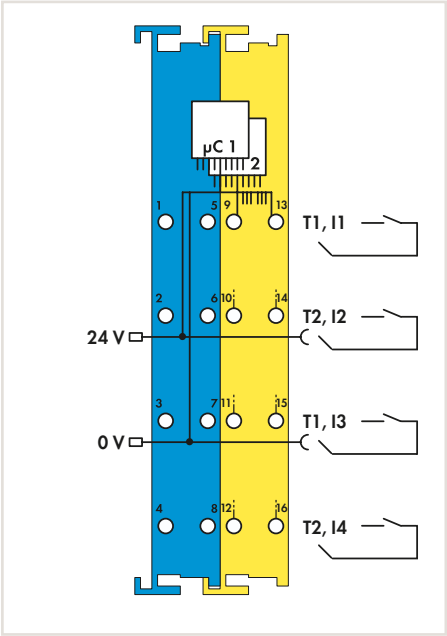
Digital input, PROFIsafe V2 iPar

4-channel digital input, PROFIsafe V 2.0 iPar



Item description	4F-Ex i DI
Version	24 VDC PROFIsafe V2 iPar
Item no.	**750-663/000-003**

Technical Data

Protocol	PROFIsafe V2
Sensor inputs	4, clock sensitive to T1 ... T2
Input current typ.	3 mA
Input frequency max.	50 Hz
Input filter (digital)	0 ms ... 200 ms configurable in steps
Clock outputs	2
System supply voltage	5 VDC; via data contacts
Field supply voltage	24 VDC via power jumper contacts (provided via Ex-i supply U_O = max. 27.3 V)
Isolation (peak value)	U_M = 375 V system/supply
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	24 x 70.9 x 100 mm
Functional Safety	
Achievable risk reduction	SIL 3 acc. to IEC 61508:2010; SIL 3 acc. to IEC 61511:2005; SIL 3 acc. to IEC 62061:2005; Cat. 4, PL e acc. to EN ISO 13849:2008
Safety standards	IEC 61508, IEC 62061, EN ISO 13849, IEC 61511
Ex Guideline	EN/IEC 60079-0, -7, -11, -26, -31
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-663/000-003

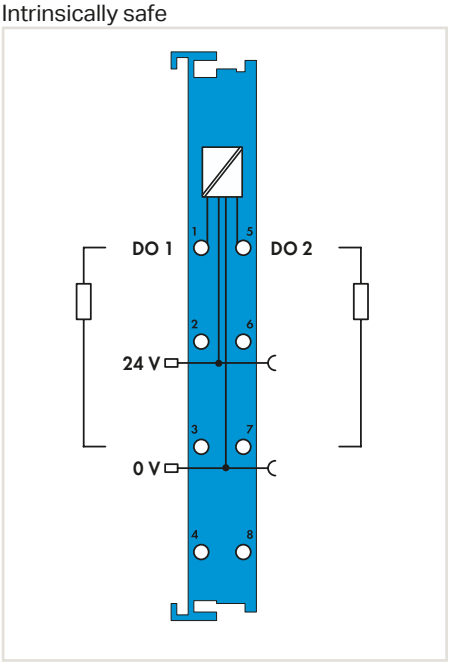
This product combines intrinsic safety with functional safety and is specially conceived for reliable acquisition from potential-free, contact-based emergency stop switches, safety interlock switches, mode selectors, as well as safe sensors, that are located in hazardous environments. Thus, safety functions with safe sensors from Ex Zones 0 and 1 are attainable.

Digital output, 24 VDC, Intrinsically safe

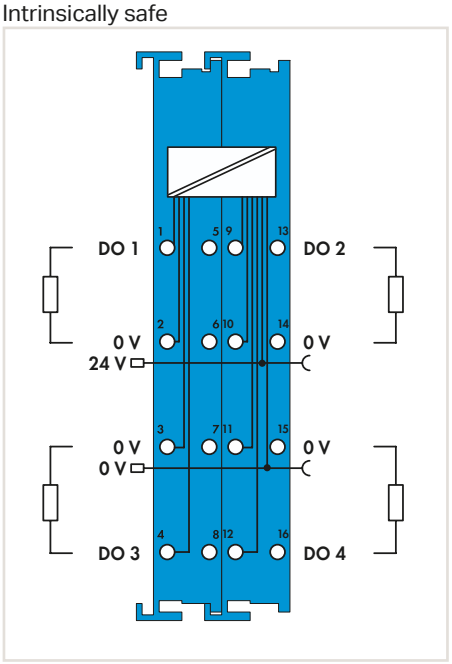
Figure: 750-535

Figure: 750-539

2-channel digital output; 24 VDC; Intrinsically safe



4-channel digital output; 24 VDC; valve; Intrinsically safe



Item description	2DO	4DO
Version	24 VDC Ex i	24 VDC Valve Ex i
Item no.	**750-535**	**750-539**

Technical Data

Number of digital outputs	2	4
Type of signal	24 VDC	24 VDC
Output characteristic	High-side switching	High-side switching
Load type	Resistive, inductive, lamps	Resistive, inductive, lamps
Actuator connection	2-conductor	2-conductor
Switching frequency (max.)	1 kHz	100 Hz
Actuator supply voltage	24 VDC	24 VDC
Field supply voltage	24 VDC via power jumper contacts (provided via Ex i supply U_O = max. 27.3 V)	24 VDC via power jumper contacts (provided via Ex i supply U_O = max. 27.3 V)
Internal data width	2 bits	4 bits in, 4 bits out (diagnostics)
Isolation	U_M = 375 V system/supply	U_M = 375 V system/supply
Ambient temperature (operation)	0 … +55 °C	0 … +55 °C
Dimensions W x H x D	12 x 69.8 x 100 mm	12 x 69.8 x 100 mm

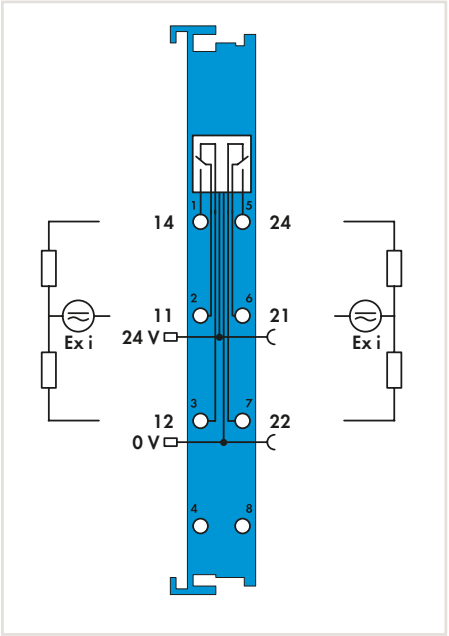
Relay output, Intrinsically Safe

2-channel relay output; 2 changeover contacts; Intrinsically Safe



Item description	2RO
Version	Relay 2CO Ex i
Item no.	**750-538**

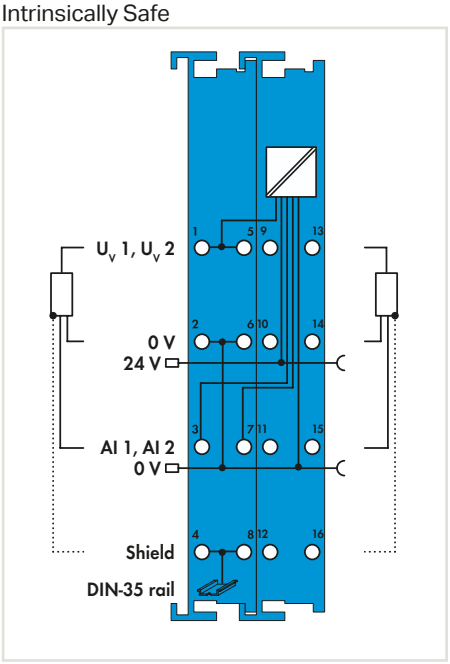
Technical Data	
Number of digital outputs	2
Type of signal	100 VAC, 30 VDC*
Output switching design	2 changeover contacts, relay
Output characteristic	Potential-free
Output current per channel	0.5 A AC / 1 A DC*
Actuator connection	2 conductor
Switching frequency (max.)	0.33 Hz
Field supply voltage	24 VDC via power jumper contacts (provided via Ex i supply U_O = max. 27.3 V)
Current consumption, system supply	26 mA
Internal data width	2 Bit
Isolation	U_M = 375 V system/supply
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	12 x 69.8 x 100 mm
Ex Guideline	EN/IEC 60079-0, -7, -11, -26, -31
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx
Data sheet and further information, see:	wago.com/750-538

*Both maximum switching current and voltage must comply with EN 60079-11.

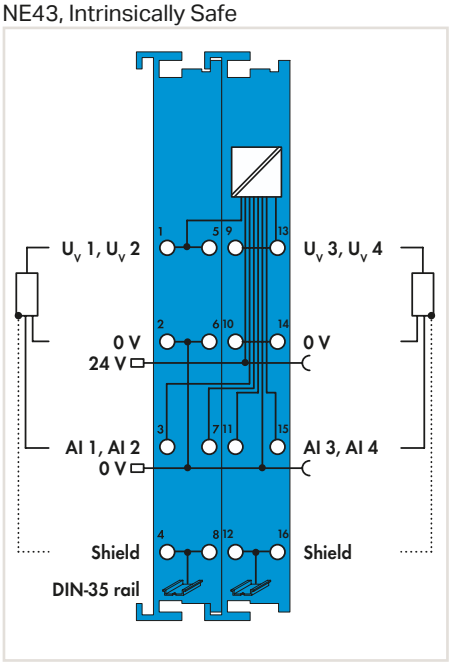
Analog Input, 4 … 20 mA or 0/4 … 20 mA, Intrinsically Safe

Figure: 750-486

2-channel analog input, 4 … 20 mA, Intrinsically Safe



4-channel analog input, 0/4 … 20 mA, NE43, Intrinsically Safe



Item description	2AI	4AI
Version	4-20mA Ex i	0/4-20mA NE43 Ex i
Item no.	**750-485**	**750-486**
Technical Data		
Number of analog inputs	2	4
Type of signal	4 … 20 mA	0 mA … 20 mA, 4 mA … 20 mA, 3.6 mA … 21 mA
Signal characteristic	single-ended	single-ended
Input resistance	< 100 Ω	< 200 Ω
Resolution	12 bits	12 bits + sign bit
Conversion time	< 2 ms	< 10 ms
Measuring error (25 °C)	< ± 0.2 % of largest measurement range	< ± 0.1 % of largest measurement range
Temperature coefficient	< ± 0.01 % /K of largest measurement range	< ± 0.01 % /K of largest measurement range
Field supply voltage	24 VDC via power jumper contacts (provided via Ex i supply U$_O$ = max. 27.3 V)	24 VDC via power jumper contacts (provided via Ex i supply U$_O$ = max. 27.3 V)
Transmitter supply	U$_V$ = 16 V at 20 mA	U$_V$ = 15 V at 20 mA
Data width	2 x 16 bits data, 2 x 8 bits control/status (optional)	4 x 16 bits data, 4 x 8 bits control/status (optional)
Isolation	U$_M$ = 375 V system/supply	U$_M$ = 375 V system/supply

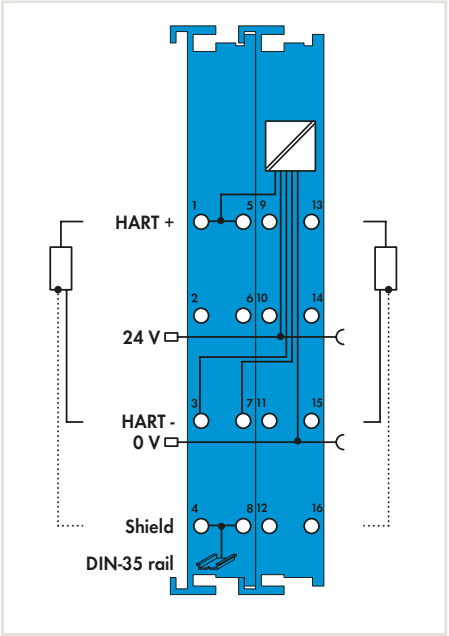
Analog input, 4 … 20 mA HART, Intrinsically Safe

2-channel analog input, 4 … 20 mA HART, Intrinsically Safe



Item description	2AI
Version	4-20mA HART Ex i
Item no.	**750-484**

Technical Data

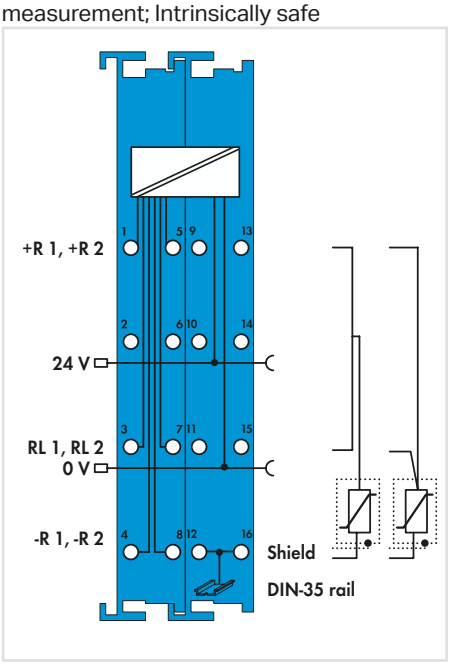
Number of analog inputs	2
Type of signal	4 … 20 mA
Signal characteristic	single-ended
Resolution	12 bits
Conversion time	10 ms
Measuring error (25 °C)	0.2 % of largest measurement range
Temperature coefficient	< ± 0.01 % /K of largest measurement range
Field supply voltage	24 VDC via power jumper contacts (provided via Ex i supply U_O = max. 27.3 V)
Transmitter supply	U_V = 16.5 V at 20 mA
Data width	2 x 2 bytes data, 2 x 2 bytes data + 2n x 4 bytes data (n = number of dynamic variables), 2 x 2 bytes data + 6 bytes mailbox
Isolation	U_M = 375 V system/supply
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	24 x 69.8 x 100 mm
Ex Guideline	EN/IEC 60079-0, -7, -11, -26, -31
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx
Data sheet and further information, see:	wago.com/750-484

In addition to the analog signal processing, this product offers the option of HART communication for parameterizing or recording side variables.

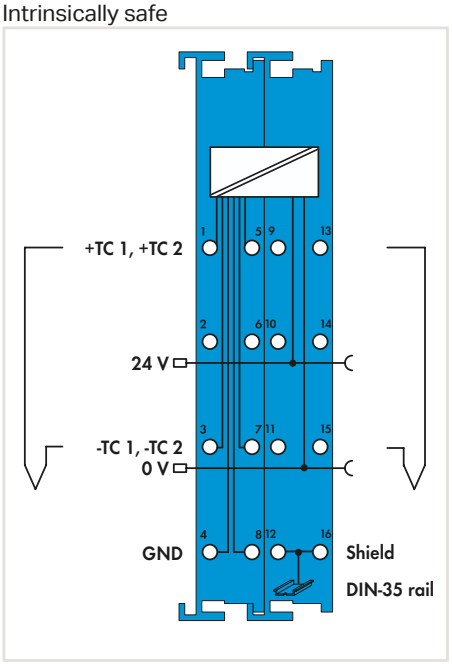
Analog input, Resistance measurement or Thermocouple, Intrinsically Safe

Figure: 750-481/003-000

2-channel analog input; Resistance measurement; Intrinsically safe



2-channel analog input; Thermocouple; Intrinsically safe



Item description	2AI	2AI
Version	RTD Ex i	TC Ex i
Item no.	**750-481/003-000**	**750-487/003-000**

Technical Data

Number of analog inputs	2	2
Type of signal	Resistance thermometer: Pt100, Pt200, Pt500, Pt1000, Ni100, Ni120, Ni1000; Resistors: 1.2 kΩ, 5 kΩ; Potentiometer setting: 0 … 100 % (1.2 kΩ, 5 kΩ)	Thermocouple: Type B, E, J, K, L, N, R, S, T, U; voltage encoder: ± 30 mV, ± 60 mV, ± 120 mV
Sensor connection	2-conductor, 3-conductor	2-conductor
Temperature range	-200 … + 850 °C (Pt), -60 … +250 °C (Ni), -80 … +320 °C (Ni 120)	depending on sensor -100 … +1800 °C
Resolution	0.1 °C, 0.1 Ω, 0.0049 %	0.1 °C or 0.01 mV for voltage measurement
Conversion time	150 … 500 ms (per channel)	≤ 320 ms (both channels)
Measuring error (25 °C)	< ± 0,2 % of largest measurement range	< ±6 K (type K); voltage input < ±2 K; cold junction compensation < ±4 K
Temperature coefficient	< ± 0,01 % /K of largest measurement range	< ± 0,2 K/K of largest measurement range (type K)
Cold junction compensation		integrated or external
Field supply voltage	24 VDC via power jumper contacts (provided via Ex i supply U_O = max. 27.3 V)	24 VDC via power jumper contacts (provided via Ex i supply U_O = max. 27.3 V)
Data width	2 x 16 bits data, 2 x 8 bits control/status (optional)	2 x 16 bits data, 2 x 8 bits control/status (optional)
Isolation	U_M = 375 V system/supply	U_M = 375 V system/supply

750 XTR I/O-System

750 and 753 I/O-System

- Highly versatile
- More than 500 modules available
- Functional safety
- Ex i

750 XTR I/O-System

For demanding applications in which the following are critical:

- Extreme temperature stability
- Immunity to electromagnetic interference and impulse voltages
- Vibration and shock resistance

SPEEDWAY I/O-System

- Uncompromising protection, even in the harshest environments outside the switch cabinet
- Degree of protection: IP67
- Fully encapsulated

5

750 XTR I/O-System
General Product Information

5

Taking it to the eXTReme — The Standard for 750 XTR

The WAGO 750 XTR I/O-SYSTEM is instantly recognizable by its dark gray modules, Profit from the unique added value this system brings to extreme environments or applications.

The WAGO 750 XTR I/O-SYSTEM features outstanding characteristics: It is extremely temperature-resistant, immune to interference, as well as insensitive to vibrations and impulse voltages.
This is what makes it the first choice for demanding applications including:

- Marine systems and onshore/offshore industry
- Renewable energy systems (wind turbines, solar systems and biogas plants)
- Transformer stations and power distribution systems
- Petrochemical industry
- Water and wastewater industry
- Custom machines
- Railway applications

Superior reliability in extreme climates

Automation systems are increasingly being located in outdoor and remote locations where components are directly affected by widely fluctuating temperature conditions such as wind turbines or transformer stations.
Regardless of freezing cold, extreme heat or high humidity, the WAGO 750 XTR I/O-SYSTEM is engineered for absolute dependability in virtually any weather. The XTR version of the WAGO 750 I/O-SYSTEM is unfazed by both freezing cold down to −40 °C and scorching heat up to +70 °C. And this applies equally to both start-up and continual operation.
The maximum approved operating altitude of 5,000 m is another highlight. Even in the thin air of a mountain-top station, the system impressively demonstrates its high performance and availability.

eXTReme Evolution of the Tried and Tested

Using an industry-leading platform, the WAGO 750 XTR I/O-SYSTEM boasts the same proven benefits:

- Compact design: up to 16 channels on one terminal block width of 12 mm
- Easy to use
- CAGE CLAMP® spring pressure connection technology for vibration-proof, fast and maintenance-free connections
- Fieldbus independence due to its modular structure
- Clear identification with the WAGO WSB marking system

Additional Protection Against Interference Pulses

The WAGO 750 XTR I/O-SYSTEM provides greater isolation up to 5 kV of impulse voltage, lower EMC emission of interference and higher insensitivity to EMC interference. These strengths add up to trouble-free operation.

High Mechanical Performance

Automation systems must be particularly vibration-resistant, especially when installed close to vibration-prone and shock-generating system components. Powerful motors and power circuit breakers are just two examples from a wide range of applications. The WAGO 750 XTR I/O-SYSTEM also sets new standards here: With 5 g vibration resistance per DIN EN 60068-2-6 (acceleration: 50 m/s²) and 15 g (150 m/s²) shock resistance, as well as 25 g (250 m/s²) continuous shock resistance per IEC 60068-2-27, the system is engineered for dependability — no matter what.
Count on long-lasting, trouble-free operation and industry-topping levels of safety — even in the most severe applications, such as tunnel boring machines!

Worldwide Approvals

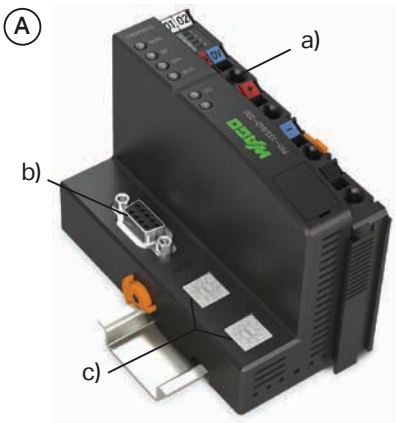
International approvals for industrial automation, shipbuilding and onshore/offshore applications guarantee worldwide use even under the harshest operating conditions, e.g., Germanischer Lloyd, Det Norske Veritas, American Bureau of Shipping, Korean Register of Shipping, Nippon Kaiji Kyokai, Registro Italiano Navale, Polski Rejestr Stratkow.

Advantages:

- No need for air conditioning
  - Takes less space
  - Lower energy and maintenance costs
- Can be used in unshielded areas
- Maximum system uptime
- Install close to vibrating and shock-generating system components
- Vibration-proof, fast and maintenance-free CAGE CLAMP® connections

750 XTR I/O-System
Interfaces and Types

Ⓐ



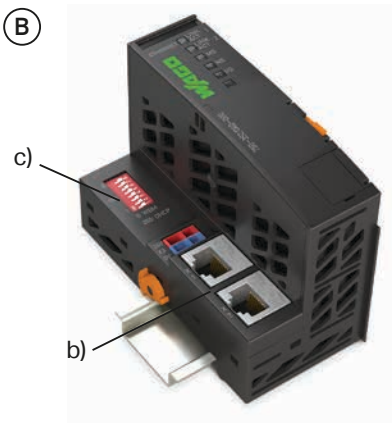
Housing Design Fieldbus Coupler (A)

- Including supply module (a) to power downstream I/O modules
- Technical differences on the connection level; fieldbus interface (b) and optional addressing switch (c)
- W x H x D (mm) 50.5 x 71.1 x 100

Housing Design Fieldbus Coupler ECO (B)

- Restriction on power supply and data width
- W x H x D (mm) 49.5 x 71.9 x 96.8

Ⓑ



Ⓒ

Housing Design 750 (C)

- 8 connection points (CAGE CLAMP®)
- W x H x D (mm) 12 x 67.8 x 100

Housing Design 750 (D)

- 16 connection points (push-in CAGE CLAMP®)
- W x H x D (mm) 12 x 69 x 100

Ⓓ

Ⓔ

Double-Width Housing Design (E)

Some modules are integrated into a double housing to address specific technological needs. Despite utilizing the same standardized housing, these modules are twice as wide.

- W x H x D (mm) 24 x 67.8 x 100

5

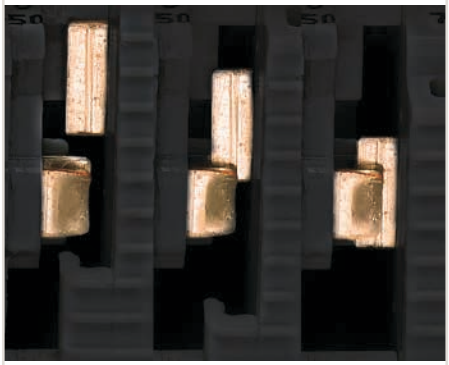
750 XTR I/O-System
Application and Installation Instructions

Attachment/release on the mounting rail

Secure, automatic connection of the data and electronics power supply by gold-plated pressure contacts

Service interface for configuring the fieldbus coupler; connectivity via configuration cable or radio adapter

5



Secure, automatic connection of the power supply by self-cleaning blade contacts

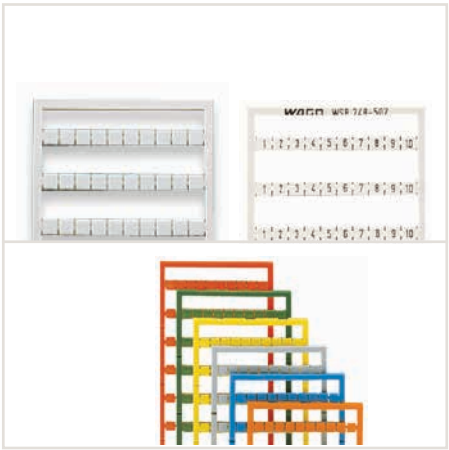
Notice:

For some I/O modules, not all power jumper contacts are made! An I/O module with three power jumper contacts (e.g., 2-channel digital input) cannot be snapped into place behind an I/O module in which not every contact is made.

To increase electromagnetic compatibility (EMC), some components are connected to the DIN-rail by a discharge contact. The DIN-rail must always have a low-resistance connection to the ground potential.

Wide range of accessories available for EMC-compliant installation, including shield connection

Marking Accessories



Mini-WSB quick marking system, blank, pre-marked and colored; suitable for all 750 I/O modules.

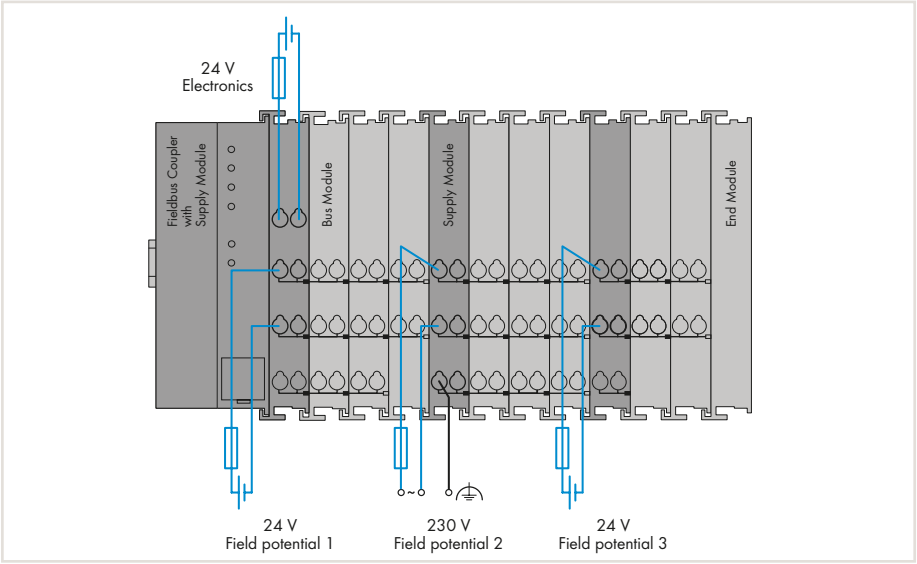
Marker carrier for one single I/O module, suitable for all 750 and 753 I/O modules; the marker carrier can be placed in the upper, Mini-WSB carrier plate.

Marker carrier for one I/O node; both versions (750-106 and 750-107) permit continuous marking regardless of the I/O module housing used.

750 XTR I/O-System
Application and Installation Instructions

Supply Modules

Power is always channeled to the internal electronics power supply by the fieldbus coupler. The power supply to the field-side supply is electrically isolated. The division enables a separate supply for sensors and actuators. The I/O modules' connections automatically lead to transferring the supply voltages. Bus supply modules with diagnostics enable additional monitoring of the power supply. This ensures a flexible, user-specific supply design for a station.
The current supply to the electronics is limited by a maximum value. This value depends on the fieldbus coupler used. If the sum of the internal current demand of all the I/O modules should exceed this value, an additional bus supply module is necessary. Even in this case, power supply to the field-side supply of 10 A may not be exceeded. However, different power supply modules allow a new power supply, formation of potential groups and the implementation of emergency stop concepts.



Notice:

Interference-free WAGO I/O modules are not a component of the safety function and do not replace the safety switching device! When using the components in safety functions, the corresponding notes must be observed in the relevant manual.

Notes

Additional steps must be implemented based on where the I/O-System is installed:

- Specific power and field-side power supply filters (750-624/040-001 or 750-626/040-000) are required for marine and onshore/offshore applications, as well as in telecontrol and rail technology.

Please refer to the manual for details about the power supply's design.

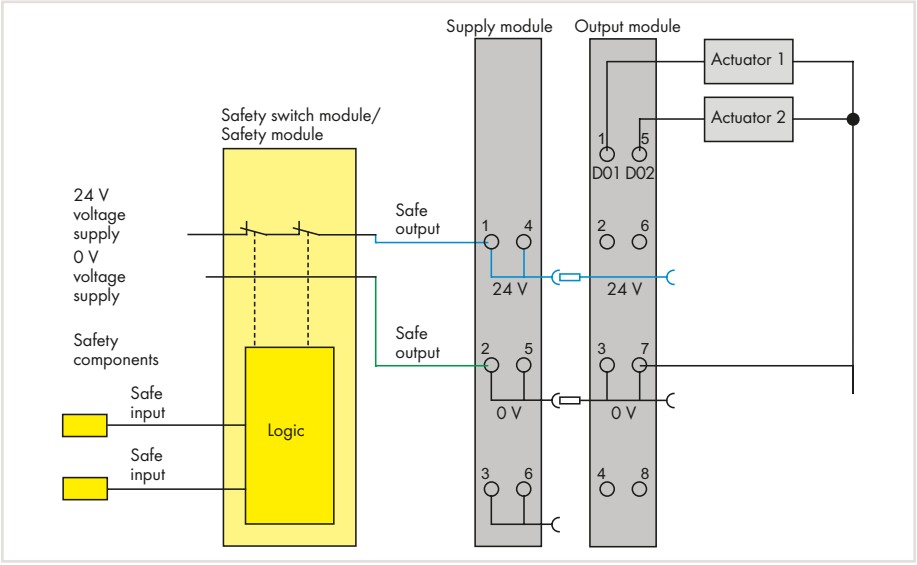
Mixed Operation:

Mixed operation (standard/XTR I/O modules) within a node is possible when groups of modules are electrically isolated on the field side, i.e., electrically isolated power supply. The combination may be useful, for example, when there are only increased requirements for dielectric strength and immunity to interference, but the ambient temperature is not critical.

Interference-Free in Safety-Related Applications

To easily and safely perform cost-effective, centralized deactivation of complete actuator groups safely, the actuator's power supply can be switched off using a safety switching device. This can either be performed for each individual actuator or by turning off the power supply to a group of control outputs.
In the event of failure, ensure that no interference from other current or power circuits occurs — even when the control voltage is switched off — so the defined safety function properties (logic and time response) remain unchanged.

All modules are designed to provide interference-free safety functionality. These modules comply with safety requirements up to Category 4 of DIN EN ISO 13849-1:2007. The safety category and performance level depend solely on the safety components and their wiring.



Example: Two-channel, double-pole power supply disconnection

750 XTR I/O-System

Approvals

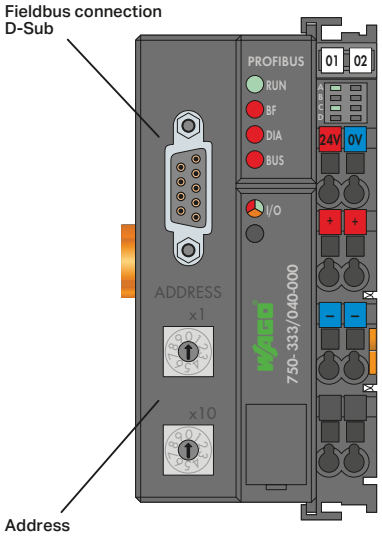
Overview of the approvals in the article comparison in Section 12, Technical Appendix, or online under www.wago.com

750 XTR I/O-System
Standards and Rated Conditions

General Specifications	
System supply voltage	24 VDC (−25 … +30 %) Specified values for ambient temperature under laboratory conditions +15 °C… +35 °C. Derating for −40 … +55 °C: 24 V (−25 … +20 %)*. Derating for +55 … +70 °C: 24 V (−25 … +10 %)*. * Including 15 % residual ripple (lower limit −27.5 %)
Ambient temperature (operation)	−40 … +70 °C
Ambient temperature (storage)	−40 … +85 °C
Relative humidity	Max. 95 %, short-term condensation per Class 3K7 / IEC EN 60721-3-3 and E DIN 40046-721-3 (except wind-driven precipitation, water and ice formation)
Operating altitude	Without temperature derating: 0–2000 m; with temperature derating: 2000–5000 m (0.5 K/100 m); max.: 5000 m
Pollution degree	2 per IEC 61131-2
Dielectric strength	Per (EN 60870-2-1) Modules ≤ 50 V: 510 VAC / 775 VDC; Modules > 50 V: 2.5 kVAC / 3.5 kVDC Isolation: Rated impulse voltage Modules ≤ 50 V: 1 kV (Class VW1 per EN 60870-2-1) Modules > 50 V: 5 kV (Class VW3 per EN 60870-2-1) Surge: Modules ≤ 50 V: 1 kV (L–L) / 2 kV (L–E) Modules > 50 V: 2 kV (L–L) / 4 kV (L–E)
Vibration resistance	Per IEC 60068-2-6 (acceleration: 5 g), EN 60870-2-2, IEC 60721-3-1, -3, EN 50155, EN 61373
Shock resistance	Per IEC 60068-2-27 (15 g/11 ms/half-sine/1,000 shocks; 25 g/6 ms/1,000 shocks), EN 50155, EN 61373
EMC immunity to interference	EN 61000-6-1, EN 61000-6-2, EN 61131-2 Marine applications, EN 50121-3-2, EN 50121-4 EN 50121-5, EN 60255-26, EN 60870-2-1 EN 61850-3, IEC 61000-6-5, IEEE 1613, VDEW: 1994
EMC emission of interference	EN 61000-6-3 and EN 61000-6-4, EN 61131-2 EN 60255-26, marine applications EN 60870-2-1 (industrial and residential areas) EN 61850-3 (industrial and residential areas) EN 50121-3-2, EN 50121-4, EN 50121-5
Protection type	IP20
Mounting position	Horizontal (standing/lying) or vertical
Mounting type	On 35 mm DIN-rail
Housing material	Polycarbonate, polyamide 6.6
Exposure to pollutants	Per IEC 60068-2-42 and IEC 60068-2-43
Permissible SO2 contaminant concentration at a relative humidity < 75 %	25 ppm
Permissible H2S contaminant concentration at a relative humidity < 75 %	10 ppm
Wire connection	CAGE CLAMP® (for standard I/O modules and fieldbus couplers)
Conductor size; strip length for standard I/O modules and couplers: ECO fieldbus couplers:	0.08–2.5 mm² / 28–14 AWG; 8–9 mm / 0.31–0.35 inch 0.08–1.5 mm² / 28–16 AWG; 5–6 mm / 0.2–0.24 inch
Wire connection	Push-in CAGE CLAMP® (for I/O modules with 16 connection points)
Conductor size; strip length for I/O modules with 16 connection points:	0.25–1.5 mm² / 24–16 AWG; 8–9 mm / 0.31–0.35 inch
Current carrying capacity of the power jumper contacts	10 A

Fieldbus Coupler PROFIBUS DP

2nd Generation, 12 MBd, extreme



Item description	FC PROFIBUS
Version	G2 12 MBd XTR
Item no.	**750-333/040-000**

Technical Data

Fieldbus	PROFIBUS
Protocols	PROFIBUS DP/V1
Connection technology: Fieldbus input/output	D-Sub 9 socket
Number of fieldbus nodes on master max.	96 with repeater
Baud rate	9.6 kBd … 12 MBd
Number of I/O modules per node max.	63
Input and output process image (internal) max.	244 bytes
System supply voltage	24 VDC (−25 … +30 %) Specified values for ambient temperatures under laboratory conditions +15 … +35 °C. Derating for −40 … +55 °C: 24 V (−25 … +20 %)*. Derating for +55 … +70 °C: 24 V (−25 … +10 %)*.
Input current typ. at rated load (24 V)	500 mA
Total current for system supply	1800 mA
Rated surge voltage	1 kV
Ambient temperature (operation)	−40 … +70 °C
Dimensions W x H x D	50.5 x 71.1 x 100 mm
Approvals	CE, KC, Marine, cULus UL 508, ANSI/ISA

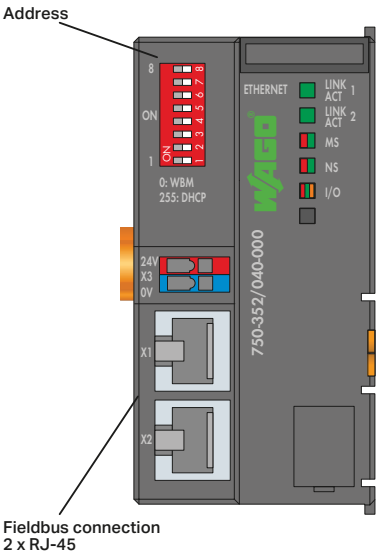
Fieldbus Coupler ETHERNET

3rd Generation, extreme

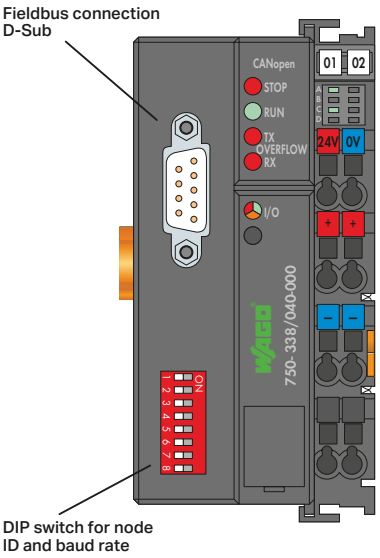


Item description	FC ETHERNET
Version	G3 XTR
Item no.	**750-352/040-000**

Technical Data	
Fieldbus	EtherNet/IP, MODBUS/TCP
Protocols	EtherNet/IP, MODBUS/TCP (UDP), HTTP, BootP, DHCP, DNS, FTP, SNMP
Connection technology: Fieldbus input/output	2 x RJ-45
Bus segment length max.	100 m
Baud rate	10/100 Mbit/s
Number of I/O modules per node max.	64
Input and output process image (internal) max.	1020 words
System supply voltage	24 VDC (−25 … +30 %)
Input current typ. at rated load (24 V)	280 mA
Total current for system supply	700 mA
Rated surge voltage	1 kV
Ambient temperature (operation)	−40 … +70 °C
Dimensions W x H x D	49,5 x 71,9 x 96,8 mm
Approvals	CE, KC, Marine, UL 508, ANSI/ISA
Data sheet and further information, see:	wago.com/750-352/040-000

Fieldbus Coupler CANopen

D-Sub, extreme



Item description	FC CANopen
Version	DSub XTR
Item no.	**750-338/040-000**

Technical Data	
Fieldbus	CANopen
Connection technology: Fieldbus input/output	D-Sub 9 connector
Number of fieldbus nodes on master max.	110
Bus segment length max.	30–1000 m (depending on baud rate / cable)
Baud rate	10 kBd … 1 MBd
Number of I/O modules per node max.	64
Input and output process image (internal) max.	512 bytes
Number of PDOs	32 Tx / 32 Rx
Number of SDOs	2 SDO servers
Communication profile	DS-301 V4.01
Device profile	DS-401 V2.0, Additional functions: Limit monitoring, flank-triggered PDOs, configurable response in the event of an error
System supply voltage	24 VDC (−25 … +30 %) Specified values for ambient temperatures under laboratory conditions +15 … +35 °C. Derating for −40 … +55 °C: 24 V (−25 … +20 %)*. Derating for +55 … +70 °C: 24 V (−25 … +10 %)*.
Input current typ. at rated load (24 V)	500 mA
Total current for system supply	1650 mA
Rated surge voltage	1 kV
Ambient temperature (operation)	−40 … +70 °C
Dimensions W x H x D	50.5 x 71.1 x 100 mm
Approvals	CE, KC, Marine, cULus UL 508, ANSI/ISA
Data sheet and further information, see:	wago.com/750-338/040-000

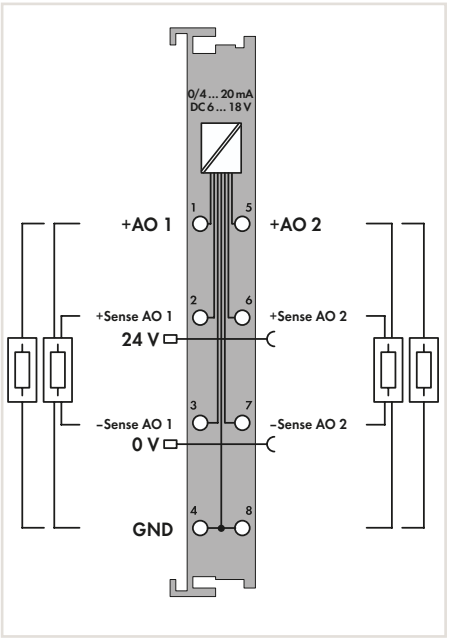
Analog Output, adjustable 0/4 … 20 mA, 6 … 18 VDC

2-channel analog output; 0/4 … 20 mA; 16 bits; 6 … 18 VDC; extreme



Item description	2AO
Version	0/4-20mA 16Bit 6-18 VDC XTR
Item no.	**750-563/040-000**

Technical Data	
Number of analog outputs	2
Type of signal	0 … 20 mA, 4 … 20 mA, 6 … 18 V
Load impedance	> 1.8 kΩ (voltage output), < 500 Ω (current output)
Resolution	16 bits
Conversion time	5 ms
Measuring error (25 °C)	< ± 0.05 % of largest measurement range
Temperature coefficient	< ± 100 ppm
System supply voltage	24 VDC (min. … +30 %), via power jumper contacts. Specified values for ambient temperatures under laboratory conditions: +15 … +35 °C. Derating for –40 … +55 °C: 24 V (min. … +20 %)*; Derating for +55 … +70 °C: 24 V (min. … +10 %)*; min. voltage range: 21.6 V; min. current range: 20.4 V
Rated surge voltage	1 kV
Data width	2 x 16 bits data, 2 x 8 bits control/status (optional)
Ambient temperature (operation)	–40 … +70 °C
Dimensions W x H x D	12 x 69.8 x 100 mm
Approvals	CE, KC, Marine, cULus UL 508, ANSI/ISA
Data sheet and further information, see:	wago.com/750-563/040-000

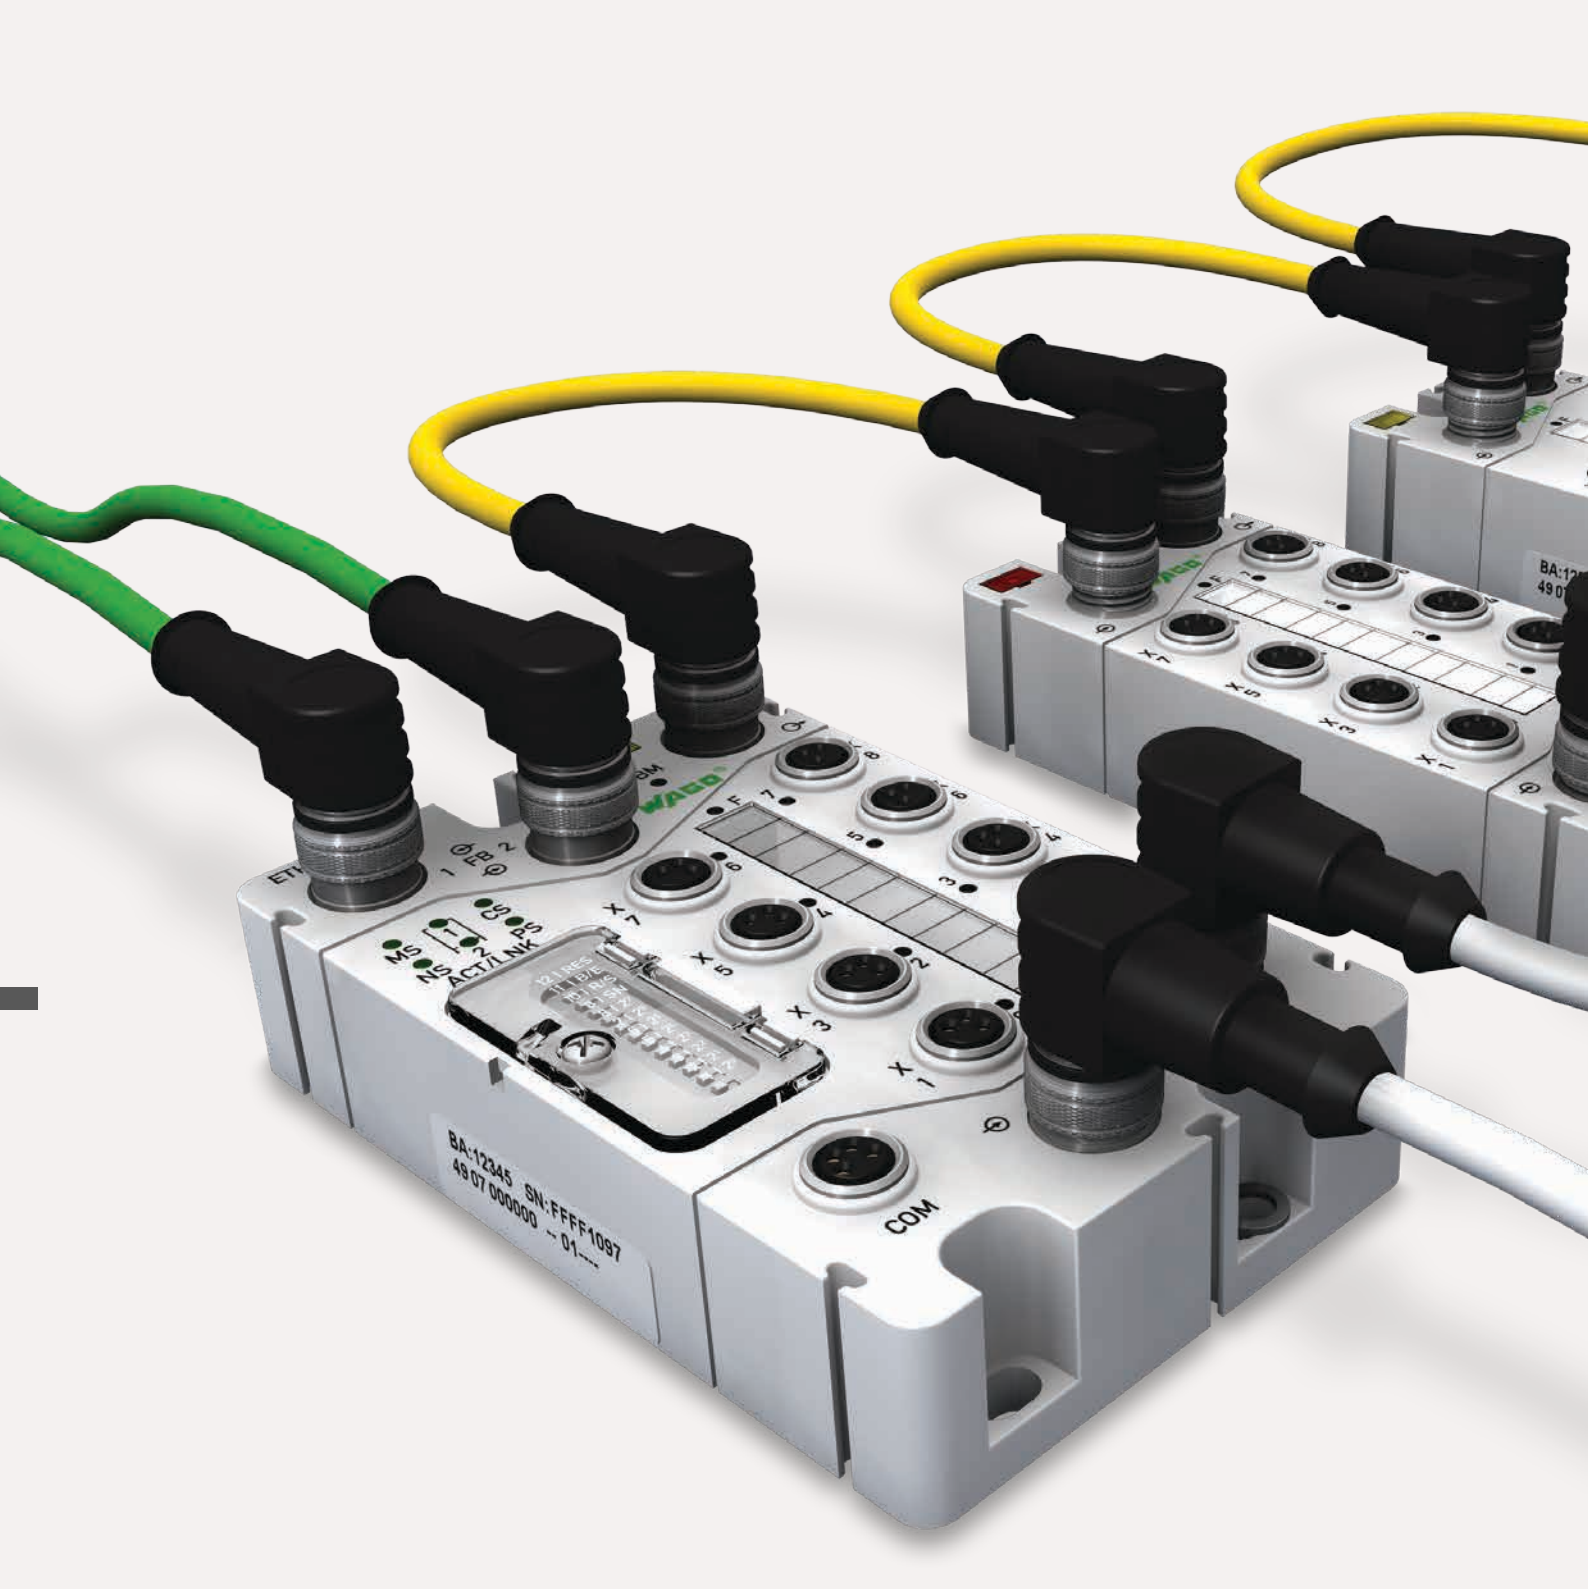
Note:
Operation of the adjacent I/O modules requires a supply module.

After the fieldbus node is assembled with the correct buscoupler and selected I/O modules, the end module is snapped onto the assembly.
It completes the internal data circuit and ensures correct data flow.



SPEEDWAY I/O-System

750 and 753 I/O-System

- Highly versatile
- More than 500 modules available
- Functional safety
- Ex i

◄◄ Section 4

750 XTR I/O-System

For demanding applications in which the following are critical:

- Extreme temperature stability
- Immunity to electromagnetic interference and impulse voltages
- Vibration and shock resistance

◄ Section 5

SPEEDWAY I/O-System

- Uncompromising protection, even in the harshest environments outside the switch cabinet
- Degree of protection: IP67
- Fully encapsulated

SPEEDWAY I/O-System
Contents

SPEEDWAY I/O-System
General Product Information

For Cabinet-Free Data Acquisition

Where discrete wiring was previously required, fieldbuses now communicate between controller, system and machine.
Depending on the application, cabinet-free automation systems help minimize costs for planning, start-up and maintenance.

In addition to requiring a high degree of protection, a robust design and standardized connection technology, there is an increasing demand for advanced IP67 features that were once reserved only for IP20 systems, including:

- Real-time capable (isochronous data acquisition/output)
- Parameterizable
- Diagnostic capable
- Upgradable

Connect the switch cabinet directly to the field level without sacrificing functionality — SPEEDWAY perfectly tailors machines to meet specific, decentralized needs. Configuration is both easy and flexible, with changes made safely and quickly (plug & play).

6

Uncompromising Protection, Even in the Harshest Environments

Every module utilizes IP67-grade protection and robust construction. These fully encapsulated modules safeguard system operation, even when subjected to temperature extremes and prolonged periods of vibration. When combined, these robust design elements ensure long-term electronic circuit protection. Additionally, moisture cannot penetrate the units to cause damage (e.g., hairline cracks).
Segmented electromagnetic shielding consisting of a metalized housing and shield plating guarantees optimal electromagnetic compatibility within the housing. Potential interferences are directly discharged via the modules' attachments to the machine or system. Even in sub-zero temperatures, the WAGO SPEEDWAY I/O SYSTEM performs reliably.

Modular Design

WAGO 767 SPEEDWAY is a fieldbus-independent modular IP67 I/O system. It is linked via a fieldbus coupler with a higher-level controller. The fieldbus coupler already has digital inputs. An integrated system bus interface connects to other I/O modules.
Fieldbus couplers and I/O modules can be extensively parameterized, allowing direct field-side acquisition and transmission of signals depending on the application needs.

Up to:

- 64 I/O modules per station
- 8 channels per module
- 520 channels per station
- 50 m between two modules
- 500 m total extension per station

Ergonomic Design

Standardized M8, M12 and M23 connections (metal design) ensure easy and safe wiring. The fieldbus, system bus, power supply and sensors/actuators are connected via several coded connectors. This streamlined approach prevents wiring errors.
To accommodate custom marking, the modules have marking strips and a WMB plate. Both the LEDs and marking field are uniquely assigned to the connection.

Flexible Assembly

The modules can be directly mounted on machines. Extensive engineering ensures compliance with standardized specifications from CNOMO guidelines regarding the spacing of assembly drill holes that are often used in passive distributor or sensor/actuator boxes. Adapters for both rail- and machine-mount brackets are also available.

Exceptional Degrees of Freedom

Featuring update capability, the SPEEDWAY I/O-System makes it easy to update fieldbus couplers and I/O module firmware to incorporate new functions. Integrated system parameter handling stores and loads parameter settings and checks that the replacement module is correct when installed.
With option handling, variable I/O station configurations, which can occur when tools are changed in a machining center, can be implemented without engineering via PROFIBUS.

Advantages:

- Fully encapsulated for harsh environmental conditions
- Fieldbus-independent — Support all standard fieldbus protocols & ETHERNET standards
- Real-time capability up to isochronous mode for selected ETHERNET-based fieldbuses
- Exclusive use of standard pluggable connectors
- Flexible mounting options

SPEEDWAY I/O-System
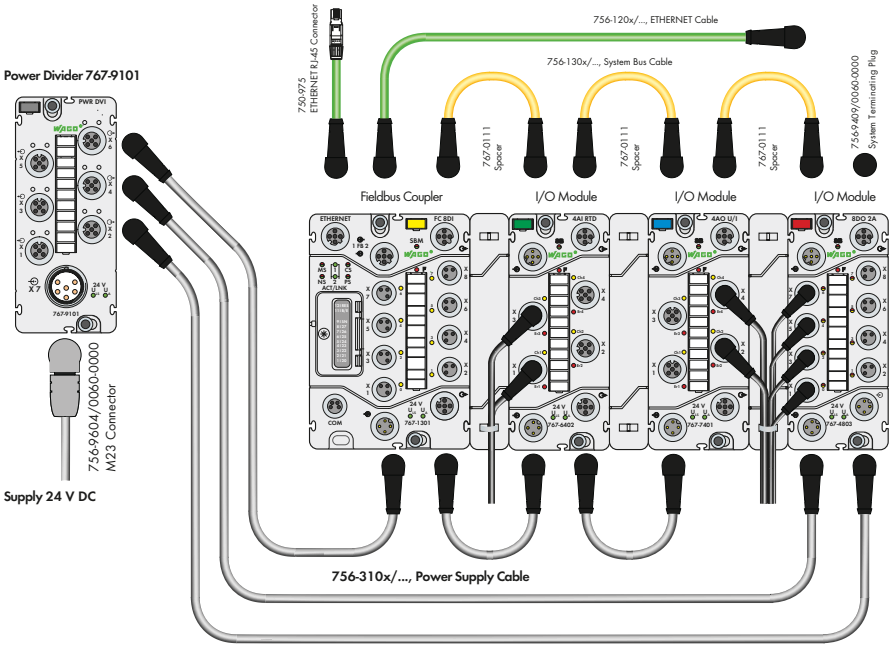
Application and Installation Instructions

Supply Modules

The WAGO SPEEDWAY system's modular structure allows both individual I/O modules and groups of modules to be supplied (e.g., emergency stop groups). Thus, different power supplies can be used at the same potential to operate each individual module and group of modules. Two supply lines are routed within the supply cables (gray). The logic and sensor supply (ULS) is always electrically isolated from the actuator supply (UA).

Additional I/O modules can be connected until the highest permissible current load of 4 A for one supply line (ULS and/or UA) is reached. The power supply must be re-established to connect additional SPEEDWAY modules. However, using 2 A output modules, power supply will not be transmitted in the event of an increased power demand.

WAGO's SPEEDWAY Power Divider permits ULS and UA power supply distribution via six M12 connectors. The combination of point-to-point and linear power distribution/distribution routing offers the greatest flexibility to optimize the supply lines for the respective application and to supply power over large distances.



Notice:

Interference-free WAGO I/O modules are not a component of the safety function and do not replace the safety switching device! When using the components in safety functions, the corresponding notes must be observed in the relevant manual.

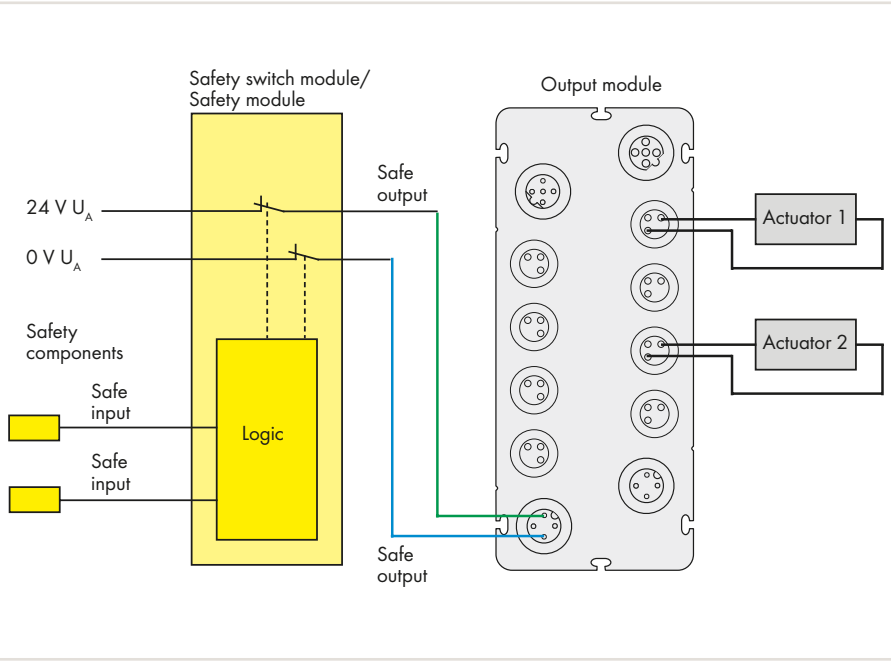
Notice:

For interference-free operation, it is necessary to lay the power cables separately or to use shielded supplied lines. Please observe the notes in the manual!

Interference-Free in Safety-Related Applications

To easily and safely perform cost-effective, centralized deactivation of complete actuator groups safely, the actuator's power supply can be switched off using a safety switching device. This can either be performed for each individual actuator or by turning off the power supply to a group of control outputs.
In the event of failure, ensure that no interference from other current or power circuits occurs — even when the control voltage is switched off — so the defined safety function properties (logic and time response) remain unchanged.

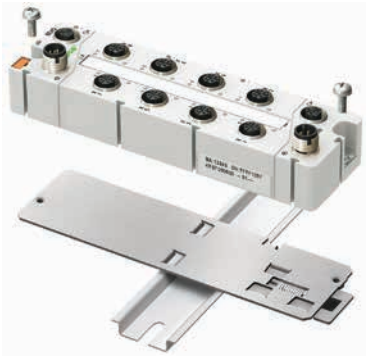
Some modules are designed to provide interference-free safety functionality. These modules comply with safety requirements up to Category 4 of DIN EN ISO 13849-1:2007. Safety category and performance level depend solely on the safety components and their wiring.



Example: Two-pin shutdown of the power supply of all digital outputs

SPEEDWAY I/O-System
Application and Installation Instructions

A



(A) Carrier rail adapter

(B) Profile rail adapter

Available for fieldbus couplers and I/O modules as accessories

SPEEDWAY I/O-System
Standards and Rated Conditions

General Specifications	
System supply voltage	24 VDC (−25 … +30 %)
Ambient temperature (operation)	−25 °C … +60 °C; temperature change 3 K/s
Storage temperature	−40 … +85 °C
Relative humidity	5 … 95 %, without condensation
Operating altitude	−1000 … 2000 m; air pressure 1080 … 795 hPa
Altitude at storage/transport	−1000 … 3500 m; air pressure 1080 … 660 hPa
Free fall	≤ 1 m per EN 61131-2
Pollution degree	3 per IEC 60664 (IEC 61131)
Protection class	III per IEC 60536 (VDE 0106, Part 1)
Vibration resistance	5 g acc. IEC 60068-2-6
Shock resistance	Short-term: 50 g/11 ms/half-sine acc. IEC 60068-2-27 Long-term: 30 g/6 ms/half-sine acc. IEC 60068-2-29
EMC immunity to interference	EN 61000-6-2
EMC emission of interference	EN 61000-6-4
Protection type	IP67 (NEMA 6&6P) per DIN 40050 (EN 60529)
Mounting position	Any
Housing material	Polyamide (PA), light gray (RAL7035); Makrolon (address switch cover), transparent; Flammability per UL94-V0; halogen, silicon-free Potting: Polyurethane (PUR), halogen/silicon-free
UV resistance	1,000 h UV continuous light per DIN EN ISO 4892-2B
Maximum contaminant concentration	SO2 < 0.5 ppm; H2S < 0.1 ppm
Current carrying capacity (supply connections)	Max. 8 A (ULS: 4 A; UA: 4 A)

PROFINET IO features	Integrated Switch
Protocols	PROFINET IO (conformity class B), DCP, LLDP, SNMP, Shared Device
Connection technology: Fieldbus input/output	Socket M12, 4 poles, D coded
Input and output process image (internal) max.	1024 bytes
System supply voltage	24 VDC (−25 … +30 %), Logic and sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Number of digital inputs	8
Type of signal	24 VDC
Input characteristic	Type 1, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input wiring	High-side switching
Input filter (digital)	0,1/ 0,5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	2.8 mA
Connection technology: Inputs	Socket M8, 3 poles
Field supply voltage	24 VDC (−25 … +30 %); Actuators (U_A), only for power supply transmission
Number of expendable modules	64
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	75 x 35.7 x 117 mm
Approvals	CE, KC, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/767-1201

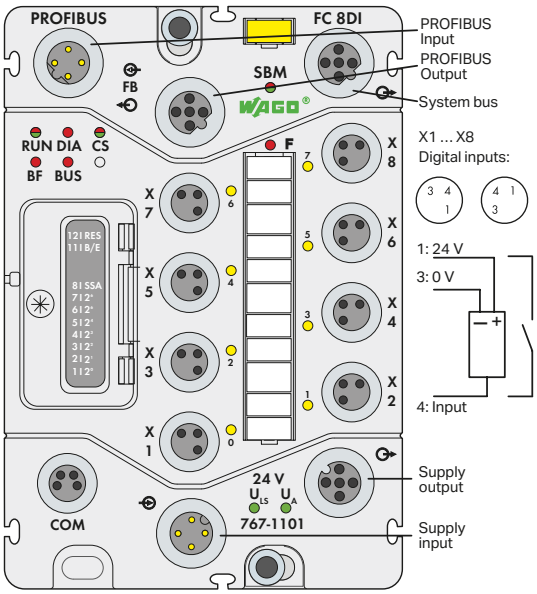
Fieldbus Coupler PROFIBUS DP

8DI 24 VDC



Item description	FC PROFIBUS
Version	8DI 24VDC
Item no.	**767-1101**

Technical Data

Fieldbus	PROFIBUS
Protocols	PROFIBUS DP/V1
Connection technology: Fieldbus input/output	Socket M12, 4 poles, B coded
Baud rate	9.6 kBd ... 12 MBd
Input and output process image (internal) max.	244 bytes
System supply voltage	24 VDC (−25 ... +30 %), Logic and sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Number of digital inputs	8
Type of signal	24 VDC
Input characteristic	Type 1, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input wiring	High-side switching
Input filter (digital)	0,1/ 0,5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	2.8 mA
Connection technology: Inputs	Socket M8, 3 poles
Field supply voltage	24 VDC (−25 ... +30 %); Actuators (U_A), only for power supply transmission
Number of expendable modules	63
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	75 x 35.7 x 117 mm
Approvals	CE, KC, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/767-1101

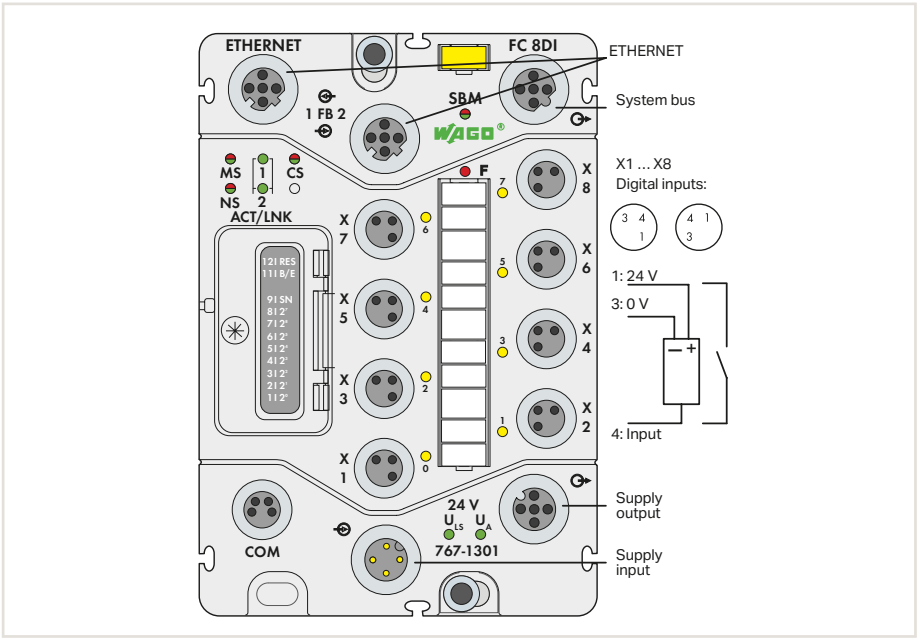
Fieldbus Coupler ETHERNET

8DI 24 VDC



Item description	FC ETHERNET
Version	8DI 24VDC
Item no.	**767-1301**

Technical Data

Fieldbus	EtherNet/IP, MODBUS/TCP
Protocols	MODBUS/TCP (UDP), EtherNet/IP
Connection technology: Fieldbus input/output	Socket M12, 4 poles, D coded
Baud rate	10/100 Mbit/s
Input and output process image (internal) max.	2048 bytes
System supply voltage	24 VDC (−25 … +30 %), Logic and sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Number of digital inputs	8
Type of signal	24 VDC
Input characteristic	Type 1, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input wiring	High-side switching
Input filter (digital)	0,1/ 0,5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	2.8 mA
Connection technology: Inputs	Socket M8, 3 poles
Field supply voltage	24 VDC (−25 … +30 %); Actuators (U_A), only for power supply transmission
Number of expendable modules	64
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	75 x 35.7 x 117 mm
Approvals	CE, UL 508, ATEX/IECEx

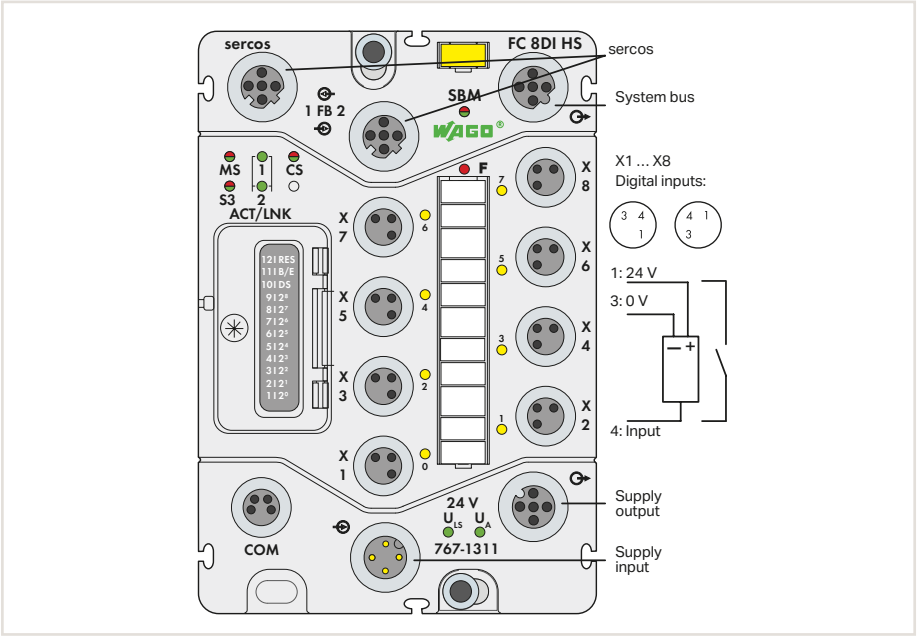
Fieldbus Coupler sercos

8DI 24 VDC



Item description	FC sercos
Version	8DI 24VDC
Item no.	**767-1311**

Technical Data

Fieldbus	sercos
Protocols	sercos v1.1.2, TCP/IP, FTP, HTTP
Connection technology: Fieldbus input/output	Socket M12, 4 poles, D coded
Baud rate	100 Mbit/s, full-duplex
Input and output process image (internal) max.	2048 bytes
System supply voltage	24 VDC (−25 … +30 %), Logic and sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Number of digital inputs	8
Type of signal	24 VDC
Input characteristic	Type 1, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input wiring	High-side switching
Input filter (digital)	0,1/ 0,5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	2.8 mA
Connection technology: Inputs	Socket M8, 3 poles
Field supply voltage	24 VDC (−25 … +30 %); Actuators (U_A), only for power supply transmission
Number of expendable modules	64
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	75 x 35.7 x 117 mm

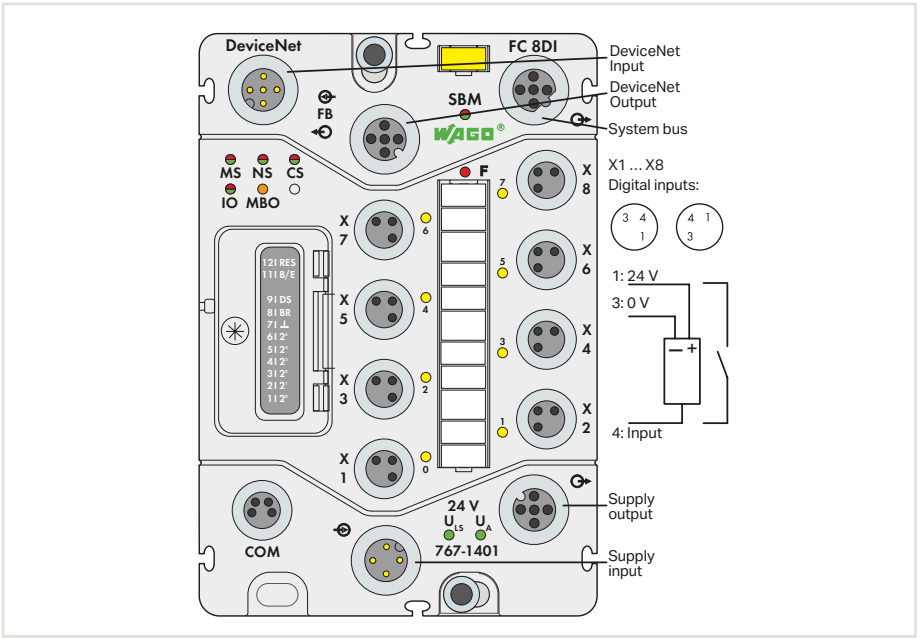
Fieldbus Coupler DeviceNet

8DI 24 VDC



Item description	FC DeviceNet
Version	8DI 24VDC
Item no.	**767-1401**

Technical Data

Fieldbus	DeviceNet
Connection technology: Fieldbus input/output	Socket M12, 5 poles, A coded
Baud rate	125/ 250/ 500 kbit/s
Input and output process image (internal) max.	2048 bytes
System supply voltage	24 VDC (–25 … +30 %), Logic and sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Number of digital inputs	8
Type of signal	24 VDC
Input characteristic	Type 1, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input wiring	High-side switching
Input filter (digital)	0,1/ 0,5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	2.8 mA
Connection technology: Inputs	Socket M8, 3 poles
Field supply voltage	24 VDC (–25 … +30 %); Actuators (U_A), only for power supply transmission
Number of expendable modules	64
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	75 x 35.7 x 117 mm

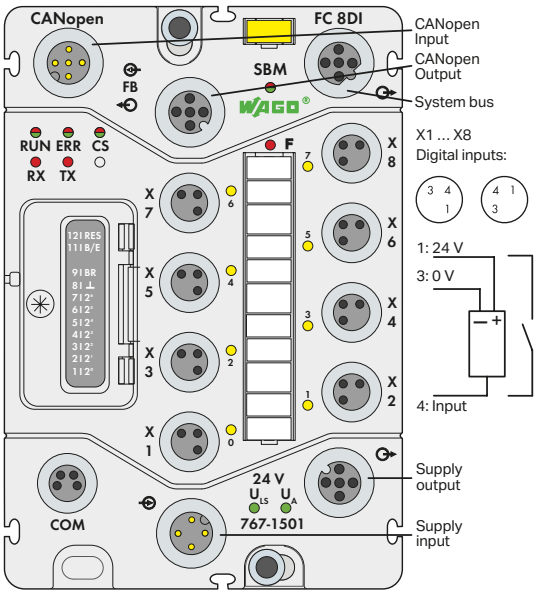
Fieldbus Coupler CANopen

8DI 24 VDC



Item description	FC CANopen
Version	8DI 24VDC
Item no.	**767-1501**

Technical Data

Fieldbus	CANopen
Device profile	DS 401 V2.0
Protocols	CANopen acc. to DS-301 V4.01
Connection technology: Fieldbus input/output	Socket M12, 5 poles, A coded
Baud rate	125/ 250/ 500 kbit/s
Input and output process image (internal) max.	512 bytes
System supply voltage	24 VDC (−25 … +30 %), Logic and sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Number of digital inputs	8
Type of signal	24 VDC
Input characteristic	Type 1, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input wiring	High-side switching
Input filter (digital)	0,1/ 0,5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	2.8 mA
Connection technology: Inputs	Socket M8, 3 poles
Field supply voltage	24 VDC (−25 … +30 %); Actuators (U_A), only for power supply transmission
Number of expendable modules	64
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	75 x 35.7 x 117 mm
Approvals	CE, KC, UL 508, ATEX/IECEx

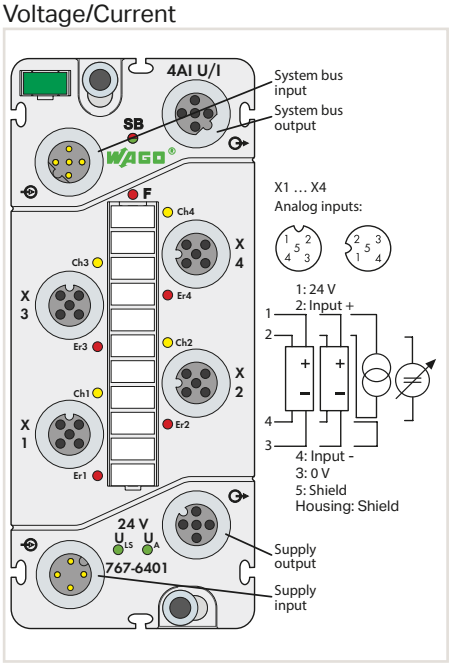
4-channel analog input

Voltage/Current



Item description	4AI
Version	U/I
Item no.	**767-6401**

Technical Data

Number of analog inputs	4
Type of signal	0 … 20 mA, 0 … 22 mA (NE43), 4 … 20 mA, ±20 mA, 0 … 10 V, ±10 V
Signal characteristic	Differential inputs
Input impedance	AI(U) ≥ 100 kΩ, AI(I) ≤ 200 Ω at 20 mA
Resolution	2-conductor, 3-conductor, 4-conductor
Conversion time	1 ms
Measuring error (25 °C)	≤ ± 0.2 % of the largest measurement range
Temperature coefficient	≤ 100 ppm/K of the largest measurement range
Connection technology: Inputs	Socket M12, 5 poles, A coded
System supply voltage	24 VDC (−25 … +30 %), Logic und sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Field supply voltage	24 VDC (−25 … +30 %); Actuators (U_A), only for power supply transmission
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	50 x 35.7 x 117 mm
Approvals	CE, KS, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/767-6401

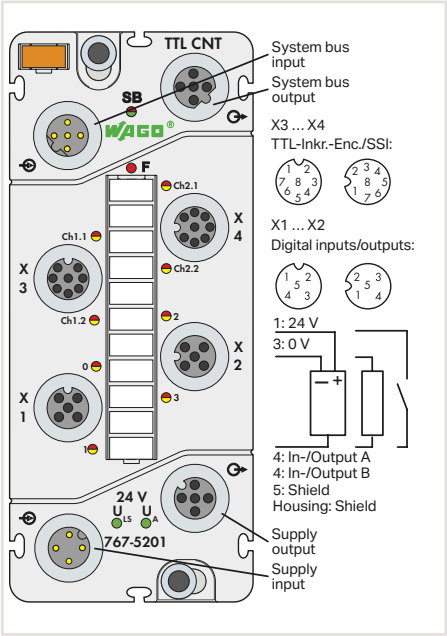
TTL Incremental Encoder/SSI Transmitter



Item description	TTL Inc. Encoder/ SSI
Item no.	**767-5201**
Technical Data	
Number of inputs	2
Encoder connection	A, A\, B, B\, C, C\ (Incremental encoder); D+, D-, CL+, CL (SSI encoder)
Sensor supply	5 V/24 V, max. 300 mA
Signal input/output	Differential signal RS-422
Method of conversion (SSI)	Binary/Gray
Counter resolution (Inc.)	32 bits
Operating frequency (Inc.)/ Baud rate (SSI)	1 MHz / up to 2 MHz
Connection technology: Incr. Encoder/SSI Encoder	Socket M12, 8 poles, shielded, A coded
Number of digital inputs	4
Type of signal	24 VDC
Input characteristic	Type 3, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Number of digital outputs	4
Output current per channel	0,1 A, short-circuit/overload proof (thermal shutdown)
Actuator connection	2-conductor, 3-conductor
Connection technology: Inputs/Outputs	Socket M12, 5 poles, shielded, A coded
System supply voltage	24 VDC (−25 … +30 %), Logic und sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Field supply voltage	24 VDC (−25 … +30 %), Actuators (U_A)
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	50 x 35.7 x 117 mm
Approvals	CE, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/767-5201

Accessories	Item no.	Page
Marking strip	767-102	357
Marking pen	210-110	357
Spacer module	767-111	356
Carrier rail adapter	767-122	356
Profile adapter	767-124	356
M12 protective cap	756-8102	357
M12 protective cap (plug)	756-8103	357

Configurable functions:
Online simulation, diagnostics
- Incremental encoder: Evaluation, filter
- SSI encoder: Data width/length, transmission rate
- Cam: Upper/lower value, output
- Pulse-width modulation: Pulse duty factor, frequency
- Digital I/Os: Operating mode, filter, substitute value strategy

Item no.	**767-5202**
Technical Data	
Number of inputs	2
Encoder connection	A, A\, B, B\, C, C\ (Incremental encoder)
Sensor supply	5 V/24 V, max. 300 mA
Signal input	HTL, differential/single-ended
Counter resolution (Inc.)	32 bits
Operating frequency (Inc.)/Counter frequency	250 kHz
Counter input	24 VDC
Power supply (Counter)	max. 300 mA
Connection technology: Incr. encoder/Counter	Socket M12, 8 poles, shielded, A coded
Number of digital inputs	4
Type of signal	24 VDC
Input characteristic	Type 3, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Number of digital outputs	4
Output current per channel	0,1 A, short-circuit/overload proof
Actuator connection	2-conductor, 3-conductor
Connection technology: Inputs/Outputs	Socket M12, 5 poles, shielded, A coded
System supply voltage	24 VDC (−25 … +30 %), Logic und sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Field supply voltage	24 VDC (−25 … +30 %), Actuators (U_A)
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	50 x 35.7 x 117 mm
Approvals	CE, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/767-5202

Configurable functions:
Online simulation, diagnostics
- Incremental encoder: Evaluation, filter
- Counter: Gate, direction, gate time, preset
- Cam: Upper/lower value, output
- Pulse-width modulation: Pulse duty factor, frequency
- Digital I/Os: Operating mode, filter, substitute value strategy

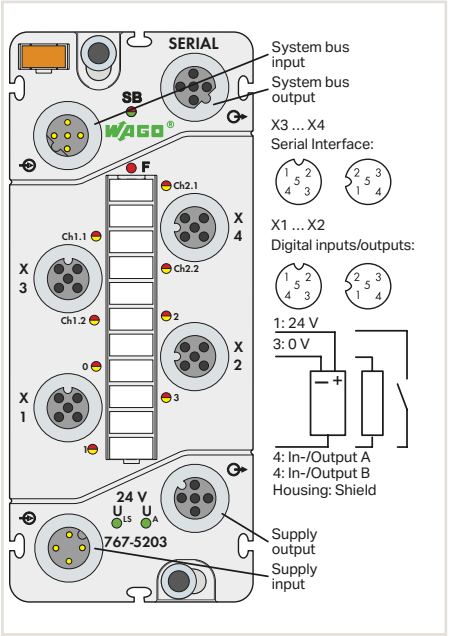
RS-232/422/485 Serial Interface



Item description	RS232/422/485 Interface
Item no.	**767-5203**
Technical Data	
Type of signal	RS-232/422/485
Transmission channels	1 RxD / 1 TxD (full-/half-duplex)
Baud rate	300 … 115.200 Baud
Parity	None/Odd/Even
Number of data bits	7/8, adjustable
Number of stop bits	1/2, adjustable
Buffer	4 KB (In); 4 KB (Out)
Connection technology: Interface	Socket M12, 5 poles, shielded, A coded
Number of digital inputs	4
Type of signal	24 VDC
Input characteristic	Type 2, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input filter (digital)	0.1/ 0.5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	7.3 mA
Number of digital outputs	4
Output current per channel	0.5 A (max. 0.6 A), short-circuit/overload proof
Actuator connection	2-conductor, 3-conductor
Connection technology: Inputs/Outputs	Socket M12, 5 poles, shielded, A coded
System supply voltage	24 VDC (−25 … +30 %), Logic und sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Field supply voltage	24 VDC (−25 … +30 %), Actuators (U_A)
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	50 x 35.7 x 117 mm
Approvals	CE, KC, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/767-5203

Configurable functions:
Online simulation, diagnostics
- Serial interface: Operating mode, baud rate, data bits, parity, stop bits, flow-Control
- Digital I/Os: Operating mode, input filter, inversion, substitute value strategy, manual mode

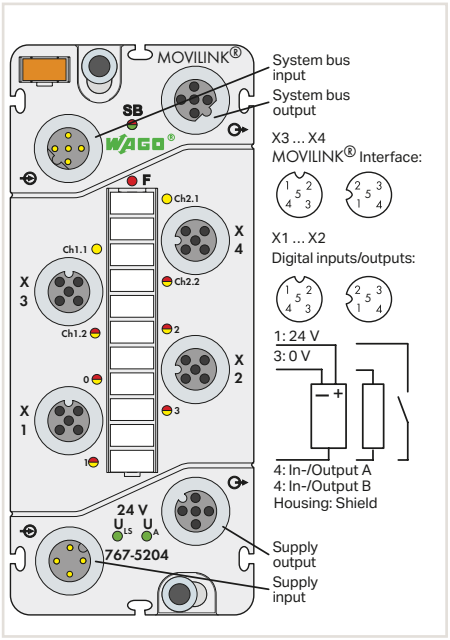
MOVILINK® Interface (RS-232, RS-485)



Item description	RS232/485 Movilink Interface
Item no.	**767-5204**

Technical Data

Type of signal	RS-232/485
Transmission channels	1 RxD / 1 TxD (full-/half-duplex)
Baud rate	9.600 Bd ... 57.600 Bd
Protocols	MOVILINK®
MOVILINK operating mode	Easy Modus/Mailbox Modus
Connection technology: Interface	Socket M12, 5 poles, shielded, A coded
Number of digital inputs	4
Type of signal	24 VDC
Input characteristic	Type 2, acc. to IEC 61131-2
Sensor connection	2-conductor, 3-conductor
Input filter (digital)	0.1/ 0.5/ 3 /15 /20 ms/Filter off; adjustable
Input current per channel for signal (1) typ.	7.3 mA
Number of digital outputs	4
Output current per channel	0.5 A (max. 0.6 A), short-circuit/overload proof (thermal disconnection)
Actuator connection	2-conductor, 3-conductor
Connection technology: Inputs/Outputs	Socket M12, 5 poles, shielded, A coded
System supply voltage	24 VDC (−25 ... +30 %), Logic und sensors (U_{LS})
Connection technology: System supply	Socket M12, 4 poles, A coded
Field supply voltage	24 VDC (−25 ... +30 %), Actuators (U_A)
Connection technology: System bus	Socket M12, 5 poles, B coded
Dimensions W x H x D	50 x 35.7 x 117 mm
Approvals	CE, UL 508, ATEX/IECEx
Data sheet and further information, see:	wago.com/767-5204

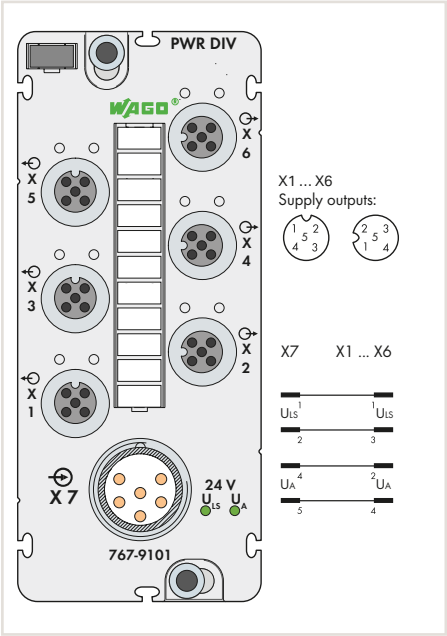
M12 protective cap (plug)	756-8103	357

The module is used to actuate drives from SEW Eurodrive via the serial MOVILINK® interface.

Configurable functions:
Online simulation, diagnostics
- MOVILINK® interface: Operating mode, Type, Braud rate
- Digitale I/Os: Operating mode, input filter, inversion, substitute value strategy, manual mode

MOVILINK is a registered trademark of SEW Eurodrive GmbH & Co KG

Power Divider



Item description	Power Divider
Item no.	**767-9101**

The power distribution connector is used to distribute supply voltage to several modules.

Technical Data	
System supply voltage	24 VDC (−25 … +30 %)
Field supply voltage	24 VDC (−25 … +30 %), Logic und sensors (U_{LS})
Connection technology: Supply	Plug M23, 6 poles*
Current carrying capacity module	max. 24 A (U_{LS} max. 8 A, U_A max. 16 A)*
No. of outputs	6
Current carrying capacity connector	max. 8 A (U_{LS}: 4 A, U_A: 4 A)*
Connection technology: System supply	Socket M12, 4 poles, A coded*
Isolation	500 VDC U_{LS}/U_A
Dimensions W x H x D	50 x 43.3 x 117 mm
Approvals	CE, KS, UL 508
Data sheet and further information, see:	wago.com/767-9101

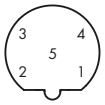
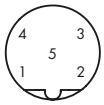
System bus cable for drag chain



M12 socket

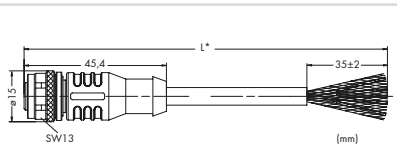


M12 plug

Pin 1 - 5: 0.14 mm²

1 red
2 black
3 blue
4 brown
5 yellow, green, orange, gray

Connection technology	M12 socket/plug, B coded
Operating voltage	≤ 60 V
Operating current	4 A
Rated surge voltage	1.5 kV
Suitable for drag chain applications	≥ 5 Mio. bending cycles
Ambient temperature (operation) moved	0 … +50 °C
Protection type	IP67
Cable diameter	6.8 mm



System bus cable for drag chain, M12 socket, straight, B coded	Item No.	Pack. Unit
M12 socket, straight, 2 m	756-1501/060-020	1
M12 socket, straight, 5 m	756-1501/060-050	1

Conductor size
Ø 6 ... 8 mm
screw clamp connection:
0.14 ... 0.75 mm²
spring clamp connection:
0.14 ... 0.5 mm²

M12 socket, right angle

	Item No.	Pack. Unit
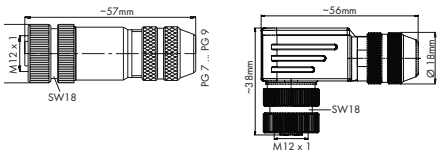
Fitted pluggable connector, 5-pole shielded, M12 socket, right angle A coded, Spring	756-9210/060-000	1
Fitted pluggable connector, 5-pole shielded, M12 socket, right angle B coded, Spring	756-9404/060-000	1
Fitted pluggable connector, 5-pole shielded, M12 socket, right angle B coded, Screw	756-9414/060-000	1

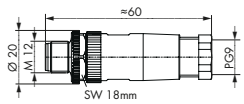


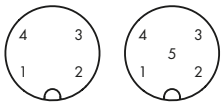
Conductor size
Ø 6 ... 8 mm/
0.14 ... 0.50 mm²

M12 socket, straight and right angle

	Item No.	Pack. Unit
Fitted pluggable connector, 8-pole shielded, M12 socket, straight, Screw	756-9211/090-000	1
Fitted pluggable connector, 8-pole shielded, M12 socket, right angle, Screw	756-9214/090-000	1

Configurable connectors with PG9 thread

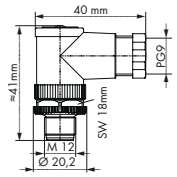


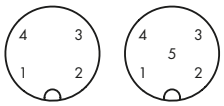


Conductor size
Ø 6 … 8 mm
screw clamp connection:
0.25 … 0.75 mm²
spring clamp connection:
0.14 … 0.5 mm²

M12 plug, straight

	Item No.	Pack. Unit
Fitted pluggable connector, 4-pole, M12 plug, straight A coded, Screw	756-9203/040-000	1
Fitted pluggable connector, 5-pole, M12 plug, straight A coded, Spring	756-9203/050-000	1

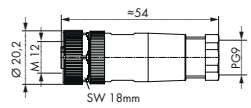


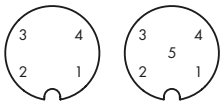


Conductor size
Ø 6 … 8 mm
screw clamp connection:
0.25 … 0.75 mm²
spring clamp connection:
0.14 … 0.5 mm²

M12 plug, right angle

	Item No.	Pack. Unit
Fitted pluggable connector, 4-pole, M12 plug, right angle A coded, Screw	756-9206/040-000	1
Fitted pluggable connector, 5-pole, M12 plug, right angle A coded, Spring	756-9206/050-000	1

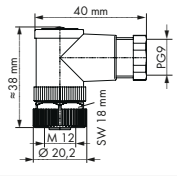


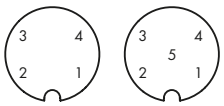


Conductor size
Ø 6 … 8 mm
screw clamp connection:
0.25 … 0.75 mm²
spring clamp connection:
0.14 … 0.5 mm²

M12 socket, straight

	Item No.	Pack. Unit
Fitted pluggable connector, 4-pole, M12 socket, straight A coded, Screw	756-9213/040-000	1
Fitted pluggable connector, 5-pole, M12 socket, straight A coded, Spring	756-9213/050-000	1



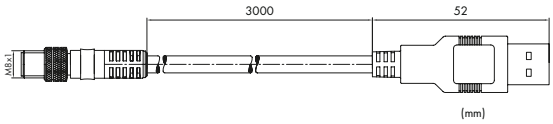


Conductor size
Ø 6 … 8 mm
screw clamp connection:
0.25 … 0.75 mm²
spring clamp connection:
0.14 … 0.5 mm²

M12 socket, right angle

	Item No.	Pack. Unit
Fitted pluggable connector, 4-pole, M12 socket, right angle A coded, Screw	756-9216/040-000	1
Fitted pluggable connector, 5-pole, M12 socket, right angle A coded, Spring	756-9216/050-000	1

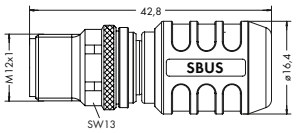
USB communication cable, terminating resistors, T-piece

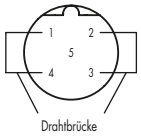


Pin 1 = red
Pin 2 = white
Pin 3 = green
Pin 4 = black

USB communication cable

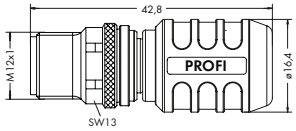
	Item No.	Pack. Unit
USB communication cable, M8 plug, straight, USB Typ A plug, straight, 3 m	756-4101/042-030	1

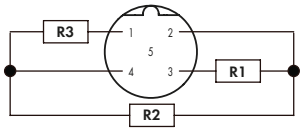




System bus terminating plug

	Item No.	Pack. Unit
M12 system bus terminating plug, B coded, straight	756-9409/060-000	1

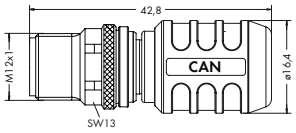


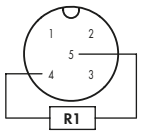


R3=390 Ω 0.4 W
R2=220 Ω 0.4 W
R1=390 Ω 0.4 W

PROFIBUS terminating plug

	Item No.	Pack. Unit
M12 PROFIBUS terminating plug, B coded, straight	756-9405/060-000	1

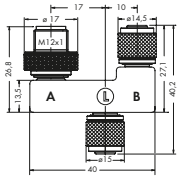


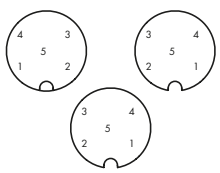


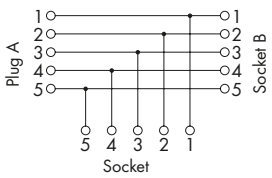
R1=120 Ω 0.25 W

CANopen, DeviceNet terminating plug

	Item No.	Pack. Unit
M12 CANopen, DeviceNet terminating plug, A coded, straight	756-9209/060-000	1





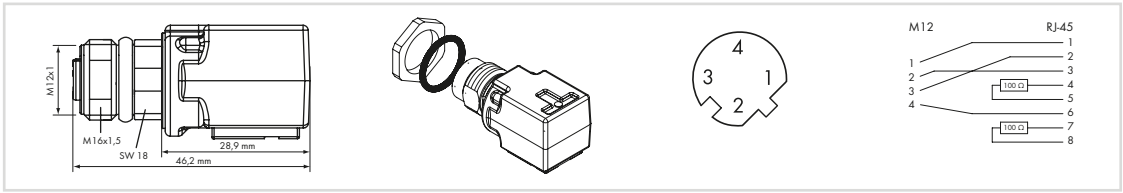


1 = Drain
2 = +24 V
3 = GND (0 V)
4 = CAN_H
5 = CAN_L

DeviceNet drop T-piece

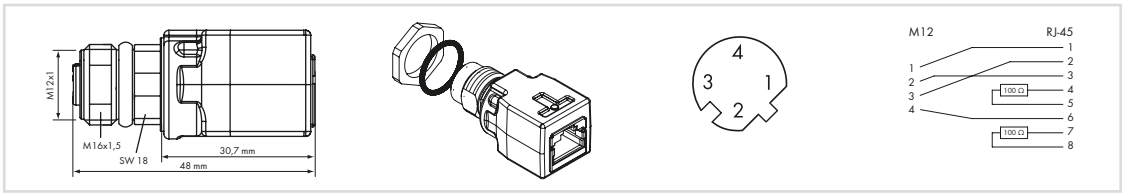
	Item No.	Pack. Unit
M12 DeviceNet drop T-piece	756-9303/050-000	1

ETHERNET, PROFINET accessories



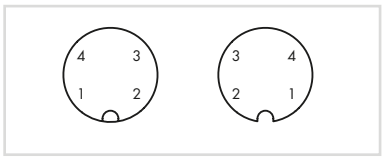
Adapter, right angle, M12 socket, D coded/RJ-45 socket

	Item No.	Pack. Unit
Adapter, right angle, M12 socket, D coded/RJ-45 socket (also ideally suited for control cabinet feedthrough applications or connecting IP67/IP20 components)	756-9503/040-000	1



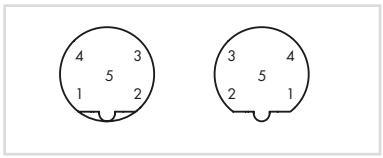
Adapter, straight, M12 socket, D coded/RJ-45 socket

	Item No.	Pack. Unit
Adapter, straight, M12 socket, D coded/RJ-45 socket (also ideally suited for control cabinet feed-through applications) or connecting IP67/IP20 components)	756-9504/040-000	1



M12 socket / M12 plug, A coded

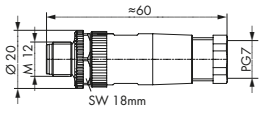
	Item No.	Pack. Unit
M12 panel feed-through connectors, A coded	756-9217/050-000	1

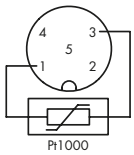


M12 socket / M12 plug, B coded

	Item No.	Pack. Unit
M12 panel feed-through connectors, B coded	756-9406/050-000	1

M12 termination and M23 configurable connectors

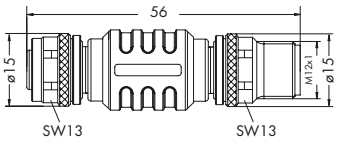


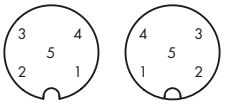


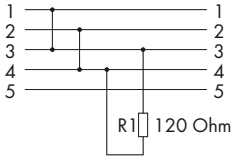
Conductor size
Ø 6 ... 8 mm /
0.14 - 0.5 mm²

Compensation connector, M12 plug, for 767-6403 Thermocoupler Module (Pt1000 sensor integrated)

	Item No.	Pack. Unit
Compensation connector, M12 plug, straight, 5 poles, spring clamp technology	756-9207/050-000	1

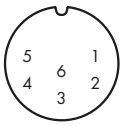






Termination M12

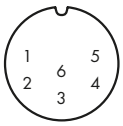
	Item No.	Pack. Unit
RS-422/-485 Termination M12	756-9218/050-000	1



Conductor size
Ø 6.5 ... 10.5 mm / max. 2.5 mm²

M23 plug

	Item No.	Pack. Unit
Fitted pluggable connector, 6-pole, M23 plug, straight, Solder	756-9601/060-000	1
Fitted pluggable connector, 6-pole, M23 plug, right angle, Solder	756-9602/060-000	1



Conductor size
Ø 6.5 ... 10.5 mm / max. 2.5 mm²

M23 socket

	Item No.	Pack. Unit
Fitted pluggable connector, 6-pole, M23 socket, straight, Solder	756-9603/060-000	1
Fitted pluggable connector, 6-pole, M23 socket, right angle, Solder	756-9604/060-000	1

M23 assembly key

	Item No.	Pack. Unit
M23 assembly key	756-8201	1

Torque Wrench M8 and M12, Assembly kit

Assembly kit for 756 Series IP67 cable assemblies and pluggable connectors with hex nut, consists of:

- Tool kit
- Torque screwdriver with adjustable torque (window scale)
- Adjustment tool for changing the torque
- Socket wrench SW9 (for M8 cable assemblies)
- Socket wrench SW13 (for M12 cable assemblies)

A torque specification of 0.6 Nm for M8 connectors and 1.0 Nm for M12 connectors is required for 756 Series cables and connectors.

6

Torque Wrench M8 and M12		
	Item No.	Pack. Unit
	206-701	1

Torque range	0.4 … 1 Nm ±6 %
Material	
Handle	Polypropylene (PP) for hard zone, thermoplastic elastomers (TPE) for soft zone
Allen key	Polyamide (PA), fiber-glassreinforced; chromium-vanadiummolybdenum steel (CrMoV) (1.2381)
Adjustment tools	Cellulose acetate; chromiumvanadium-molybdenum steel (CrMoV) (1.2381)
Color	black
Standards/specifications	EN ISO 6789; BS EN 26789; ASME B107.14.M

Industrial Switches

Industrial switches

- Copper cables
- Fiber optic cables
- Ring redundancy

Industrial switches

Industrial switches
General Product Information

Always the Right Solution

WAGO's range of switches ensures the scalability of your ETHERNET network infrastructure, while providing outstanding electrical and mechanical characteristics. These robust devices are designed for industrial use and they are fully compliant with IEEE 802.3, IEEE 802.3u, IEEE 802.3ab.

Combinable with Fiber Optic Conductors

ETHERNET via fiber-optic cables offers a multitude of advantages for industrial applications.
High immunity to interference, electrical isolation and long ranges up to 80 km are extremely beneficial characteristics — and all are compatible with the IT world!

Scaled Offering

Unmanaged and managed switches in various designs are available for high-end applications. Our ECO switches are ideal for cost-sensitive applications that do not require technical features such as redundancy. They are ideally suited for small- to medium-sized networks.

Modular Expandability

Exchangeable SPF modules can be used to adapt WAGO switches for various fiber optic cables and the necessary distances and fibers.
There are SFP modules for multimode and single mode fiber optic cables for ranges up to 80 km. With the optimum combination of copper and fiber optic cables, you are equipped for a multitude of requirements.

Web-Based Management

WAGO's fully managed switches have integrated Web-based management. Any Web browser can be used to configure the switch.

Integrated Function Monitoring

For monitoring and error reporting, the managed switch has configurable functions such as e-mail alarm and SNMP traps. In addition, all switches except for ECO versions can monitor individual ports or the power supply via a potential-free alarm contact. A DIP switch is used to configure this function.

Availability, Redundancy

Select industrial switches have several options to build redundant network structures and to guarantee secure communication even when connections are faulty:
- "Rapid Spanning Tree" per IEEE 802.1w compatible with IT standard
- Jetring — a simple ring protocol with a switching time of < 300 ms
- Xpress Ring — fast ring protocol switching time < 20 ms
- ERPSv2 per ITU-T standard switching time < 50 ms

In addition to redundancy of the communication link, a redundant power supply is integrated into the switches that can be monitored using an alarm relay. Thus, if the power supply fails, communication is not interrupted.

Different Operating Modes

The unmanaged switches are ideally suited for direct plug-and-play use. Managed switches are available for applications where IP filtering or further interpretation of telegrams is required for the application.

Advantages:

- Adaptable to different transmission media
- Automatic adaptation to
  - Speed (auto-negotiation)
  - Wiring (auto-crossover, MDI/MDIX)
- Optional redundancy
- Larger supply voltage range

Versions

Extended Temperature Range

Industrial automation technology is typically operated in temperatures ranging from 0 … 55 °C. However, there are applications that require an extended temperature range. Nearly all switches and SFP modules are available for an extended temperature range of -40 °C … +70 °C.

Industrial switches
Application and Installation Instructions

Increasing Availability through Media Redundancy

A primary reason for the success of ETHERNET communication in automation technology is that redundant mechanisms exist and uptime can be increased. This is accomplished by duplicating components and lines so that defects, such as a broken cable, no longer cause communication to fail. However, this requires complex algorithms that detect errors and determine alternative paths without causing loops or rings in the network — and this is performed with the shortest possible downtime. WAGO provides select switches with corresponding features.

Rapid Spanning Tree

- Is a standardized protocol for determining the shortest path.
- Is used in any complex topologies to disable redundant paths.
- Determines the best alternative paths during a connection interruption and activates the required paths.
- Typically requires one to three seconds to switch.

Jetring

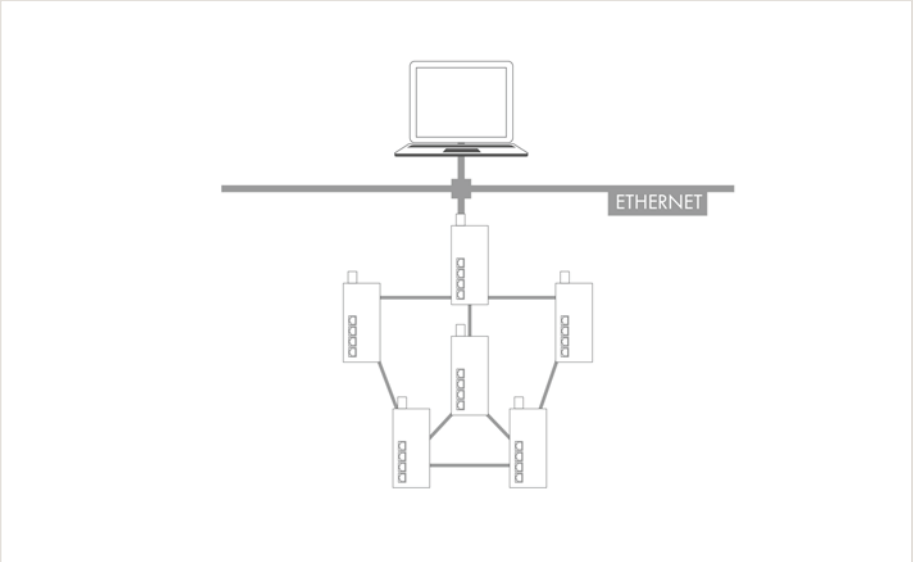
- Is a special ring protocol which does not need any special configuration.
- Automatically assigns a switch as the “master”; disables those network connections that would lead to loop and automatically switches over in case of failure.
- Typically requires approx. 300 ms to switch.
- Can be operated in “Fast Aging Mode” in connection with specific ETHERNET couplers/controllers for fast switching.

Xpress Ring

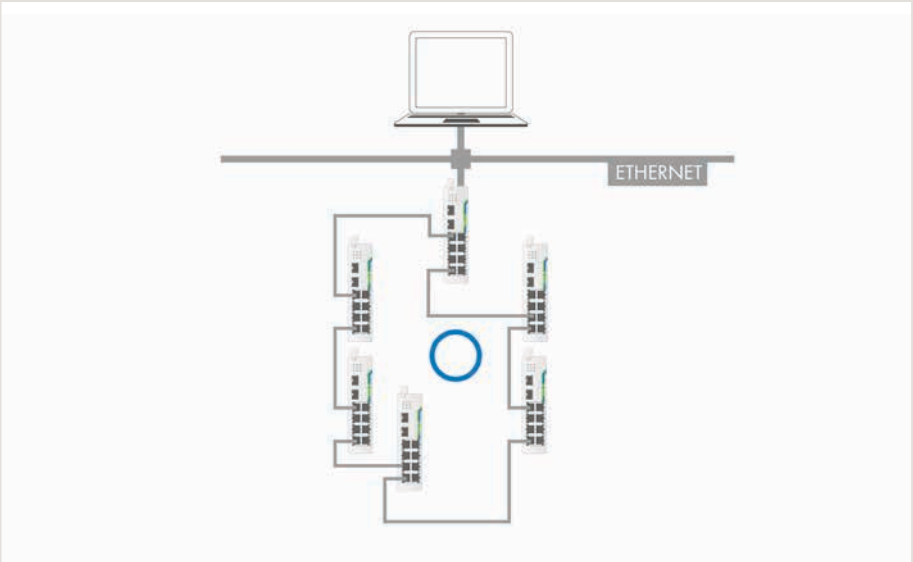
- Requires that all nodes in the ring support the protocol.
- Requires an explicit configuration of the connections.
- Requires less than 20 ms to switch.
- Is suitable as a protocol in redundant coupled ring systems (coupling ring).

ERPSv2 Ring

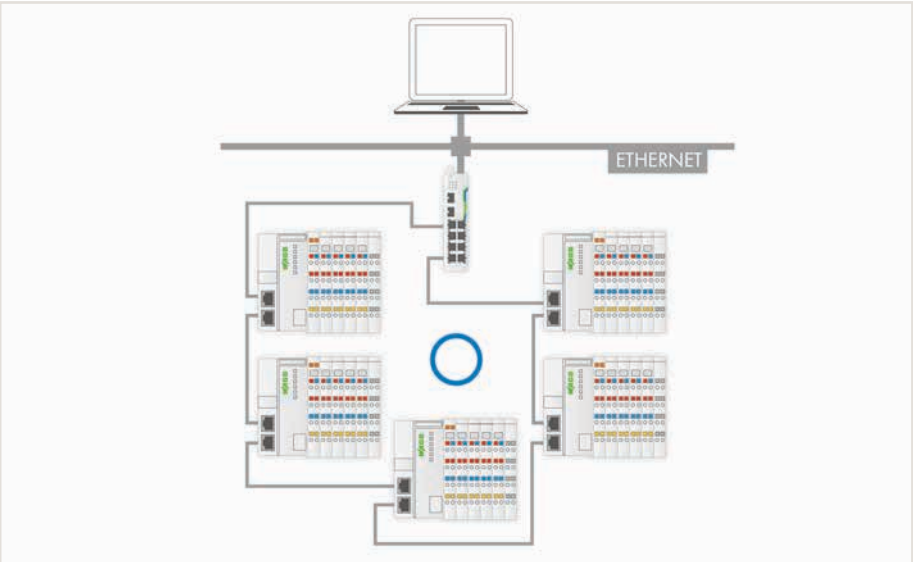
- Enables complex network structures, each with 6 rings per switch.
- Requires < 50 ms to switch.



Example: Complex topology



Example: Simple ring topology



Example: Simple ring topology with 750-881 in “Fast Aging Mode”

Radio Technology
General Product Information

Wireless Technology in the Industrial Environment

Wireless technology can support wired applications or enable completely new applications.
In mobile or movable systems, wireless technology is the first choice when greater distances or obstacles must be overcome. It is an alternative for applications in which wired solutions are not economical or technically feasible.

Various wireless technologies can be used depending on the application.

Bluetooth® — Robust, Flexible, High-Performance

Well-known in consumer electronics, *Bluetooth*® technology is also well-suited to industrial use with its internationally approved frequency range, a very robust transmission technology (frequency hopping), real-time response and a range of up to 1000 m. It makes wireless process data communication between two stations possible (point-to-point communication), and also enables the setup of a piconet in which a *Bluetooth*® master can communicate with up to seven slaves, e.g., decentralized mobile sensors.
In addition, *Bluetooth*® can be used as the radio system for commissioning.

Features:

- Secure transmission (encrypted)
- AFH (Adaptive Frequency Hopping)
- Adaptive transmission power
- Uses the license-free 2.4 GHz frequency band

GPRS for Remote Connections

For applications that go beyond site boundaries, *TO-PASS*® telecontrol technology provides the right solution. More detailed information on *TO-PASS*® is available in Section 9.

WLAN — Full IT Integration

WLAN makes it easy to set up a wireless transmission link for ETHERNET protocols. This can be standard ETHERNET protocols, e.g., for communication between a smartphone and automation components. Industrial fieldbus protocols such as PROFINET, MODBUS/TCP or Ethernet/IP can also be used to link mobile equipment with stationary equipment. Ranges up to 400 m are possible depending on the transmission technology used.

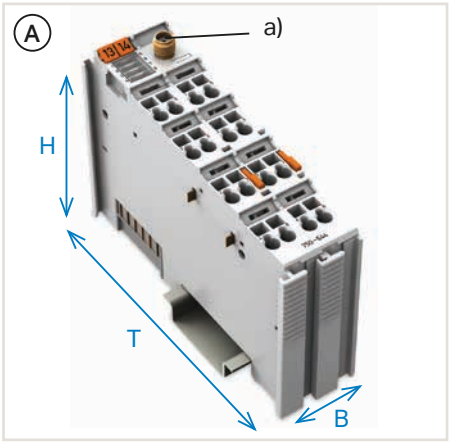
EnOcean® — The Radio Standard in Building Automation

Wireless switches and sensors based on EnOcean® technology harvest available energy to power themselves, e.g., kinetic energy from actuating a switch or sensors powered by ambient light. This energy harvesting completely eliminates maintenance of the radio transmitter at a range of up to 300 m in open air (30 m in buildings).

Advantages:

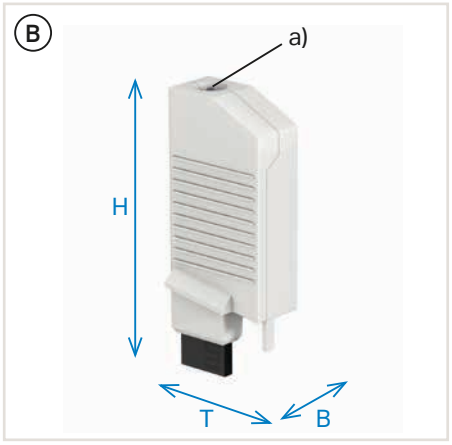
- Branch and application-specific — always the right radio system
- Industrial design: High-performance, rugged and safe
- Tightly integrated into WAGO automation technology

Radio Technology
Interfaces and Types



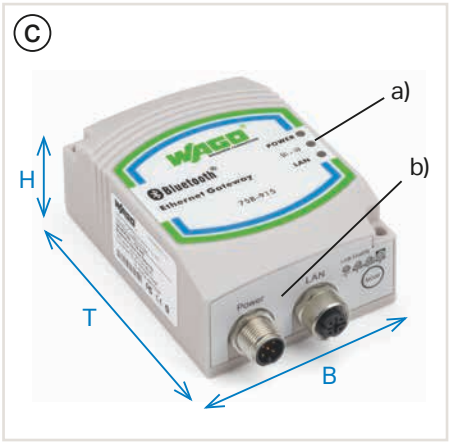
Communication Module for I/O-System (A)

- Can be used with the products:
  - Programmable fieldbus controllers (PFC)
  - Fieldbus couplers (FC) 750 I/O-System
- Antenna connection (a)
- W x H x D (mm) 24 x 72 x 100, approx. 6.5 mm of excess length with antenna socket



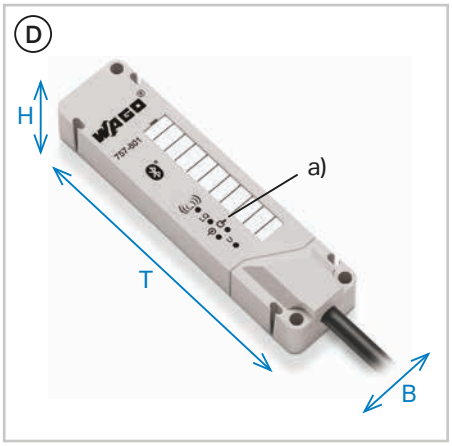
Radio Adapter (B)

- Can be used with the products:
  - PFC, PFC 750 XTR Series, FC, FC 750 XTR Series
  - *JUMPFLEX*® Signal Conditioners, 2857 + 857 Series
- Integrated antenna
- Diagnostic LED (a)
- W x H x D (mm) 15 x 50 x 19



ETHERNET Gateway (C)

- Integrated converter from ETHERNET protocols to radio technology
- Integrated antenna
- Diagnostic LEDs (a)
- Connections with M12 pluggable connectors (b)
- Degree of protection: IP65
- W x H x D (mm) 66 x 36.2 x 91



RS-232, IP67 Module (D)

- *Bluetooth*® / RS-232 converter
- Diagnostic LEDs (a)
- Connecting cable
- Degree of protection: IP67
- W x H x D (mm) 30 x 20 x 117

Contact Units (GE

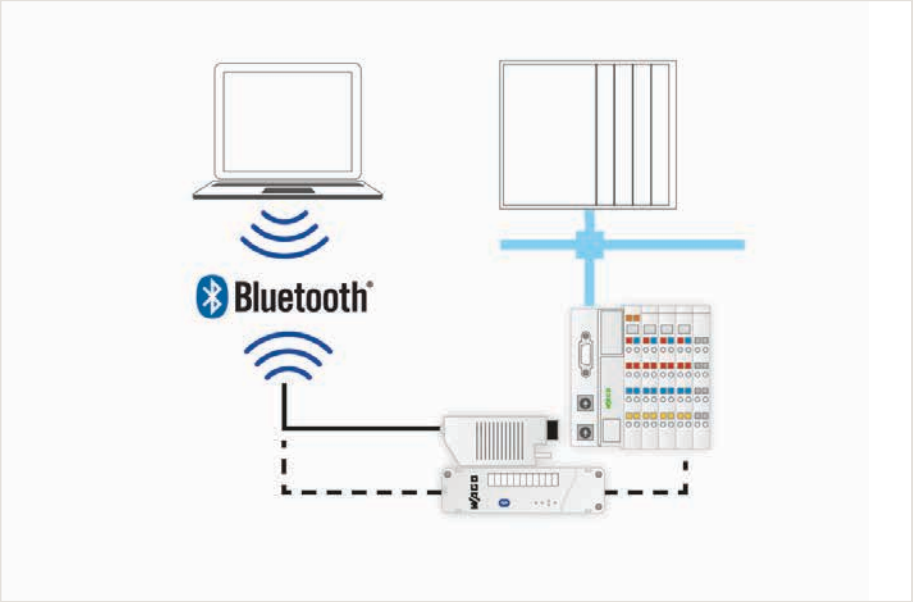
- Universal contact units for standard switch series in building automation
- Compatible with manufacturer programs from BERKER, GIRA, JUNG, MERTEN

8

Bluetooth® Wireless Technology
Application and Installation Instructions

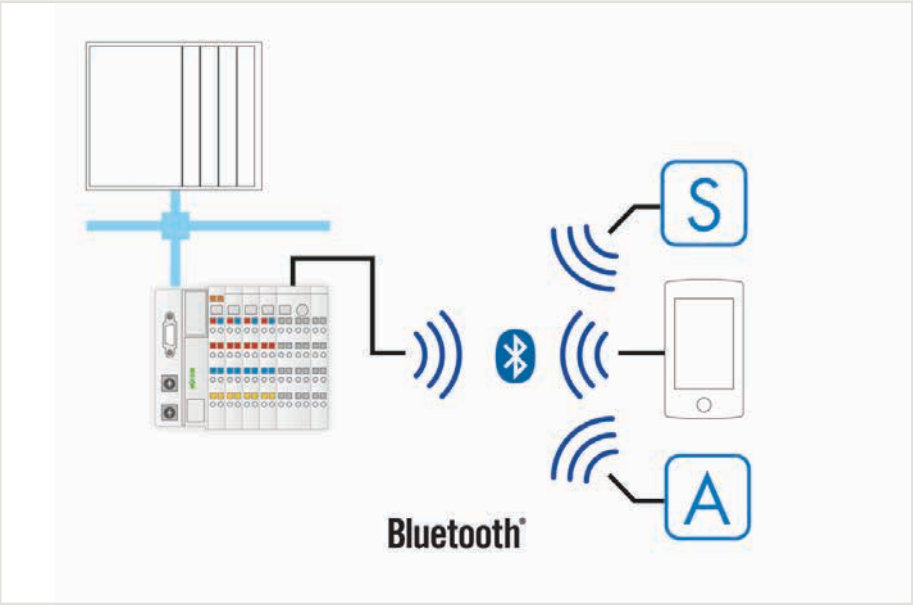
Wireless engineering

- Commissioning, maintenance
- For connecting WAGO software on a PC/notebook to a product's service interface
- Programmable fieldbus controllers
- Programmable XTR Fieldbus Controller
- 750 I/O-System Fieldbus Coupler
- 750 XTR I/O-System Fieldbus Coupler
- Temporary installation via compact *Bluetooth*® adapter
- Permanent installation with high degree of protection



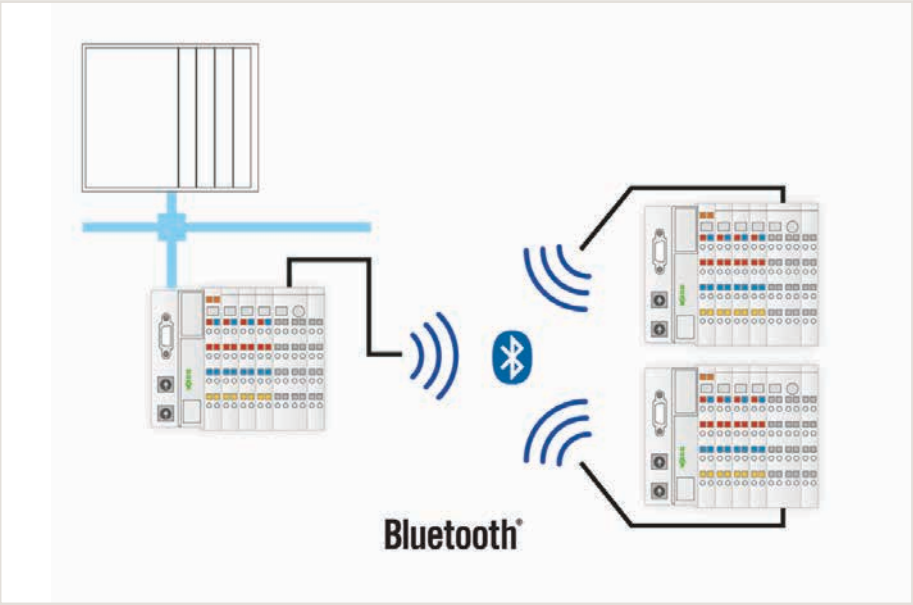
Integration of Mobile Sensors/Actuators

- Data exchange between up to eight modules
- Radio transmitter/receiver in the I/O module
- Operation on
  - Programmable fieldbus controllers
  - Fieldbus couplers
- Range: Up to 1000 m in open air



Connect Mobile Systems and Exchange Data Between Two or More Stations

- Fieldbus-independent coupling of I/O stations (up to eight) or programmable fieldbus controllers
- E.g., for coupling a mobile unit with a stationary basic system
- Or for wireless data exchange between several stations over long distances
- Process data coupling
- Range: Up to 1000 m in open air

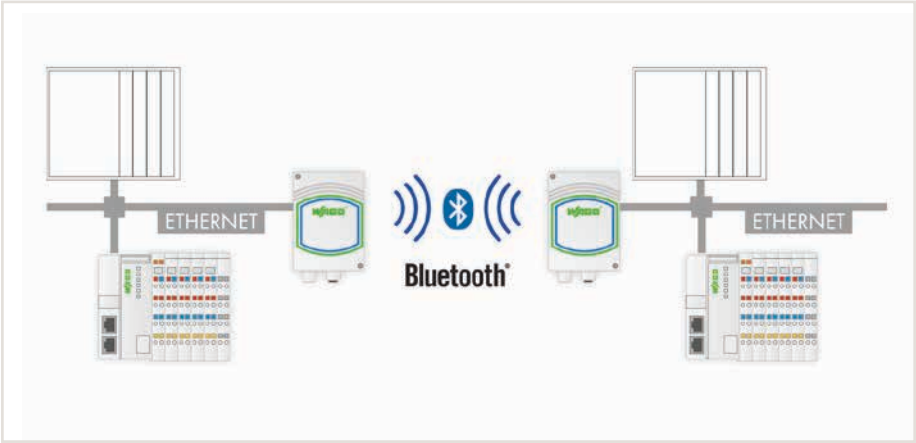


8

Bluetooth® Wireless Technology
Application and Installation Instructions

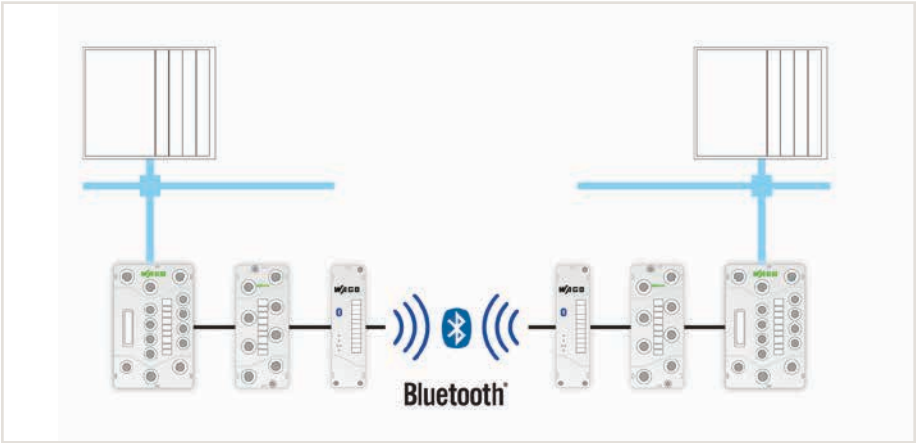
Tunneling ETHERNET Fieldbuses

- Point-to-point connection (between two nodes), e.g., for connecting mobile units to a central controller or for connecting stationary stations
- Tunneling PROFINET, MODBUS/TCP, ETHERNET/IP, etc., via Bluetooth® wireless technology
- Process data coupling
- Range: Up to 300 m in open air



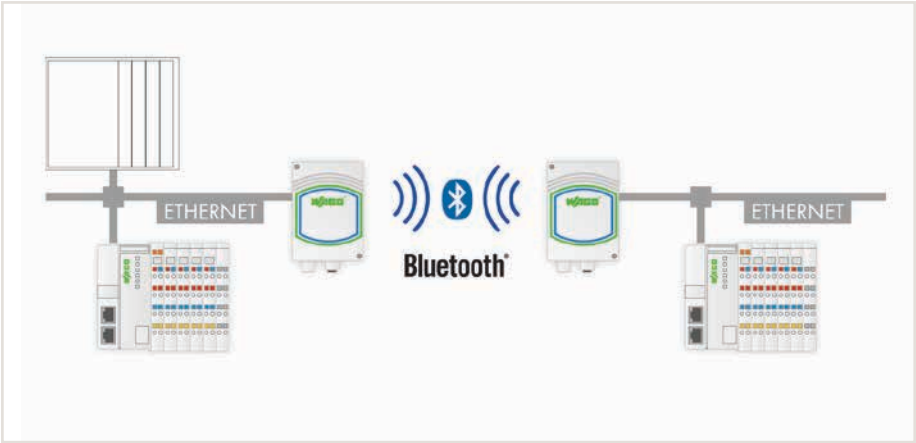
Connect Mobile Systems (IP67)

- Fieldbus-independent coupling of I/O stations or programmable fieldbus controllers
- E.g., for coupling a mobile unit with a stationary basic system
- Process data coupling
- Range: Up to 100 m in open air



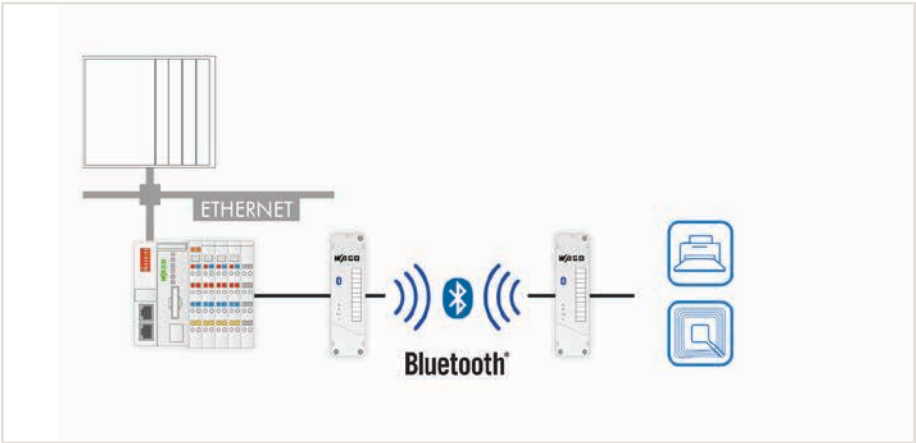
Coupling Mobile Systems

- Tunneling ETHERNET telegrams via Bluetooth® wireless technology
- Point-to-point connection, e.g., for coupling a mobile unit with a stationary basic system
- Process data coupling
- Range: Up to 300 m in open air



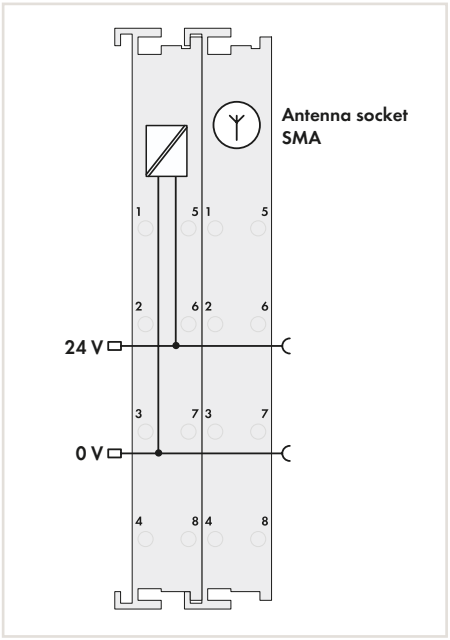
Wirelessly connect to serial devices

- Coupling of standard devices with RS-232 interface
- E.g., a printer to a mobile unit controlled by a stationary basic system
- Or to a portable RFID reader
- Range: Up to 100 m in open air



Bluetooth® RF Transceiver

Bluetooth® RF Transceiver



Item description	*Bluetooth*® RF-Transceiver
Item no.	**750-644**
Technical Data	
Antenna	External via SMA socket
Radio technology	*Bluetooth*® 2.0 + EDR
Topology	Piconet (1 master, max. 7 slaves)
Profiles	SPP, PAN
Frequency band	ISM band, 2402 … 2480 MHz
Transmitter power	Up to 20 dBm (*Bluetooth*® Class 1)
Receiver sensitivity	−94 dBm
Transmission range	Max. 1000 m free field, 100 m within buildings*
Power supply (*Bluetooth*®)	24 VDC via power jumper contacts
System supply voltage	5 VDC via data contacts
Internal data width	Configurable to 12, 24, 48 bytes, including 1 control/status byte
Diagnostics (via visual indicator)	Device status, connection status (radio connection quality, signal strength, interference)
Diagnostics (via process image)	Device status, connection status (radio connection quality, signal strength, interference), time monitoring
EMC immunity to interference	acc. to EN 61000-6-2
EMC emission of interference	acc. to EN 61000-6-3
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	24 x 72 x 100 mm
Approvals	FCC approval (this device complies with Part 15 of FCC rules), *Bluetooth*® approval, CE, KC, UL 508, ANSI/ISA, ATEX/IECEx
Data sheet and further information, see:	wago.com/750-644

Accessories	**Item no.**	Page
External antenna	**758-912**	405

The *Bluetooth*® Transceiver enables wireless exchange of process data with up to seven other devices using *Bluetooth*® 2.0 radio technology. Interoperability with *Bluetooth*® devices is provided via the *Bluetooth*® PAN and SPP profiles and is not restricted to any one manufacturer.
The module's extended diagnostic functions include cyclic and acyclic state information. For quick on-site diagnostics, main information on operational status and radio connection is also displayed via 8 LEDs.

* The specifications only apply when the antenna listed as an accessory is used.
The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

Software WAGO-I/O-*PRO* V2.3, WAGO-I/O-*CHECK*, see Section 1

Item description	*Bluetooth*® ETHERNET Gateway
Item no.	**758-915**
Technical Data	
Radio technology	*Bluetooth*® 2.0
Topology	Peer-to-peer connection
Profiles supported	Generic Access Profile (GAP), Personal Area Networking Profile (PANU, NAP)
Frequency band	ISM band, 2402–2480 MHz
Transmission range	Up to 400 m (Class 1)*
Antenna	Integrated
Power supply	24 VDC
Voltage range	9–30 VDC
Connections	- ETHERNET: M12 connector, D-coded; - Supply: M12 connector, A-coded
Configuration	Simple, push-button operation and Web-based management
Number of inputs	1 (trigger input)
Ambient temperature (operation)	–30 … +65 °C
Dimensions W x H x D	66 x 36.2 x 91 mm
Protection type	IP65
EMC immunity to interference	acc. to EN 61000-6-2
EMC emission of interference	acc. to EN 61000-6-3
Approvals	R&TTE (Europe), FCC/CFR 47 part 15, IC (Industrie Canada), CE
Data sheet and further information, see:	wago.com/758-915

* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

The *Bluetooth*® ETHERNET gateway simplifies creation of a wireless transmission link for ETHERNET protocols (e.g., PROFINET, MODBUS/TCP, Ethernet/IP).
The gateway is used as a cable substitute to create a robust, industry-proven *Bluetooth*® 2.0 link between two automation devices.
IP65 degree of protection and an internal circularly polarized antenna allow it to be used even in harsh industrial environments. Simple, push-button operation provides very fast connection between two *Bluetooth*® ETHERNET gateways.
Additional settings can be made via Web-based management.
Bluetooth® Adaptive Frequency Hopping (AFH) and "Low Emission ModeTM" provide excellent coexistence with other wireless systems, such as WLAN.

Note:
Two *Bluetooth*® ETHERNET gateways are required to establish a peer-to-peer connection.

IP67 cables and connectors
see Section 11

Bluetooth® Module

Item description	*Bluetooth*® Module
Version	RS-232, IP67
Item no.	**757-801**
Technical Data	
Version	*Bluetooth*® 2.1
Radio	Class 1 / max. 100 m*
Antenna	Integrated
Frequency range	ISM band, 2402 … 2483 MHz
Type of communication	Peer-to-peer connection
Profiles supported	Serial Port Profile (SPP)
Security encryption	*Bluetooth*® security mode 4 "Secure Simple Pairing" 128-bit encryption
Baud rate	9600 … 115200 bit/s
Power supply	+24 VDC
Display	Five LEDs
Mounting	Screw mount
Connections	RS-232
Ambient temperature (operation)	–20 … +60 °C (static); –5 … +60 °C (moving)
Dimensions W x H x D	30 x 20 x 117 mm
Protection type	IP67
EMC immunity to interference	acc. to EN 61000-6-2
EMC emission of interference	acc. to EN 61000-6-3
Connecting cable	Cable length: 5 m
Approvals	*Bluetooth*® approval, CE
Data sheet and further information, see:	wago.com/757-801

* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

WAGO's 757-801 *Bluetooth*® Module wirelessly connects a serial interface to external *Bluetooth*® devices (e.g., PCs/notebooks with *Bluetooth*®). Data is exchanged via *Bluetooth*® SPP (Serial Port Profile).
Substitute cabling between two serial devices by automatically restoring the outgoing wireless connection (e.g., to a second *Bluetooth*® module).
High protection class provides enhanced, wireless *Bluetooth*® module's installation outside of control cabinets.
Diagnostic LEDs signal the quality of the wireless connection and communication via the RS232 interface.

Marking strips, felt-tip pen
see Accessories, Section 10

Bluetooth® Adapter

Item description	*Bluetooth*® Adapter
Item no.	**750-921**
Technical Data	
Range:	30 m free field (Class 2)*
Data transfer rate	9600 … 115000 bit/s
Frequency range	ISM band, 2402 … 2483 MHz
Type of communication	Peer-to-peer connection
Profiles supported	Serial Port Profile (SPP)
Version	*Bluetooth*® 2.1
Radio	Class 2
Antenna	Integrated
Connections	4-pole service connector
Configuration	AT commands, e.g., via hyperterminal
Function	Master or slave
LED	Operating mode
Security encryption	128-bit encryption
Ambient temperature (operation)	–20 … +60 °C
Dimensions W x H x D	15 x 50 x 19 mm
Approvals	*Bluetooth*® approval, CE
Data sheet and further information, see:	wago.com/750-921

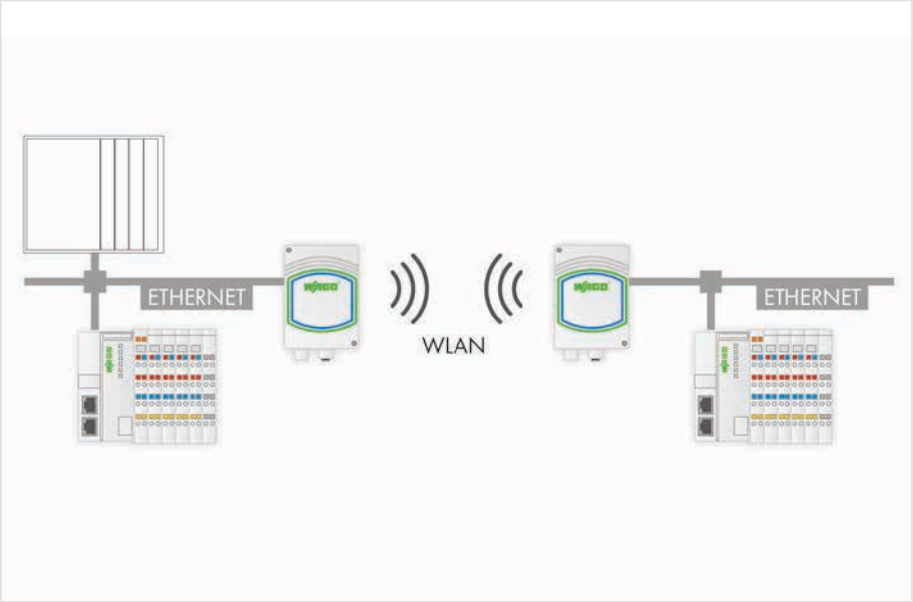
* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

The *Bluetooth*® Adapter wirelessly connects a notebook computer with *Bluetooth*® functionality to the service interface of the fieldbus coupler/controller. It also provides an active connection to a programmable fieldbus controller.
As a cable substitute, the *Bluetooth*® Adapter allows communication between two controllers, as well as between fieldbus couplers/controllers via WAGO software tools.
The adapter is supplied via the service interface and, therefore, via the power supply of the fieldbus coupler/controller.

WLAN Wireless Technology
Application and Installation Instructions

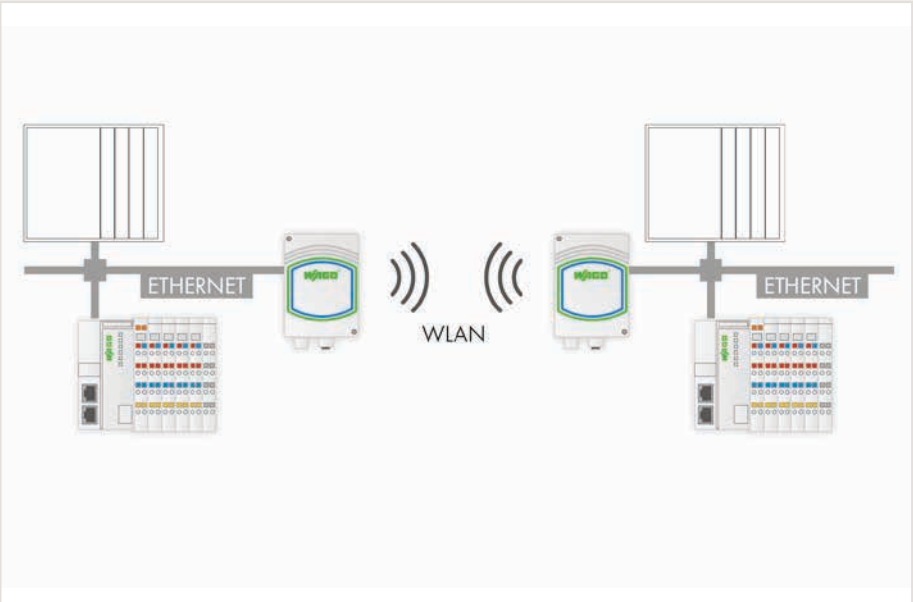
Connect Mobile Systems

- Peer-to-peer connection (between two nodes), e.g., for coupling a mobile unit with a stationary basic system
- Tunneling ETHERNET telegrams via WLAN wireless technology
- Process data coupling
- Range: Up to 400 m in open air (2.4 GHz frequency band)
- Range: Up to 200 m in open air (5 GHz frequency band)



Tunneling ETHERNET Fieldbuses

- Peer-to-peer connection (between two nodes), e.g., for connecting mobile units to a central controller
- Tunneling PROFINET, MODBUS/TCP, Ethernet/IP, etc., via WLAN wireless technology
- Process data coupling
- Range: Up to 400 m in open air (2.4 GHz frequency band)
- Range: Up to 200 m in open air (5 GHz frequency band)



WLAN ETHERNET Gateway

Power connector:
M12 plug, A-coded

1: Vin + (DC 9 ... 30 V)
2: External Trigger Ground
3: Vin GND (0 V)
4: External Trigger + (DC 9 ... 30 V)
5: n.c.

ETHERNET connector:
M12 socket, D-coded

1: Transmit +
2: Receive +
3: Transmit -
4: Receive -

* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

WAGO WLAN ETHERNET Gateways simplify creation of a wireless transmission link for ETHERNET protocols (e.g., PROFINET, MODBUS/TCP, Ethernet/IP).
The gateway is used as a cable substitute to create a robust, industry-proven WLAN link between two automation devices.
IP65 degree of protection and an internal circularly polarized antenna allow it to be used even in harsh industrial environments. Simple, push-button operation provides very fast connection between two WLAN ETHERNET Gateways.
Additional settings can be made via Web-based management.

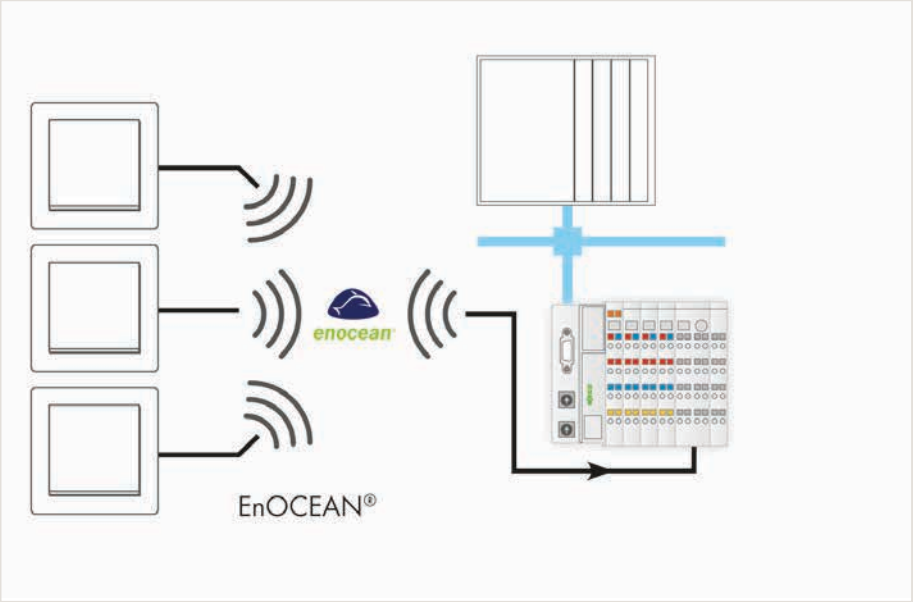
Note:
Two WLAN ETHERNET Gateways of the same type are required to establish a peer-to-peer connection.

IP67 cables and connectors
see Section 11

EnOcean® Radio Technology
Application and Installation Instructions

Integration into the WAGO-I/O-SYSTEM

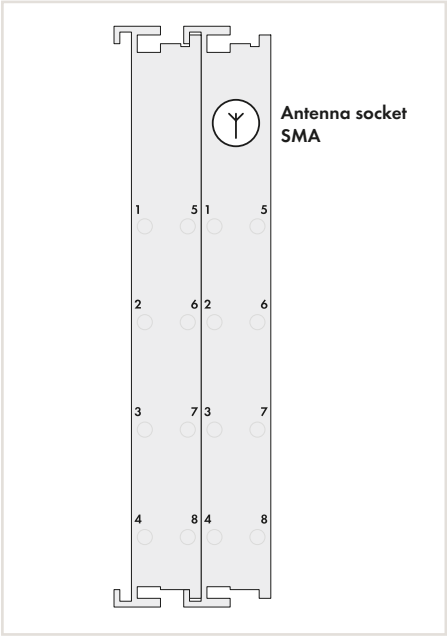
- Receiver in the I/O module
- Operation on
  - Programmable fieldbus controllers
  - Fieldbus couplers
- Range: Up to 300 m in open air, approx. 30 m in buildings



8

Radio Receiver EnOcean

Radio Receiver EnOcean



Item description	Radio Receiver EnOcean
Item no.	**750-642**
Technical Data	
Antenna	External via SMA socket
Frequency band	868.3 MHz
Transmission range	Up to 300 m in open field (30 m typical in buildings, see manual)*
Transmission protocol (radio telegram)	EnOcean
System supply voltage	5 VDC via data contacts
Internal data width	1 x 24 bits in/out (3 bytes user data), 1 x 8 bits control/status
EMC immunity to interference	acc. to EN 61000-6-2
EMC emission of interference	acc. to EN 61000-6-3
Ambient temperature (operation)	0 … +55 °C
Dimensions W x H x D	24 x 72 x 100 mm
Approvals	CE, KC, Marine, UL 508, ANSI/ISA, ATEX/ IECEx
Data sheet and further information, see:	wago.com/750-642

Accessories	**Item no.**	Page
External antenna	**758-910**	405

* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

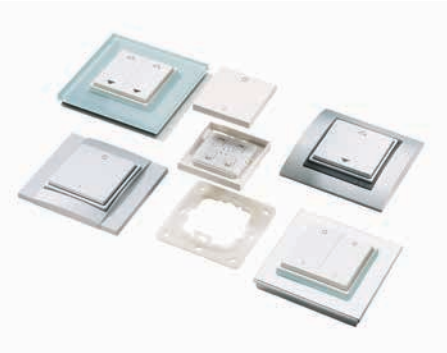
This radio receiver receives radio telegrams from maintenance-free, battery-less and wireless switches and sensors based on EnOcean radio technology.
The energy required for switch or sensor operation is produced by converting one type of energy (heat, solar or mechanical energy) into usable electrical energy.
The LED (RSSI) indicates a sufficient input level.

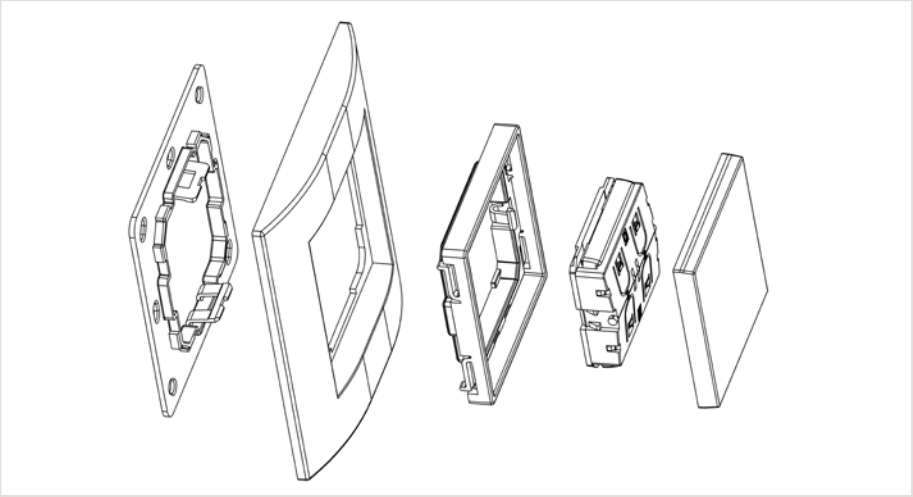
Preprogrammed function blocks for WAGO Controllers make integration easy.

8

Approvals and corresponding ratings, see Page 521 or www.wago.com

EnOcean® easyfit PTM 250 Radio Transmitter





Item description	EnOcean easyfit PTM 250			
Version	2-channel light	4-channel light	2-channel roller blind	4-channel roller blind
Item no.	**758-940/001-000**	**758-940/003-000**	**758-940/002-000**	**758-940/004-000**

Technical Data				
Integrated radio transmitter	EnOcean PTM 200			
Radio technology	EnOcean 868 MHz, RPS type 2			
Range:	300 m free field, 30 m typical within buildings*			
Antenna	Integrated			
Total installation height	14 mm (frame lies directly on surface)			
Dimensions of rocker / frame cut-out / center plate	50 x 50 mm / 55 x 55 mm / 71 x 71 m			
Assembly	Flat on surface, glued (double-sided mounting film enclosed) or screwed			
Color	Pure white			
Rocker switch variant	Rocker switch with neutral middle position	Series rocker switches	Rocker switch with neutral middle position	Series rocker switches
Relative humidity	95 % non condensing			
Ambient temperature (operation)	–25 … + 65 °C			
Compatibility	BERKER, GIRA, JUNG, MERTEN			
Approvals	R&TTE, CE			
Data sheet and further information, see:	wago.com/758-940			

PTM 250 is a universal, extremely flat function switch insert with maintenance-free energy generator. The universal switch insert fits in numerous frame programs from various installation material suppliers. The base plate can be glued or screwed into position for easy attachment to glass as well as plaster. Integration into the frame is similar to universal inserts for antenna sockets.

Delivered without frame; frames must be ordered separately from the desired manufacturer program

* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

External Antenna

Item description	External Antenna	External Antenna
Version	GSM 900/1800	WLAN/*Bluetooth*® 2.4 GHz
Item no.	**758-910**	**758-912**
Technical Data		
Frequency band	870 … 960 MHz; 1710 … 1880 MHz	2400 … 2485 MHz
VSWR	< 1.5	
Gain	0 dB	2 dBi
Max. power	20 W	
Cable length	250 cm	250 cm
Connector	SMA right angle plug + ferrite bead	SMA angled plug
Data sheet and further information, see:	wago.com/758-910	wago.com/758-912

Notes on operating the antenna with WAGO EnOcean radio receivers:
The antenna is to be mounted on a plate measuring at least 25 x 25 cm.
The distance of interfering sources to the antenna and antenna line must be at least 30 cm and the free space between the antenna and the next wall must be at least 35 cm.
The antenna cable should, under no circumstances, be bent sharply, since irreversible damage may result to the antenna line (RG174 bending radius > 15 mm).

For applications that go beyond site boundaries

- Telecontrol technology based on GSM/GPRS

TO-PASS® Telecontrol Technology
Contents

9

TO-PASS® Telecontrol Technology
General Product Information

From Fault Detector to Intelligent Telecontrol PLC

The *TO-PASS*® product series makes it possible to monitor remote objects even in harsh environmental conditions at any time. The devices use the GSM mobile radio network and can communicate wirelessly without data lines or radio links.

Data can be sent to a user-selected destination, e.g., the WAGO Web portal, and easily accessed from any browser. Remote access ensures a high degree of system uptime, while simultaneously relieving service personnel from the burden of performing time-consuming, on-site inspections. With an appropriate GSM service provider contract, wireless connection is more efficient and cost-effective than a standard wired connection. *TO-PASS*® Compact modules can be commissioned via configuration tool without programming knowledge, serving as a convenient gateway into wireless communication and telecontrol technology.

Application: Error Message Monitoring

Error messages are recorded locally and reported via SMS, e-mail or fax. Conversely, outputs can be connected via SMS.

Application: Cyclic Monitoring

Process data is recorded cyclically, transmitted over the Web via GPRS and saved centrally. All options for analysis and further processing including engagement in the process are available.

Application: Detection and Object Tracking

Using GPS, *TO-PASS*® Mobile makes it possible to capture position and process values. This permits tracking of personnel and vehicles, trip monitoring, fleet management and much more.

Application: Intelligent Telecontrol PLC

The combination of intelligent data preprocessing with integration into the central *TO-PASS*® data storage provides optimal scalability for comprehensive support of even the most complex applications.

Data Collection/Distribution via Web Portal

The *TO-PASS*® Web Portal is an adaptive portal capable of identifying, saving in its own databank and independently visualizing values from the *TO-PASS*® Compact modules — no programming required. It makes it easy to view and manage data in a Web browser on the Internet.

Remote Parameterization

All *TO-PASS*® devices can also be configured remotely using the CSD service of the GSM network.

Integrated Position Determination

An integrated GPS receiver allows *TO-PASS*® Mobile devices to detect position within 20 meters and to manage this together with the actual process values. This can be helpful, for example, to record compliance of a cold chain for food transport on land and at sea without interruption.

High Degree of Protection

TO-PASS® Outdoor makes it possible to use the telecontrol modules even under difficult environmental conditions. The enclosure protects against moisture. An integrated UPS bridges power failures and can also, for example, send an error message. The option of integrating enclosure heating extends the unit's operating temperature range, opening it up to additional applications, such as wind power plants. Solar operation also ensures stand-alone use.

Approvals

TO-PASS® devices have a have a broad range of approvals for worldwide telephone networks. That means unrestricted applicability throughout the European Union. There are also approvals for Croatia, Turkey, Singapore, USA, Canada and Mexico. Approvals for other countries are available on request.

Advantages:

- Very easy to use
- Versions for different requirements
- Parameterization without programming knowledge
- Great coverage and availability of the GSM network
- Data collection/distribution via Web portal
- Low ongoing mobile radio costs
- Optional: High degree of protection

TO-PASS® Telecontrol Technology
Versions

TO-PASS® Compact (A)

- Compact telecontrol modules
- With integrated GSM modem
- With integrated I/Os in different configurations
- Message dispatch via SMS, e-mail, fax or over the phone
- Switching of outputs via SMS

TO-PASS® Compact, Event/Process Memory Option (A)

- Same as above
- Also local storage of all status changes
- Also local storage of all process values (cyclic, settable)

TO-PASS® Compact, Web Option (B)

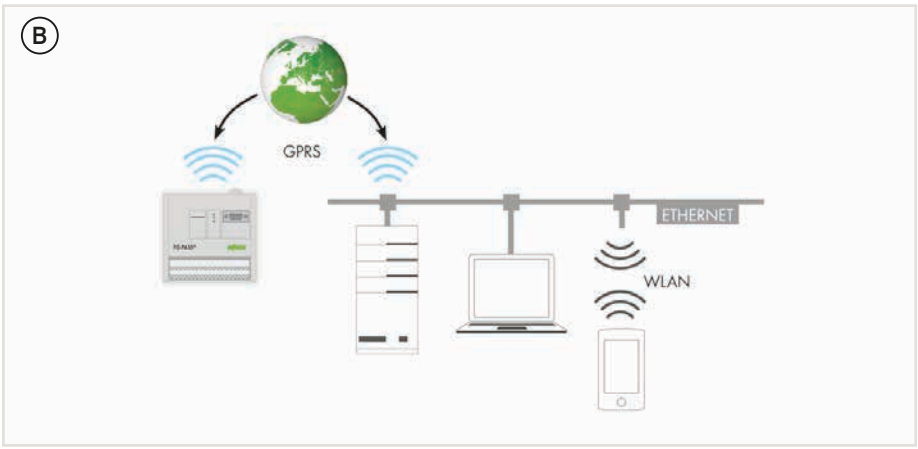
- Same as above
- Additional GPRS: Permanent online connection to the process
- Allows cyclic data transmission to the *TO-PASS*® Web Portal
- Allows cyclic data transmission to a controller with a fixed IP address that receives and further processes the data using the *TO-PASS*® Web Connector (see Application Notes)
- Allows cyclic data transmission to any PC with a fixed IP address equipped with the *TO-PASS*® communication protocol.

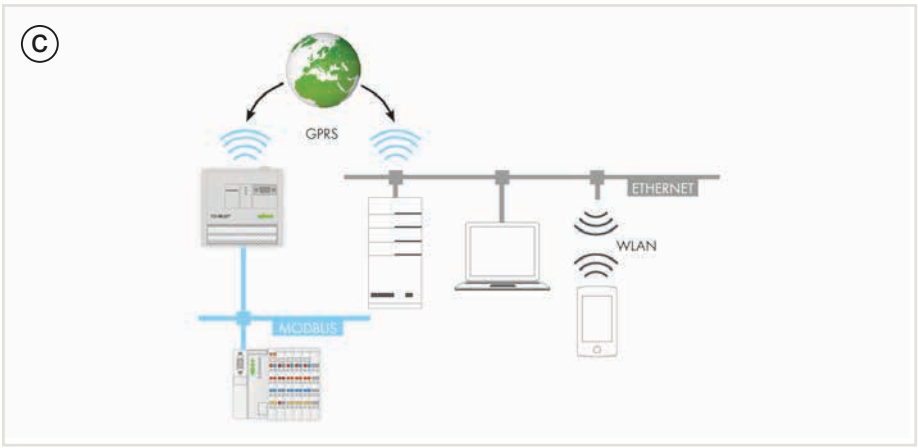
TO-PASS® Compact, MODBUS option (C)

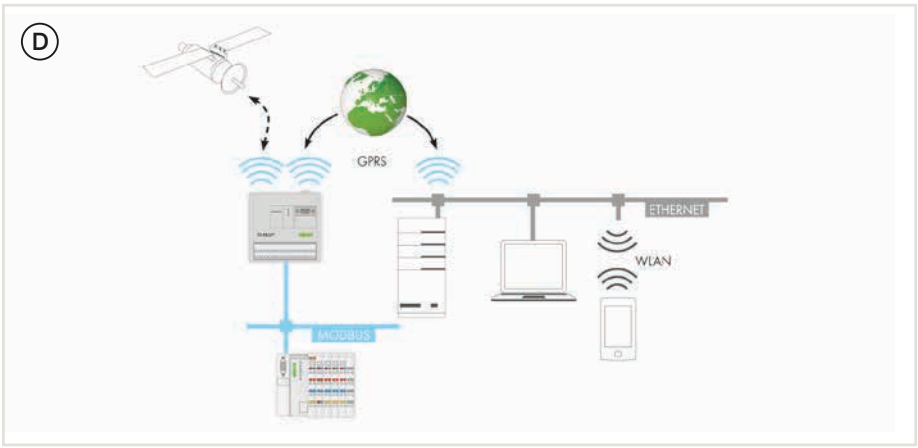
- Same as above
- Additional option for reading in data via MODBUS, e.g., from the WAGO 750 I/O-SYSTEM
- Connection via RS-232 or RS-485 depending on the version

TO-PASS® Mobile (D)

- Like *TO-PASS*® Compact
- Additional option for position determination via GPS

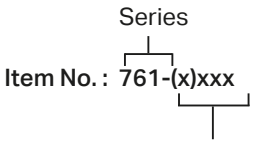






TO-PASS® Telecontrol Technology
Item Number Key

Explanation of the components of an item number key

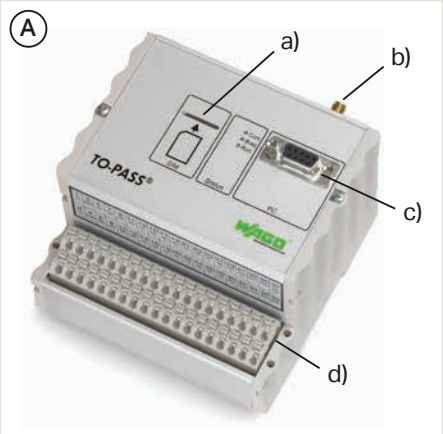


1xx: Compact telecontrol module with 4DI, 4DO
2xx: Compact telecontrol module with 8DI, 4DO, 8AI, 2AO
3xx: Mobile telecontrol module with 4AI

x10: standard
x11: Additional 2 AI
x12: Additional Web option
x13: Additional 2 AI + Web option
114: Additional 2 AI + Web option + MODBUS RS-485
214: Additional event logger, data logger option
x16: Additional Web option + MODBUS RS-232
x17: Additional Web option + MODBUS RS-232

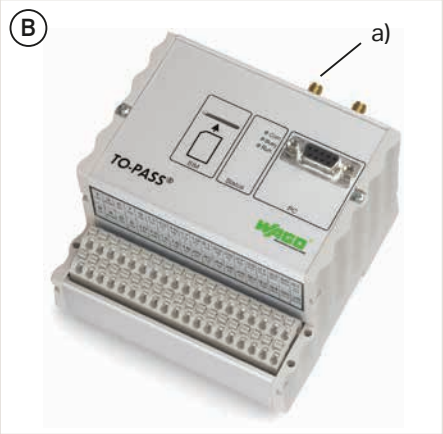
9009: Outdoor unit (without telecontrol module)

TO-PASS® Telecontrol Technology
Interfaces and Types



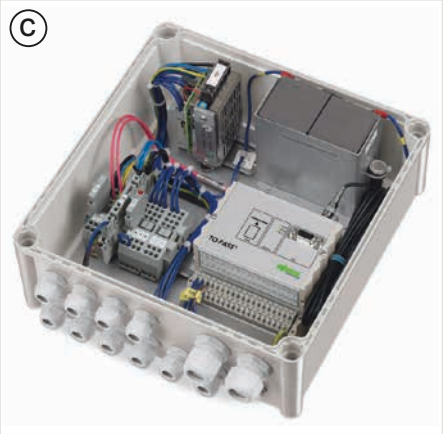
TO-PASS® Compact (A)

- Slot for SIM card (a)
- Antenna connection (b)
- RS-232/-485 serial interface (c)
- I/O connection level (d)
- W x H x D (mm) 109 x 105 x 78
  Height from upper edge of DIN-rail



TO-PASS® Mobile (B)

- Like *TO-PASS*® Compact
- Additional antenna connection for GPS receivers (a)



TO-PASS® Outdoor (C)

- Compact unit for mounting telecontrol modules in an IP66 enclosure
- Integrated GSM antenna
- 230 VAC supply voltage
- Power failure protection by batteries
- Option: Temperatures down to −4 °C are possible with built-in heater
- Also available for self-sustaining solar operation
- W x H x D (mm) 280 x 130 x 310
  incl. cable grips

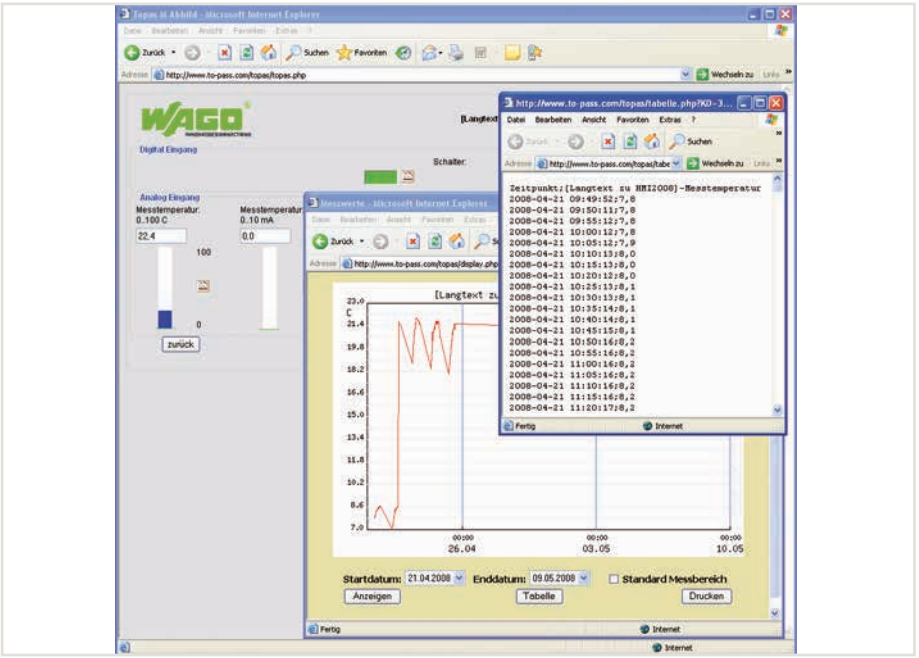
TO-PASS® Telecontrol Technology
Application and Installation Instructions

Manage Data with *TO-PASS*® Web Portal

The *TO-PASS*® Compact and *TO-PASS*® Mobile device versions with Web functionality are able to transmit data cyclically to a central Webserver. The process image (i.e., states and values of all digital and analog inputs) is transmitted to the Webserver with a time stamp at a variably configurable interval and then stored in a database. Standard data loggers and the cumbersome process of reading out data are no longer necessary.

The *TO-PASS*® Web Portal can be used as a Webserver.

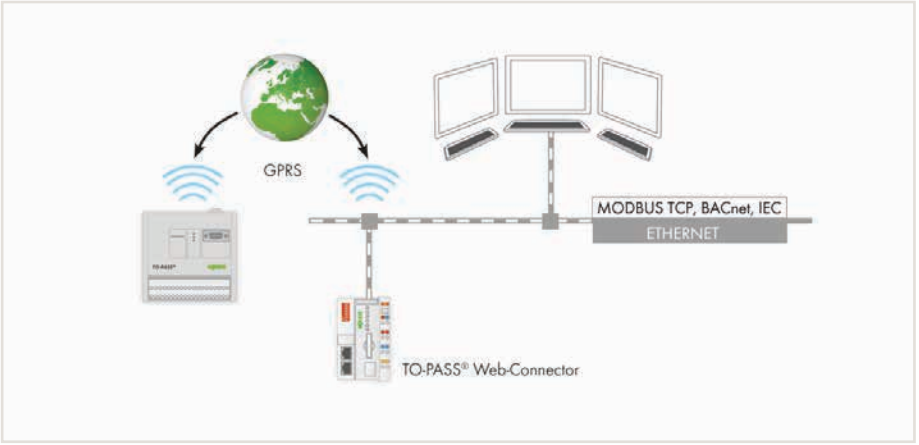
In addition to simple data storage, it provides password-protected visualization with current process data representation and chart recorder for measured value history. Controlling and managing your data is simplified by using an Internet browser via www.to-pass.com. More information on the *TO-PASS*® Web Portal is available in Section 1.



Application: *TO-PASS*® Web Portal as a central Webserver with evaluation function

Forward Data with *TO-PASS*® Web Connector

The *TO-PASS*® Web Connector function block is available for easy integration of fault detectors in the control system. Error and event messages are transmitted by GPRS data string via HTTP to a WAGO controller with a fixed IP address. These in turn are capable of passing the data to a central control system via different communication protocols (e.g., MODBUS TCP, BACnet, IEC telecontrol protocols).
Refer to Section 3 for suitable controllers.

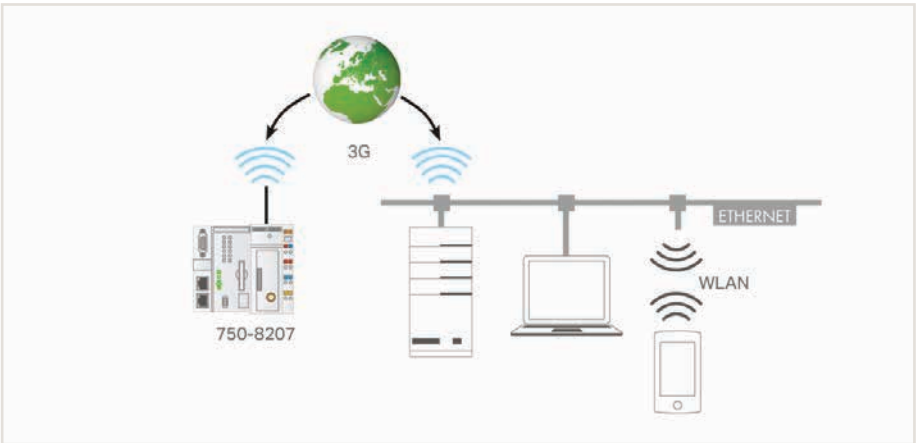


Application: *TO-PASS*® Web Connector as a link between local data and control system

Intelligent, Decentral Data Preprocessing

The controller with integrated mobile modem is recommended for telecontrol tasks requiring on-site control. Prepared function blocks are available for communication with the *TO-PASS*® Web Portal. These intelligent telecontrol stations can also be fully integrated in the *TO-PASS*® infrastructure for seamlessly adapting into the application environment.

Information on WAGO 750 I/O-SYSTEM controllers is available in Section 3.



Application: Controller with WAGO 750 I/O-SYSTEM as a data logger and data preprocessor for *TO-PASS*®

TO-PASS® Telecontrol Technology
Standards and Rated Conditions

General Specifications	
Supply voltage	10–30 VDC
Ambient temperature (operation)	–20 … +70 °C°C
Ambient temperature (storage)	–40 … +85 °C
Relative humidity	95 %, without condensation
Operating altitude	0–2000 m
Altitude at storage/transport	0–15000 m
Pollution degree	2 per IEC 61131-2
Vibration resistance	4 g acc. IEC 60068-2-6
Shock resistance	15 g per IEC 60068-2-27
EMC immunity to interference	Per EN 61000-6-2
EMC emission of interference	Per EN 61000-6-3
Protection type	IP20
Mounting type	On 35 mm DIN-rail
Mounting position	Any
Connection technology: Antenna	SMA socket
Connection technology: Inputs/outputs	250 Series Terminal Blocks with PUSH WIRE® connection
Conductor size; strip length	0.5–1.5 mm² / 22–14 AWG; 9–10 mm / 0.35–0.39 inch

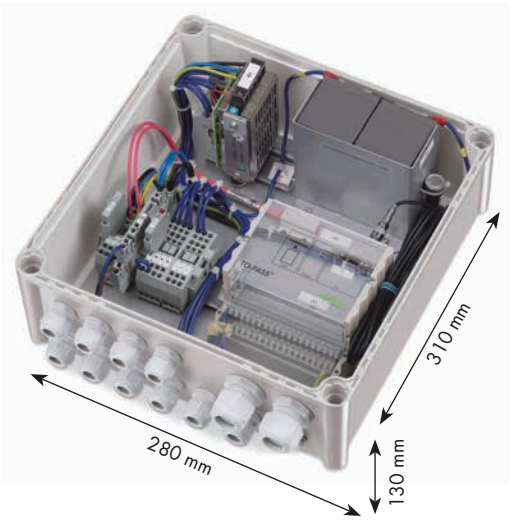
TO-PASS® Outdoor Housing



Item description	*TO-PASS*® Outdoor
Item no.	**761-9009**
Technical Data	
Supply voltage	230 VAC, recommended pre-fuse: B 16 A, C 10 A
Power consumption	42 W
Sensor supply voltage	30 VDC, max. 150 mA
Self consumption	Approx. 1.5 W at 230 VAC (for charged batteries and a TO-PASS® module without sensors and heating): Heating: 8 W; heating switch: ON at 5 °C, OFF at 15 °C
Battery capacity	24 V / 1.2 Ah / annual maintenance required; battery runtimes: approx. 24 hours at a 5-minute transmission cycle not including the supply of decentralized peripheral devices
Mounting type	Protected wall-mount (no direct sunlight)
Mounting	4 x drilled holes, 7 mm
Housing material	Polycarbonate
Cable bushings	10 x M16, 2 x M25
Protection type	IP66
Ambient temperature (operation)	−4 … +32 °C
Dimensions W x H x D	280 x 130 x 310 mm
Included:	IP66 housing with integrated GSM antenna; power supply unit 230 VAC to 30 VDC; 2 batteries; terminal block connections; cables; heater
Data sheet and further information, see:	wago.com/761-9009

Sensor/Actuator Boxes

SPEEDWAY I/O-System

- Uncompromising protection, even in the harshest environments outside the switch cabinet
- Degree of protection: IP67
- Fully encapsulated

Sensor/Actuator Boxes

- M8 and M12 sensor/actuator boxes
- Machine-mounted passive signal recording and output
- Fully encapsulated

◂ Section 6

Sensor/Actuator Boxes

10

Sensor/Actuator Boxes
General Product Information

For Signal Acquisition at the Machine Level

Passive M8/M12 sensor/actuator boxes are placed close to the process and acquire signals at the machine level. They can be used in very harsh environmental conditions and establish the connection from sensors and actuators to the controller across molded or detachable cables. Use of standardized pluggable connections supports sensor and actuator plug & play, while the use of trunk cables replaces the individual wiring of I/O signals to automation components in the switch cabinet. Cabling is well-arranged and minimized.

Signal Acquisition in Exceptionally Harsh Conditions

The sensor/actuator boxes are very robust and comply with degree of protection IP67 or IP68 with molded cabling (72 hours at 1 m water depth). Therefore, they are the ideal solution for applications where signals must be recorded under extreme environments (temperature, shock, vibration) without a switch cabinet. They are also excellent alternatives when the use of an active IP67 I/O system would not be cost-effective due to a low signal count or simple signal conditions (digital signal acquisition/output).

Plug-&-Play Connector Technology

The IP67 sensor/actuator boxes with a removable connecting cable (M16 or M23 pluggable connection) are well-suited to areas where frequent easy release and reconnection is required (transport, modification, service, etc.).

Fixed Trunk Cable

The IP68 sensor/actuator boxes with molded cables are preferred when challenging cable paths do not allow the use of preassembled M16/M23 cables.

Extreme Mechanical Performance

A system/machine is exposed to severe mechanical and thermal influences. It is important to process its signals despite strong vibration and shock. The sensor/actuator boxes are used at the machine level.
Full encapsulation safeguards system operation, mitigating the effects of extreme vibration and temperature loads when collecting signals and supplying power via the connecting cable of the controller or other automation components in the uncritically positioned area of the switch cabinet.

Flexible Assembly

The sensor/actuator boxes can be directly mounted on the machine. Extensive engineering ensures compliance with standardized specifications from CNOMO guidelines regarding the spacing of assembly drill holes that are often used in passive distributor or sensor/actuator boxes. An optional adapter is available that can be used to seamlessly mount two modules side by side. This has the advantage of maintaining a defined distance for proper routing of the sensor/actuator cables and of avoiding contamination points.

10

Advantages:

- Rugged, simple and compact extension for IP20 automation components
  - Meets increased requirements for environmental conditions
  - For plug & play connector technology when needed
  - For simpler cable installation in the form of trunk cables
- High-quality PUR connecting cables (drag chain compatible, halogen free)
- Fully encapsulated (resistance and leak-proof)
- Flange sockets (metal design)
- Ambient temperature (operation) −25 … +80 °C
- Status LEDs

Sensor/Actuator Boxes

- 025: 25 m

Standards and Rated Conditions

General Specifications	
Electrical Data	
Max. contact resistance	10 mΩ
Supply voltage	10–30 VDC
Current carrying capacity of the signal connections	2 A
Current carrying capacity of the supply connections	9 A (M12) or 6 A (M8)
Signal characteristic	PNP
Mechanical Data	
Degree of protection	
Sensor/actuator boxes with cable connection	IP68 (72 hours at 1 m water depth)
Sensor/actuator boxes with M16/M23 connector	IP67
Ambient operating temperature (operation)	–25 … +80 °C
Mounting	Screw mount
Mounting position	Any
Vibration resistance	5 g acc. IEC 60068-2-6
Shock resistance	49 g per IEC 60068-2-27
Material Data	
Housing material	PA 66 (UL 94 V0); RAL 7035; silicon and halogen free
Encapsulation	Fully encapsulated with conformal coating (UL 94 V0)
Connecting cable	Suitable for drag chains

Approvals

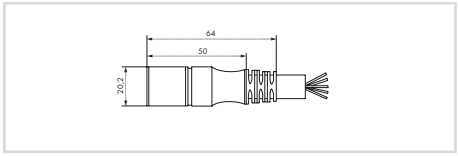
14-pole

Pin A, L: 0.75 mm²
Pin C - J, N - T: 0.34 mm²

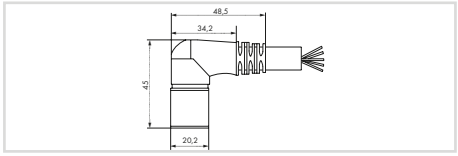
A brown	N pink-brown
C white-pink	O violet
E black	P white
G pink	R red
J green	S gray
L blue	T yellow
M commoned with A	U commoned with L

Operating voltage	150 V
Operating current	6 A (0.75 mm²); 4 A (0.34 mm²)
Rated surge voltage	1.2 kV
Suitable for drag chain applications	≥ 2 Mio. bending cycles
Ambient temperature (operation) moved	−30 … +90 °C
Protection type	IP67
Cable diameter	9.1 mm ± 0.2



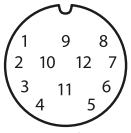
Interconnecting cable,14-pole, M16 socket straight

Cable length	Item No.	Pack. Unit
5 m	756-3205/140-050	1
10 m	756-3205/140-100	1
15 m	756-3205/140-150	1



Interconnecting cable,14-pole, M16 socket right angle

Cable length	Item No.	Pack. Unit
5 m	756-3206/140-050	1
10 m	756-3206/140-100	1
15 m	756-3206/140-150	1

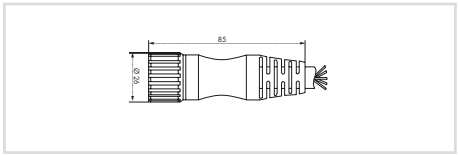


12-pole

Pin 9, 11, 12: 1.00 mm²; Pin 1 - 8: 0.34 mm²

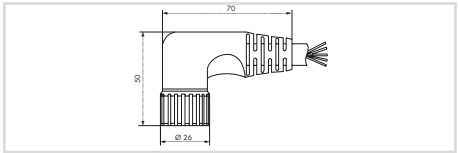
1 white	7 black
2 green	8 violet
3 yellow	9 blue
4 gray	10 commoned with 9
5 pink	11 brown
6 red	12 green-yellow

Operating voltage	300 V
Operating current	8 A
Rated surge voltage	AC 2.5 kV
Suitable for drag chain applications	≥ 2 Mio. bending cycles
Ambient temperature (operation) moved	−5 … +80 °C
Protection type	IP67
Cable diameter	8.6 mm ± 0.3



Interconnecting cable,12-pole, M23 socket straight

Cable length	Item No.	Pack. Unit
5 m	756-3201/120-050	1
10 m	756-3201/120-100	1
15 m	756-3201/120-150	1



Interconnecting cable,12-pole, M23 socket right angle

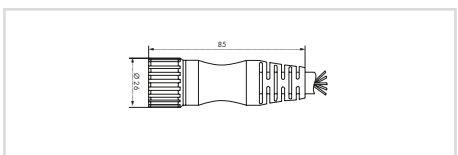
Cable length	Item No.	Pack. Unit
5 m	756-3202/120-050	1
10 m	756-3202/120-100	1
15 m	756-3202/120-150	1

19-pole

Pin 6, 12, 19: 1.00 mm²;
Pin 1 - 5, 7 - 11, 13 - 19: 0.34 mm²

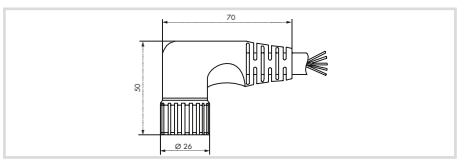
1 violet	8 white-green	15 white
2 red	9 white-yellow	16 yellow
3 gray	10 white-gray	17 pink
4 red-blue	11 black	18 gray-brown
5 green	12 green-yellow	19 brown
6 blue	13 yellow-brown	
7 gray-pink	14 brown-green	

Operating voltage	300 V
Operating current	10 A (Contacts 6, 12, 19); 8 A (other contacts)
Rated surge voltage	AC 2.5 kV
Suitable for drag chain applications	≥ 2 Mio. bending cycles
Ambient temperature (operation) moved	−5 … +80 °C
Protection type	IP67
Cable diameter	9.7 mm ± 0.3



Interconnecting cable,19-pole, M23 socket straight

Cable length	Item No.	Pack. Unit
5 m	756-3203/190-050	1
10 m	756-3203/190-100	1
15 m	756-3203/190-150	1



Interconnecting cable,19-pole, M23 socket right angle

Cable length	Item No.	Pack. Unit
5 m	756-3204/190-050	1
10 m	756-3204/190-100	1

	787-1606 [b]	24 VDC (23 … 28.5 V) / 2 A		
	787-1616 [b]	24 VDC (23 … 28.5 V) / 4 A		
	787-1616/0000-1000 [b]	24 VDC (23 … 28.5 V) / 3.8 A LPS		
	787-1622 [b]	24 VDC (23 … 28.5 V) / 5 A		
	787-1632	24 VDC (23 … 28.5 V) / 10 A		
	787-1634	24 VDC (23 … 28.5 V) / 20 A		
	787-1623 [b]	48 VDC (40 … 56 V) / 2 A		
	787-1633	48 VDC (40 … 56 V) / 5 A		
	787-1635	48 VDC (40 … 56 V) / 10 A		
	787-1628	24 VDC (23 … 28.5 V) / 5 A	1/2 x 180 … 500 VAC 254 … 780 VDC	
	787-1638	24 VDC (23 … 28.5 V) / 10 A		
	787-1640	24 VDC (23 … 28.5 V) / 10 A	2/3 x 320 … 575 VAC 450 … 800 VDC	
	787-1642	24 VDC (23 … 28.5 V) / 20 A		
	787-1644	24 VDC (23 … 28.5 V) / 40 A		
***EPSITRON*® ECO Power – Economical Power Supplies for Standard Applications**				
	787-712 [c]	24 VDC (22 … 28 V) / 2.5 A	1 x 85 … 264 VAC 130 … 373 VDC	• Economically priced and robustly packaged in a metal housing • Clear operating status LED indication and optional DC OK contact • Up to 90 % efficiency • Ambient operating temperature: −25 °C … +70 °C • Overhead mounting possible • UL 508, UL 60950 approvals • ATEX/IEC Ex approval, Zone 2 or Class I Div. 2 [c] • Tool-free connection technology [d]
	787-722 [c]	24 VDC (22 … 28 V) / 5 A		
	787-732 [c]	24 VDC (22 … 28 V) / 10 A		
	787-734 [d]	24 VDC (22 … 28 V) / 20 A	1 x 90 … 264 VAC 130 … 373 VDC	
	787-736 [d]	24 VDC (22 … 28 V) / 40 A		
	787-738 [d]	24 VDC (22 … 28 V) / 6.25 A	2/3 x 325 … 575 VAC 460 … 800 VDC	
	787-740 [d]	24 VDC (22 … 28 V) / 10 A		
	787-742 [d]	24 VDC (22 … 28 V) / 20 A		
	787-1702	24 VDC (22 … 26 V) / 1.25 A	1 x 90 … 264 VAC 125 … 375 VDC	• Economically supports basic applications • Flexible mounting via carrier rail adapter • Installation flexibility thanks to screw-mount clips • Up to 84 % efficiency • UL 508, UL 60950, EN 60335-1 approvals
	787-1712	24 VDC (22 … 26 V) / 2.5 A		
	787-1722	24 VDC (22 … 26 V) / 5 A		
	787-1732	24 VDC (22 … 26 V) / 10 A		

EPSITRON® Power Supply System
additional technical data visit www.wago.com/epsitron

	Item Number	Output	Input Voltage Range	Functional Description
***EPSITRON*® COMPACT Power – Compact, High-Performance Power Supplies**				
	787-1102 [a]	24 VDC (22.8 … 26.4 V) / 1.3 A	1 x 85 … 264 VAC 120 … 373 VDC	• Compact, low-profile design • Stepped profile for installation in standard distribution boards • Pluggable picoMAX® connection technology (tool-free) • Ambient operating temperature: -25 … +70°C • Approvals: UL 60950, UL 508, GL[a], EN60335-1[b] • Suitable for both parallel and series operation
	787-1112 [a]	24 VDC (22.8 … 26.4 V) / 2.5 A		
	787-1122 [a]	24 VDC (22.8 … 26.4 V) / 4 A		
	787-1202 [b]	24 VDC (22 … 26 V) / 1.3 A	1 x 85 … 264 VAC 125 … 375 VDC	
	787-1212 [b]	24 VDC (22 … 26 V) / 2.5 A		
	787-1216 [b]	24 VDC (22 … 26 V) / 4.2 A		
	787-1226 [b]	24 VDC (22 … 26 V) / 6 A	1 x 90 … 132 VAC 180 … 264 VDC	
	787-1001	12 VDC (10.8 … 18 V) / 2 A	1 x 85 … 264 VAC 120 … 373 VDC	• Compact, low-profile design • Ideal for decentralized applications • Clear operating status indication via LED • Up to 88 % efficiency • Ambient operating temperature: −25 °C … +60 °C (device start at −40 °C, type-tested) • Overhead mounting permitted • UL 508, UL 60950, GL approvals
	787-1011	12 VDC (10.5 … 15.5 V) / 4 A		
	787-1021	12 VDC (10.5 … 15.5 V) / 6.5 A		
	787-1017	18 VDC (15 … 28 V) / 2.5 A		
	787-1002	24 VDC (22.8 … 26.4 V) / 1.3 A		
	787-1012	24 VDC (22.8 … 26.4 V) / 2.5 A		
	787-1022	24 VDC (22.8 … 26.4 V) / 4 A		
	787-1020	5 VDC (4.5 … 8.5 V) / 5.5 A		
***EPSITRON*®-DC/DC Converters – Dependable Power Supply for Specialty Voltages**				
	787-2801 [a]	5 VDC / 0.5 A	24 VDC (10 … 30 V)	· Full commoning of the supply voltage with both 857 and 2857 Series • DC OK contact • UL 508, UL 60950, GL[a] approval
	787-2802 [a]	10 VDC / 0.5 A	24 VDC (15 … 30 V)	
	787-2803	24 VDC / 0.5 A	48 VDC (40 … 55 V)	
	787-2805 [a]	12 VDC / 0.5 A	24 VDC (15 … 30 V)	
	787-2810 [a]	5 / 10 / 12 VDC, adjustable / 0.5 A	24 VDC (10 … 30 V)	
	787-1014	24 VDC / 2 A	110 VDC (77 … 140 V)	• Suitable for railway applications per EN 50155 • UL 508, UL 60950 approvals
	787-1014/0072-0000	24 VDC / 2 A	72 VDC (40 … 90 V)

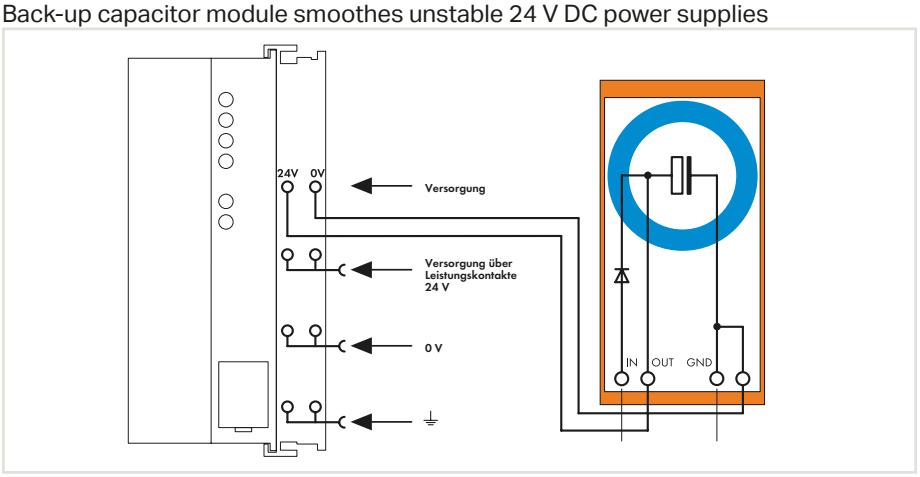
Back-up capacitor module, DC/DC Converter

Back-up capacitor module smoothes unstable 24 V DC power supplies



Item description	Stützelko-Modul, zur Glättung instabiler 24 VDC
Item No.	**288-824**

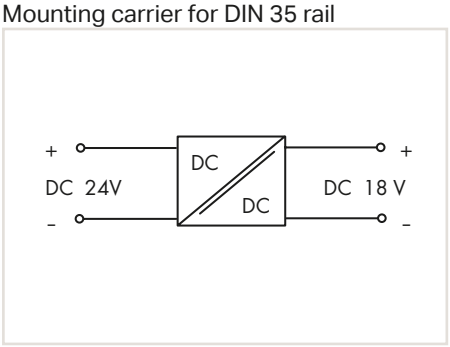
Technical Data

Nominal voltage	24 VDC (+25 %)
Nominal current	1 A
Nominal capacity	10000 µF
Weight	104.4 g
Dimensions W x H x L	38 x 81 x 85 mm, Height from upper-edge of DIN 35 rail
Wire connection	CAGE CLAMP® (236 Series)
Cross sections	0.08 … 2.5 mm² / 28 … 14 AWG
Strip lengths	5 … 6 mm / 0.22 in
Data sheet and further information, see:	wago.com/288-824

This module is equipped with a capacitor which smoothes unstable 24VDC power supplies in case the voltage tolerances mentioned in our data sheets cannot be ensured.
Reasons for voltage transients could be:
- Voltage disconnections (switching transients) on primary side
- Overloads on secondary side
- Switching of inductive or capacitive loads

The back-up capacitor module is connected between the 24V power supply and the electronic device which has to be protected.
Notice:
If using a non-filtered single-phase power supply, the capacitor causes a voltage increase.

DC/DC Converter,
Mounting carrier for DIN 35 rail

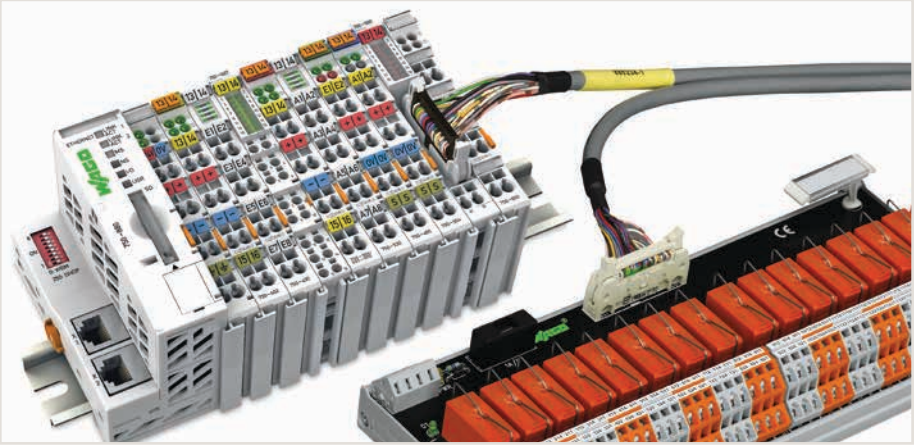


Item description	DC/DC Converter, Mounting carrier for DIN 35 rail
Item No.	**288-895**

Technical Data

Input voltage	24 VDC
Input voltage range	18 V … 36 VDC
Output voltage	18 VDC (± 1 %)
Nominal output current	400 mA
Efficiency	82 %
Test voltage input/output	1500 VDC
Short circuit protection	permanent
Ambient temperature (operation)	-25 … +70 °C
Weight	76 g
Dimensions W x H x L	50 x 25 x 85 mm, Height from upper-edge of DIN 35 rail
Wire connection	CAGE CLAMP® (256 Series)
Cross sections	0,08 … 2,5 mm² / 28 … 12 AWG (THHN, THWN)
Strip lengths	5 … 6 mm / 0.22 in
Data sheet and further information, see:	wago.com/288-895

Interface Modules for System Wiring



Digital input and output modules with ribbon cable connector provide easy and fast connection of WAGO interface modules to the WAGO-I/O-SYSTEM.
WAGO pre-assembled ribbon cables eliminate discrete wiring, while reducing costs for system wiring applications. Furthermore, modules can be pre-wired, also allowing the connection level to be relocated.

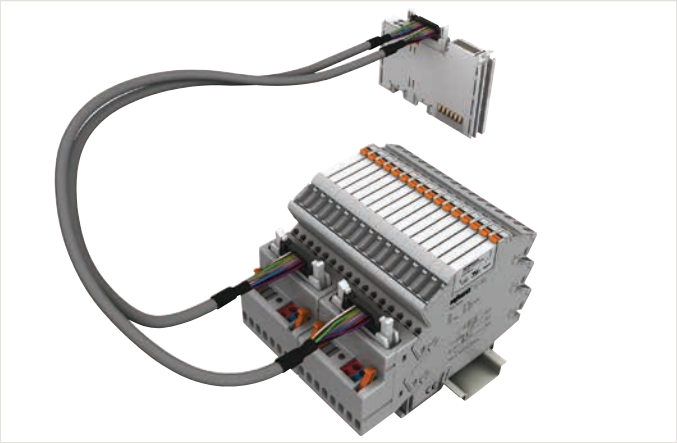
Interface Adapter for System Wiring



WAGO Interface Adapter, 857 Series
WAGO's Interface Adapter provides a fast wiring solution for relay and optocoupler modules within the JUMPFLEX® 857 Series. On the module side, pre-assembled WAGO Ribbon Cables (706 Series) connect to the WAGO-I/O-SYSTEM (PLC).
This eliminates cumbersome discrete wiring between 750 Series I/O modules and 857 Series relays/optocouplers.
As a result, both installation time and costs are reduced.
Depending on the application, the WAGO interface adapters can be used with D-sub or ribbon cable connectors.
WAGO's interface adapters are equipped with status indicator.
They also feature integrated test ports for each channel.
The interface adapters are simply plugged into the 857 Series relay/optocoupler modules via jumper slot.
Furthermore, WAGO's interface adapter features locking devices for secure connection.

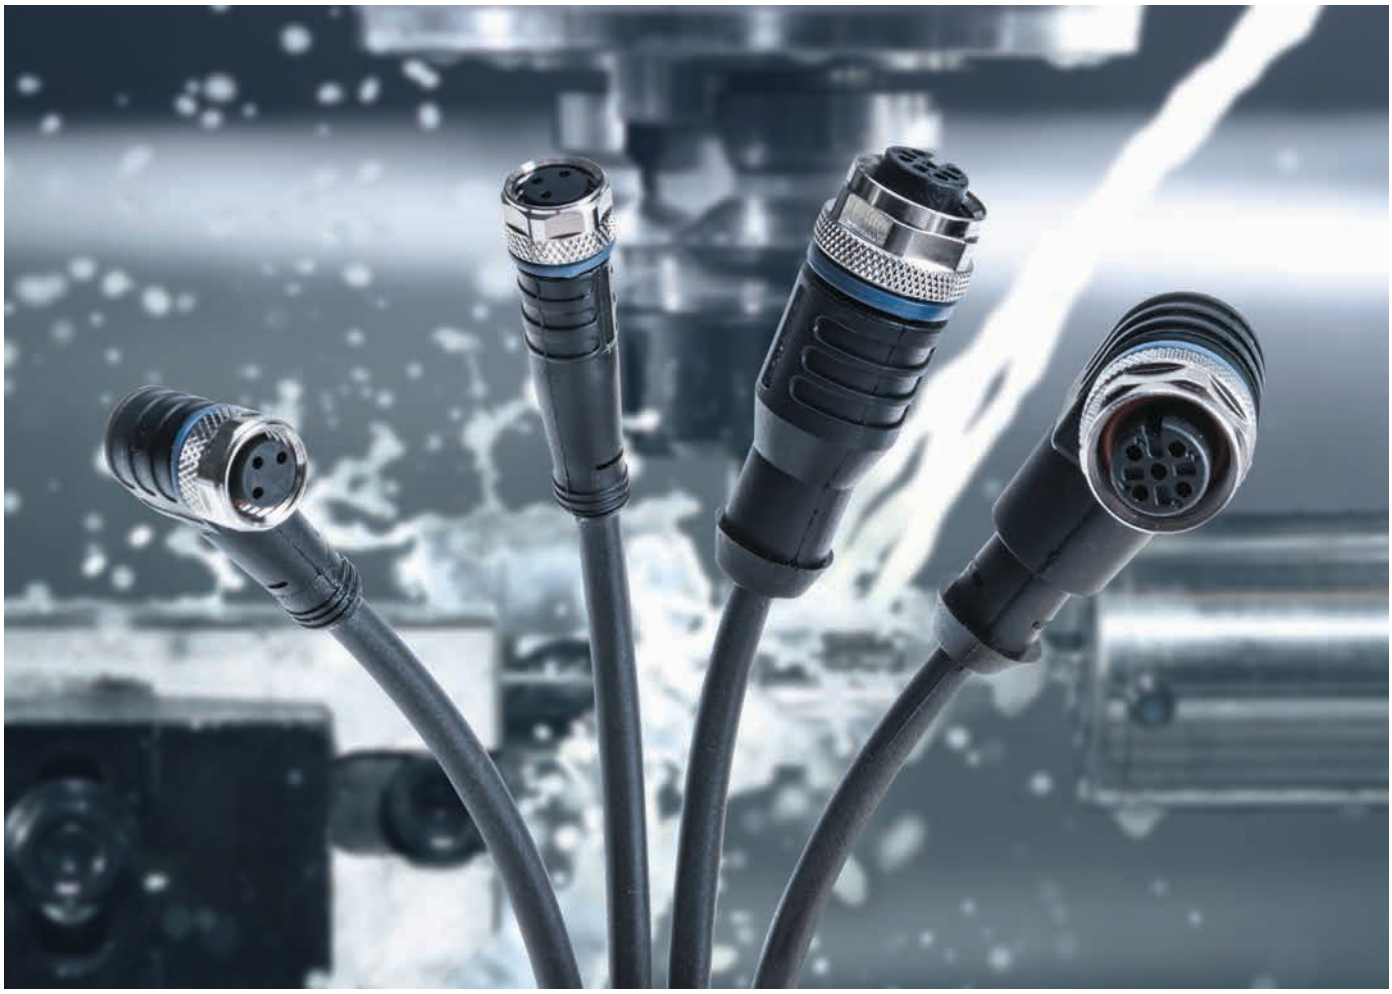
IP67 Cables and Connectors, 756 Series



Series 756 offers a wide range of accessories for the connection of inductive or capacitive proximity switches, light barriers, flow control devices, push buttons etc. to the WAGO-I/O-SYSTEM 757 (IP67 sensor/actuator boxes) and WAGO-Speedway 767 (modular IO system IP67). The cables are not only a protection against dust and water, the design of their coupling nuts also provides protectionagainst mechanical loosening when exposed to vibrations.
In addition to that, fixed cables offer bend protection.

Cables with one or two preassembled wire ends are used. Cables with one preassembled wire end are often used when the length of the cable cannot be predetermined exactly or when the cable assembly with connectors proves to be difficult. Cables with one free wire end can therefore be adapted to individual prerequisites. Cables with two preassembled wire ends drastically reduce assembly and installation time.

4 black (S)
5 gray

Operating voltage	250 V AC/DC
Operating current	max. 4 A
Rated surge voltage	2.5 kV (3-, 4-pole); 1.5 kV (5-pole)
Suitable for drag chain applications	≥ 2 Mio. bending cycles
Ambient temperature (operation) moved	-25 … +90 °C
Protection type	IP67
Cable diameter	4.3 mm ±0.2 (3-pole); 4.7 mm ±0.2 (4-pole); 5.0 mm ±0.2 (5-pole); 6.5 mm ±0.2 (5-pole, shielded)

Sensor/actuator cables, M12 plug, straight

Fitted pluggable connector, 8-pol. shielded, M12 socket, right angle, Screw	756-9214/090-000	1

Torque Wrench M8 and M12, Assembly kit

Assembly kit for 756 Series IP67 cable assemblies and pluggable connectors with hex nut, consists of:

- Tool kit
- Torque screwdriver with adjustable torque (window scale)
- Adjustment tool for changing the torque
- Socket wrench SW9 (for M8 cable assemblies)
- Socket wrench SW13 (for M12 cable assemblies)

A torque specification of 0.6 Nm for M8 connectors and 1.0 Nm for M12 connectors is required for 756 Series cables and connectors.

Torque Wrench M8 and M12		
	Item No.	Pack. Unit
	206-701	1

Torque range	0.4 … 1 Nm ±6 %
Material	
Handle	Polypropylene (PP) for hard zone, thermoplastic elastomers (TPE) for soft zone
Allen key	Polyamide (PA), fiber-glassreinforced; chromium-vanadiummolybdenum steel (CrMoV) (1.2381)
Adjustment tools	Cellulose acetate; chromiumvanadium-molybdenum steel (CrMoV) (1.2381)
Color	black
Standards/specifications	EN ISO 6789; BS EN 26789; ASME B107.14.M

Item No.	**750-921**
Technical Data	
Range	20 m free field (Class 2)*
Data transfer rate	9600 … 115000 bit/s
Frequency range	ISM band, 2402 … 2483 MHz
Type of communication	Peer-to-peer connection
Profiles supported	Serial Port Profile (SPP)
Version	*Bluetooth*® 2.1
Radio	Class 2
Antenna	Integrated
Connections	4-pole service connector
Configuration	AT commands, e.g., via hyperterminal
Function	Master or slave
LED	Operating mode
Security encryption	128-bit encryption
Ambient temperature (operation)	–20 … +60 °C
Dimensions W x H x D	15 x 50 x 19 mm
Approvals	*Bluetooth*® approval, CE
Data sheet and further information, see:	wago.com/750-921

* The maximum range in the field decreases with use in buildings and changes depending on the building materials used and the spatial geometry. Therefore range specifications within buildings can only represent typical values which can normally be reached. More detailed information is available in the manual.

The *Bluetooth*® Adapter wirelessly connects a notebook computer with *Bluetooth*® functionality to the service interface of the fieldbus coupler/controller. It also provides an active connection to a programmable fieldbus controller.
As a cable substitute, the *Bluetooth*® Adapter allows communication between two controllers, as well as between fieldbus couplers/controllers via WAGO software tools.
The adapter is supplied via the service interface and, therefore, via the power supply of the fieldbus coupler/controller.

WAGO Communication Cable

RS232 communication cable, RS-232 (SUB-D 9 pol.), Service Interface I/O-System 750

Item description	Communication cable
Item No.	**750-920**
Technical Data	
Ports	4-pole Service Interface
Length	2,5 m
Ambient temperature (operation)	0 … +55 °C
Degree of protection	IP20
Data sheet and further information, see:	wago.com/750-920

The WAGO Communication Cable provides a simple option for communication with WAGO software tools (WAGO-I/O-*CHECK*, WAGO-I/O-*PRO*, ...).

Notice: The communication cable shall not be connected or removed when energized.

USB communication cable, USB-A, Service Interface I/O-System 750

Item description	Communication cable USB-C STA-M-AX	
Version	USB 2.5m	USB 5m
Item No.	**750-923**	**750-923/000-001**
Technical Data		
USB specification	2.0 compatible/ full-speed-device	
Operating system	Microsoft® Windows® 2000; Microsoft® Windows® XP Professional; Microsoft® Windows® Vista®; Microsoft® Windows® 7	
Interface USB	Type A/m	
Length	2.5 m	5 m
Ambient temperature (operation)	-25 … +70 °C	
Approvals	CE	
Data sheet and further information, see:	wago.com/750-923	

The WAGO USB Communication Cable connects a PC (notebook) to either the service interface of the 857 Series Signal Conditioners and Relay Modules (JUMPFLEX), or to WAGO-I/O-SYSTEM buscouplers/controllers.

Notice:
Using the WAGO 759-923 USB Communication Cable in combination with select programmable fieldbus controllers requires the specific firmware versions

IP65 System housing

1 Stainless steel
2 Sheet steel
3 Die-cast aluminum
4 Polyester
5 Sheet steel with cable entry plates

The growing importance of industrial fieldbus systems in the field of process engineering, for example the chemical industry or food industry, demands enclosures that protect both the system equipment and the products.
WAGO offers enclosures that allow the use of the WAGO-I/O-SYSTEM 750 in installations where severe conditions exist.

The IP65 enclosures come equipped with the WAGO-I/O-SYSTEM 750, meeting these requirements.
They have the appropriate number of cable grips with metric or cable entry plates.
Each enclosure is available in four different sizes.
Delivery time and other types of enclosures are available upon request!

* Arrangement of the cable grips differs from standard enclosures
**The „number of I/O modules“ also takes fieldbus couplers and bus end modules into account. This applies to 12mm-wide I/O modules. I/O modules with a width of 24mm count as two I/O modules.

Included:
- Stainless steel enclosure 1.4301 streak finish
- With hinged cover 90°, (850-804/000-001: 180°), with cellular rubber gasket made of natural rubber, 2 to 3 quick disconnects
- Hinges made of chromed GdZn (Gadulinium Zinc) with M5 countersunk screws
- Macrolon inspection glass
- Metric cable grips (brass, nickel-plated), incl. filler plugs;
  M12 cable grip, cable diameter 3–6mm;
  M16 cable grip, cable diameter 5–9mm;
  M20 cable grip, cable diameter 9–13mm
- 1 DIN 35/7.5 rail

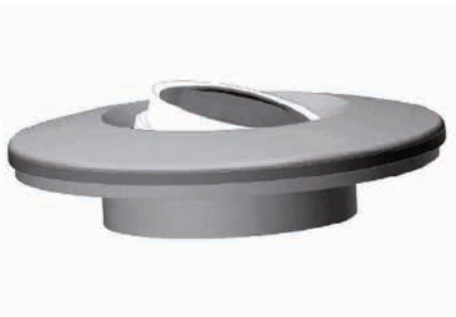
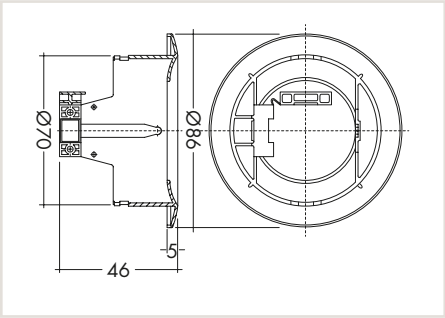
DALI Multi-Sensors

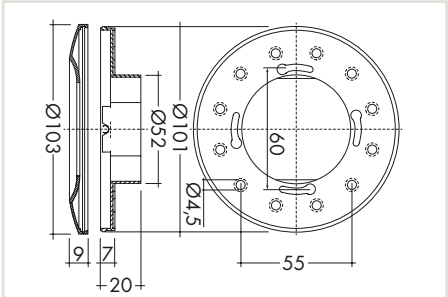
Ceiling Installation

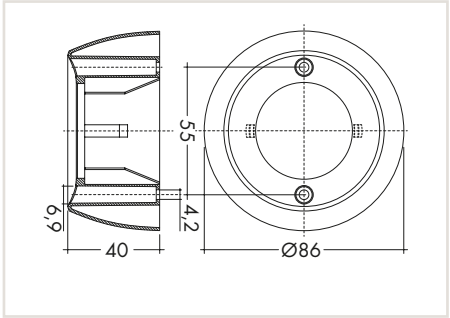
Box Installation



Surface Mounting







The WAGO DALI MSensor 02 is used with WAGO DALI Modules (753-647 DALI Multi-Master Module or 750-641DALI/DSI Module).
It has been designed for the following principal applications:
- Individual offices
- Open-plan offices
- Training/presentation rooms
- Corridors, passageways and garages

The Multi-Sensor features both motion and light detection. As an option, the sensor can be operated via remote control (from Tridonic). The sensor enables both motion detection and daylight-dependent lighting control; both of which can also be deactivated.
Addressing is performed via rotary switch or WAGO DALI Configurator.
Parameters can be adjusted individually via WAGO DALI Configurator.
Power supply is provided via DALI line.
The number of sensors, which can be operated on a DALI line, depends on the total power consumption of the specific devices and address range for the actuators and sensors. Due to the capacity of the DALI bus, a maximum of 16 DALI sensor couplers must be operated on the DALI Multi-Master Module (753-647).

Installation notes:
- The DALI MSensor 02 is supplied directly via DALI line.
- DALI is not SELV (Safety Extra Low Voltage). The installation instructions for mains voltage therefore apply.
- The detection range of the sensor must be within the lighting area of the controlled luminaires.
- The detection ranges of the sensors must not overlap as this may influence the lighting control.
- When installed at a height other than the recommended installation height (2.5 m), the presence and light sensor might show different characteristics. When mounted at a higher level, its sensitivity is reduced. If mounted at a lower level, its range is diminished.
- Heaters, fans, printers and copiers located in the detection range may cause incorrect presence detection.

Item description	DALI-MSensor

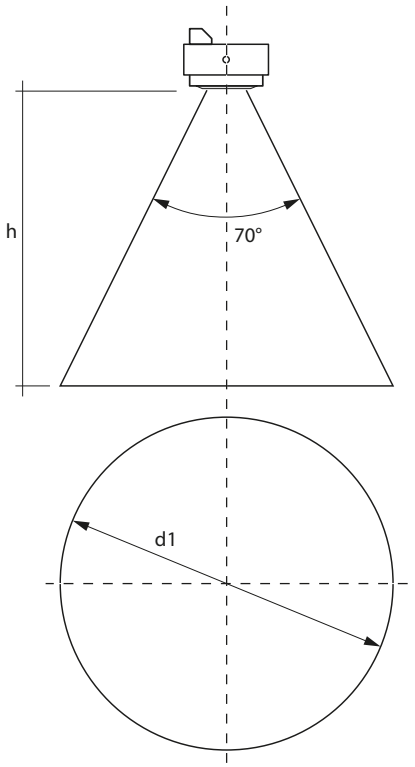
Item No.	**2851-8301**	**2851-8302**	**2851-8303**
Technical Data			
Ø of detection range, mounted at a height of 2.5 m	5 m		
Extension of the detection range	2 m (if mounted at a height of 2.5 m and swivelled through 15°)		-
Swivel design	yes		no
Swivel range	± 15°		-
Detection angle	360°		
Light measurement at the sensor head	10 ... 650 lx (The measured value at the sensor head corresponds to approx. 15 to 2,000 lux on the surface measured.)		
Remote control range	5 m		
Data sheet and further information, see:	wago.com/2851-8301	wago.com/2851-8302	wago.com/2851-8303

Technical Data	
Power supply	via DALI line
Current consumption	6 mA from DALI line
Operating temperature	0 °C … +50 °C
Storage temperature	-25 °C … +55 °C
Degree of protection	IP20
Wire type and cross-section	Solid or fine-stranded wires ranging from 0.5 mm² to 1.5 mm² (AWG 20–16)

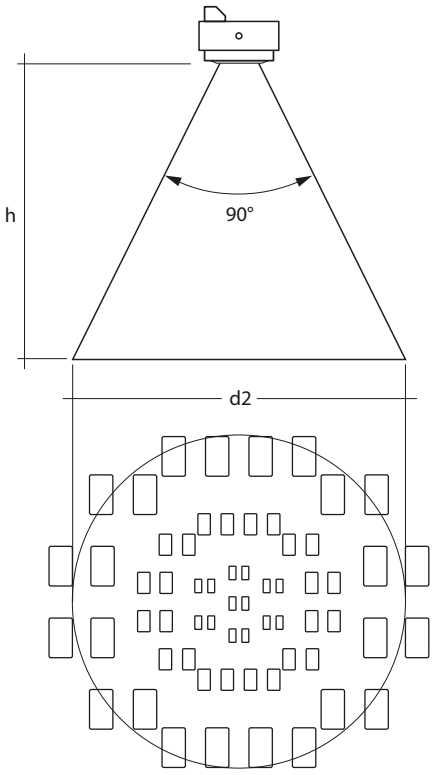
Technical Data	
General settings:	
Motion detection	enabled, on/off
Lighting control	enabled
Setpoint, lighting control	150 lx
Power-on setting	no action
Bright-out timeout	10 min.
Bright-out threshold	150 %
Control speed	4
Switch-on value	auto (calculated)
Rotary switch	0, broadcast
Motion detector settings:	
Fade-in time	< 0.7 s
Presence value	regulated
Run-on time	20 min.
Fade time	5.6 s
Absence value	3 %
Switch-off delay	10 min.
Fade-off time	5.6 s
Manual-off	10 min.

Light detection



h *	d1	d2
1,7 m	2,4 m	3,4 m
2,0 m	2,8 m	4,0 m
2,3 m	3,2 m	4,6 m
2,5 m	3,5 m	5,0 m
2,7 m	3,8 m	5,4 m
3,0 m	4,2 m	6,0 m
3,5 m	4,9 m	7,0 m
4,0 m	5,6 m	8,0 m

Motion detection

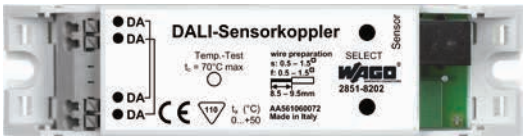


* The recommended maximum room height for office applications is 3 m and for corridor applications 4 m, for example.
Calculation of the diameter:
d = 2 x tan (0.5 x a) x h

11

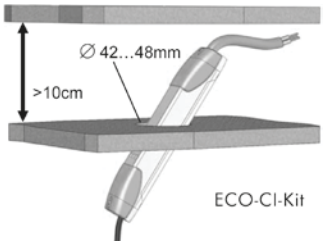
WAGO DALI Multi-Sensor Kit

DALI Sensor Coupler



MULTI 3 CI Sensor

ECO CI Kit



The WAGO DALI Multi-Sensor Kit is paired with the WAGO 753-647 DALI Multi-Master Module and includes the following three components:
- DALI Sensor Coupler (also available individually)
- ECO CI Kit
- MULTI 3 CI Sensor

The DALI Sensor Coupler connects the MULTI 3 CI Sensor to a DALI bus system. For this, the MULTI 3 CI Sensor is connected to the DALI Sensor Coupler via RJ-10 socket. DALI terminals connect the DALI Sensor Coupler to both the DALI network and WAGO DALI Module.
The ECO CI Kit contains two covers, which can be used as touch guards and strain relief for cables within the ceiling installation of the DALI Sensor Coupler.
The MULTI 3 CI Sensor has a motion and light sensor, enabling both motion detection and daylight-dependent lighting control. Power supply to the DALI Sensor Coupler is provided via DALI line. The DALI Sensor Coupler transmits measured values from the connected sensor channels as telegrams to the WAGO DALI Module via DALI line. Parameters can be adjusted individually via WAGO DALI Configurator.

The number of sensors, which can be operated on a DALI line, depends on the total power consumption of the specific devices and the address range for the actuators and sensors. Due to the capacity of the DALI bus, a maximum of 16 DALI sensor couplers must be operated on the DALI Multi-Master Module (753-647).

Assembly

Sensor connection
The MULTI 3 CI Sensor is connected to a 4-pole RJ-10 socket (4P4C), which is marked as “Sensor” on the housing cover.
For easy connection, the sensor plug is equipped with a quick-connect latch.
Only one MULTI 3 CI Sensor must be connected to sensor coupler.

Ceiling installation
For installation outside of a lighting fixture (e.g., suspended ceiling), the ECO CI Kit must also be attached to both sides of the unit to ensure strain relief and touch protection. The DALI Sensor Coupler can also be installed in lighting fixtures. The installation spaces available in lighting fixtures can be used, as the dimensions correspond to those of an electronic ballast.

Note:
The DALI Sensor Coupler is also available individually, allowing the unit to be combined with other multi-sensor models from Osram.

	Delivery type	Item No.
WAGO DALI Multi-Sensor Kit	Set incl. DALI Sensor Coupler, MULTI 3 CI Sensor, ECO CI Kit	2851-8201
DALI Sensor Coupler		2851-8202

DALI Sensor Coupler	
Power supply	via DALI line
Current consumption	5 mA (from the DALI line)
Input signal voltage/current:	according to MULTI 3 CI Sensor
Connections	Inputs: for MULTI 3 CI Sensor’s modular plug 4P4C (RJ-10), sensor cable length, max. 5 m; DALI connection: Push-wire connectors, 8.5 – 9.5 mm strip length
Cross sections	0.5 … 1.5 mm² (e + f)
Dimensions (mm) W x H x D	118 x 21 x 30 mm
Weight	35 g
Ambient temperature (operation)	0 … +50 °C
Ambient temperature (storage)	-25 … +70 °C
Relative humidity	5 … 93 %, non-condensing
Degree of protection	IP20
Approvals	CE

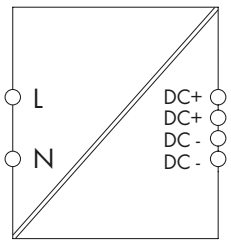
ECO CI Kit:
Installation opening diameter: 42 … 48 mm
Minimum suspended ceiling distance: 25 mm

MULTI 3 CI Sensor:
Maximum total length of signal line (incl. all connections to the control units): 100 m
Dimensions (Diameter x H): 50 x 25 mm
Light sensor detection area: 20 … 600 lx (measured on the sensor), opening angle approx. 90°
Recommended installation height: 2 … 4 m
Motion detection area: Conical, opening angle approx. 80°, depending on installation height 4 – 8 m

Power Supply for 753-647 DALI Multi-Master Module
EPSITRON® COMPACT Power
787 Series

- Supplies up to five 753-647 DALI Multi-Master Modules*
- Prepared for class II equipment
- Natural convection cooling when horizontally mounted
- Stage profile, ideal for distribution boards or distribution boxes

*Note: The 787-1007 Power Supply must be operated in a DALI network with interconnected 753-647 DALI Multi-Master Module. Otherwise the connected DALI devices will be destroyed.



EPSITRON® – Primary Switch Mode Power Supply, COMPACT Power, 1-phase, Output 18 VDC / 1.1 A

Item No.	Pack. Unit
787-1007	1

Technical Data	
Input:	
Nominal input voltage Vi nom	100 … 240 VAC
Input voltage range	85 … 264 VAC; 120 … 373 VDC
Frequency	44 … 66 Hz; 0 Hz
Input current Ii	0.6 A at 110 VAC / 0.4 A at 230 VAC
Inrush current	< 30 A, NTC
Mains failure hold-up time	> 10 ms at 110 VAC / > 80 ms at 230 VAC
Output:	
Nominal output voltage Vo nom	18 VDC
Output current Io	1.1 A at 18 VDC max. 0.8 A (18 VDC) in any mounting position
Factory preset	18 VDC
Adjustment accuracy	2 %
Residual ripple	< 150 mV (peak-peak)
Current limitation	1.1 x Io typ.
Overload behavior	Constant current
Operational indication	LED green (U_a)
Efficiency	80 % typ.
Power loss PV	3 W (no load) / 6 W (rated load)
Fuse protection:	
Internal fuse	2 AT
External fuse	Wire breaking 10 A, 16 A, Characteristic B, C; An external DC fuse is required for the DC input voltage

Technical Data	
Environmental requirements:	
Ambient operating temperature	-25 … +60 °C

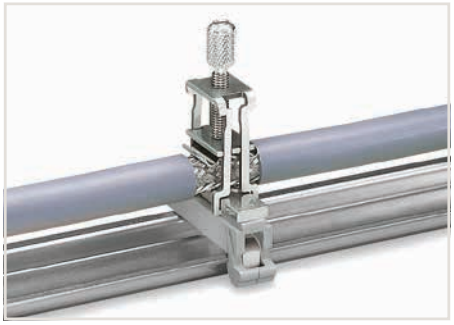
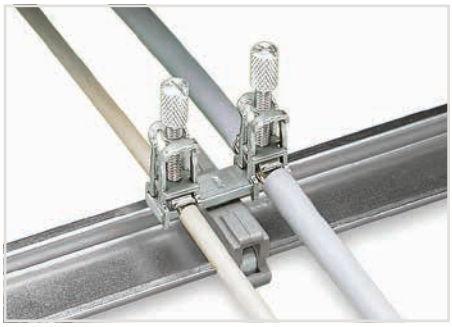
790 Series, Shield Connection System
– Description and Handling –



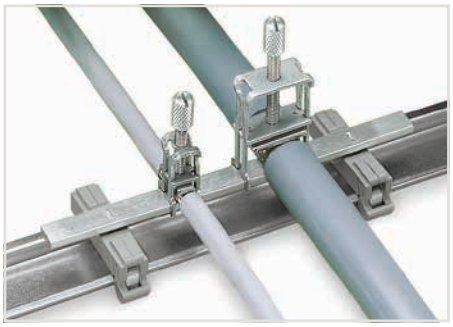
Carrier with grounding foot* (790-113)
45 mm long, busbar 90° to the rail

* for all sizes of shield clamping saddles



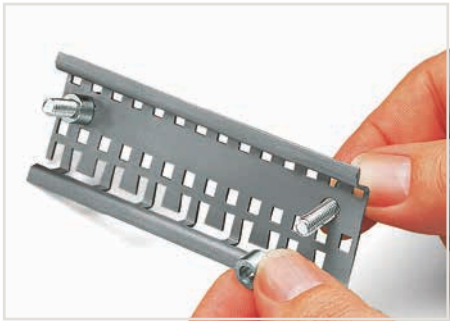
Carrier with grounding foot* (790-114)
45 mm long, busbar parallel to the rail

* for all sizes of shield clamping saddles

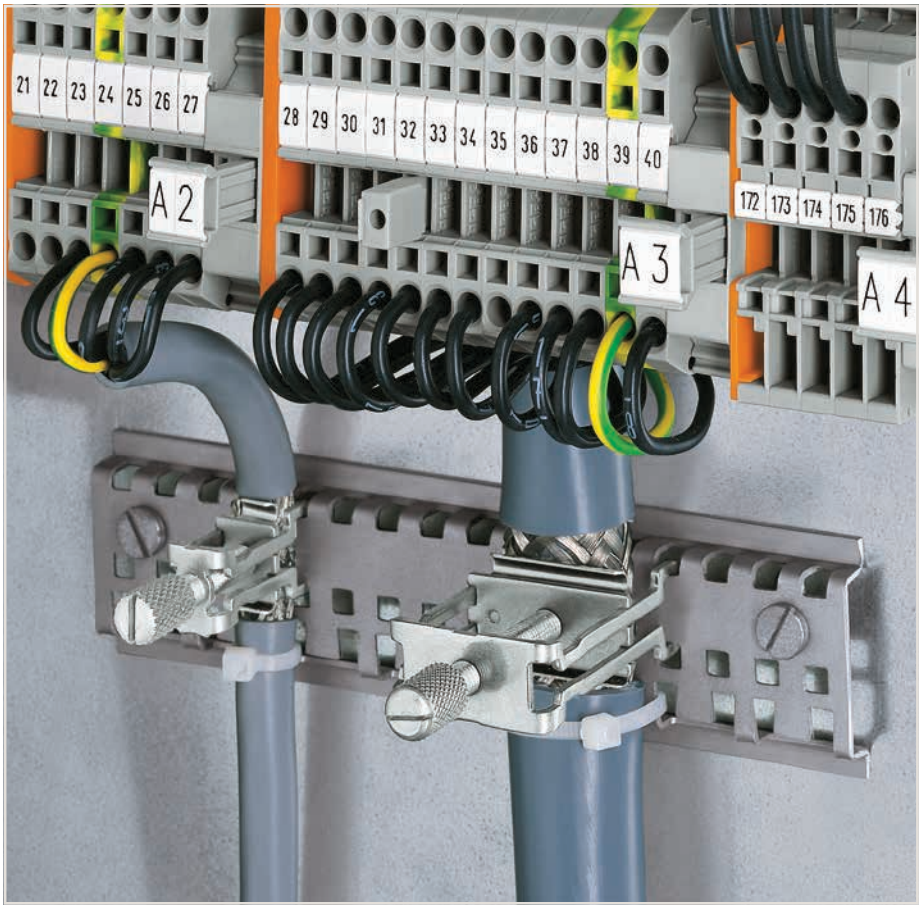


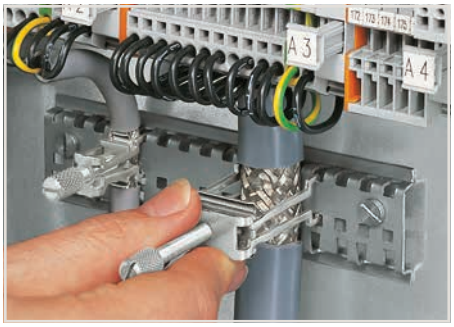
Carrier with grounding foot* (790-115),
125 mm long, busbar parallel to the rail

* for all sizes of shield clamping saddles

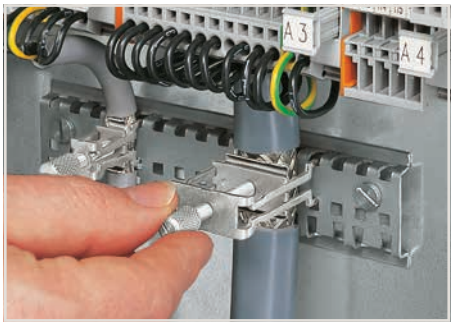


Fitting spacer sleeve to a specialty slotted carrier rail

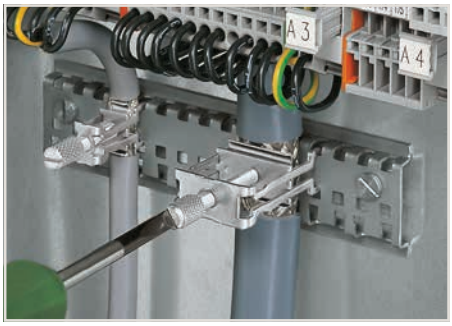




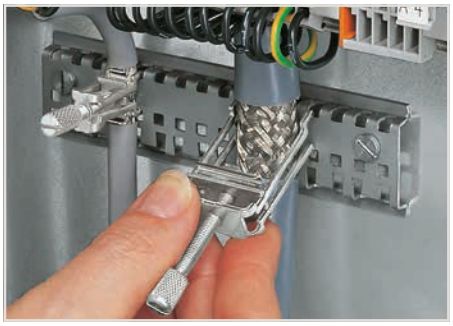
Fitting an additional clamping saddle



Tightening/removing a shield clamping saddle



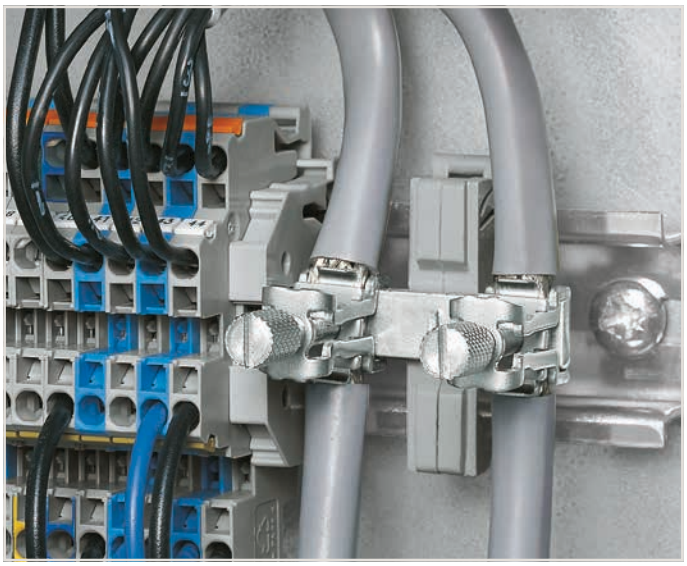
After connection, tighten the knurled screw to complete the installation.
Recommended tightening torque: 0.5 Nm



To remove the clamping saddle, unscrew until ratcheted mechanism is released, then slightly tip saddle and remove the clamping saddle.

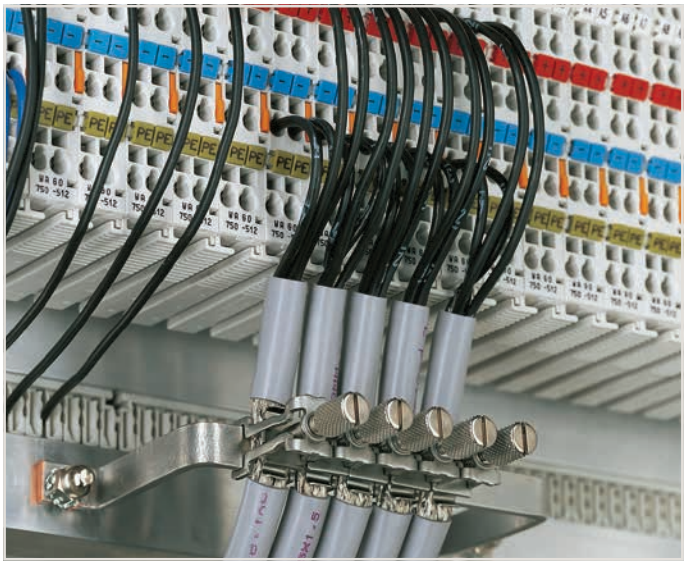
11

790 Series, Shield Connection System
Installation

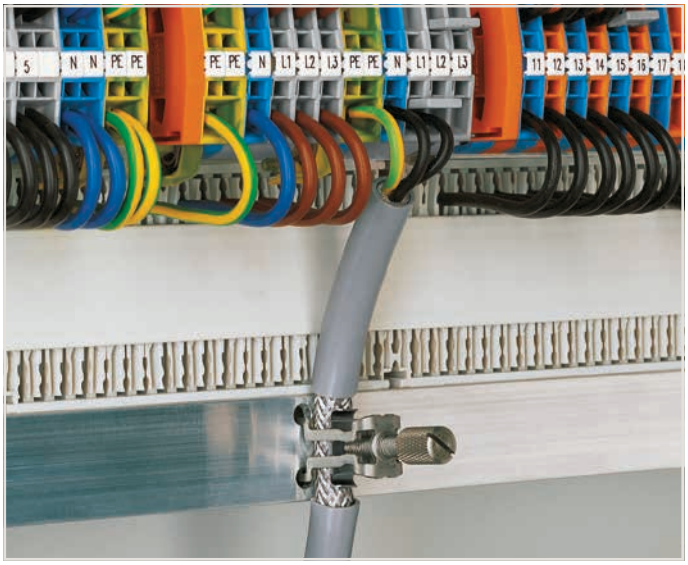


Carrier with grounding foot, busbar parallel to the rail

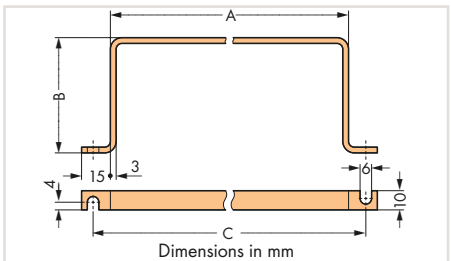
Insulated mounting carriers for a common shield reference potential, independent of housing potential



U-shaped copper busbar 10 mm x 3 mm



Snap into any metal plate up to max. thickness 3 mm.



Dimensions in mm

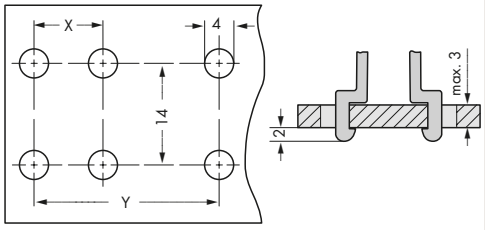
Shield (screen) clamping saddle size

Distance	X
11 mm	9.5 mm
Distance	Y
19 mm	17.5 mm
27 mm	25.5 mm
43 mm	41.5 mm



Additionally, the spring material is part of the clamping saddle, providing a good electrical connection (the system also acts as a partial strain relief). The spring element integrated in the shield clamping saddle compensates deformation and settling that results from a connected shield.

Shield Clamping Saddles
790 Series

Shield clamping saddle, 11 mm, diameter of compatible conductor up to 8 mm
Note: Cannot be used for connecting ground conductors

Item No.	Pack. Unit
790-108	50 (10)

Shield clamping saddle, 19 mm, diameter of compatible conductor, 7 … 16 mm
Note: Cannot be used for connecting ground conductors

Item No.	Pack. Unit
790-116	50 (10)

Shield clamping saddle, 27 mm, diameter of compatible conductor, 6 … 24 mm
Note: Cannot be used for connecting ground conductors

Item No.	Pack. Unit
790-124	50 (10)

Shield clamping saddle, 43 mm, diameter of compatible conductor, 22 … 40 mm
Note: Cannot be used for connecting ground conductors

Item No.	Pack. Unit
790-140	50 (10)

Assembly

The shield clamping saddle is shipped ready for direct connection to the busbar 10 mm x 3 mm or to a drilled mounting plate. After connection, tighten the knurled screw to complete the installation.
Max. tightening torque 0.5 Nm

Removal

To remove the clamping saddle, unscrew until ratcheted mechanism is released, then slightly tip saddle and remove the clamping saddle.

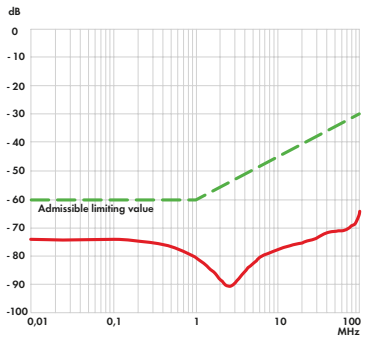
11

Negative Shield Attenuation



WAGO's shield connecting system is highly effective because the clamping unit can be brought very close to the unshielded part of the cable.

Shield Clamping Saddle with Latching Spring
790 Series

Shield clamping saddle, 12.4 mm, diameter of compatible conductor, 3 … 8 mm
Note: Cannot be used for connecting ground conductors and strain relief

Item No.	Pack. Unit
790-208	50

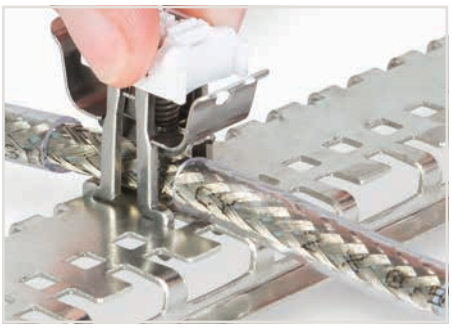
Shield clamping saddle, 21.8 mm, diameter of compatible conductor, 6 … 16 mm
Note: Cannot be used for connecting ground conductors and strain relief

Item No.	Pack. Unit
790-216	25

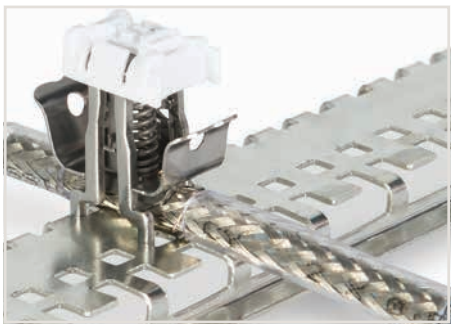
Shield clamping saddle, 27 mm, diameter of compatible conductor, 6 … 20 mm
Note: Cannot be used for connecting ground conductors and strain relief

Item No.	Pack. Unit
790-220	25

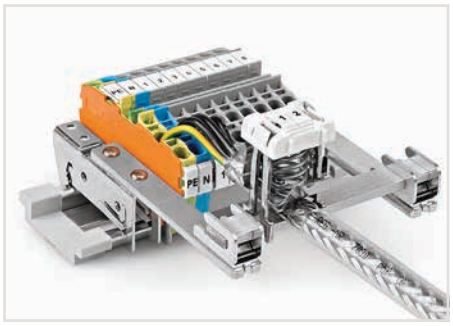
Mounting on specialty slotted carrier rail (790-145)
When releasing the saddle, do not place your finger under the clamping spring!



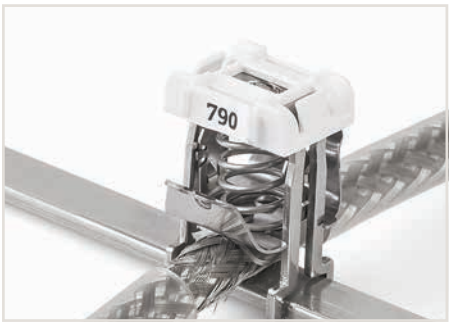
Removing the shield clamping saddle.



Shield clamping saddle contacts shield conductor and specialty slotted carrier rail (790-145).



Application example



Marking – here with marking strip

Marking – here with WMB markers

11

Shield Clamps and Shield Termination
791 and 709 Series

Insert the shield termination in the female connector using the operating tool

Shield clamp, diameter of compatible conductor 10 … 17 mm, height max. 63 mm, 23 mm wide
Note: Cannot be used for connecting ground conductors

	Item No.	Pack. Unit
	791-117	50

Shield termination, including cable ties for conductor diameter 5 … 10 mm

	Item No.	Pack. Unit
	709-350	100 (25)

Shield clamp, diameter of compatible conductor 1.5 … 6.5 mm, height max. 40 mm, 10 mm wide
Note: Cannot be used for connecting ground conductors

	Item No.	Pack. Unit
	791-107	50

Shield termination, including cable ties for conductor diameter 5 … 10 mm

	Item No.	Pack. Unit
	709-352	100 (25)

Fit the shield termination on the conductor.

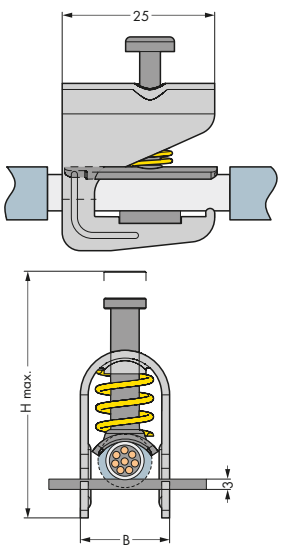
Shield clamp, diameter of compatible conductor 5 … 11 mm, height max. 47 mm, 17 mm wide
Note: Cannot be used for connecting ground conductors

	Item No.	Pack. Unit
	791-111	50

Shield clamp, diameter of compatible conductor 16 … 24 mm, height max. 78 mm, 30 mm wide
Note: Cannot be used for connecting ground conductors

	Item No.	Pack. Unit
	791-124	50

Fasten the shield conductor and the shield termination to the strain relief plate using cable ties.



Dimensions in mm

Shield termination, here with the example of an X-COM® female connector

Accessories for Shield Connection Systems

Carrier with grounding foot, parallel to the rail, 15 mm long, Cu 10 mm x 3 mm, suitable for 790-108 shield clamping saddle

Item No.	Pack. Unit
790-110	25

Carrier with grounding foot, parallel to the rail, 25 mm long, Cu 10 x 3 mm, suitable for 790-108 and 790-116 shield clamping saddles, as well as for 791-111 and 791-117 shield clamps 790-112

Item No.	Pack. Unit
790-112	25

Carrier with grounding foot, 90 ° to carrier rail, 45 mm long, Cu 10 mm x 3 mm, suitable for 790 Series shield clamping saddle

Item No.	Pack. Unit
790-113	25

Carrier with grounding foot, parallel to the rail, 45 mm long, Cu 10 x 3 mm, suitable for 790 Series shield clamping saddles and 791 Series shield clamps

Item No.	Pack. Unit
790-114	25

Carrier with 2 grounding feet, parallel to the rail, 125 mm long, Cu 10 mm x 3 mm

Item No.	Pack. Unit
790-115	25

Busbar, tin-plated, 1000 mm long, Cu 10 mm x 3 mm, I_N 140 A

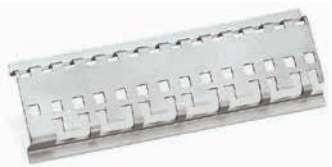
Item No.	Pack. Unit
210-133	1

Busbar, tin-plated, 30 mm long, Cu 10 mm x 3 mm

Item No.	Pack. Unit
790-133	20

Busbar, tin-plated, 50 mm long, Cu 10 mm x 3 mm

Item No.	Pack. Unit
790-134	20



Carrier rail, with special perforations, 1000 mm long, tin-plated

Item No.	Pack. Unit
790-145	1

Spacer sleeve, for specialty slotted carrier rail, use M5 size screw

Item No.	Pack. Unit
790-144	200 (100)

Vertical mounting position of the busbar

Busbar carrier with T-connector, flexible, for busbars Cu 10 mm x 3 mm, distance between center of DIN-rail and busbar carrier: 70 mm, height: 56 mm

	Item No.	Pack. Unit
	790-350/790-398	12

Busbar carrier with T-connector, flexible, for busbars Cu 10 mm x 3 mm, distance between center of DIN-rail and busbar carrier: 70 mm, height: 99 mm

	Item No.	Pack. Unit
	790-352/790-398	12

Busbar carrier with T-connector, flexible, for busbars Cu 10 mm x 3 mm, distance between center of DIN-rail and busbar carrier: 85 mm, height: 56 mm

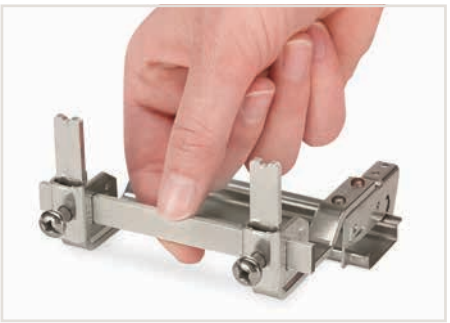
	Item No.	Pack. Unit
	790-360/790-398	12

Busbar carrier with T-connector, flexible, for busbars Cu 10 mm x 3 mm, distance between center of DIN-rail and busbar carrier: 85 mm, height: 99 mm

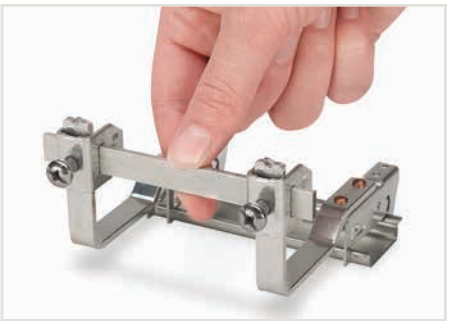
	Item No.	Pack. Unit
	790-362/790-398	25

T-connector, for connecting two busbars Cu 10 mm x 3 mm

	Item No.	Pack. Unit
	790-398	10

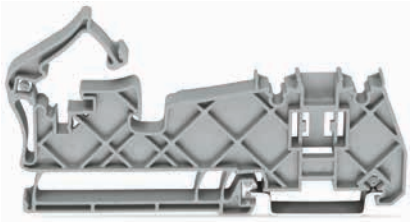


The height of the busbar can be adjusted.

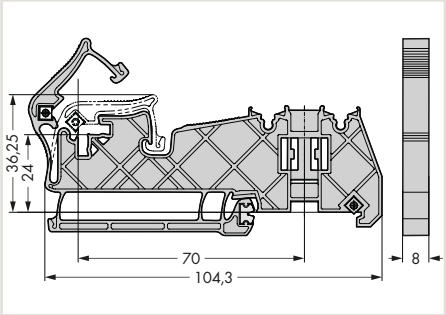


Fix the busbar by tightening the screws at the required position.

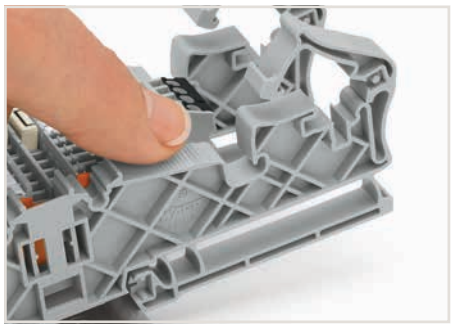
Busbar Carriers
790 Series



Dimensions in mm

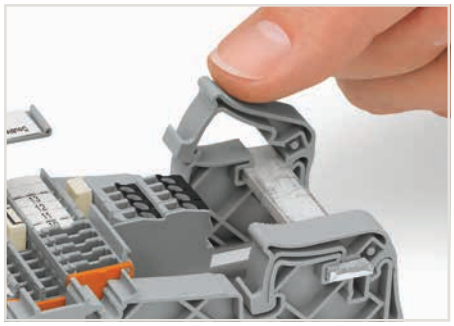


Busbar carrier, for busbars Cu 10 mm x 3 mm, no contact to DIN-rail, insulated		
Color	**Item No.**	Pack. Unit
gray	**790-400**	20

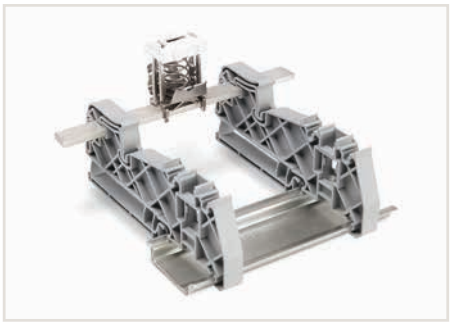


Snapping the busbar carrier onto DIN 35 rail.

Vertical mounting position of the busbar

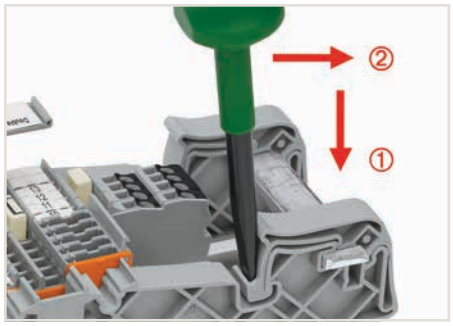


Placing the busbar in the carrier holder.



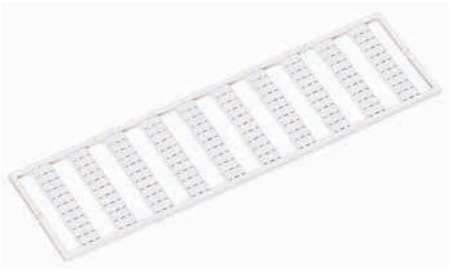
Horizontal mounting position of the busbar

Insert the fixing bracket.



Release the fixing bracket by pushing the operating tool down ① and then forward ②.

WMB Multi marking systems for terminal widths 3.5 mm, 4 … 4.2 mm and from 5 mm



- Marker width 5 mm: For continuous marking of 270, 280, 780, 869, 870, 880 and individual marking of 281 … 285, 781 … 785, 2002, 2003, 2022, 2004, 2006, 2010 and 2016 Series terminal blocks
- Marker width 5 … 5.2 mm: For continuous marking of 270, 280, 780, 869, 870, 880, 2002, 2003 and 2022 Series terminal blocks and individual marking of terminal blocks larger than 5 / 5.2 mm
- Marker width 4 … 4.2 mm: For continuous marking of 279 and 2001 Series terminal blocks
- Marker width 3.5 mm: For continuous marking of 2000 and 2020 Series terminal blocks

Operating tools

Operating tool with a partially insulated shaft, type 1, (2.5 x 0.4) mm blade, for 279, 726, 727, 2000, 2001 and 2020 Series

	Item No.	Pack. Unit
	210-719	1

Operating tool set with a partially insulated shaft, type 1, (2.5 x 0.4) mm blade, type 2, (3.5 x 0.5) mm blade, type 3, (5.5 x 0.8) mm blade

	Item No.	Pack. Unit
	210-722	1

Operating tool set with a partially insulated shaft, (2.5 x 0.4) mm blade, short for 279, 726, 727, 2000, 2001, 2020 Series

	Item No.	Pack. Unit
	210-647	1

Operating tool with a partially insulated shaft, type 2, (3.5 x 0.5) mm blade, for 260, 261, 262, 264, 270, 280, 281, 290, 775, 776, 777, 769, 780, 781, 869, 870, 880, 2002, 2003, 2004, 2005, 2022 Series

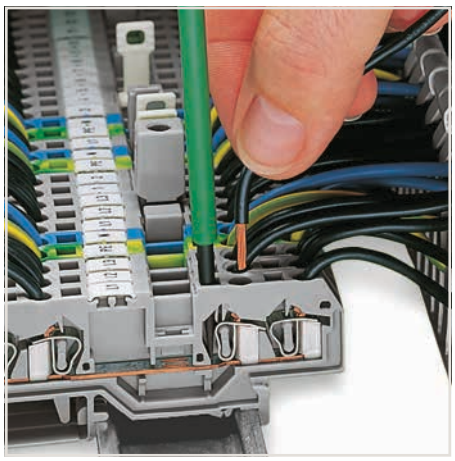
	Item No.	Pack. Unit
	210-720	1

Operating tool with a partially insulated shaft, (2.5 x 0.4) mm blade, short, angled, for 279, 2000, 2001 and 2020 Series

	Item No.	Pack. Unit
	210-648	1

Operating tool with a partially insulated shaft, type 3, (5.5 x 0.8) mm blade, for 282, 283, 284, 285, 782, 783, 784, 785, 2006, 2010, 2016 Series

	Item No.	Pack. Unit
	210-721	1



The blade dimensions of the above-listed operating tools with a partially insulated shaft are ideal for easy operation of front-entry terminal blocks.

Set of operating tools

11

Cable strippers

Cable stripper, for round cables with an outer Ø 2.5 mm … 11 mm

Item No.	Pack. Unit
206-171	1

Cable stripper, for round cables with an outer Ø 4.5 mm … 45 mm

Item No.	Pack. Unit
206-174	1

Replacement blade, for Ø 2.5 … Ø 11 mm, for cable stripper (206-171)

Item No.	Pack. Unit
206-170	1

Replacement blade, for Ø 4.5 … Ø 45 mm, for cable stripper (206-174)

Item No.	Pack. Unit
206-173	1

Set the cable diameter.

Strip the cable.

Stripping Tools

„Quickstrip" 10, 0.02 mm² ... 10 mm² "f-st" (6 mm² "s"), Cutter for conductors up to 10 mm² "f-st" 1.5 mm² "s")

Item No.	Pack. Unit
206-124	1

„Quickstrip" 16, 4 mm² ... 16 mm², Cutter for conductors up to 10 mm² "f-st" (1.5 mm² "s")

Item No.	Pack. Unit
206-125	1

„Standard" blade cassette, 0.02 ... 10 mm², for wire stripper (206-124)

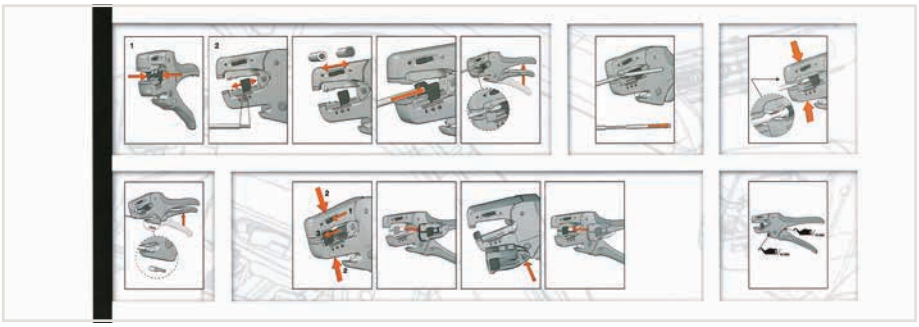
Item No.	Pack. Unit
206-126	1

„V" blade cassette, 0.1 ... 4 mm² for PTFE, for wire stripper (206-124)

Item No.	Pack. Unit
206-127	1

„Standard" blade cassette, 4 ... 16 mm², for wire stripper (206-125)

Item No.	Pack. Unit
206-128	1



Handling description included.

Stripping tools:
- Automatically adjusts to conductor size
- No damage to conductor strands
- Gripping pressure of jaws automatically adjusts conductor insulation diameter
- Clamping jaws and stripping blades open automatically once the stripping process is completed, ensuring no damage to the conductor strands
- Exact strip length may be set by sliding red setting stop
- Stripping blades can be replaced
- Self-sharpening, fully protected cutter, also replaceable.*
- The complete body is made of glass fiber-reinforced polyamide.

* applies to Microstrip

Cutting

Stripping

Crimping Tools

Variocrimp 4 crimping tool, for insulated and uninsulated ferrules, 0.25 mm² … 4 mm²/AWG 24 … 12

Item No.	Pack. Unit
206-204	1

Variocrimp 16 crimping tool, for insulated and uninsulated ferrules, 6 … 16 mm²/AWG 10 … 6

Item No.	Pack. Unit
206-216	1

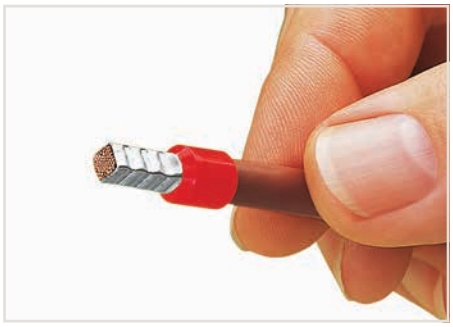
Cable cutter, cutting Cu and Al conductors up to 35 mm²

Item No.	Pack. Unit
206-118	1

Insert ferruled conductor into crimping station.

Squeeze handles until ratchet mechanism is released.

Cutting a cable.



A perfect gastight crimp, both electrically and mechanically reliable.

Only for “Variocrimp 16”:
Adjust conductor cross section with crimping tool in open position.

Application notes:

- The built-in crimping pressure control of “Variocrimp 4” automatically adjusts the crimping force to the conductor cross-section. Select the wire gauge on “Variocrimp 16” before crimping.
- Only one crimping station is needed to handle the specified conductor sizes
- Uniform, compact crimping on all four sides for high conductor retention
- No need to center the conductor into the ferrule.
- Conductor and ferrule insertion possible from both sides (for left- and right-handers)
- Built-in ratchet mechanism ensures gas-tight crimp connection
- Crimping tools open automatically after crimping operation is complete
- Comfortable handles for operator

Test and Measurement Devices

Profi LED+, 2-pole voltage tester with LED display, removable test probes, 4 mm Ø

Item No.	Pack. Unit
206-707	1

Profi LED+, 2-pole voltage tester with LED display, removable test probes, 4 mm Ø

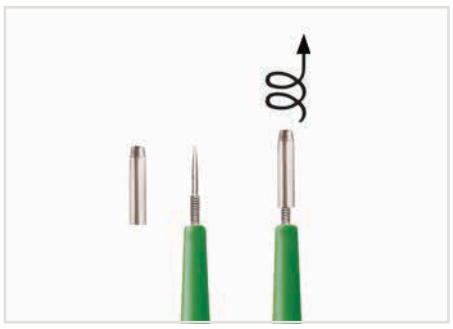
Item No.	Pack. Unit
206-706	1

Spare test probes, 4 mm Ø (2 pieces)

Item No.	Pack. Unit
206-808	25

Additional product features for Profi LED+
- Automatic measurement range selection
- Single-pole phase testing AC >100 V
- Two-pole sequence testing (R and L)
- Continuity testing
- FI/RCD testing (30 mA) via buttons
- One-hand operation for SCHUKO and CEE sockets
- LED torch lamp function
- Automatic backlight
- Auto power-off function
- CAT IV 1000 V
- TÜV/GS tested and approved
- IEC/EN 61243-3 (DIN VDE 0682-401)

Additional product features for Profi LED+:
- Automatic measurement range selection
- Single-pole phase testing AC >100 V
- Two-pole sequence testing (R and L)
- Continuity testing
- FI/RCD testing (30 mA) via buttons
- One-hand operation for SCHUKO and CEE sockets
- LED torch lamp function
- CAT IV 1000 V
- TÜV/GS tested and approved
- IEC/EN 61243-3 (DIN VDE 0682-401)



Profi-LED+:
- Improved socket contact via 4 mm Ø test probes
- Removable test probes for small test ports (suitable for all WAGO terminal blocks)

Test and Measurement Devices
206 Series

Multi-Tester, Digital multimeter with contactless voltage tester

Item No.	Pack. Unit
206-810	1

Clamp-Multi-Tester

Item No.	Pack. Unit
206-816	1

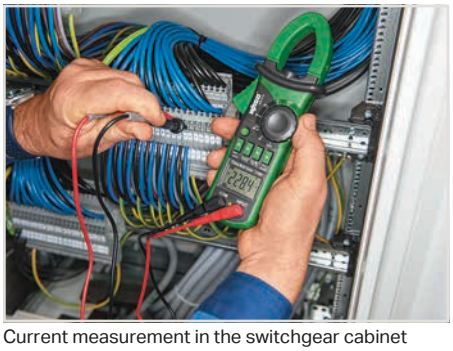
Testboy, with integrated flashlight, contactless voltage tester

Item No.	Pack. Unit
206-804	1

Additional product features for Multi Tester:
- Contact-less voltage test AC >100 V (optical and acoustical)
- Resistance measurement up to 20 MΩ
- Acoustical continuity test
- Diode test
- Data hold function
- Auto power-off function
- LED torch lamp function
- CAT IV 600 V
- TÜV/GS tested and approved
- IEC/EN 61010-1 (DIN VDE 0411)

Voltage testing in switchgear cabinet
Additional Clamp-Multi-Tester features:
- DC and AC current up to 600 A
- True RMS and min./max. value measurement
- DC and AC voltage up to 600 V
- Manual or automatic measurement range selection
- Resistance up to 60 MΩ
- Capacitance measurement
  Acoustical continuity test
- Diode test, Data hold function
- Large LCD with backlight
- LED measuring point lighting
- CAT III 600 V overvoltage protection
- IEC/EN 61010-1 (DIN VDE 0411)
- Includes batteries, measurement leads and carrying bag

A device that will reliably detect AC voltage in cables, sockets, fuses, switches, outlets, etc.
Testboy can detect the following:
- Live conductors
- Cable breaks
- blown fuses (in cartridge or holder)
- Defective switches
- Defective lamps



Current measurement in the switchgear cabinet

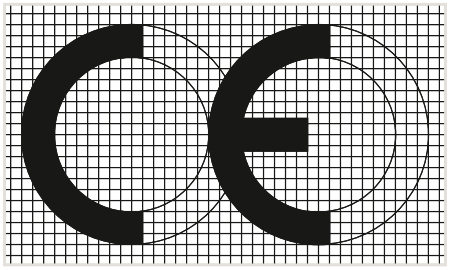
CE Marking and EC Directives

CE conformity marking:

The CE conformity marking consists of the characters "CE", with the following script:



Communauté Européenne
(European Community)

The CE marking shall be affixed to the electrical equipment, or if that is not possible, to the smallest packing unit. With the CE marking, manufacturers attest conformity of their products to the relevant directives.

In addition to the CE marking, the manufacturer provides an EC "Declaration of Conformity" for the product. This EC "Declaration of Conformity" must be retained and submitted to a national surveillance authority upon request.

The **EC directives** are legally binding specifications of the European Union. Their goal is the harmonization of legal and administrative regulations in the various EU member states, in order to prevent trade obstructions.

In order to "market" a product, it must comply with the relevant directives. The product may be subject to several directives, e.g. the EMC and the low voltage directives.

Low Voltage Directive
The safety of electrical equipment is guaranteed by the Low Voltage Directive. This directive covers 'complete' electrical equipment designed for use with a voltage rating of between 50 and 1000V for alternating current and between 75 and 1500V for direct current. Products falling within the scope of the Low Voltage Directive that are designed in such a way that they can be used in other electrical devices and whose safety, for the most part, is dependent on how these components were built into the end product and what features the end product has are defined as basic components in accordance with the Low Voltage Directive. The Low Voltage Directive doesn't apply to basic components.

EMC Directive
The EMC Directive implies that a product must meet the limits of the radiated electromagnetic disturbance and also requires that a product must be immune to electromagnetic interference. Electromagnetic passive components or components with no direct function, like resistors, diodes, capacitors, switching relays or cables (in the form of passive printed circuit boards) are not considered as apparatus within the meaning of the EMC Directive.

Machinery Directive
The Machinery Directive does not apply to WAGO products.

Explosive Atmospheres Directive (ATEX)
Directive for devices and protective systems intended for use in hazardous locations.

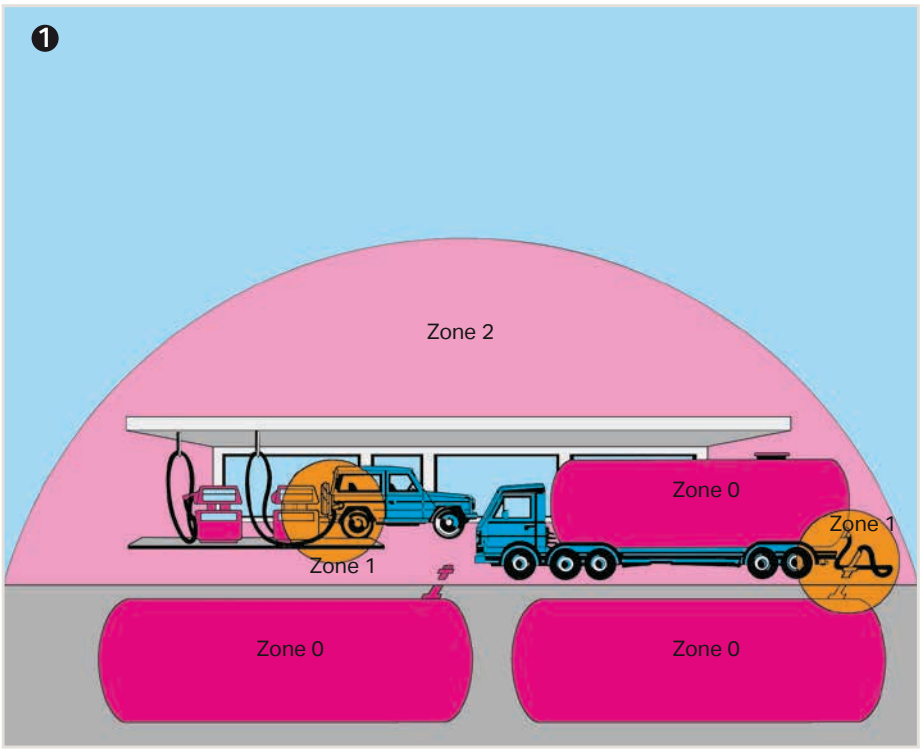
Radio Equipment Directive
A device or relevant component thereof, capable of communication by emitting and/or receiving radio waves utilizing the spectrum allocated to terrestrial/space radio communication, falls within the scope of the Radio Equipment Directive. As such, these devices and components are tested and labeled accordingly. This label implicitly includes both Low Voltage and EMC Directives, since the Radio Equipment Directive also encompasses the safety targets for both of these directives.

General Technical Information
for Electrical Equipment in Hazardous Environments

Harzardous Environments

Hazardous environments are areas in which the atmosphere may become explosive. Explosive atmosphere is defined as a mixture of ignitable substances in the form of gases, vapors or mixtures with air under atmospheric conditions in critically mixed ratios such that excessive high temperature, arcs or sparks may cause an explosion.

DIN EN 1127-1 and all other related standards that are commonly known divide up hazardous areas according to the likelihood of the occurrence of an explosive atmosphere into the following zones:



❶ Hazardous environments as a result of combustible gases, vapors or mist.

Zone 0

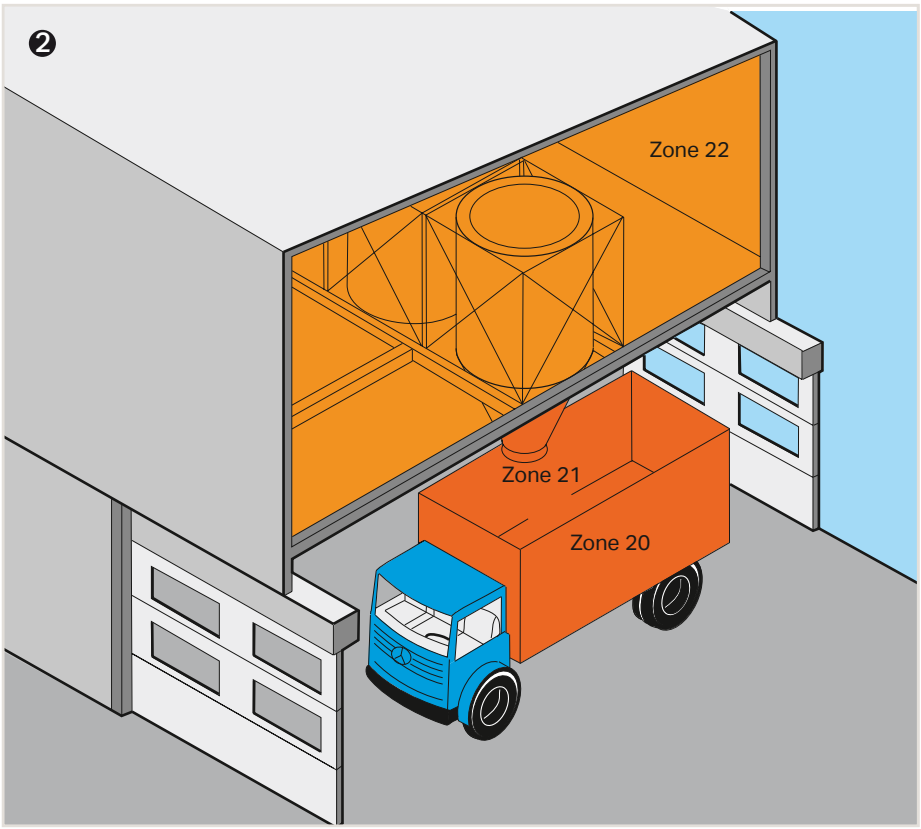
Area in which an explosive gas/air mixture is continuously present or present for long periods.

Zone 1

Area in which an explosive atmosphere can occur during normal operation

Zone 2

Area in which an explosive atmosphere is unlikely to occur under normal operation and if it does it will be for a short period.



❷ Hazardous areas caused by combustible dust

Zone 20

Area in which an explosive dusty atmosphere is present "permanently", for "long periods" or "frequently" and in which deposits of combustible dust of unknown or excessive thickness may be formed. Dust deposits alone are not grounds for classification as Zone 20.

Zone 21

Area in which an explosive dusty atmosphere is present "occasionally" under normal operating conditions and in which deposits or layers of combustible dust can generally be present.

Zone 22

Area in which an explosive dusty atmosphere is not likely to occur during normal operation and, if it occurs, will only exist for a "short period", or in which accumulations or layers of combustible dust are present.

Please refer to the manuals for more information on explosion protection.

Electromagnetic Compatibility and Mechanical Strength
(Industrial- and Residential Areas)

Immunity to interference for industrial areas acc. to EN 61000-6-2

Test Specification		Test Values	Evaluation Criteria *)
EN 61000-4-2	ESD	4 kV/8 kV (contact/air)	B
EN 61000-4-3	Electromagnetic fields	10 V/m: 80 MHz ... 1 GHz	A
		3V/m: 1.4 ... 2.0 GHz	A
		1V/m: 2.0 ... 2.7 GHz	A
EN 61000-4-4	Burst	1 kV/2 kV (data/supply)	B
EN 61000-4-5	Surge	Data: - / 1 kV (line: line – line : ground)	B
		DC supply: 0.5 kV / 0.5 kV (line : line – line : ground)	B
		AC supply: 1 kV / 2 kV (line : line – line : ground)	B
EN 61000-4-6	RF disturbances	10 V/m, 80 % AM (0.15 ... 80 MHz)	A
EN 61000-4-8	Magnetic field	30 A/m, 50/60Hz	A
*)	Criteria A: The device must work in accordance with the regulations during and after the test. Criteria B: The device must work in accordance with the regulations after the test.		

Emission of interference for residential areas acc. to EN 61000-6-3

Test Specification		Limit Values Quasi Peak	Frequency Range	Distance
EN 55016-2-1	AC supply, conducted	66 ... 56 dB(µV)	150 ... 500 kHz	
		56 dB(µV)	500 kHz ... 5 MHz	
		60 dB(µV)	5 ... 30 MHz	
EN 55016-2-1	DC supply/data line	79 dB(µV)	150 ... 500 kHz	
	conducted	73 dB(µV)	500 kHz ... 30 MHz	
EN 55016-2-3	radiated	30 dB(µV/m)	30 ... 230 MHz	10 m
		37 dB(µV/m)	230 MHz ... 1 GHz	10 m
EN 55022	Telecommunications/	84 ... 74 dB(µV)	150 ... 500 kHz	
	Mains connection, conducted	74 dB(µV)	500 kHz ... 30 MHz	

Emission of interference for industrial areas acc. to EN 61000-6-4

Test Specification		Limit Values Quasi Peak	Frequency Range	Distance
EN 55016-2-1	AC supply, conducted	79 dB(µV)	150 ... 500 kHz	
		73 dB(µV)	500 kHz ... 30 MHz	
EN 55016-2-3	radiated	40 dB(µV/m)	30 ... 230 MHz	10 m
		47 dB(µV/m)	230 MHz ... 1 GHz	10 m
EN 55022	Telecommunications/	97 ... 87 dB(µV)	150 ... 500 kHz	
	Mains connection, conducted	87 dB(µV)	500 kHz ... 30 MHz	

Mechanical strength acc. to EN 61131-2

Test Specification		Frequency Range	Limit Values
IEC 60068-2-6	Vibration	5 Hz ≤ f < 9 Hz	1.75 mm amplitude (permanently)
			3.5 mm amplitude (short term)
		9 Hz ≤ f < 150 Hz	0.5 g (permanent)
			1 g (short term)
		Note on vibration test:	
		a) Frequency change: max. 1 octave/minute	
		b) Vibration direction: 3 axes	
IEC 60068-2-27	shock		15 g
		Note on shock test:	
		a) Type of shock: half sine	
		b) Shock duration: 11 ms	
		c) Shock direction: 3x in positive and 3x in negative direction for each of the three mutually perpendicular axes of the test specimen	

Electromagnetic Compatibility and Mechanical Strength (shipping)

Immunity to interference in the shipping industry acc. to Germanischer Lloyd

Test Specification		Test Values	Evaluation Criteria *)
IEC 61000-4-2	ESD	6 kV / 8 kV (contact – air)	B
IEC 61000-4-3	Electromagnetic fields	10 V/m 80 MHz ... 2 GHz	A
IEC 61000-4-4	Burst	1 kV / 2 kV (data – supply)	A
IEC 61000-4-5	Surge	0.5 kV / 1 kV (line: line – line : ground)	A
IEC 61000-4-6	RF disturbances	10 V, 80 % AM (0.15 ... 80 MHz)	A
Type Test	AF disturbances (harmonics)	3 V, 2 W	A
Type Test	high voltage	755 V DC	-
		1500 V AC	-
*)	Criteria A: The device must work in accordance with the regulations during and after the test. Criteria B: The device must work in accordance with the regulations after the test.		

Immunity to interference in the shipping industry acc. to Germanischer Lloyd

Test Specification		Limit Values Quasi Peak	Frequency Range	Distance
Type Test	EMC 1, conducted (allows for ship bridge control applications)	96 ... 50 dB(µV)	10 ... 150 kHz	
		60 ... 50 dB(µV)	150 ... 350 kHz	
		50 dB(µV)	350 kHz ... 30 MHz	
Type Test	EMC 1, radiated	80 ... 52 dB(µV/m)	150 ... 300 kHz	3 m
	(allows for ship bridge control applications)	52 ... 34 dB(µV/m)	300 kHz ... 30 MHz	3 m
		54 dB(µV/m)	30 MHz ... 2 GHz	3 m
	except for:	24 dB(µV/m)	156 ... 165 MHz	3 m
Type Test	EMC 2, conducted (allows for machine room applications)	120 ... 69 dB(µV)	10 ... 150 kHz	
		79 dB(µV)	150 ... 500 kHz	
		73 dB(µV)	500 kHz ... 30 MHz	
Type Test	EMC 2, radiated	80 ... 50 dB(µV/m)	150 kHz ... 30 MHz	3 m
	(allows for machine room applications)	60 ... 54 dB(µV/m)	30 ... 100 MHz	3 m
		54 dB(µV/m)	100 MHz ... 2 GHz	3 m
	except for:	24 dB(µV/m)	156 ... 165 MHz	3 m

Mechanical strength acc. to Germanischer Lloyd

Test Specification		Frequency Range	Limit Values
IEC 60068-2-6	Vibration (category A, C)	2 Hz ≤ f < 13.2 Hz	±1.0 mm amplitude (permanent)
		13.2 Hz ≤ f < 100 Hz	0.7 g (permanent)
		Note on vibration test: a) Frequency change: max. 1 octave/minute b) Vibration direction: 3 axes	
IEC 60068-2-6	Vibration (category A-D)	2 Hz ≤ f < 25 Hz	±1.6 mm amplitude (permanent)
		25 Hz ≤ f < 100 Hz	4 g (permanent)
		Note on vibration test: a) Frequency change: max. 1 octave/minute b) Vibration direction: 3 axes	

Specifications and Test Results

In particular the following standards apply to the design and the application of the terminal blocks and connectors contained in this catalog:

DIN VDE 0100
Construction of high current installations with nominal voltages up to 1000V

EN 50110-1
VDE 0105-1
Operation of electrical installations

IEC 61140
EN 61140
VDE 0140-1
Protection against electric shock - Common
aspects for installation and equipment

IEC 60664-1
EN 60664-1
VDE 0110-1
Insulation coordination for equipment within
low-voltage systems - Part 1: Principles, requirements and tests

IEC 60204-1
EN 60204-1
VDE 0113-1
Safety of machinery - Electrical equipment
of machines - Part 1: General requirements

EN 50178
VDE 0160
Electronic equipment for use in power installations

IEC 62305-1
EN 62305-1
VDE 0185-305-1
Protection against lightning - Part 1: General principles

IEC 60060-1
HD 588.1 S1
VDE 0432-1
High voltage test techniques; Part 1: general specifications and test requirements

IEC 60085
EN 60085
VDE 0301-1
Electrical insulation - Thermal evaluation and designation

IEC 60529
EN 60529
VDE 0470-1
Degrees of protection provided by enclosures (IP code)

IEC 60603-1
EN 60603-1
Connectors for frequencies below 3 MHz for use with printed boards - Part 1: Generic specification: General requirements and guide for the preparation of detail specifications, with assessed quality

IEC 61984
EN 61984
VDE 0627
Connectors - Safety requirements and tests

IEC 60999-1
EN 60999-1
VDE 0609-1
Connecting devices - Electrical copper conductors; Safety requirements for screw-type and screwless-type clamping units - Part 1: General requirements and particular requirements for clamping units for conductors 0.2 mm² up to 35 mm²

IEC 60617-2
EN 60617-2
Graphical symbols for diagrams - Part 2: Symbol elements, qualifying symbols and other symbols having general application

IEC 61558-1
EN 61558-1
VDE 0570-1
Safety of power transformers, power supplies, reactors and similar products Part 1: General requirements and tests

IEC 60669-2-1
EN 60669-2-1
VDE 0632-2-1
Switches for household and similar fixed electrical installations - Part 2-1: Particular requirements - Electronic switches

IEC 60947-7-1
EN 60947-7-1
VDE 0611-1
Low-voltage switchgear and controlgear - Part 7-1: Ancillary equipment - Terminal blocks for copper conductors

IEC 60998-2-2
EN 60998-2-2
VDE 0613-2-2
Connecting devices for low-voltage circuits for household and similar purposes - Part 2-2: Particular requirements for connecting devices as separate entities with screwless type clamping units

IEC 60947-1
EN 60947-1
VDE 0660-100
Low-voltage switchgear and controlgear Part 1: General rules

IEC 60947-5-6
EN 60947-5-6
VDE 0660-212
Low-voltage switchgear and controlgear Part 5-6: Control circuit devices and switching elements, DC interface for proximity sensors and switching amplifiers (NAMUR)

IEC 60439-1
EN 60439-1
VDE 0660-500
Low-voltage switchgear and controlgear assemblies - Part 1: Type-tested and partially type-tested assemblies

IEC 60555-1
EN 60555 Part 1
VDE 0838-1
Disturbances in supply systems caused by household appliances and similar electrical equipment; Part 1: definitions

IEC 60715
EN 60715
Dimensions of low-voltage switchgear and controlgear - Standardized mounting on rails for mechanical support of electrical devices in switchgear and controlgear installations

IEC 60950-1
EN 60950-1
VDE 0805-1
Information technology equipment - Safety Part 1: General requirements

IEC 60127-6
EN 60127-6
VDE 0820-6
Miniature fuses – Part 6: Fuse-holders for miniature fuse-links

EN 50155
VDE 0115-200
Railway applications – Electronic equipment
used on rolling stock

EN 50090-2-2
VDE 0829-2-2
Home and Building Electronic Systems (HBES) – Part 2-2: System overview – General technical requirements; German version

IEC 60099-1
EN 60099-1
VDE 0675-1
Surge arresters - Part 1: Non-linear resistor type gapped surge arresters for a.c. systems

IEC 61643-1
EN 61643-11
VDE 0675-6-11
Low-voltage surge protective devices – Part 11: Surge protective devices connected to low-voltage power systems – Requirements and tests

IEC 61643-21
EN 61643-21
VDE 0845-3-1
Low voltage surge protective devices - Part 21: Surge protective devices connected to telecommunications and signalling networks; Performance requirements and testing methods

IEC 61508-1
EN 61508-1
VDE 0803-1
Functional safety of electrical/electronic/programmable electronic safety-related systems - Part 1: General requirements

IEC 62061
EN 62061
VDE 0113-50
Safety of machinery - Functional safety of safety-related electrical, electronic and programmable electronic control systems

Interfaces - Fieldbuses

DIN 66259-1
Electrical characteristics for unbalanced double-current interchange circuits

EN 50325-1
Industrial communications subsystem based ISO 11898 (CAN) for controller-device interfaces - Part 1: General requirements

IEC 61784-1
EN 61784-1
Industrial communication networks – Profiles Part 1: Fieldbus profiles

IEC 61158-2
EN 61158-2
Industrial communication networks - Fieldbus specifications - Part 2: Physical layer
specification and service definition

IEC 61158-6-x
EN 61158-6-x
DIN EN 61158-6-x
Industrial communication networks - Fieldbus specifications - Part 6-x

Explosion Protection

IEC 60079-0
EN 60079-0
VDE 0170-1
Electrical apparatus for explosive gas atmospheres - Part 0: General requirements

IEC 60079-7
EN 60079-7

Electrical Engineering Laboratory:
Product Safety for Our Customers

The WAGO laboratory in Minden is an "accredited test lab for electrical and mechanical tests on terminal blocks and connectors, as well as for environment simulations."

Accreditation, as ISO/IEC 17011:2004 defines, is a third party-attestation related to a conformity assessment body conveying formal demonstration of its competence to carry out specific conformity assessment tasks.

Accreditation, according to DIN EN ISO/IEC 17025, is granted by the Deutsche Akkreditierungsstelle GmbH DAkkS (German Accreditation Office GmbH DAkkS). This national accreditation office, which was established by the German Federal Ministry for Economics and Technology (BMWi), certifies that our test laboratory is officially recognized as possessing the necessary expertise to conduct defined tests and types of tests independently and objectively.

Through obtaining the accreditation, the following objectives were achieved:

- Customer requirements
- Workflow optimization
- Clearly defined processes
- Clear organization and structure
- Greater transparency
- Consistent, high-quality laboratory testing
- Maximum traceability
- Traceable measurement results
- Sustainable quality awareness

Akkreditierung

Die Deutsche Akkreditierungsstelle GmbH bestätigt hiermit, dass das Prüflaboratorium

WAGO Kontakttechnik GmbH & Co. KG
Hansastraße 27, 32423 Minden

die Kompetenz nach DIN EN ISO/IEC 17025:2005 besitzt, Prüfungen in folgenden Bereichen durchzuführen:

Elektrische und mechanische Prüfungen an Klemmen und Steckverbinder sowie Umweltsimulation

Die Akkreditierungsurkunde gilt nur in Verbindung mit dem Bescheid vom 18.12.2014 mit der Akkreditierungsnummer D-PL-19704-01 und ist gültig bis 17.12.2019. Sie besteht aus diesem Deckblatt, der Rückseite des Deckblatts und der folgenden Anlage mit insgesamt 5 Seiten.

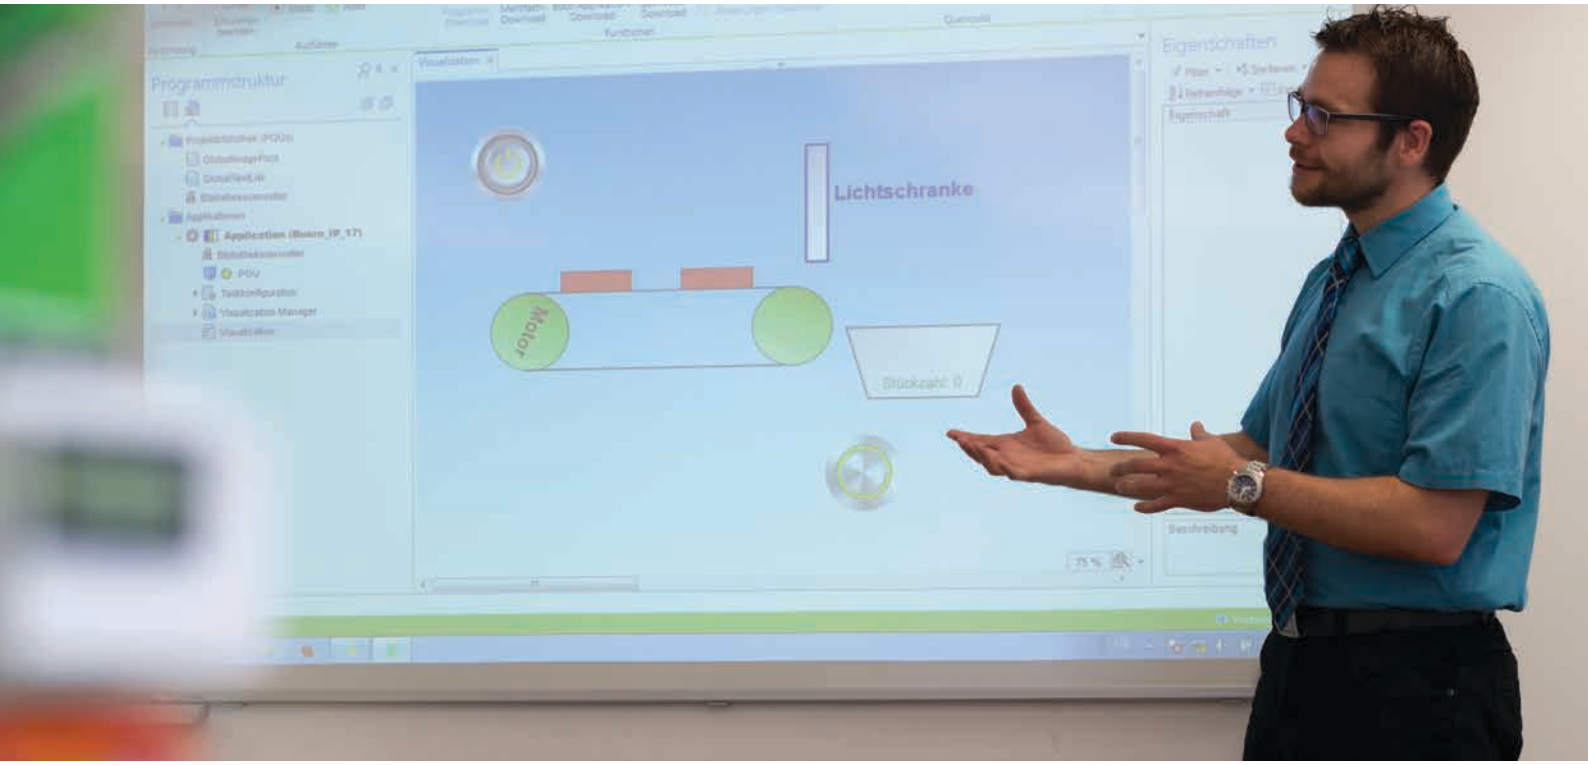
WAGO Seminars
Learn Today. Benefit Tomorrow

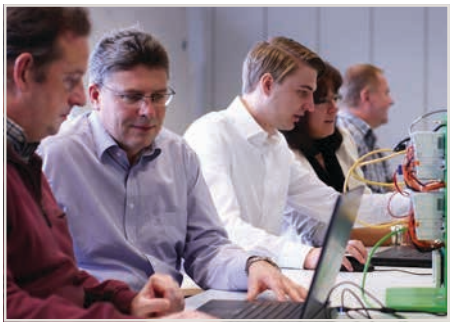


Setting the Bar with Your Goals

Product-related and customer-specific training seminars

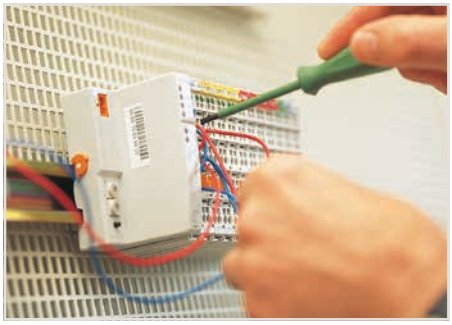
Small Groups

No question goes unanswered and no one is overlooked in WAGO training courses made up of small groups.



Teamwork

Learning is effective in a group. Ideas can be discussed and exchanged while experiences can be shared – all for the benefit of the participants.



Practical Topics

Experience has shown that – practice makes perfect. The focus of every WAGO training seminar is on practical, hands-on learning.

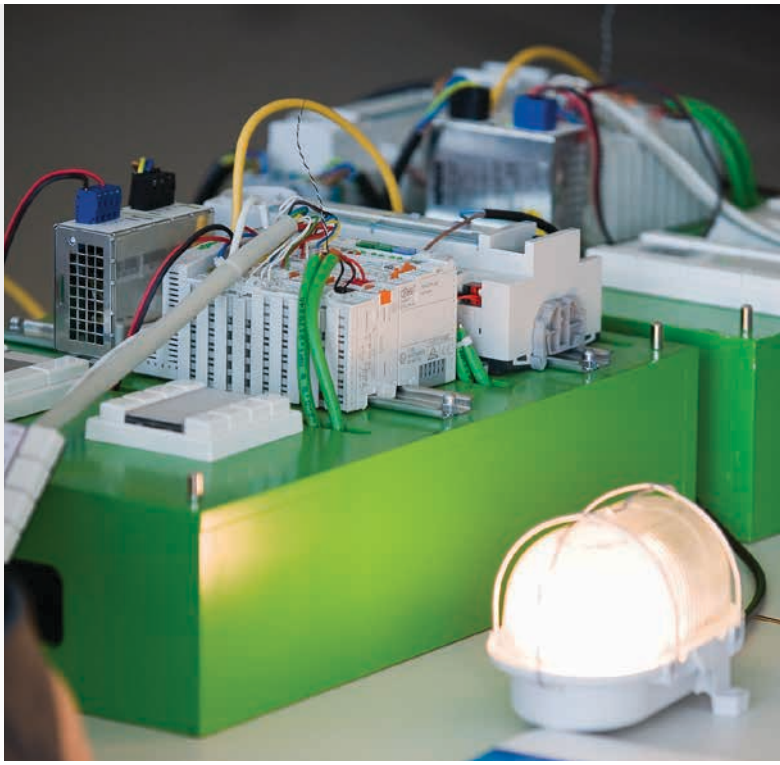
WAGO Seminars

Experience the benefits of first-hand knowledge and expertise – straight from the source!

Your instructor is a specialist and knows all the ins and outs of the topic. No time is therefore wasted. Each WAGO training seminar ensures that every minute spent is an effective investment of your expertise.

Request your registration form by e-mail:
training@wago.com

Contact Your Local WAGO Company.



Product-Related Seminars

We regularly offer product-related training courses on the following:

- Building and industrial automation
- Programming of automation components
- Fieldbus systems

Current seminars at:

www.wago.com

Customer-Specific Training Seminars

In addition to these "open" seminars, we also offer customer-specific courses as company seminars to address your company's particular needs.

Upon request, we can also conduct these courses at your location.

Special company seminars
