

Manufacturer of Fiber Optic Components  
& Integrated Solutions

For Immediate Release

## **Gould Fiber Optics: Expanding its Product Portfolio of Micro Optic Components to Now Offer Modal Insensitive Multimode Fiber Splitters**

**Millersville, MD, USA– February 2014**

Gould Fiber Optics, a leading worldwide manufacturer and supplier of premium passive fiber optic components, planar components and integrated modules, is expanding its product portfolio of Micro Optic components. Gould introduces its new line of Micro Optic based Modal Insensitive Multimode fiber splitter components. These splitters feature stable coupling/split ratios with different types of light sources such as lasers, SLDs and LEDs. Unlike the fused (FBT) multi-mode couplers, the micro optic based multi-mode splitters can hold the designed split ratio unchanged for any type of light sources used for build, operation and test. The splitters are available in different coupling ratios (50/50, 10/90, 5/95) made with multimode fibers 50/125, 62.5/125. Other fibers and coupling ratios are available upon request.

### **About Gould Technology, LLC**

Gould Technology, based in Millersville, Maryland, with administrative offices in Albany, Georgia, is the first name in fiber optic couplers and passive fiber optic components. Product examples: high power and multi-wavelength pump and power combiners, polarization maintaining products and planar. Additionally, Gould is a leading provider of customized, fully tested advanced integrated optical solutions to the military, aerospace, sensors and telecommunications industries. The company was a pioneer in fiber optics technology, commercializing products as early as 1983. The company holds numerous patents on fiber optic components and manufacturing processes, and has partnered with major companies in the development of optical solutions and products which could be found on the ocean floor, in space, and around the house. Gould is ISO 9001-2008 certified, Telcordia GR-1209 and GR-1221, and RoHS compliant. For more information, call toll-free: 1-800-544-6853 or visit [www.gouldfo.com](http://www.gouldfo.com).
