

GOLDMUND
SWISS MADE

Logos System Description:

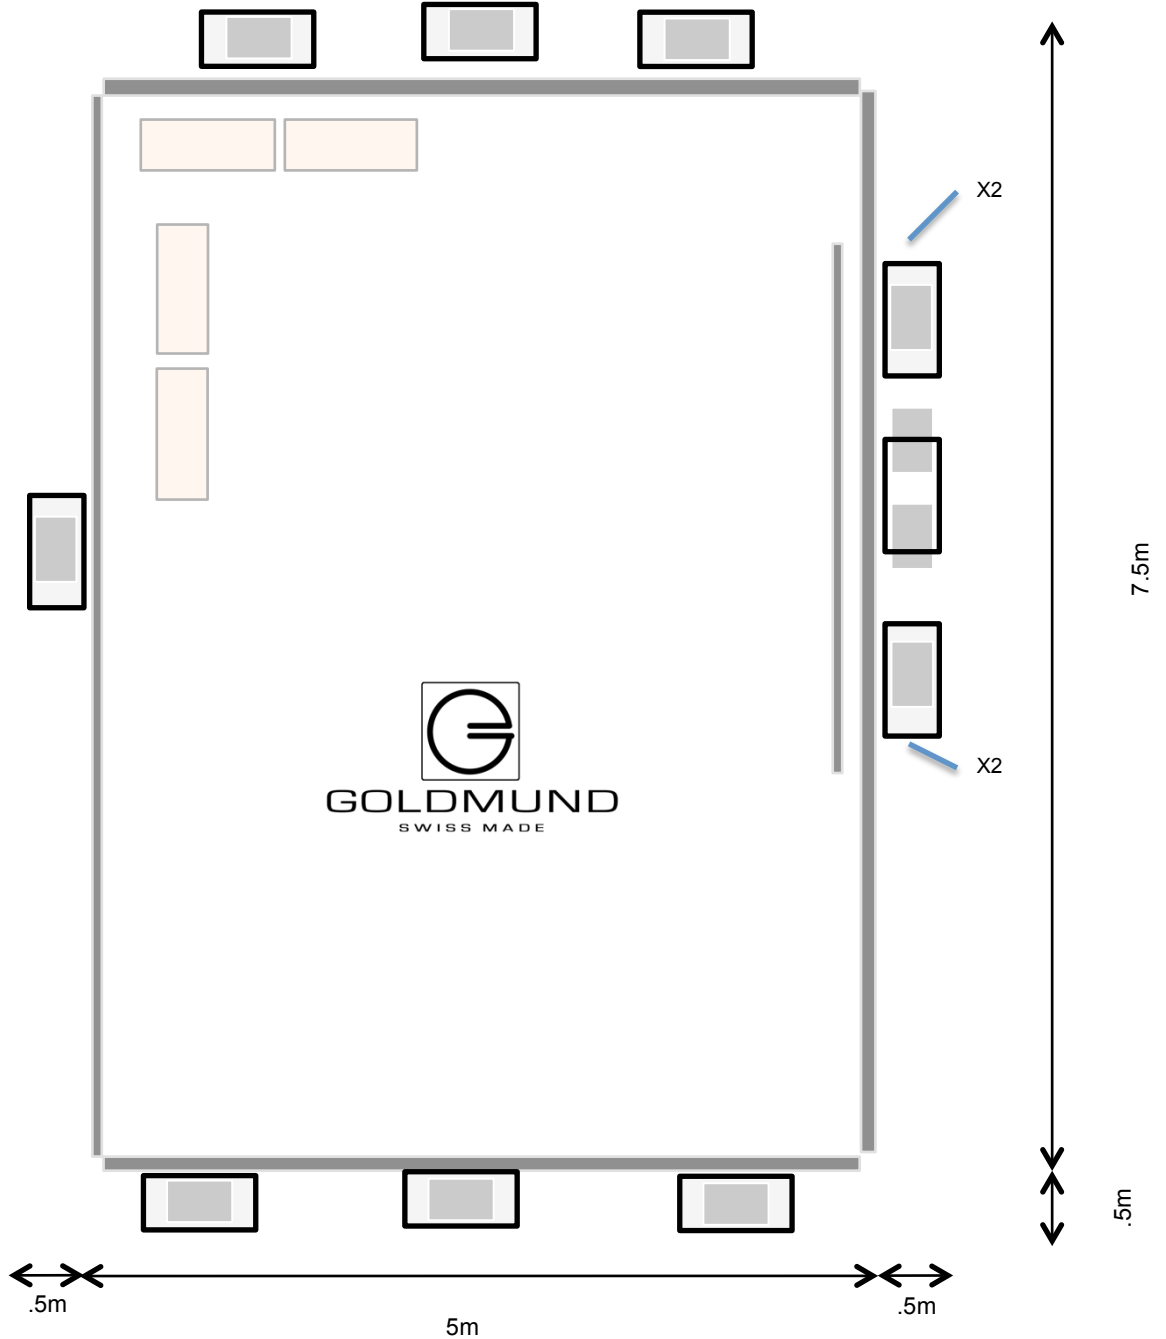

The fully customizable Logos system is very distinctive and will impress the people who want power, quality and flexibility. Designed for medium to semi large room, the Logos system can be made both as an in-wall design or as an external system. The Logos give the full liberty of customization thus enabling the most demanding customers to create their home theatre room to any specification with any décor and still can have the perfect sound.

The logos system comprises of Logos speakers, Logos Sub, Wall units, Processors, and Players. Depending on the customer the room can be made multi-channel up to 32 channels giving the best possible surround effect. The Logos system incorporates Proteus and Leonardo in almost all of its components thereby recreating the natural sound within the enclosed area. The Logos 3 Sub reproduces the natural effects thereby adding an extra dimension to the whole experience.

With innumerable possibilities the Logos system will astonish mind, body and soul.

Brief Product description:

Logos Wall: The Logos Wall is an in-wall active speaker. It includes the Goldmund Leonardo and Proteus technology and uses a full digital filtering; the crossover is made by software inside the acoustic processor (Here a Mimesis 32) with the standard or personalized configuration file provided in the Goldmund Universal Configurator.

Logos Sub Wall: The Logos sub-wall is an active in-wall subwoofer. Its signal is treated with Proteus Technology with all its correction. Its particularity is to produce very neat and realistic bass when usual subwoofer sound particularly artificially redundant and boomy.

Logos 3 Active Kit: The specially designed Logos 3 infra-woofer creates bass and vibrations to such a distinctive level that the whole experience becomes more immersive and even physical. The active subwoofer includes built-in Goldmund amplifier which makes Logos 3 infra-sub stand out compared to any other commercial subwoofer. The sound produced under 20 kHz cannot be heard by human ear but actually offers a purely physical experience by perfectly reproducing the Low Frequency Effect recorded in some movies.

Mimesis 32.5: The Mimesis 32.5 is the most powerful Goldmund Acoustic Processor. With 32 discrete channels, it allows handling the most advanced configurations such as the ones used in the Goldmund Media Room. Its 3 x A/D converters of highest quality will allow all kind of possible connections both in 2-channel and Home Theater environments. It can distribute any number of speakers in a room in

order to achieve maximum coverage in both bandwidth and space recreation. This innovation has totally surpassed today's limits, achieving levels of reality never thought possible before.
