1. We about us

Office and workshop in Alling near Munich

Production plant Hamm in Nordrheinwestfalen

For over 25 years GPS Prüftechnik has been standing for technical achievements, innovation, quality and reliability.

Our very high goal is to guarantee customer satisfaction by an absolute quality of our products and services.

We are able to reach this goal with the close contact to our customers, a team of technical specialised employees and a rapid and exact response to customers requirements.

The development of our company supports us in the way of thinking.

Network of distribution

GPS Prüftechnik works together with powerful partners which fulfil the high requirements of GPS Prüftechnik considering the closeness to the customer and the quality of service.

Beside our foreign offices in Switzerland and Hungary, we have partners in France, Finland, Great Britain, Holland, Italy, and Spain which work with us very close.

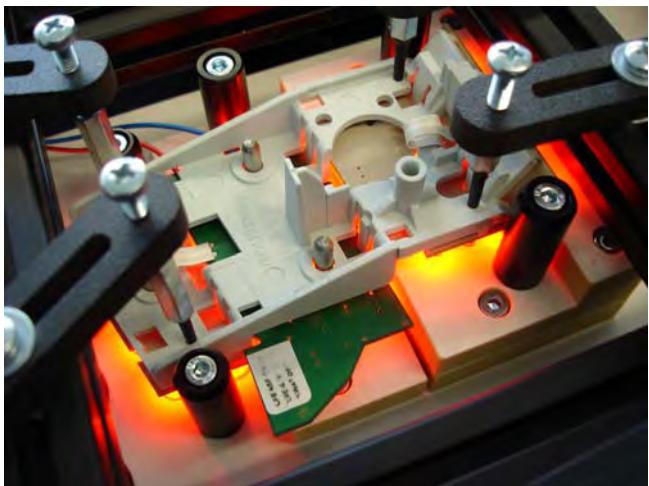

Production plant Seligenstadt near Frankfurt a.M.

Production plant Zalaegerszeg Hungary

Digital LED Colour Analyzer

The GPS Digital Colour Analyzer tests the full spectrum of visible light from very dim to the brightest LED.

An unrivalled repeatability by testing colour and intensity of LEDs is guaranteed.

The GPS Digital Colour Analyzer provides a very economical solution for your LED testing.

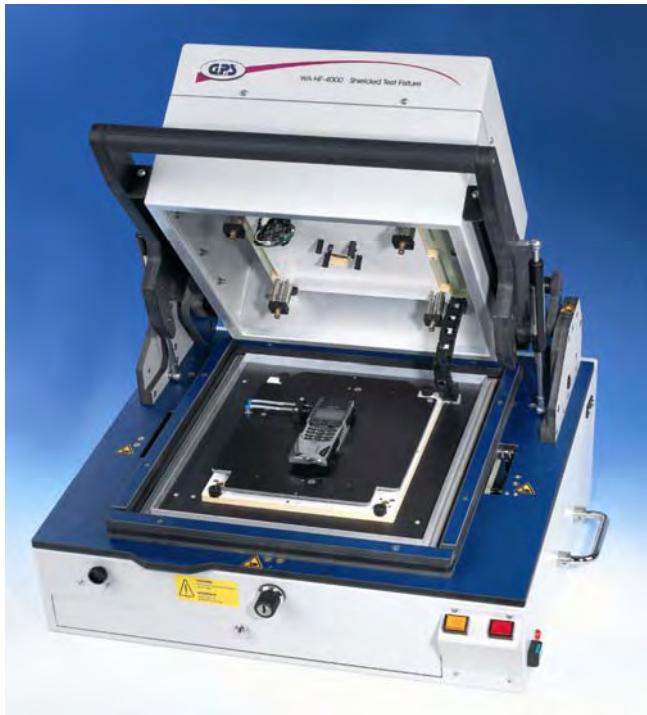

The GPS Digital Colour Analyzer offers fast and automatic testing for both the colour and brightness (intensity) of Light Emitting Devices (LEDs).

The applied Digital Colour Sensor allows a colour depth of 12 bit resolution for the colours red, green and blue.

With the Digital Colour Sensor therefore an unmatched accuracy of measurement of colour and intensity can be reached.

Shielded Test Fixture

The GPS WA-HF-4000 is a shielded test fixture for testing objects with radio interface as mobile phones, PDAs (personal digital assistance), radio keys, cordless phones and other small devices.

The testing objects can work on the basis of very different radio standards like GSM, WCDMA (UMTS), *Bluetooth™**, WLAN or Home RF.

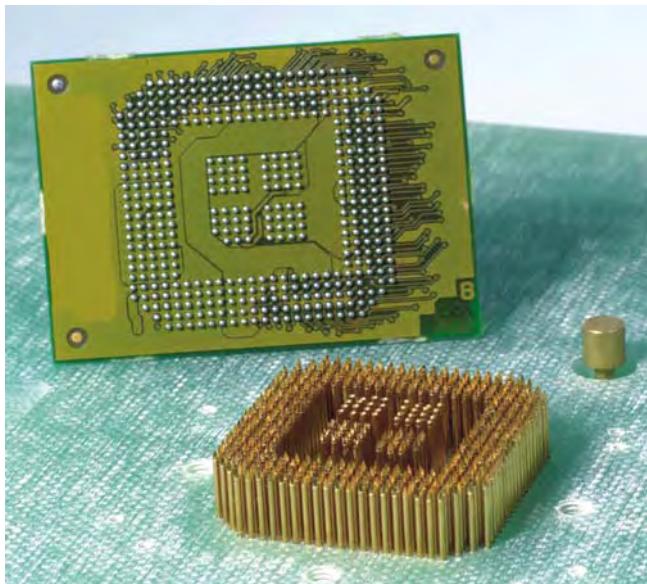

This test fixture is applicable particularly to the production and also to service, repairs and quality assurance.

In the HF shielded area there are no interfering parts as boards or something else, so that good capture conditions can be reached.

To avoid interfering reflexions in the test fixture additional HF and audio absorber can be installed.

X-Probe® Fixture

Das X Probe®-Designkonzept zeichnet sich, verglichen mit einem konventionellen Federkontaktstift- und Hülsen-System, durch einen robusteren Federkontaktstift für ein kleineres Raster aus. Wird die Hülse von einem 100mil (2,54mm) Federkontaktstift entfernt, kann der Federkontaktstift in einem 75mil (1,90mm) Raster eingesetzt werden (X75 Serie). Ein 75mil (1,90mm) Federkontaktstift kann in ein 50mil (1,27mm) Raster (X50 Serie) und ein 50mil (1,27mm) Federkontaktstift in ein 39mil (0,99mm) Raster (X39 Serie) eingesetzt werden.

Die X Probe®-Serie besteht aus zwei Teilen, nämlich aus einem Federkontaktstift und einem Termination-Pin. Der Federkontaktstift ist nach dem von QA patentierte „rolled probe tube design“ konstruiert und am Ende mit einer modifizierten Steckhülse versehen. Diese Steckhülse verlängert das Gehäuse des Federkontaktstiftes, alle anderen Eigenschaften sind jedoch gleich.

Fine Pitch Fixture

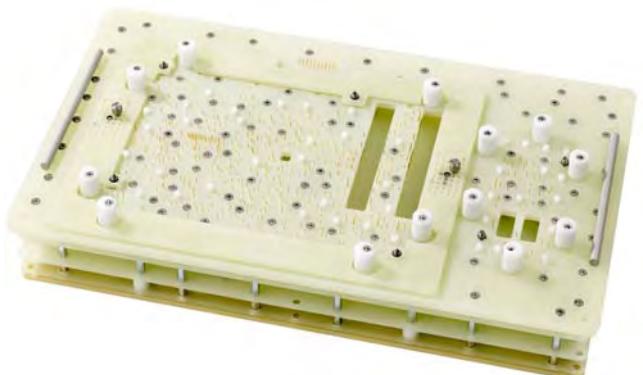

For the Fine Pitch Fixture rigid probes of the Bare Board Test (bare boards) are used.

The fixture system consists of the base fixture and the test head.

The test head leads the rigid probes to the test pad of the UUT so that test pad sizes up to 0,4mm diameter can be contacted safely.

The center to center is 0,5mm.

Fine Pitch Fixtures are offered as well as mechanical, pneumatic and vacuum fixtures.

With qualified employees and newest production technologies we are able to offer our customers the best technical solution.

CNC-controlled drilling- and milling machine

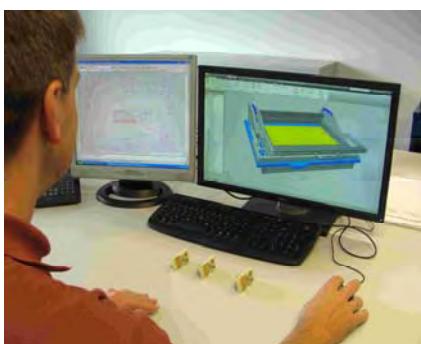

The ATE industry is very quality conscious. It is therefore our goal to offer to our customer high quality solution, technically as well as in service.

The keys to constantly providing high quality and technical solution are well trained, skilled and highly motivated employees and the use of up to date production equipment. Most of our employees have been working in the ATE business for years and pass on their steadily growing experience to the newer colleagues through our internal training program.

Our production equipment is mostly computer aided to ensure a smoothly production data flow and highest quality.

Semiautomatic wiring system

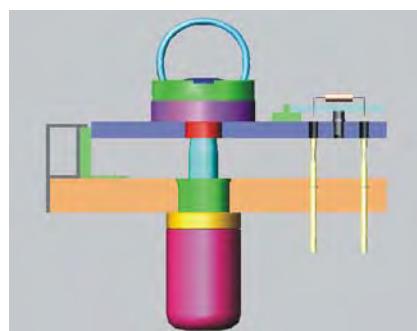

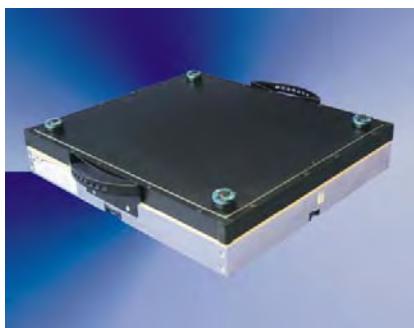

Modernste Software Tools wie Autodesk, Inventor und NC Polaris

Customized fixtures

Vacuum Fixture

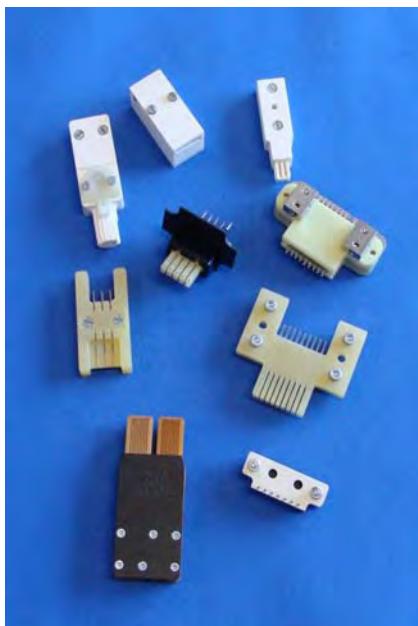

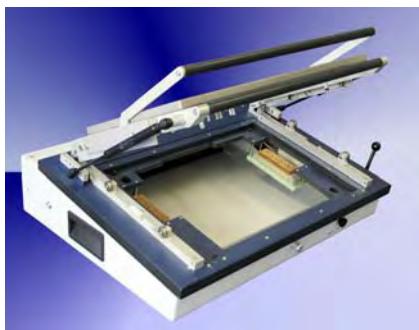

Vacuum fixtures for all important
Test Systems

The patented fastening system
“Plug And Guide”

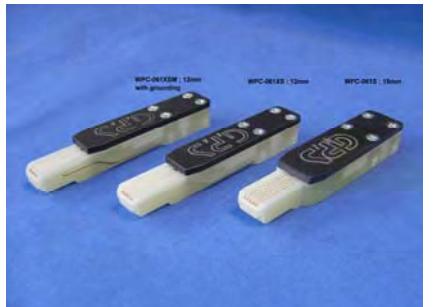

For all vacuum fixtures there is a variety of options available. The most popular are listed here:

- Dual well option to reduce handling time or to optimize the required space.
- Double sided probing with our top side probing unit which combines parallel lowering in approaching the unit under test with easy access in the opened position.
- Integration of opens test sensors into the fixture from the top as well as from the bottom side.
- Dual stage option to switch off easily all probes that are not required for critical measurements without removing the unit under test from the fixture.
- Mechanical or pneumatic edge connector probing to test at the connector's pins.
- Mechanical or pneumatic operation of switches, buttons etc. to test these devices as well.

Changeable Fixture

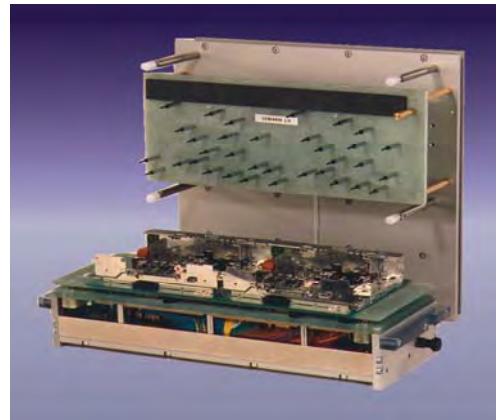

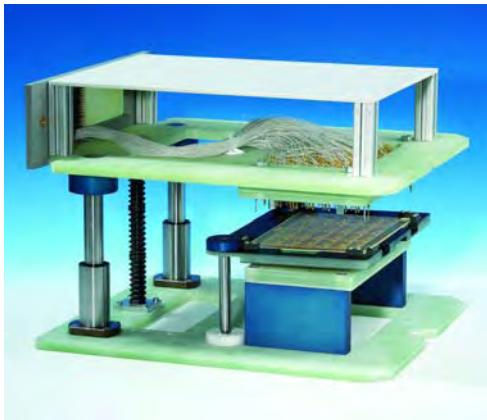

Zur verschleißfreien Kontaktierung von unterschiedlichen Buchsen, bieten wir eine Vielzahl von Anfahrmechaniken und Prüfstecker wie Western- oder USB-Stecker.

We offer various cassette fixturing solution for customers which produce a number of different boards in small batches. The boards specific part of these cassette fixtures can be exchanged in the base unit which help reducing fixturing costs.

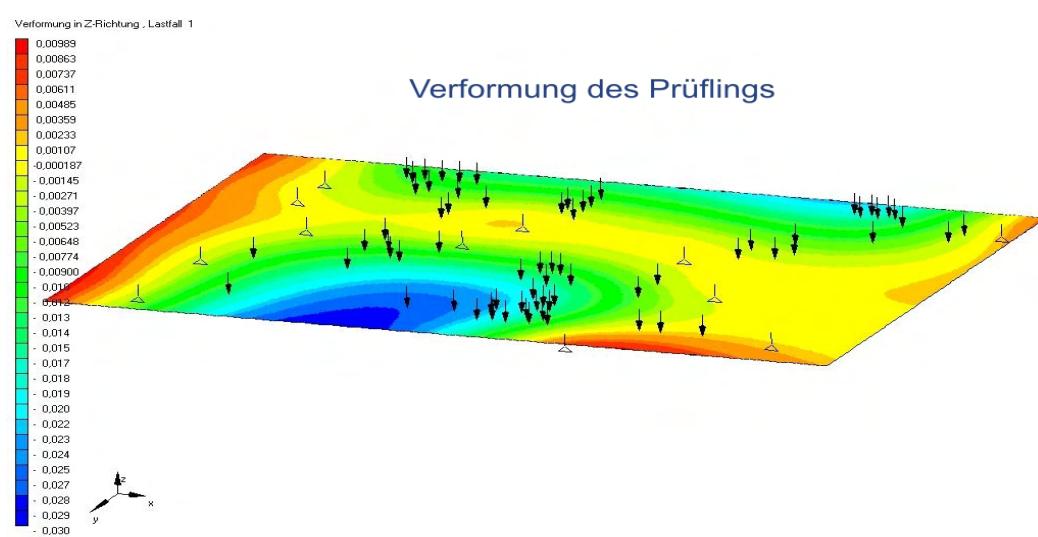

In-Line Systems and Special Fixture

Beside our standard product range we have already developed various customised solutions with integrated controllers and stand-alone test systems.

We see ourselves as specialists for probing printed circuit boards. So if you have a test requirement of any kind please do not hesitate to contact us and we will try to develop a solution together with you.

Stress Analysis of Loaded Boards in Test Fixtures

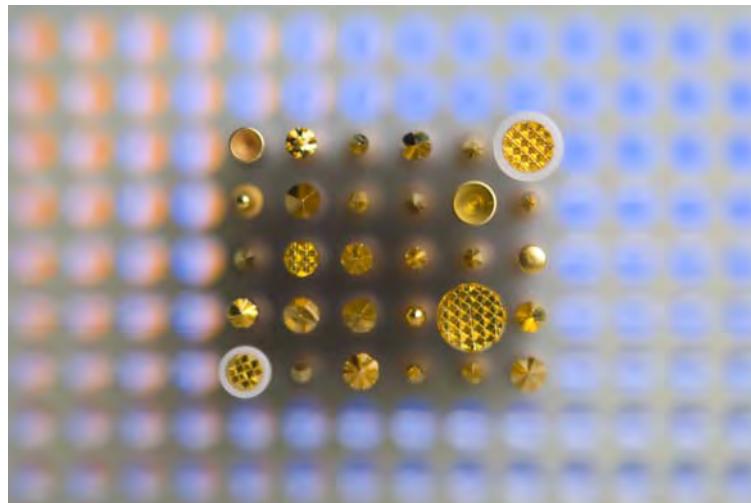

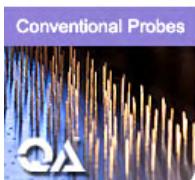

The stress analysis is for an optimal design of test fixtures regarding their distance pins and push down fingers according to the spring force of the test probes.

The calculation shows the expected distribution of deformation and bending stress as well as the surface pressure of each push down finger.

We would like to advise you on the development of new test fixtures or also would like to calculate your fixtures which are already in use.

QA probes

The probes are very important for the pointing accuracy of the whole fixture. The QA probe design features a patented self alignment of the probes in the uncompressed position.

The spring is longer compared to the conventional probe design although the outside dimensions are compatible. The longer spring ensures a minimum mechanical lifetime of 1 Million cycles.

The risk of probe failure due to spring fatigue is therefore negligible. The probe plunger is based to ensure a constant probe resistance.

This helps stabilizing the electrical measurements. With an automatized production QA is able to offer a wide variety of tip styles and spring force at a short delivery.

We sell QA probes exclusively in the areas of Germany, Austria, Switzerland, Hungary, Czech Republic and Slovakia.

TABLE OF CONTENTS

4.1 X Probe®-Socketless Technology

4.2 Advantages and Features of X Probe®-Socketless Technology

4.3 Platforms

4.4 Pointing Accuracy of X Probe®-Socketless Technology

4.5 Suggested Mounting Hole Specifications

4.6 Calculating X PROBE Termination Pin Set Heights

4.7 Calculation between Standard Fixture and X Probe®-Fixture

4.1 X Probe®-Socketless Technology

The X PROBE design concept is taking a larger more robust probe and mounting it on closer centers compared to a conventional probe and socket system. By eliminating the socket from the system, a .100" center probe can be mounted on .075" centers (X75 Series), a .075" center probe can be mounted on .050" centers (X50 Series) and a .050" center probe can be mounted on .039" centers (X39 Series).

The X PROBE Socketless Series is comprised of two parts; a probe and a termination pin. The probe is designed around the patented rolled probe tube design with a modified interconnect receptacle on the bottom. This interconnect receptacle increases the X PROBE tube length slightly. All other aspects of the probe are the same.

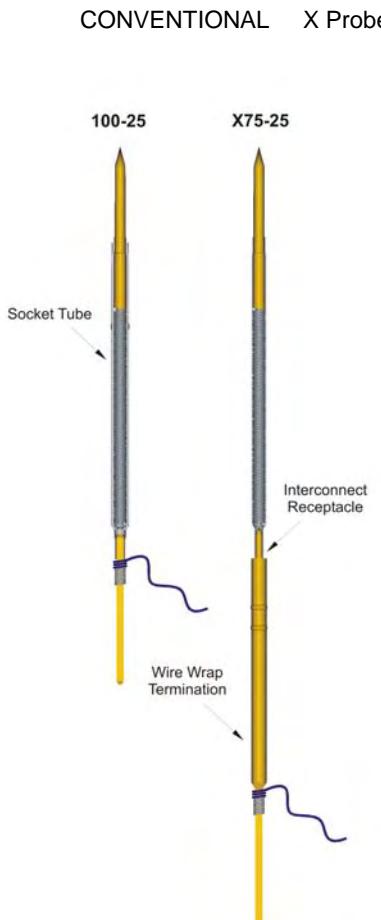

Figure1

The interconnect receptacle receives the precision interconnect pin located at the top of the termination pin. The termination pin is unique in that it performs all of the functions of a typical socket while staying within the diameter of the probe tube.

4.2 Advantages and Features of X Probe®-Socketless Technology

- Mount "larger" probes on closer centers for longer probe life.
- Eliminating the single press ring socket increases pointing accuracy.
- Extensive probe to termination pin insertions versus competitive products.
- Replace socketless probes as easily as conventional probes for preventive maintenance.
- Wide variety of tip styles and spring force selections to accommodate various test targets.
- Available in .050 [1.27] center probe with .400 [10.16] stroke for dual level testing.
- Double-ended termination available for wireless test fixtures.
- Multiple set heights allow for various test probe height requirements.
- Easily incorporated into fixture designs for all test platforms: Agilent, GenRad, Teradyne and others.
- X PROBE Socketless Technology is compatible with all existing manufacturing and assembly techniques.

4.3 Platforms

The X PROBE is compatible with Agilent, Teradyne, and others. Existing fixture kits are able to accommodate X PROBES even when additional plates are required. In general, the height of the fixture is increased to maintain the depth of the wiring area to accommodate the personality pins and alignment plate. A taller dress frame is required to accommodate any additional height.

With design considerations, standard test probes can be mixed mounted with the X PROBE Series. A standard socket would mount in the Probe Plate and clearance holes would have to be drilled in the Spacer* and Back Plates. In a vacuum fixture, a gasket or seal method would have to be designed to maintain the integrity of the vacuum. The best approach is to cut out areas in the plates where the sockets are to be mounted and design inserts with gaskets to accommodate them.

Please ask for other interfaces.

X Probe® Socketless Technology Wired with Multiple Set Heights

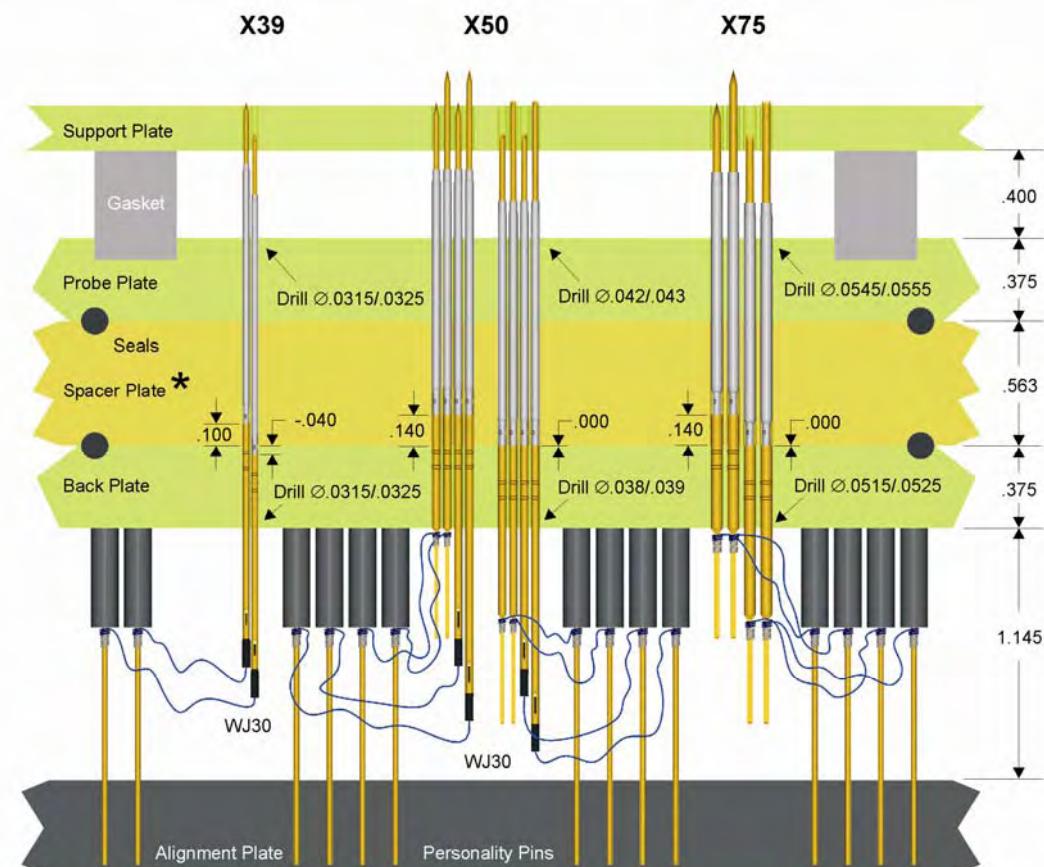

Figure 5

All plate thickness dimensions are suggested.

4.4 Pointing Accuracy of X Probe®-Socketless Technology

Pointing accuracy is defined as the maximum radial deviation of a probe tip from the true centerline of a probe's mounting hole. The total probe-to-target accuracy is dependent upon the "Fixture Offset", the "Scatter Pattern Offset", and the "Scatter Pattern Diameter". Thus, with the use of X PROBE technology, the user can expect at least 40% better pointing accuracy compared to a conventional probe and socket system.

Performance summary

| Product Series | Resistance | Mechanical Life | |
|----------------|------------|----------------------|---------|
| | | # of Cycles | Storke |
| X39-PRP25 | 44 | 1.000.000 | 4,25 mm |
| X50-PRP25 | 25 | 1.000.000 | 4,25 mm |

| X75-PRP40 | 14 | 1.000.000 (L Spring) | 8,05 mm |

Figure 6

4.5 Suggested Mounting Hole Specifications

The X PROBE termination pins are installed in the Back Plate of the fixture and are used to adjust the set height of the probe while providing the electrical connection from the probe to the fixture wiring.

The X PROBE Socketless Series is available in two Termination types: wired and wireless. The following chart gives recommended hole sizes and pin gauges for G-10/FR4 or similar materials:

| Series | Plate | Probe Mounting Hole | Termination Mounting Hole |
|--------|-------------------|------------------------|------------------------------|
| X39 | Probe Plate (KTP) | 0,8-0,826 mm | ./. |
| | Spacer Plate | min 0,86 mm | ./. |
| | Back Plate | ./. | 0,8-0,826 mm |
| | Pin Gauge PN | PG-X39 | PG-X39 |
| X50 | Probe Plate (KTP) | 1,07-1,09 mm | ./. |
| | Spacer Plate | min 1,14 mm | ./. |
| | Back Plate | ./. | 0,97-0,99 mm |
| | Pin Gauge PN | PG-X50 | PG-X50 |
| X75 | Probe Plate (KTP) | 1,38-1,41 mm | ./. |
| | Spacer Plate | min 1,57 mm | ./. |
| | Back Plate | ./. | 1,31-1,33 mm |
| | Pin Gauge PN | PG-X75A-P | PG-X75A-T |

Figure 7

Pin Gauge PN

4.6 Calculating X Probe Termination Pin Set Heights

Termination pin set height is a critical factor in the performance and life of the X Probe. When set too low, the X Probe is under-stroked, reducing the contact force and the probe's ability to penetrate surface contaminants. When set too high, the X Probe is over-stroked, resulting in decreased spring life or possible Tipp damage due to bottoming. To calculate the proper set height, follow these steps:

1. Make a cross-sectional sketch of the fixture in the actuated (2/3 stroke) position. The sketch at right is typical of many vacuum fixtures.
2. Dimension the thickness of the items that stack up on the top surface of the probe mounting plate. Add these dimensions to get a final distance (H) from the top of the plate to the contact surface of the UUT. Subtract the average lead length from this dimension if contacting component leads.
3. (A) is the distance from the UUT to the top of the Back Plate.
4. (C) is the X Probe tube length (see table).
5. (P) is the distance from the X Probe tip to the top of the X Probe tube (see table). Remember this dimension is with the X Probe compressed to its recommended working travel.

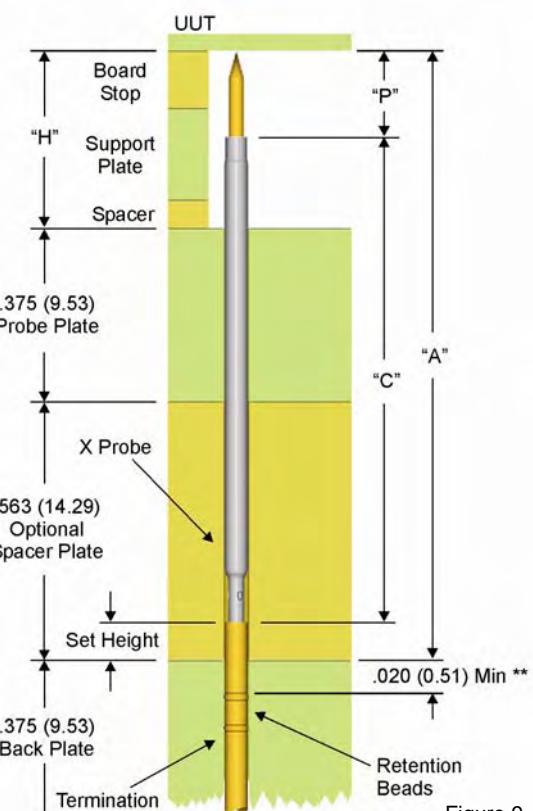

Figure 9

$(A) = (H) + 9,53 \text{ mm KTP (Probe Plate)} + 14,29 \text{ mm (optional Spacer Plate)}$. Use actual plate thickness or standoff lengths as per your design.

$$\text{Proper set height} = (A) - (C) - (P)$$

| Key Probe Dimensions for Calculating Set Heights | | | |
|--|---------------------|-------------------------|-----------------------------|
| Series | Probe Tube Length C | Recommended Extension P | Available Set Height Ranges |
| X39-25 | 29,92 mm | 2,67 mm | 1,02-2,54 mm |
| X50-25 | 28,19 mm | 3,38 mm | 0-3,56 mm |
| X50-40 | 28,19 mm | 3,38 mm | 0-3,56 mm |
| X75-25 | 27,94 mm | 3,63 mm | 0-3,56 mm |
| X75-40 | 27,94 mm | 3,63 mm | 0-3,56 mm |

Figure 10

4.7 Calculation between Standard Fixture and X Probe®-Fixture

| Test Points | Standard Fixture | | | | X-Probe Fixture | | | |
|-------------|------------------|------------|-------------|-------------|-----------------|------------|-------------|-------------|
| | 100 mil. | 75 mil. | 50 mil. | 39 mil. | 100 mil. | 75 mil. | 50 mil. | 39 mil. |

TABLE OF CONTENTS

5.1 General Information

5.2 Advantages and Features of Digital Colour Analyzer

5.3 Measuring Colour using Hue

5.4 Fixture building guidelines

5.5 Digital LED Colour Analyzer

5.6 Specification of the Digital LED Colour Analyzer

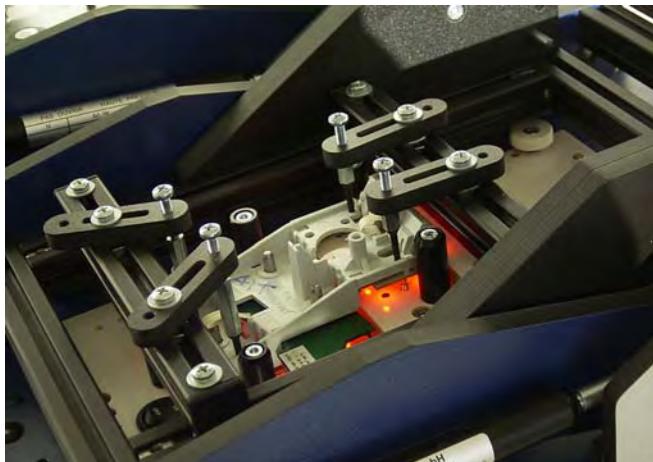

5.1 General Information

With over 20 years experience in the In Circuit Test (ICT) industry and extensive knowledge of the Automatic Test Equipment (ATE) environment, the GPS LED Analyzer provides a fast and reliable solution for testing of LED colour and intensity in a Production environment.

Communications with the GPS LED Analyser is via RS 232 or USB interface.

The use of plastic fiber optic cable of 1mm diameter allows light from LEDs on very close centers be tested for both colour and intensity consistency. The plastic fiber optic cable, which has a bend ratio of 15mm, eliminates the need to use light pipes, light guides or light probes. The fibre optic is easily fixtured in a 75 thou receptacle mounted over the centre of the LED.

One example of use to check brake lights LEDs

Figure1

Mounting the LED Colour Analyzer in an In-Circuit-Test Fixture.

Figure2

5.2 Advantages and Features of GPS Colour Analyzer

The LED Analyzer is used in the following applications:

- PCB LED Testing
- Automotive Dashboard LEDs
- Switches with LED Backlighting
- Indicating LEDs
- Automotive LEDs and Brake Lights
- Mobile Appliances and Cellphones
- Traffic Signals
- Industrial and Medical
- Backlighting and Projection
- LCDs and TFT Displays

Features:

- Test up to 495 LEDs simultaneously
- Test Standard, High and Low Brightness LEDs
- Test 7 segment displays
- Functional and Incircuit Test
- Uses flexible plastic optic fibers for ease of installation
- Low intensity testing

Benefits:

- Fast and accurate LED Colour and Intensity Measurement
- Simple setup and easy to use
- Low cost
- No operator intervention required

Additional Information:

- Easy to program
- Free software included
- Full Technical support provided
- Excellent Repeatability

5.3 Measuring Colour using Hue

At GPS we use Hue to describe colour. This is a useful quantity, because colour can be represented by a single number in the Hue system instead of three values in RGB system.

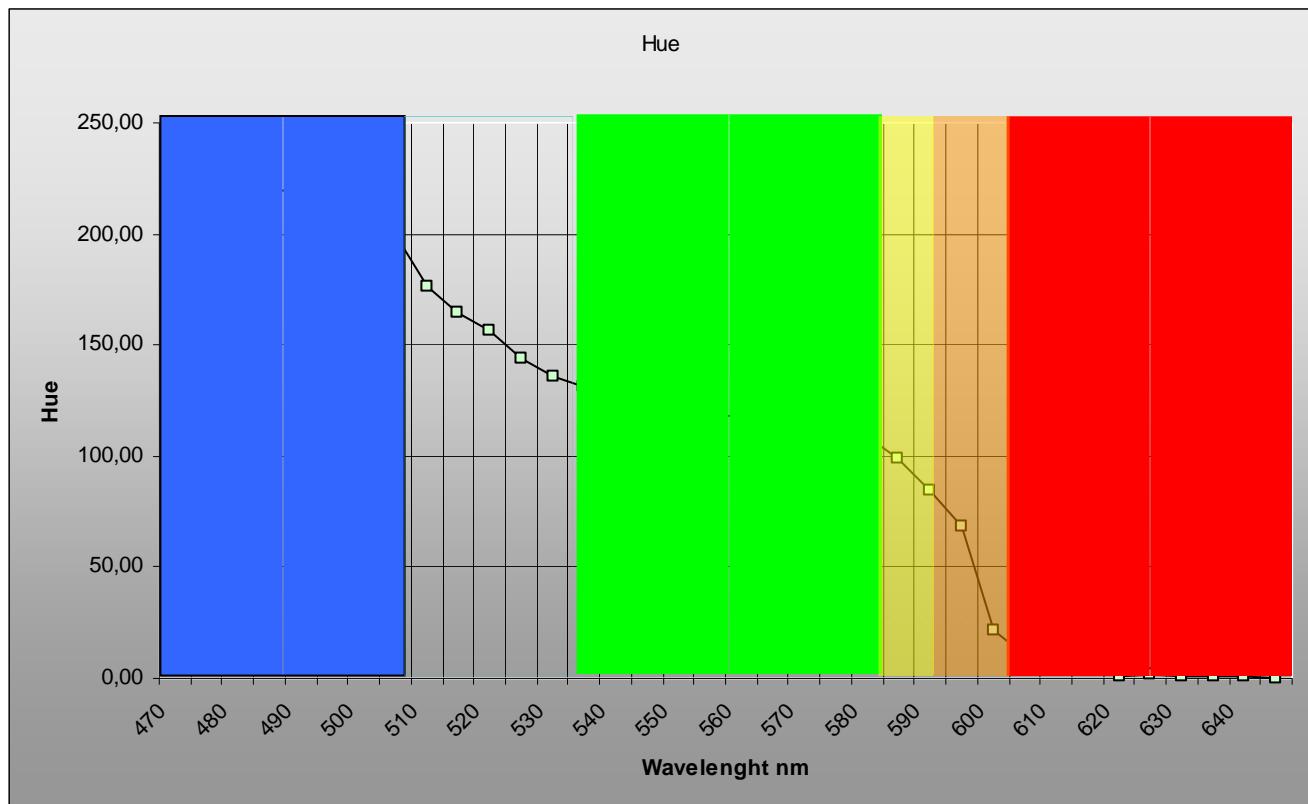

Figure 3

The colour spectrum can be described by a colour wheel. This is a system where the three primary colours (Red, Green and Blue) are represented by 0 degrees, 120 degrees and 240 degrees respectively.

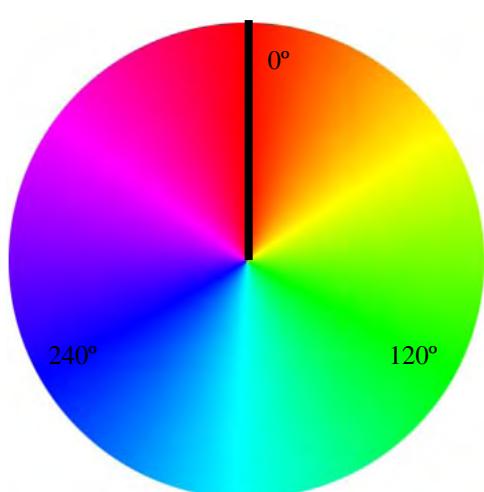

Figure 4

All colours can be created by adding together different quantities of the three colours. For example yellow, is a mixture of green and red. Cyan is a mixture of blue and green. White is regarded as equal amounts of each colour (not shown in this diagram).

As we can see in the diagram it is not clear exactly where one colour ends and another begins. In this situation it is up the observer to determine the colour. In the case of the green region, green can lie anywhere within 100° to 140°. In the case of the blue region blue can lie anywhere within 220° to 260°. Red is slightly different because of the Hue system.

Red can lie between 0° and 10° or 355° and 360°. In the circular system 0 and 360 are the same

5.4 Fixture building guidelines

Introduction

Construction of the fixture is one of the most critical aspects of a successful implementation of the GPS Led Analyser. If this step is implemented properly the resulting tests will be more stable and repeatable with low risk of false failures.

Plastic Fiber

Understanding the fiber used in the GPS Led Analyser is critical. The fiber used is 1mm outside diameter with a 0.5mm core.

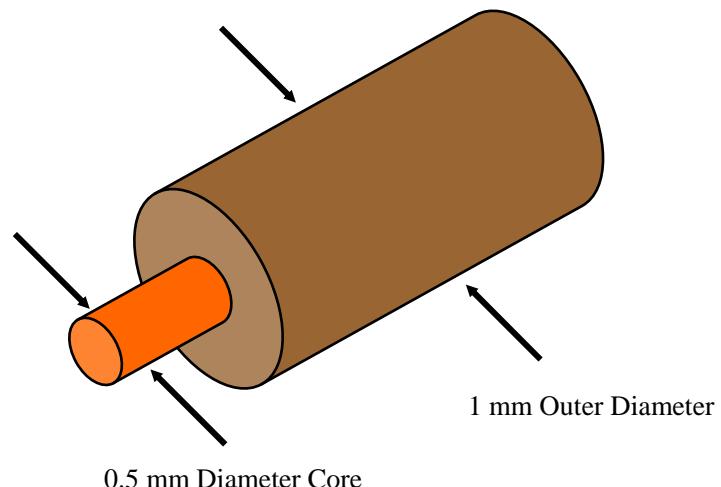

Figure 5

Some important characteristics of the fiber are as follows

- Minimum bend radius 15mm
- Operating temperature range of fiber -55 to +70 degrees celcius
- Numerical aperture 0.5
- Included light collection angle of 60 degrees

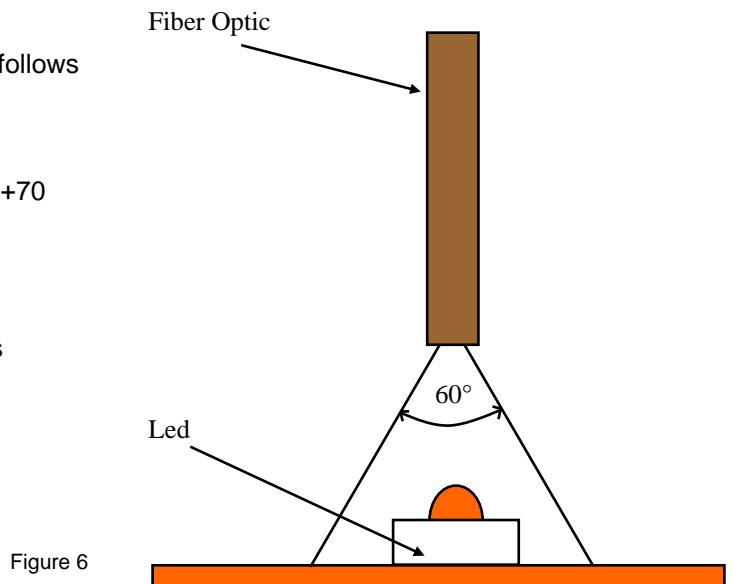

Figure 6

Optical Measurement using Fiber optic Cable

There are some important considerations when using a fiber optic cable to test the light intensity of an LED. The most important of these is the relative position of the fiber with respect to the LED and the gap between the fiber and the LED. To a lesser degree the angle between the fiber and the LED can also have an influence on the test results.

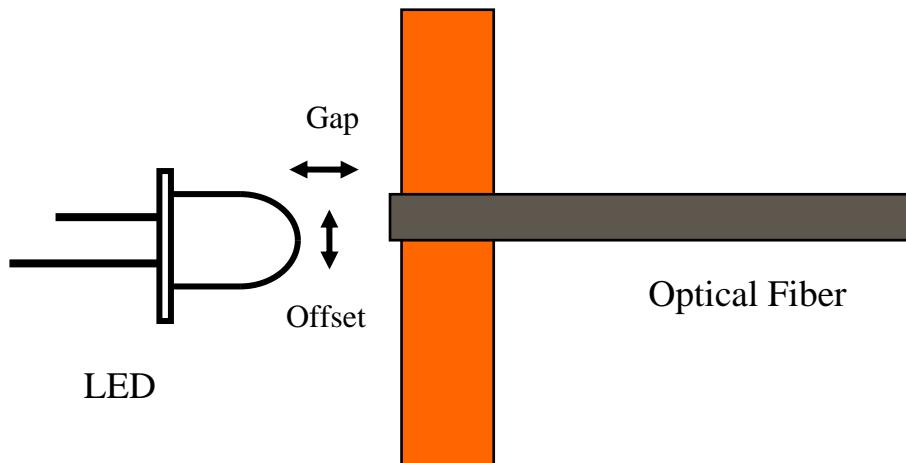

Figure 7

The following is a plot of Intensity Vs Gap. This is called an inverse square relationship so if the gap is doubled the intensity reduces to $\frac{1}{4}$ of the original intensity. From this it can be seen that if the gap is very narrow then a small increase or decrease in gap will cause a very big change in measured intensity. We would recommend that the minimum gap is at least 2mm and preferably 4 to 5mm.

Effect of Gap on the Intensity Measured by Fiber

Relative Intensity vs Distance

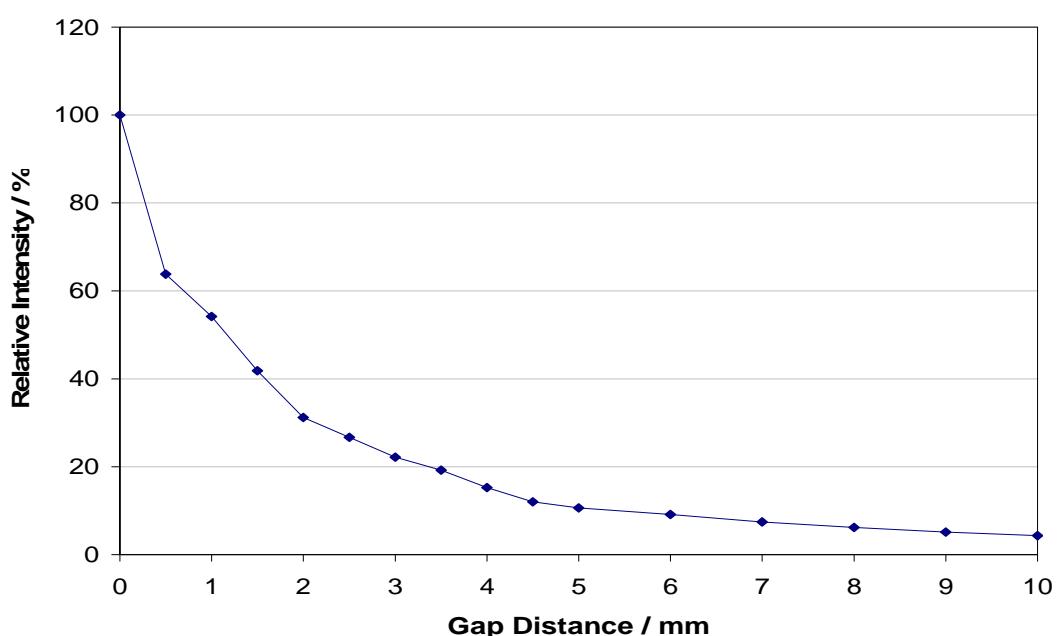

Figure 8

The following is a graph of Intensity Vs offset. This graph was generated using a surface mounted Led which has a bright centre point and a bright circle of light around the centre point. As can be seen from the graph when the gap is 1mm and the offset is changed from -2mm to +2mm the intensity shows a very rapid change. The three peaks are a profile of the led intensity as the fiber passes the bright circle and the centre bright spot. As the gap increases the rate of change becomes much less but the maximum intensity is also decreased considerably. This decrease in intensity can be compensated for by using the SK command through the serial port.

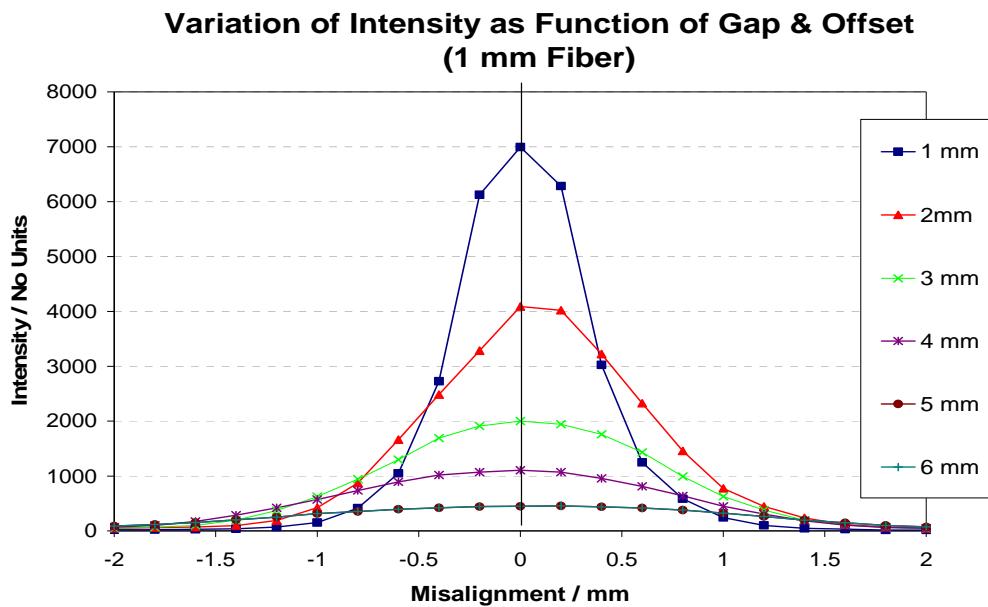

Figure 9

Mounting the Fiber

The recommended method of mounting the fiber is using the supplied 1mm ID, 75 thou receptacle (socket). This is ideal as any fixture house will be familiar with mounting these receptacles in a test fixture. Another advantage of the receptacle is the internal indentation which is very effective at holding the fiber in position during the debug process. When debug is complete the fiber can be held in position using a small dot of silicon adhesive

Figure 10

Attachment for thin fiber:

Additional to the 75mil receptacle (socket) you can also use the Attachment E39-F9.

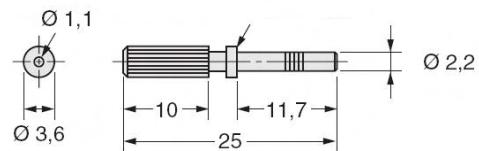

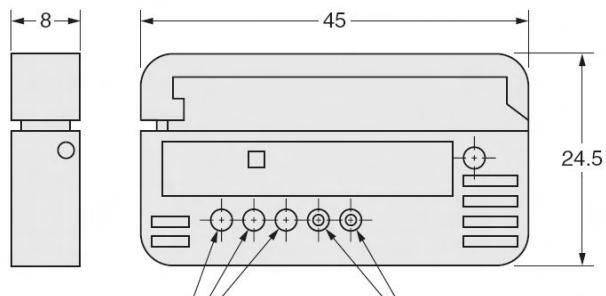

Figure 11

Cutting the Fiber

The fiber can be shortened with a fiber cutter to the correct length.

In order to guarantee a clean cut of the fiber, it is recommended to use each cutting hole only once.

Fiber Cutter
E39-F4

Standard fiber insertion hole

Thin fiber insertion hole

Figure 12

5.5 Digital LED Colour Analyzer

Figure 17

The GPS Digital Colour Analyzer allows fast and automatic testing the Colour and Brightness (Intensity) of Light Emitting Devices (LEDs). Tests the full spectrum of visible LEDs from very dim to the brightest on the market. The new digital colour sensor allows unrivalled repeatability for colour and intensity testing.

The LED Analyzer is used in the following applications:

- PCB LED Testing
- Automotive Dashboard / Brake Lights, Daytime running lights / Interior
- Switches with LED Backlighting
- Mobile Applications - Cell Phones, Backlighting
- Industrial and Medical Instruments
- Signaling
- Architectural Lighting

Key Features:

- Designed for any Test Platforms
- Tests the full spectrum of visible LEDs
- Tests Intensity from very dim to the brightest LEDs
- Unrivalled repeatability for colour and intensity readings
- Available with 2 to 5 channels
- Allow up to 495 LEDs to test simultaneously
- Ease of Use – Instant on
- Excellent Technical Support
- Free Drivers and Software
- Designed for Testing Colour and White LEDs
- Tests Bicolor and Tricolor LEDs
- RS 232 and USB Interface
- Robust and reliable design
- Uses flexible plastic Optical Fibres for ease of installation

5.6 Specification of the Digital LED Colour Analyzer

Physical:

| | |
|-----------------------------|-------------------------|
| Board Dimensions | 70x65x35mm (W x L x H) |
| Fiber Length | 600mm |
| Fiber Diameter | 1,00mm |
| Number of Fibers | 2 to 5 |
| Min. bend radius of Fiber | 15mm |
| Operating Temperature Range | 0C° to +50C° |

Electrical:

| | |
|----------------|---------------------------------|
| Supply Voltage | 5,0 V |
| Supply Current | 80 mA |
| Interface | RS232 (Serial) USB Interface |

Probes, Sockets and Accessories

General Information

Probes are one of the most important parts of a fixture. A perfect probing depends aside from the pointing accuracy of the probes decisively on the quality of the probes. Therefore GPS uses only QA probes and distributes those exclusively in the German-speaking countries and also in the european area.

The three parts of probes are:

- the plunger with the contact tip,
- the spring which ensures the needed contact pressure,
- the tube which barries the spring and in which the plunger moves.

Decisive for the lifetime of the probe is a durable gold plating to guarantee a low probe resistance to the UUT and to the socket. The same goes for the sockets, which are wired to the interface. The probe springs are made of a long-lived spring steel to prevent an early fatigue.

Another criterion of quality are the production tolerances of the probes and the sockets. The lower these tolerances are in comparison with the diameters of the probes the lower the scatter pattern diameter is (i.e. the radial deviation of a probe tip from the true centerline of the probe mounting hole). The scatter pattern diameter can be limited easier at probes with a larger diameter than with a smaller one - even through highly precise production. Therefore we recommend to use 1/10" center probes wherever possible. This recommendation should always be taken into consideration by designing the board in order to reduce the fixturing costs.

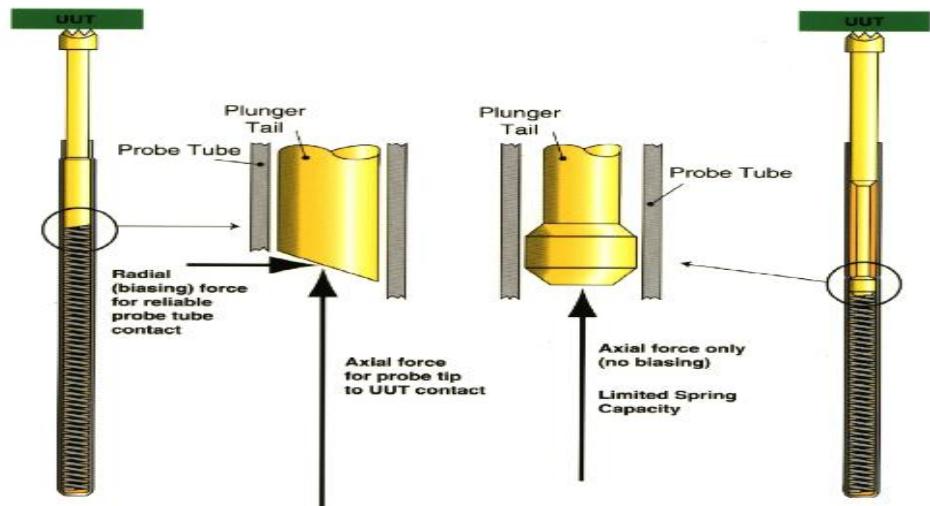

Probes, Sockets and Accessories

Design

Design of the patented probes

QA's PR Design stands out for the following essential qualities:

1. The first is a probe tube and plunger design that reduces radial plunger play at the probe tube opening. The clearance between the tube and the plunger has been reduced by forming the tube around the plunger itself.
This feature reduces play from side to side and significantly improves pointing accuracy.
2. These probes also feature a patented biasing system for the tail end of the plunger. Biasing is the name given to the intentional loading of the plunger against the inside surface of the probe tube.
An angled surface machined on the plunger tail mates with the spring and allows it to exert a small radial force on the tube.
This biasing force causes a well-defined wiping action between the plunger and the inner surface of the probe tube to provide improved electrical contact.
3. Another unique design and performance advantage of this probe design is the increased spring space in the tube. Through this design, our probes offer higher spring forces than any competitive probe of the same overall size.

Probes, Sockets and Accessories

Product Information and Material

Product informations:

In the following there is a short summary of the QA-Products and the price list which goes with it.

The indication for each serie is made by the centers and the stroke. The 100-25 serie, for example, is for a 100 mil (2,54 mm) center to center and has a stroke of 0,25" (6,35 mm). The key for the specific items is shown on the next page.

Materials:

Two popular materials are available in most of the series: gold plated (G) and special gold plated (P) pins. The difference lies in the time of the gold plating. Normal gold can be applied to the probe only after the drawing process, because it would exfoliate during the drawing process. Compared with that the special gold plating (P) can be applied before the drawing process because it is not as brittle. Therefore the electrical resistance of these probes is lower than of normal gold plated ones. The following table shows the electrical resistances of 500 and 1.000.000 probings.

| | 500 Probings | 1.000.000 Probings |
|--------------|-----------------------|-----------------------|
| SERIE | max. mOhm / min. mOhm | max. mOhm / min. mOhm |
| PRG | 21 / 15 | 39 / 15 |
| PRP | 17 / 10 | 36 / 12 |

MD-42-1100

Fixture specification

- Outside dimensions : 510 x 520 x 130 mm
- Max. working area : 430 x 390 mm
- Stable quality through the case and the aluminium frame
- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of epoxy material (10 mm)
- GPS ESD sealing of vacuum chamber
- Rounded edges (for a better intake)
- Protecting erector standard
- Case can be opened during the debugging
- Outpouring intended for the use of a counter
- ESD leakage probes standard
- Moving plate 8 mm (optional)
- Interface without insertion
- Short delivery time

MD-42-2100

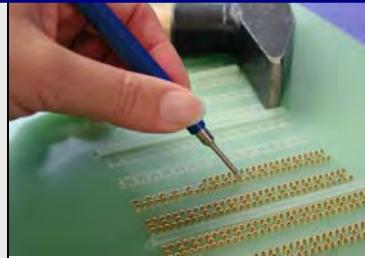

Fixture specification

- Outside dimensions : 510 x 520 x 130 mm
- Max. working area : 2 x (170 x 390) mm
- Stable quality through the case and the aluminium frame
- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of epoxy material (10 mm)
- GPS ESD sealing of vacuum chamber
- Rounded edges (for a better intake)
- Protecting erector standard
- Case can be opened during the debugging
- Outpouring intended for the use of a counter
- ESD leakage probes standard
- Moving plate 8 mm (optional)
- Interface without insertion
- Short delivery time

- Probe plate made of G10 material (10 mm)
- GPS ESD sealing of vacuum chamber
- Rounded sealing edges (for a better intake)
- Protecting erectors standard
- Case can be opened during the debugging
- Outpourings intended for the use of a counter
- ESD leakage pins standard
- Foldable grips, can be mounted on the top or at the side
- Moving plate 8 mm (optional)
- Interface without pins
- Short delivery time

TSI-50-1100

Fixture specification

- Outside dimensions : 510 x 430 x 100 mm
- Max. working area : 400 x 290 mm
- Cant for easy handling
- Stable quality through the case and the aluminium frame
- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of G10 (CP quality) 10 mm
- GPS ESD sealing of vacuum chamber
- Rounded edges (for a better intake)
- Protecting erectors standard
- Case can be opened during the debugging
- Outpourings intended for the use of a counter
- ESD leakage probes standard
- Foldable grips can be assembled at the sides or on the surface
- Moving plate 8 mm (optional)
- Interface without insertion
- Short delivery time

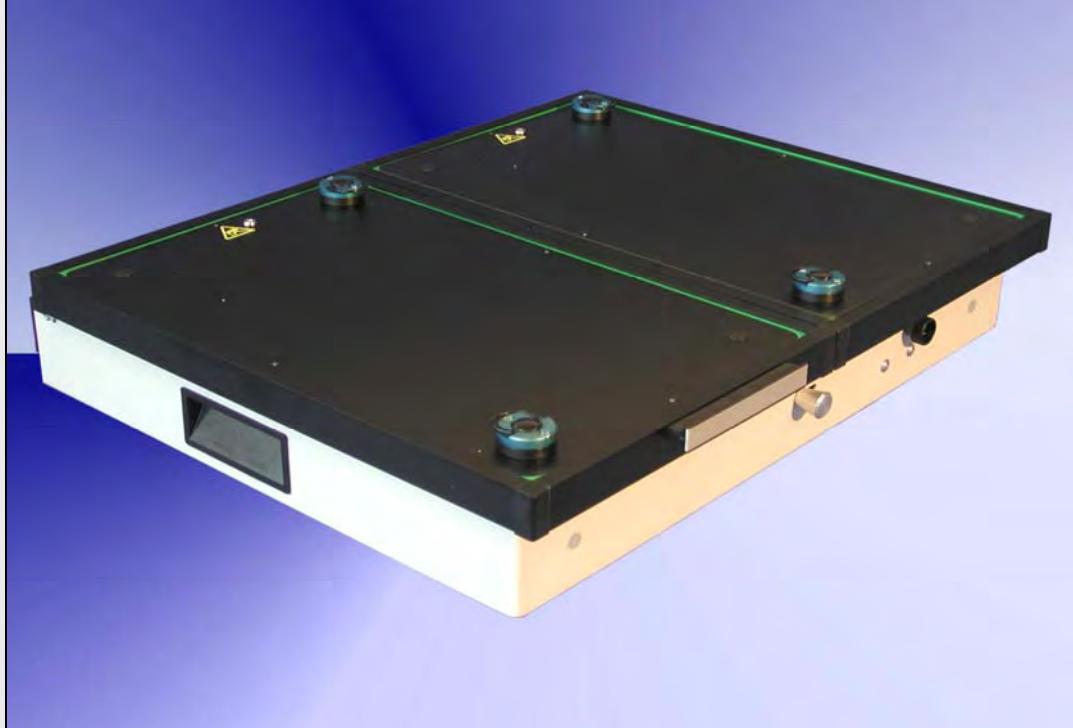

TSI-50-1200

Fixture specification

- Outside dimensions : 490 x 340 x 100 mm
- Max. working area : 310 x 190 mm
- Stable quality through the case and the aluminium frame
- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of G10 (CP quality) 10 mm
- GPS ESD sealing of vacuum chamber
- Rounded edges (for a better intake)
- Protecting erector standard
- Case can be opened during the debugging
- ESD leakage probes standard
- Moving plate 8 mm (optional)
- Interface without insertion
- Short delivery time

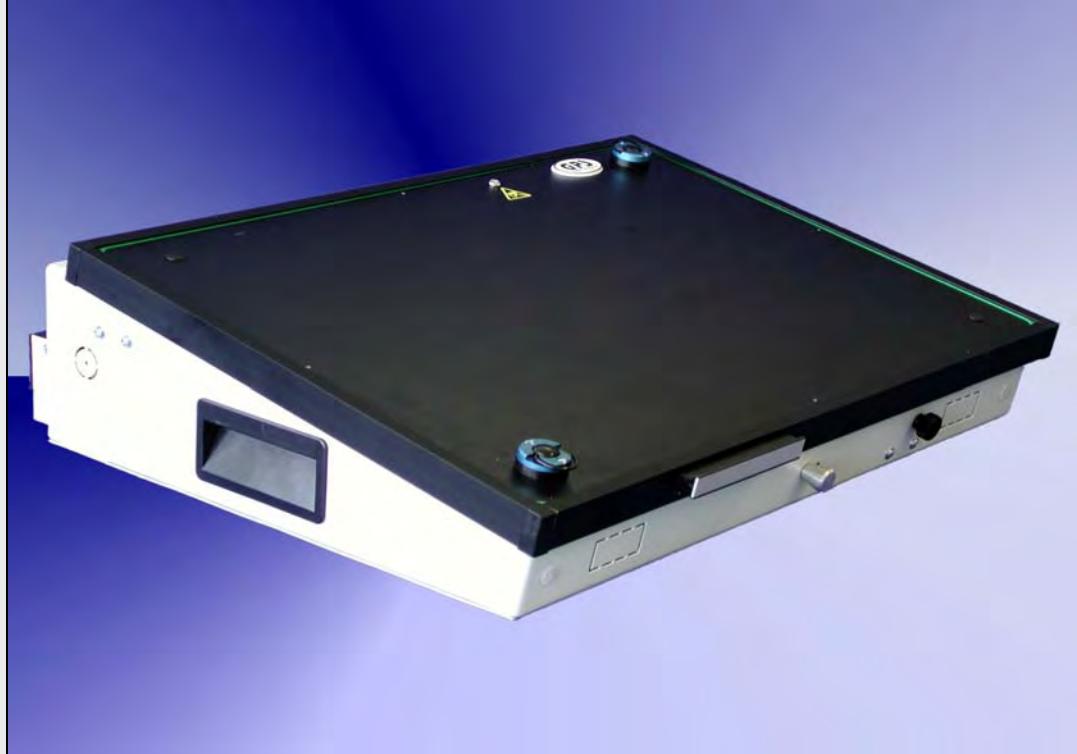

TSI-50-2100

Fixture specification

- Outside dimensions: 510 x 430 x 100 mm
- Max. working area: 2 x (290 x 146) mm
- Stable quality through the case and the aluminium frame
- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of G10 (CP quality) 10 mm
- GPS ESD sealing of vacuum chamber
- Rounded edges (for a better intake)
- Protecting erector standard
- Case can be opened during the debugging
- ESD leakage probes standard
- Grip to open the fixture
- Moving plate 8 mm (optional)
- Short delivery time

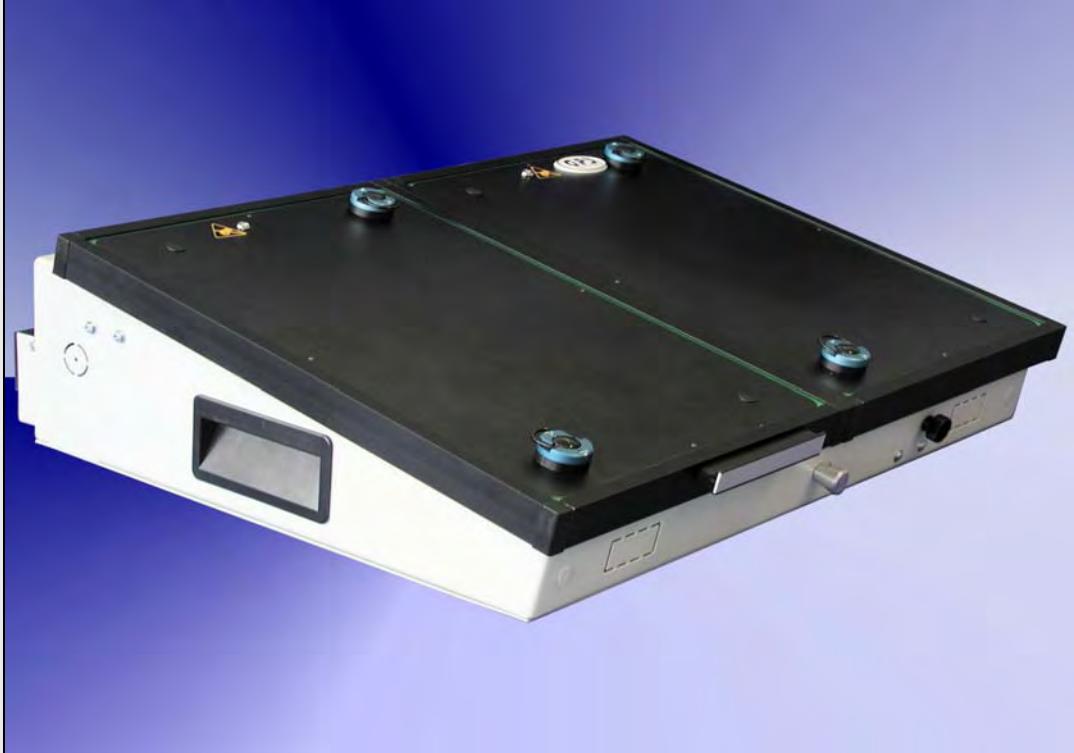

TSI-50-3100

Fixture specification

- Outside dimensions : 550 x 500 x 160 mm
- Max. working area : 490 x 320 mm
- Cant for easy handling
- Stable quality through the case and the aluminium frame
- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of G10 (CP quality) 10 mm
- GPS ESD sealing of vacuum chamber
- Rounded edges (for a better intake)
- Protecting erector standard
- Case can be opened during the debugging
- Outpourings intended for the use of a counter
- ESD leakage probes standard
- Moving plate 8 mm (optional)
- Short delivery time

TSI-50-4100

Fixture specification

- Outside dimensions : 550 x 500 x 160 mm
- Max. working area : 2 x (320 x 195) mm
- Cant for easy handling
- Stable quality through the case and the aluminium frame
- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of G10 (CP quality) 10 mm
- GPS ESD sealing of vacuum chamber
- Rounded edges (for a better intake)
- Protecting erector standard
- Case can be opened during the debugging
- Outpourings intended for the use of a counter
- ESD leakage probes standard
- Moving plate 8 mm (optional)
- Interface without insertion
- Short delivery time

Rohde & Schwarz Testsystem TSVP

Vacuum Fixture

G20-50-1100

Specification:

- Interface are modular and reconfigurable
- Outside dimensions: 555 x 500 x 245 mm
- Max. working area: 470 x 330 mm
- Cant for easy handling
- PAG - plug and guide system
- Probe plate made of G10 (CP quality) 10 mm
- GPS ESD sealing of vacuum chamber
- Protecting erector standard
- Rounded edges (for a better intake)
- QuadraPaddle™ contacts ensure reliable connections to over 20.000 mating cycles
- Stable quality through the case and the aluminium frame
- Exact guidance
- Vacuum- und pneumatic ports integrable
- Thermocouple and fiber optic integrable

- PAG - plug and guide system
- Moving plate made of ESD plate material
- Probe plate made of G10 material (10mm)
- GPS ESD sealing of vacuum chamber
- ESD leakage probes standard
- Extensive offer of Opens Test (OXP) components
- Translator board has to be ordered separately
- Moving plate 8 mm (optional)
- Accessories: Interface cover for 15 and 33 slots interface (testsysterm)

Interface Cover Plate

Interface Cover Plate

**GR-86-050
GR-86-055**

Specification

- Interface cover for testsystems with 33 slot interface
- Available for 15 and 18 slots fixtures
- Tooling pin, sealing and stop incl.
- Matching with GPS fixture:
 GR-86-3100
 GR-86-5100
 GR-86-6100
- Required only once per testsystem and interface size
- Short delivery time

Mechanical Fixture

Technical description

- small changeable fixture with parallel mechanical pressure unit
- it can be opened during the debugging (1250/1251)
- interface with 192 contacts (1250/1251)
- lower-cost because of the changeable unit
- individual upgrading through the unit assembly system
- customer specified interface
- fixture is suitable for about 300N (200 probes with 1,5N spring force)
- changeable plates / raise of case are not included in the fixture; order separately
- optional locking device with magnet

max. working area: 2x 160x100mm,
outside dimensions: 490x330x220mm

Order number: **WA-M-1251-T**

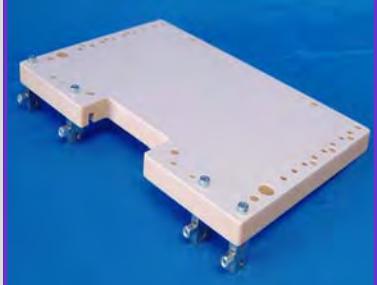

Probe plate

interface for 2 Sub-D-connectors (9 to 25pole)
(not included)

max. working area: 160x100mm,
outside dimensions: 190x130mm, approx. 10mm thick

Order number: **WA-KTP-100**

Changeable Units

Mechanical Fixture

Probe plate

incl. internal 192pol. interface,
max. working area: 320x100mm
outside dimensions: 380x130mm, approx. 10mm thick

Order number: **WA-KTP-1250**

Probe plate

incl. internal 96pol. interface,
max. working area: 160x100mm
outside dimensions: 190x130mm, approx. 10mm thick

Order number: **WA-KTP-1251**

Moving plate

made of EGS-AS; spring-probes for UUT, with 8 distance stoppers (3mm)
max. working area: 160x100mm;
outside dimensions: 190x110mm, approx. 5mm thick

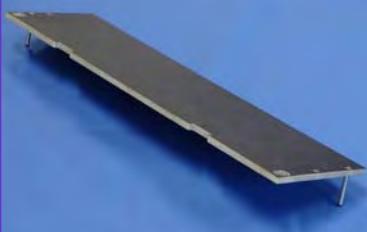

Order number: **WA-PAP-100**

Moving plate

made of EGS-AS; spring-probes for UUT, with 8 distance stoppers (3mm)
max. working area: 320x100mm;
outside dimensions: 380x110mm, approx. 5mm thick

Order number: **WA-PAP-1250**

Holdown plate

made of ESD acrylic plastic, approx. 10mm thick; inkl. screws,
max. working area : 160x100mm,
outside dimensions: 190x110mm

Order number: **WA-AP-100**

Changeable Units

Mechanical Fixture

Holddown plate

made of ESD acrylic plastic, approx. 10mm thick; inkl. screws,
max. working area : 320x100mm,
outside dimensions: 380x110mm

Order number: **WA-AP-1250**

Holddown element

crosshead with 4 height-adjustable pushdown fingers,
mounting material incl.

Order number: **WA-AE-100**

Holddown element

crosshead with 4 height-adjustable pushdown fingers,
mounting material incl.

Order number: **WA-AE-1250**

Tooling Pins (Set)

2 Pins for holddown plate and moving plate;
(use only for probing on the top side)

Order number: **WA-FB-70**

Spring probes for UUT 3N

sockets incl., spring force 3N; extended height: 13,3mm
point style: 4mm

Order number: **WA-GPA-13-3N**

Changeable Units

Spring probes for UUT 6N

sockets incl., spring force 6N; extended height 13,3mm
point style: 4mm

Order number: **WA-GPA-13-6N**

Mechanical Fixture

Spring probes for UUT 3N

sockets incl., spring force 3N; extended height 13,3mm
point style: 3mm (plastic)

Order number: **WA-GPA-13-3N-K**

Spring probes for UUT 6N

sockets incl., spring force 6N; extended height 13,3mm
point style: 3mm (plastic)

Order number: **WA-GPA-13-6N-K**

Locking device

with holding magnet (24 V DC)

Order number: **WA-M-1200-VM**

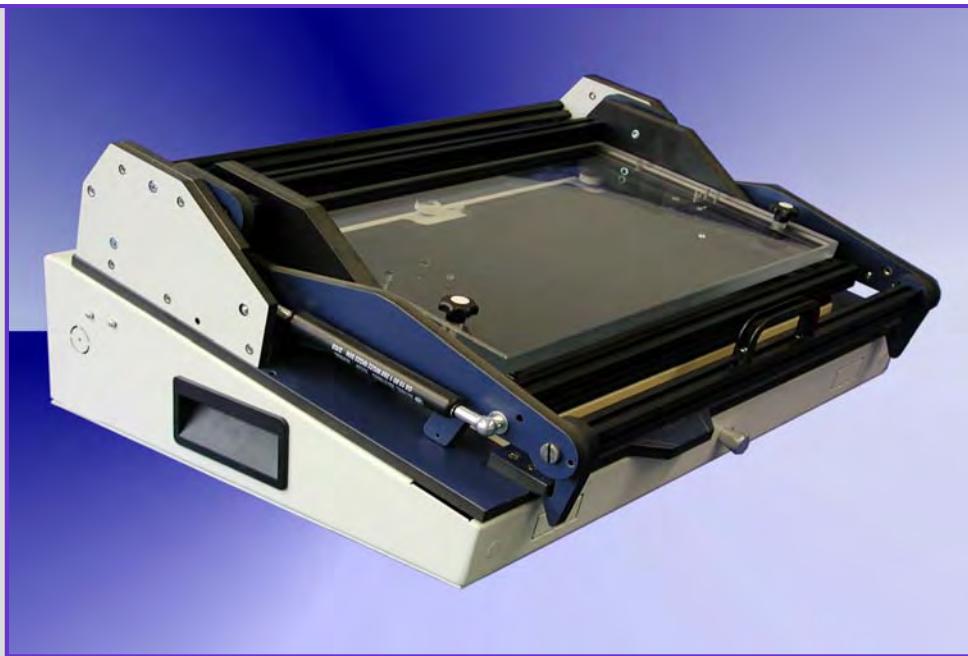

Changeable Units

WA-M-15xx

Technical desription

- parallel mechanical pressure unit
- lower-cost because of the changeable unit
- individual upgrading through the unit assembly system
- interface with contacts or probe-interface
- fixture is suitable for about 300N (200 probes with 1,5N spring force)
- customer specified interface
- case can be opened during the debugging
- changeable plates / raise of case are not included in the fixture; order separately
- various accessoires

Probe plate for FKS-IF

incl. mounting support for internal interface with max. 1020Pins
max. working area: 330x180mm

Order number: **WA-KTP-400-I**

Probe plate

incl. 96pole internal interface
max. working area: 205x110mm

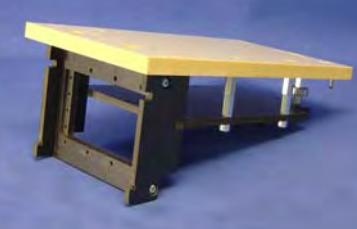

Order number: **WA-KTP-140**

Probe plate for FKS-IF

incl. mounting support for internal interface with max. 510Pins
max. working area: 180x110 mm

Order number: **WA-KTP-140-I**

Probe plate

CEM1; incl. 4x96pole internal interface
max. working area. 520x295mm
outside dimensions: 570x335mm, approx. 10mm thick

Order number: **WA-KTP-410**

Changeable Units

Probe plate for FKS-IF

for WA-M-1510-I / WA-P-3010-I; incl. mounting support
for internal interface with 1020 Pins, expandable to 2040 Pins
max. working area: 520x250mm;
outside dimensions: 570x335mm

Order number: **WA-KTP-410-I**

Mechanical Fixture

Probe plate for FKS-IF

incl. mounting support for internal interface with 510 Pins
max. working area: 260x160 mm

Order number: **WA-KTP-210-I**

Probe plate

incl. 96pole internal interface
max. working area: 295x180mm;
outside dimensions: 336x209mm

Order number: **WA-KTP-210**

Moving plate

spring-mounted, 6 spring-probes for UUT incl.,
with distance stoppers (3mm)
max. working area: 350x230mm,
outside dimensions: 400x254mm, approx. 5mm thick

Order number: **WA-PAP-400**

Moving plate

made of EGS-AS; incl. 10 distance stoppers (3mm)
max. working area: 330x180mm,
outside dimensions: 400x270mm, approx. 5mm thick

Moving plate

for WA-M-1510-I / WA-P-3010-I; made of EGS-AS
incl. 10 distance stoppers (3mm)
max. working area: 520x250 mm;
outside dimensions : 570x335mm; approx. 5mm thick

Order number: **WA-PAP-410-I**

Moving plate

made of EGS-AS; incl. 10 distance stoppers (3mm)
and 4 spring probes for UUT
max. working area: 260x160 mm;
outside dimensions: 336x209mm, approx. 5mm thick

Order number: **WA-PAP-210-I**

Changeable Units

Moving plate

made of EGS-AS; 6 spring-probes for UUT incl.
and 10 distance stoppers (3mm)
max. working area: 295x180mm;
outside dimensions: 332x209mm, approx. 5mm thick

Order number: **WA-PAP-210**

Mechanical Fixture

Holddown plate

made of ESD acrylic plastic, approx. 15mm thick,
outside dimensions : 407x240mm
max. working area: 350x230mm; incl. 6pcs pushdown fingers M3x30 PA

Order number: **WA-AP-400**

Holddown plate

made of ESD acrylic plastic, approx. 10mm thick,
max. working area: 205x110mm;
outside dimensions: 260x158mm

Order number: **WA-AP-140**

Holddown plate

made of ESD acrylic plastic, approx. 15mm thick,
max. working area: 520x295mm;
outside dimensions : 576x330,5mm

Order number: **WA-AP-410**

Holddown plate

made of ESD-PVC, approx. 10mm thick
max. working area: 295x180mm;
outside dimensions: 335x227 mm

Order number: **WA-AP-210**

Changeable Units

Mechanical Fixture

Holddown element

crosshead with 3 height-adjustable pushdown fingers,
mounting material incl.; length: 408mm

Order number: **WA-AE-400**

Holddown element

crosshead with 3 height-adjustable pushdown fingers,
mounting material incl.

Order number: **WA-AE-140**

Holddown element

crosshead with 5 height-adjustable pushdown fingers,
mounting material incl.; length 578mm

Order number: **WA-AE-410**

Holddown element

crosshead with 3 height-adjustable pushdown fingers,
mounting material incl.

Order number: **WA-AE-210**

Protecting plate

for WA-KTP-400
approx. 3mm thick, incl. fixing material
outside dimensions: 370x250mm

Order number: **WA-HSP-400**

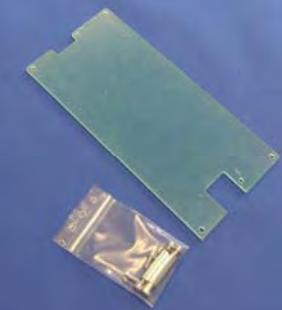

Changeable Units

Mechanical Fixture

Protecting plate

for WA-KTP-140
acrylic plastic, approx. 3mm thick; incl. fixing material
outside dimensions: 239x112mm

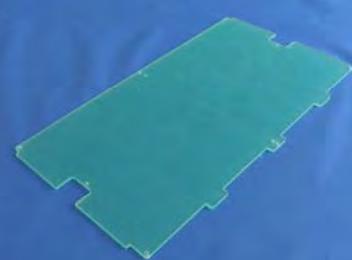

Order number: **WA-HSP-140**

Protecting plate

for WA-KTP-410
approx. 3mm thick, incl. fixing material
outside dimensions: 543x316mm

Order number: **WA-HSP-410**

Protecting plate

for WA-KTP-210
acrylic plastic, approx. 3mm thick; incl. fixing material
outside dimensions: 321x182mm

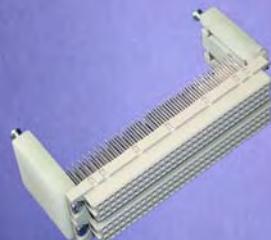

Order number: **WA-HSP-210**

Interface expansion 4x96pole Wire-Wrap

for WA-KTP-400
upgradeable, incl. fixing material

Order number: **WA-KTP-IF384**

Interface-block 170pole

with interface pins
max. 6 blocks for a WA-KTP-400-I adjustable
incl. fixing material

Order number: **WA-KTP-IF170**

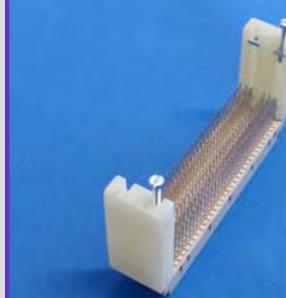

Changeable Units

Mechanical Fixture

Interface expansion 2x96pol. Wire-Wrap

for WA-KTP-140
upgradeable, incl. fixing material

Order number: **WA-KTP-IF192**

Interface expansion 4x96pole Wire-Wrap

for WA-M-1400/WA-M-1500/WA-P-3000
upgradeable, incl. fixing material

Order number: **WA-M-IF384**

Interface-block 170pole

with interface probes
max. 6 blocks for a WA-M-1500-I adjustable
incl. fixing material

Order number: **WA-M/P-IF170**

Interface expansion 2x96pol. Wire-Wrap

for WA-M-1401/WA-M-1501
upgradeable, incl. fixing material

Order number: **WA-M-IF192**

Pneumatic-interface-block 8pole

for internal interface on the probe plates WA-KTP-xxx-I
incl. fixing material

Order number: **WA-KTP-IF-PBB-8**

Changeable Units

Mechanical Fixture

Pneumatic-interface-block 8pole

for internal interface in the housing WA-M-1xxx-I or WA-P-3xxx-I
incl. fixing material

Order number: **WA-M/P-IF-PSB-8**

Interface expansion for WA-M-1510-I

for upgrading;
mounting below the base plate, for max. 3 blocks (not included);
mountable on two mounting positions

Order number: **WA-M-1510-I-203_1**

Interfac expansion for WA-KTP-140/400/410-I

for upgrading
mounting below the probe plate, for max. 3 blocks (not included);
mountable on two mounting positions

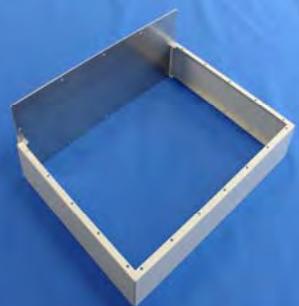

Order number: **WA-KTP-XX0-I-004**

Raise of case 90mm V2.0

for case MFG-530-Pult-Gehäuse-V1.0; aluminium,
heigh: 90mm

Order number: **MFG-530-GEHÄUSEERHÖHUNG-90**

Raise of case 250mm

for case MFG-530-Pult-Gehäuse-V1.0
heigh: 250mm

Order number: **MFG-530-GEHÄUSEERHÖHUNG-250**

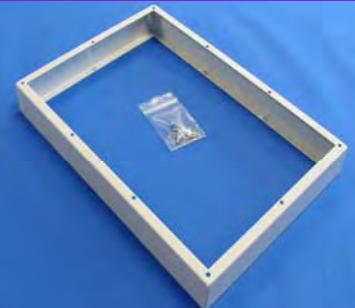

Changeable Units

Mechanical Fixture

Raise of case 45mm

for case MFG-280-PULT-GEHÄUSE-V1.0
(for WA-M-1401/1501; PA3001)

Order number: **MFG-280-GEHÄUSEERHÖHUNG**

Raise of case 90mm V1.0

for case MFG-700-Pult-V1.0; aluminium
RAL7035

Order number: **MFG-700-GEHÄUSEERHÖHUNG-90**

Start button, magnetic

for WA-M-15xx deskform
with parallel holddown mechanic-system

Order number: **WA-M-1500-MS**

Spring probes for UUT 3N

sockets incl., spring force 3N; extended height: 13,3mm
point style: 4mm

Order number: **WA-GPA-13-3N**

Spring probes for UUT 6N

sockets incl., spring force 6N; extended height 13,3mm
point style: 4mm

Order number: **WA-GPA-13-6N**

Changeable Units

Spring probes for UUT 3N

sockets incl., spring force 3N; extended height 13,3mm
point style: 3mm (plastic)

Order number: **WA-GPA-13-3N-K**

Mechanical Fixture

Spring probes for UUT 6N

sockets incl., spring force 6N; extended height 13,3mm
point style: 3mm (plastic)

Order number: **WA-GPA-13-6N-K**

Changeable Units

WA-M-16xx

Technical desription

Mechanical Fixture

Patented Pressure System

Applied for a patent at the Germany Patent Office under No. 20 2011 107 409.2

- parallel mechanical pressure unit
- interface with 384 contacts or probe-interface
- lower-cost because of the changeable unit
- individual upgrading through the unit assembly system
- customer specified interface
- fixture is suitable for about 1000N (1000 probes with 1N spring force)
- case can be opened during the debugging
- changeable plates / raise of case are not included in the fixture; order separately
- various accessoires

| Fixture: | Outside dimensions: | Working area: | Probe plate: | Moving plate: | Holddown plate: |
|-------------|---------------------|---------------|---------------|---------------|-----------------|
| WA-M-1600 | 530x270x450mm | 350x230mm | WA-KTP-1600 | WA-PAP-1600 | WA-AP-1600 |
| WA-M-1600-I | 530x270x450mm | 350x215mm | WA-KTP-1600-I | WA-PAP-1600 | WA-AP-1600 |

Changeable Units

Mechanical Fixture

Fixture with parallel closing pressure unit

without changeable plates,
incl. 384pole internal interface (expandable),
max. working area: 350x230mm;
outside dimensions: 530x270x450mm

Order number: **WA-M-1600**

Fixture with parallel closing pressure unit

without changeable plates,
incl. mounting support for internal interface with max. 1700 Pins,
usable interface-blocks: TSI-50-USB-A-Receiver / TSI-50-16A-45-FKS
TSI-50-101 / TSI-50-PSB
max. working area: 350x215mm; outside dimensions: 530x270x450mm

Order number: **WA-M-1600-I**

Probe plate

CEM1; incl. 384pole internal interface (expandable)
max. working area: 350x230mm;
outside dimensions: 440x320mm

Order number: **WA-KTP-1600**

Probe plate for FKS-IF

CEM1; incl. mounting support for internal interface with max. 1700 Pins,
usable interface-blocks: TSI-50-USB-A-Adapter / TSI-50-16A-45-IK
TSI-50-101 / TSI-50-PBB
max. working area: 350x215mm; outside dimensions: 440x320mm

Order number: **WA-KTP-1600-I**

Moving plate

made of EGS-AS
with 8 distance stoppers (3mm)
outside dimensions: 440x320mm, ca. 5mm stark

Order number: **WA-PAP-1600**

Changeable Units

WA-M-18XX

Mechanical Fixture

Technical description

- parallel mechanical pressure unit very easy to handle
- interface with 384 contacts or probe-interface
- lower-cost because of the changeable unit
- individual upgrading through the unit assembly system
- customer specified interface
- fixture is suitable for about 300N (300 probes with 1N spring force)
- changeable plates like WA-M-1600
- positioning of probe plate to holddown plate automatically
- case can be opened during the debugging
- changeable plates / raise of case are not included in the fixture; order separately
- various accessoires

| Fixture: | Outside dimensions: | Working area: | Probe plate: | Moving plate: | Holddown plate: |
|-------------|---------------------|---------------|---------------|---------------|-----------------|
| WA-M-1800 | 530x280x450mm | 350x230mm | WA-KTP-1600 | WA-PAP-1600 | WA-AP-1600 |
| WA-M-1800-I | 530x280x450mm | 350x215mm | WA-KTP-1600-I | WA-PAP-1600 | WA-AP-1600 |

Changeable Units

Fixture with parallel closing pressure unit

very easy to handle, without changeable plates,
incl. 384pole internal interface (expandable),
max. working area: 350x230mm;
outside dimensions: 530x280x450mm

Order number: **WA-M-1800**

Mechanical Fixture

Fixture with parallel closing pressure unit

very easy to handle, without changeable plates,
incl. mounting support for internal interface with max. 1700 Pins,
usable interface-blocks: TSI-50-USB-A-Receiver / TSI-50-16A-45-FKS
TSI-50-201 / TSI-50-PSB
max. working area: 350x215mm; outside dimensions: 530x280x450mm

Order number: **WA-M-1800-I**

Probe plate

CEM1; incl. 384pole internal interface (expandable)
max. working area: 350x230mm;
outside dimensions: 440x320mm

Order number: **WA-KTP-1600**

Probe plate for FKS-IF

CEM1; incl. mounting support for internal interface with max. 1700 Pins,
usable interface-blocks: TSI-50-USB-A-Adapter / TSI-50-16A-45-IK
TSI-50-101 / TSI-50-PBB
max. working area: 350x215mm; outside dimensions: 440x320mm

Order number: **WA-KTP-1600-I**

Moving plate

made of EGS-AS
with 8 distance stoppers (3mm)
outside dimensions: 440x320mm, ca. 5mm stark

Order number: **WA-PAP-1600**

Changeable Units

Mechanical Fixture

Holddown plate

made of ESD acrylic plastic, approx. 15mm thick
outside dimensions: 445x310mm

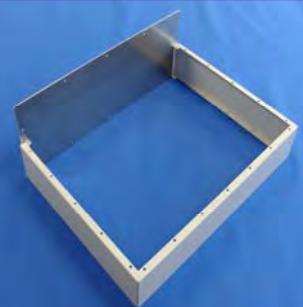

Order number: **WA-AP-1600**

Raise of case 90mm V2.0

for case MFG-530-Pult-Gehäuse-V1.0; aluminium,
height: 90mm

Order number: **MFG-530-GEHÄUSEERHÖHUNG-90**

Raise of case 250mm

for case MFG-530-Pult-Gehäuse-V1.0
height: 250mm

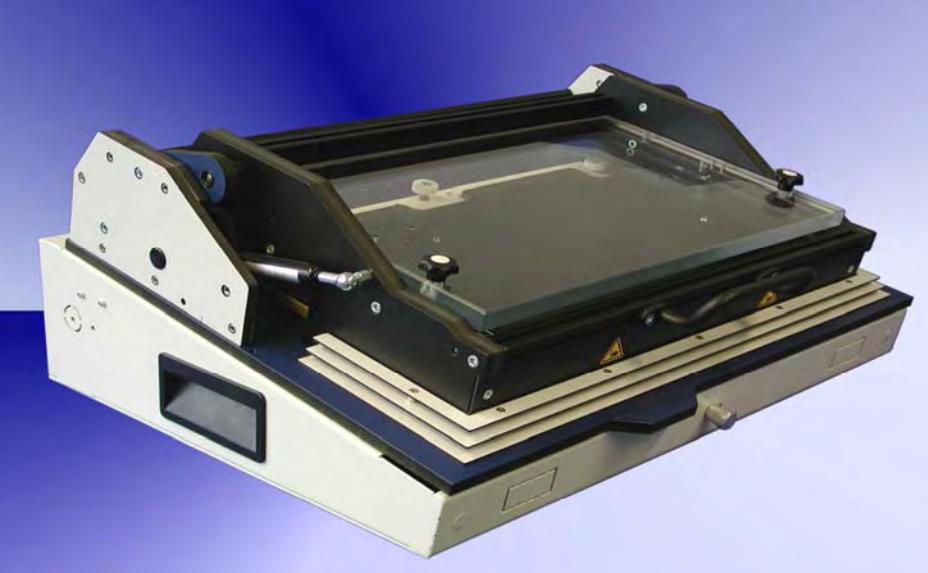

Order number: **MFG-530-GEHÄUSEERHÖHUNG-250**

Changeable Units

Pneumatic Fixture

WA-P-30xx

Technical description

- parallel pneumatic pressure unit
- lower-cost and individual because of the changeable unit
- no effort because of the dual pneumatic drivesystem (24V; 6bar)
- signal for the start by pushing down the pressure unit
- check of the contacting position (optional)
- interface with contacts or probe-interface
- fixture is suitable for about 600N (400 probes with 1,5N spring force)
- customer specified interface
- case can be opened during the debugging
- changeable plates / raise of case are not included in the fixture; order separately
- various accessories

Changeable Units

Pneumatical Fixture

Fixture with parallel closing pressure unit

incl. 192pole internal interface
max. working area: 350x230 mm

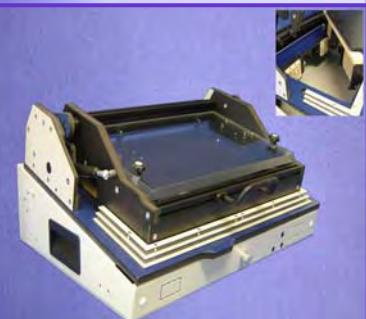

Order number: **WA-P-3000**

Fixture with parallel closing pressure unit for FKS-IF

incl. mounting support for internal interface with max. 1020Pins
max. working area: 330x180mm

Order number: **WA-P-3000-I**

Fixture with parallel closing pressure unit

incl. 96pole internal interface
max. working area: 205x110 mm

Order number: **WA-P-3001**

Fixture with parallel closing pressure unit for FKS-IF

incl. mounting support for internal interface with max. 510Pins
max. working area: 180x110mm

Order number: **WA-P-3001-I**

Tandem Fixture with parallel closing pressure unit for FKS-IF

with two separate parallel pneumatical pressure units WA-P-3001
max. working area: 2x 180x110mm;
incl. mounting supports for int. Interface with max. 510Pins

Order number: **WA-P-3001-I-T**

Changeable Units

Pneumatical Fixture

Tandem Fixture with parallel closing pressure unit

with two separate parallel pneumatical pressure units WA-P-3001
 max. working area: 2x 205x110mm,
 incl. 2x 96 pole internal interface

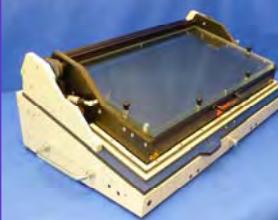

Order number: **WA-P-3001-T**

Fixture with parallel closing pressure unit

incl. 4x96pole internal interface
 max. working area: 520x295 mm
 outside dimensions: 740x510x250mm

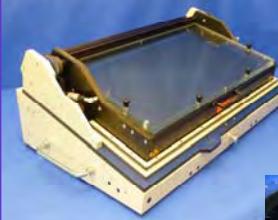

Order number: **WA-P-3010**

Fixture with parallel closing pressure unit for FKS-IF

incl. mounting support for internal interface with 1020Pins,
 expandable to max. 2040Pins
 max. working area: 520x250mm
 outside dimensions: 740x510x250mm

Order number: **WA-P-3010-I**

Tandem Fixture with parallel closing pressure unit for FKS-IF

with two separate parallel pneumatical pressure units WA-P-3011,
 outside dimensions: 740x510x250mm
 max. working area: 2x 260x160mm;
 incl. mounting supports for int. Interface with max. 510Pins

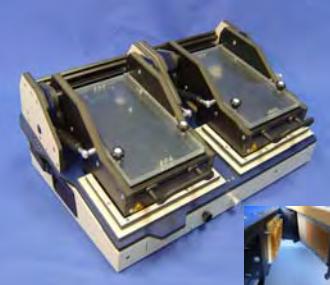

Order number: **WA-P-3011-I-T**

Tandem Fixture with parallel closing pressure unit

with two separate parallel pneumatical pressure units WA-P-3011
 outside dimensions: 740x510x250mm;
 max. working area: 2x 295x180mm;
 incl. 96 pole internal interface

Order number: **WA-P-3011-T**

Changeable Units

Pneumatical Fixture

Probe plate

CEM1; incl. 192pole internal interface
max. working area: 350x230mm,
outside dimensions: 400x270mm, approx. 10mm thick

Order number: **WA-KTP-400**

Probe plate for FKS-IF

incl. mounting support for internal interface with max. 1020Pins
max. working area: 330x180mm

Order number: **WA-KTP-400-I**

Probe plate

incl. 96pole internal interface
max. working area: 205x110mm

Order number: **WA-KTP-140**

Probe plate for FKS-IF

incl. mounting support for internal interface with max. 510Pins
max. working area: 180x110 mm

Order number: **WA-KTP-140-I**

Probe plate

CEM1; incl. 4x96pole internal interface
max. working area. 520x295mm
outside dimensions: 570x335mm, approx. 10mm thick

Order number: **WA-KTP-410**

Changeable Units

Probe plate for FKS-IF

for WA-M-1510-I / WA-P-3010-I; incl. mounting support
for internal interface with 1020 Pins, expandable to 2040 Pins
max. working area: 520x250mm;
outside dimensions: 570x335mm

Order number: **WA-KTP-410-I**

Pneumatical Fixture

Probe plate for FKS-IF

incl. mounting support for internal interface with 510 Pins
max. working area: 260x160 mm

Order number: **WA-KTP-210-I**

Probe plate

incl. 96pole internal interface
max. working area: 295x180mm;
outside dimensions: 336x209mm

Order number: **WA-KTP-210**

Moving plate

spring-mounted, 6 spring-probes for UUT incl.,
with distance stoppers (3mm)
max. working area: 350x230mm,
outside dimensions: 400x254mm, approx. 5mm thick

Order number: **WA-PAP-400**

Moving plate

made of EGS-AS; incl. 10 distance stoppers (3mm)
max. working area: 330x180mm,
outside dimensions: 400x270mm, approx. 5mm thick

Order number: **WA-PAP-400-I**

Changeable Units

Pneumatical Fixture

Moving plate

made of EGS-AS; 6 spring-probes for UUT incl.,
with distance stoppers (3mm)
max. working area: 205x110 mm;
outside dimensions: 270x140mm, approx. 5mm thick

Order number: **WA-PAP-140**

Moving plate

made of EGS-AS; incl. 10 distance stoppers (3mm)
max. working area: 180x110mm,
outside dimensions: 270x140mm, approx. 5mm thick

Order number: **WA-PAP-140-I**

Moving plate

approx. 5mm thick, 8 spring-probes for UUT incl.
and 15 distance stoppers 02 (3mm), made of EGS-619-AS-COMP Var. 2,
max. product area: 520x295mm,
outside dimensions: 570x331mm

Order number: **WA-PAP-410**

Moving plate

for WA-M-1510-I / WA-P-3010-I; made of EGS-AS
incl. 10 distance stoppers (3mm)
max. working area: 520x250 mm;
outside dimensions : 570x335mm; approx. 5mm thick

Order number: **WA-PAP-410-I**

Moving plate

made of EGS-AS; incl. 10 distance stoppers (3mm)
and 4 spring probes for UUT
max. working area: 260x160 mm;
outside dimensions: 336x209mm, approx. 5mm thick

Order number: **WA-PAP-210-I**

Changeable Units

Pneumatical Fixture

Moving plate

made of EGS-AS; 6 spring-probes for UUT incl.
and 10 distance stoppers (3mm)
max. working area: 295x180mm;
outside dimensions: 332x209mm, approx. 5mm thick

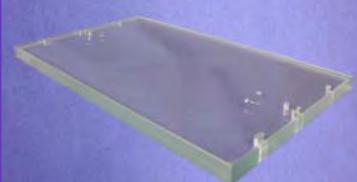

Order number: **WA-PAP-210**

Holddown plate

made of ESD acrylic plastic, approx. 15mm thick,
outside dimensions : 407x240mm
max. working area: 350x230mm; incl. 6pcs pushdown fingers M3x30 PA

Order number: **WA-AP-400**

Holddown plate

made of ESD acrylic plastic, approx. 10mm thick,
max. working area: 205x110mm;
outside dimensions: 260x158mm

Order number: **WA-AP-140**

Holddown plate

made of ESD acrylic plastic, approx. 15mm thick,
max. working area: 520x295mm;
outside dimensions : 576x330,5mm

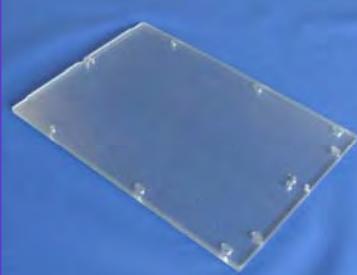

Order number: **WA-AP-410**

Holddown plate

made of ESD-PVC, approx. 10mm thick
max. working area: 295x180mm;
outside dimensions: 335x227 mm

Order number: **WA-AP-210**

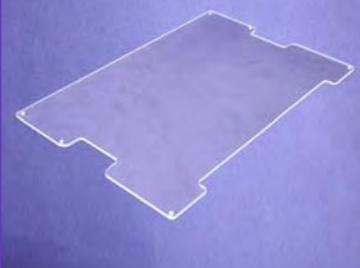

Changeable Units

Pneumatical Fixture

Protecting plate

for WA-KTP-400
approx. 3mm thick, incl. fixing material
outside dimensions: 370x250mm

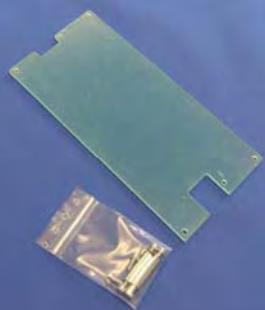

Order number: **WA-HSP-400**

Protecting plate

for WA-KTP-140
acrylic plastic, approx. 3mm thick; incl. fixing material
outside dimensions: 239x112mm

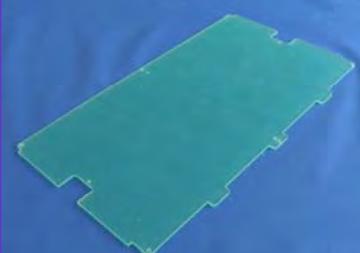

Order number: **WA-HSP-140**

Protecting plate

for WA-KTP-410
approx. 3mm thick, incl. fixing material
outside dimensions: 543x316mm

Order number: **WA-HSP-410**

Protecting plate

for WA-KTP-210
acrylic plastic, approx. 3mm thick; incl. fixing material
outside dimensions: 321x182mm

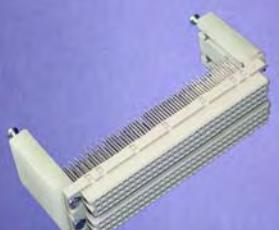

Order number: **WA-HSP-210**

Interface expansion 4x96pole Wire-Wrap

for WA-KTP-400
upgradeable, incl. fixing material

Order number: **WA-KTP-IF384**

Changeable Units

Pneumatic Fixture

Interface-block 170pole

with interface pins
incl. screws

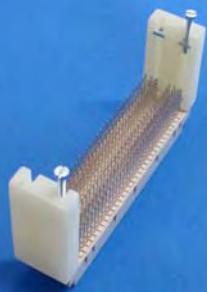

Order number: **TSI-50-101**

Interface expansion 2x96pol. Wire-Wrap

for WA-KTP-140
upgradeable, incl. fixing material

Order number: **WA-KTP-IF192**

Interface expansion 4x96pole Wire-Wrap

for WA-M-1400/WA-M-1500/WA-P-3000
upgradeable, incl. fixing material

Order number: **WA-M-IF384**

Interface-block 170pole for receiver

installed:
socket: 100-SDG160W, probe: 100-PLG1603L

Order number: **TSI-50-201**

Interface expansion 2x96pol. Wire-Wrap

for WA-M-1401/WA-M-1501
upgradeable, incl. fixing material

Order number: **WA-M-IF192**

Changeable Units

Pneumatical Fixture

Pneumatic-interface-block 8pole

for internal interface (fixture)

Order number: **TSI-50-PBB**

Pneumatic-interface-block 8pole

for internal interface (receiver)

Order number: **TSI-50-PSB**

Interface expansion for WA-M-1510-I

for upgrading;
mounting below the base plate, for max. 3 blocks (not included);
mountable on two mounting positions

Order number: **WA-M-1510-I-203_1**

Interfac expansion for WA-KTP-140/400/410-I

for upgrading
mounting below the probe plate, for max. 3 blocks (not included);
mountable on two mounting positions

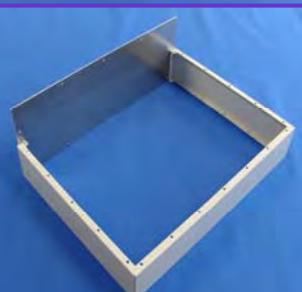

Order number: **WA-KTP-XX0-I-004**

Raise of case 90mm V2.0

for case MFG-530-Pult-Gehäuse-V1.0; aluminium,
heigh: 90mm

Order number: **MFG-530-GEHÄUSEERHÖHUNG-90**

Changeable Units

Pneumatical Fixture

Raise of case 250mm

for case MFG-530-Pult-Gehäuse-V1.0
height: 250mm

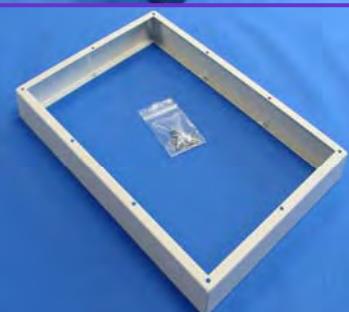

Order number: **MFG-530-GEHÄUSEERHÖHUNG-250**

Raise of case 45mm

for case MFG-280-PULT-GEHÄUSE-V1.0
(for WA-M-1401/1501; PA3001)

Order number: **MFG-280-GEHÄUSEERHÖHUNG**

Raise of case 90mm V1.0

for case MFG-700-Pult-V1.0; aluminium
RAL7035

Order number: **MFG-700-GEHÄUSEERHÖHUNG-90**

Switch for WA-P-30xx

(D-A93) switch N.O.

Order number: **WA-P-3000-SG**

Spring probes for UUT 3N

sockets incl., spring force 3N; extended height: 13,3mm
point style: 4mm

Order number: **WA-GPA-13-3N**

Changeable Units

Pneumatical Fixture

Spring probes for UUT 6N

sockets incl., spring force 6N; extended height 13,3mm
point style: 4mm

Order number: **WA-GPA-13-6N**

Spring probes for UUT 3N

sockets incl., spring force 3N; extended height 13,3mm
point style: 3mm (plastic)

Order number: **WA-GPA-13-3N-K**

Spring probes for UUT 6N

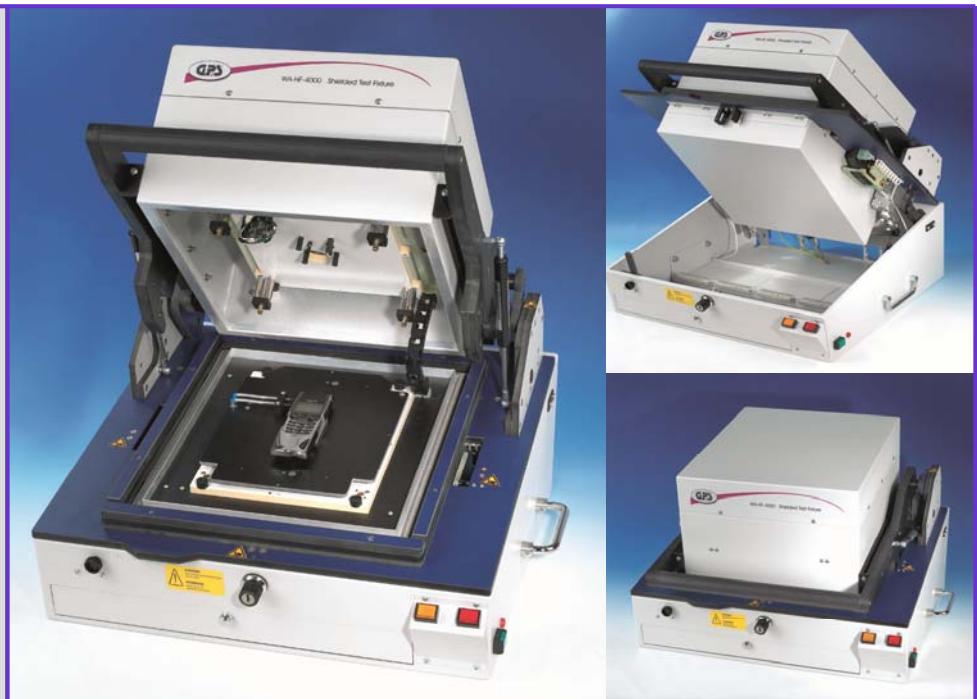

sockets incl., spring force 6N; extended height 13,3mm
point style: 3mm (plastic)

Order number: **WA-GPA-13-6N-K**

Shielded RF Test Fixture

WA-HF-4000/8000

Fixture Specification

- Pneumatic fixture for High Frequency Test
- Shielding from external RF-Signals
- 2 Product size Standard working area: L x D 180mm x 180mm
Large working area: L x D 382mm x 274mm
- Changeable cassette unit with pneumatic pressure frame mechanism
- Forceless and adjustable compression speed due to doubled pneumatic Cylinders (24V)
- Parallel pressure frame mechanism
- Start signal by depressing the pressure frame mechanism (optional)
- Kit designed as cassette type unit to maximize economy
- Fast and easy to change upper and bottom probe plate
- Interface modular and customize configurable
- Optional: Pylon Interface or G 12 Interface from Virginia Panel
- Integrated start, stop and reset buttons
- Running position monitoring (optional)
- Lockable housing
- Plug-in module for 4 PCB (100x160 mm) for local electronics
- Combination of RF, audio and video test
- For testing mobile telephones, "Bluetooth"-devices and WLAN
- Suited for acoustic (microphone and speaker) and optic (video camera) test
- Changeable Kit has to bought separately

Shielded RF Test Fixture

Technical Specification

Standard RF Fixture WH-HF-4000

Desk Fixture with parallel pressure mechanics

Größe:

Test Fixture: external dimension: L x D x H 550mm x 580mm x 400mm
Complete cassette: external dimension: L x D 340mm x 290mm
working area: L x D 190mm x 180mm

Weight:

incl. cassette unit: 20 kg

Temperature:

operating temperature: +10°C ...+40°C
storage temperature: -210°C ...+60°C

Humidity:

operating temperature: 90% r.h. no cond. by +10°C ...+40°C
75% r.h. no cond. by +30°C ...+40°C
storage temperature: 90% r.h. no cond. by +60°C

Compressed Air:

6 bar oil-free

Power Supply:

24V DC/3A for pneum. valve

Large RF Fixture WH-HF-8000

Desk Fixture with parallel pressure mechanics

Größe:

Test Fixture: external dimension: LxBxH 702mm x 580mm x 404mm
Complete cassette: LxB 482mm x 434mm
working area: LxB 380mm x 270mm

Weight:

incl. cassette unit: 26 kg

Temperature:

operating temperature: +10°C ...+40°C
storage temperature: -210°C ...+60°C

Humidity:

operating temperature: 90% r.h. no cond. by +10°C ...+40°C
75% r.h. no cond. by +30°C ...+40°C
storage temperature: 90% r.h. no cond. by +60°C

Compressed Air:

6 bar oil-free

Power Supply:

24V DC/3A for pneum. valve

Interface Chamber

Interface modular and free configurable

Pylon Block Interface for 10 Interface Blocks

Order-No.: TSI-50-IF

Virginia Panel, G12 (see also G12 Receiver)

Order-No.: ITA-G12

Shielded RF Test Fixture

Accessories

Complete Changeable Fixture Kit WA-HF-400

Consisting of:
 WA-HF-KTP-400
 WA-HF-AP-400
 WA-HF-PAP-400

Changeable probe plate WA-KTP-400

Changeable probe plate
 incl. internal 96 pol. connector
 Outside dimension: 260 x 210 x 10 mm
 Working area: 190 x 180 mm

Changeable pressure plate WA-AP-400

pressure plate 10mm thick
 Incl. 4 Pneumatic connector
 96 pol. connector
 Outside dimension: 260 x 210 x 10 mm

Changeable moving plate WA-PAP-400

Incl. 6 spring probes and distance stopper (3mm)
 Working area: 180 x 180 mm

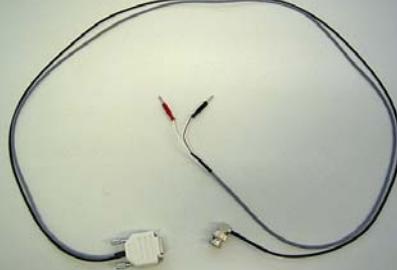

Spring Probes WA-GPA-13-3N

Spring force 3N, incl. sockets
 Height 13,3 mm, Tip style 4 mm (Nickel/Rhodium)

Base system for changeable fixtures

Mech. Changeable Fixture

MWK-55-5000

Delivered without interface

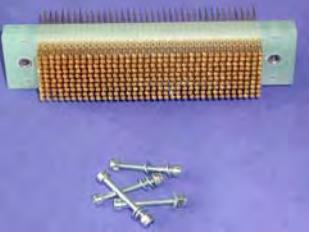

Fixture specification

- Lower-cost due to the changeable system
- deskform for easy handling
- Manual locking of the cassette (low energy consumption)
- Outside dimensions: 590 x 490 x 160 mm
- Max. working area vacuum changeable cassette: 320 x 220 mm
- Suited to max. 720 testpoints
- Short and easy change of the vacuum cassette (< 5 sec.)
- Internal interface with max. 2x360 pins (not incl.)
- Parallel push down system
- Stable quality due to the aluminium construction
- Push down plate made of 15mm ESD acrylic plastic
- Low energy consumption due to the ball-bearing guide
- Suited to two side probing
- Customer specified interface
- Case can be opened during the debugging
- Fixture is delivered without changeable cassette

Changeable Cassette

Vacuum-Changeable Fixture

VWK-55-1100

Fixture specification

- Outside dimensions : 415 x 295 x 100 mm
- Max. working area : 320 x 220 mm
- Stable quality through the aluminium frame
- Moving plate made of ESD plate material
- GPS ESD sealing of vacuum chamber
- ESD leakage probes standard
- Pin protecting plate incl.
- Grips for easy removing
- Interface blocks for the fixture has to be ordered separately
- Vacuum plate 8 mm (optional)
- Short delivery time

Accessoories

Storage Box

WA-BOX3-400

Specification

- Storage box for changeable plate inserts (WA-P-3000 / WA-M-1500)
- Each for 3 WA-KTP-400 / WA-PAP-400 and WA-AP-400
- Storage system with 3 runners and knurled screws
- Dimensions: 420 x 610 x 290 mm
- Stable quality

10. Turn Table Unit

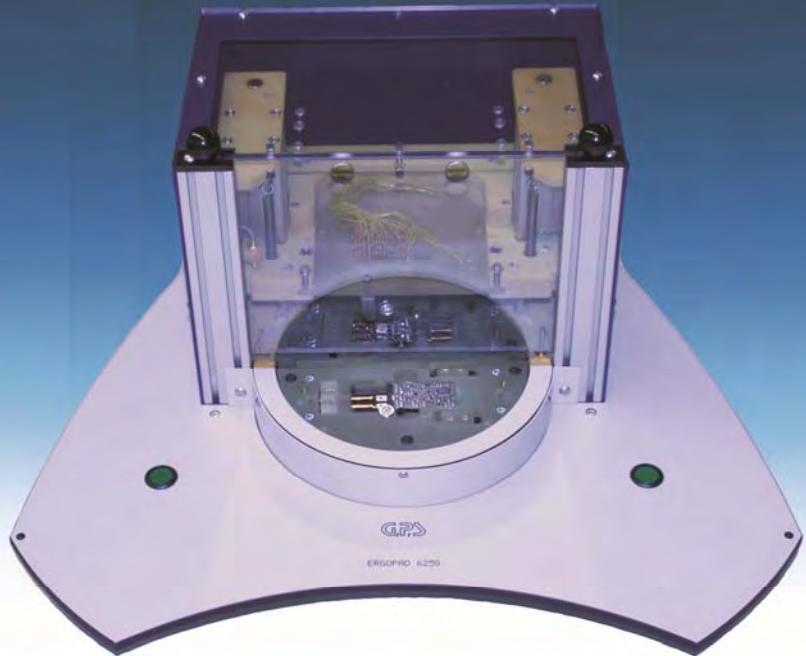

1. Turn Table Unit WA-P-6250

Turn Table Unit

Pneumatically Operated Station

WA-P-6250

Spezification

- Ergonomically designed Stand-Alone-Fixture (without testsystem)
- Unit size : width 400 x height 400 x depth 360 mm
- Max. UUT size : lenght 125 x width 65 mm
- Max. testpoints : 256
- Precise probing and repetition through column guide
- Short handling time through the turn table system (two side probing)
- Quick and easy change of the probing unit
- Designed for two side probing
- Internal interface
- Costumer specified external interface
- High safety through the two-handed operating and the sensor control
- Electrical port 24V
- Pneumatical port 6 - 7 bar, oilfree
- SPS controller
- Free space for additional installations e.g. button, fiberglass etc.
- Storage box for cassette fixtures (optional)

Receiver

Virginia Panel

G12 Receiver

Specification:

- Interface are modular and reconfigurable
- Rack mount and tabletop versions available
- You can use mechanical, pneumatically or vacuum fixture
- Outside dimensions: 480 x 470 x 100 mm
- QuadraPaddle™ contacts ensure reliable connections to over 20.000 mating cycles
- Low energy consumption through mechanically locking
- Stable quality
- Exact guidance
- Vacuum- und pneumatic ports integrable
- Thermocouple and fiber optic integrable

G12 Vacuum Fixture

G12 Mass InterConnect Solution

G12-50-1100

Specification:

- Interface are modular and reconfigurable
- Rack mount and tabletop versions available
- Outside dimensions: 640 x 440 x 160 mm
- Max. working area: 440 x 280 mm
- Deskform for easy handling
- PAG - plug and guide system
- Probe plate made of G10 (CP quality) 10 mm
- GPS ESD sealing of vacuum chamber
- Protecting erector standard
- Rounded edges (for a better intake)
- QuadraPaddle™ contacts ensure reliable connections to over 20.000 mating cycles
- Stable quality through the case and the aluminium frame
- Exact guidance
- Vacuum- und pneumatic ports integrable
- Thermocouple and fiber optic integrable

G12 Mechanical Fixtures

Mechanical Fixtures G12-M-1500-I for G12 Receiver

Specification:

- Interface are modular and reconfigurable
- Parallel mechanical pressure unit
- Outside dimensions: 530 x 450 x 240 mm
- Max. working area : 330 x 180 mm
- Lower-cost through the changeable unit
- Fast change of the probe plate and the pushdown plate
- Internal interface holding for max. 6 interface-blocks, each have 170 pins
- Probe plate and pushdown plate are not included
- Various accessories
- Individual completion through the unit assembly system
- QuadraPaddle™ contacts ensure reliable connections to over 20.000 mating cycles
- Deskform for easy handling
- Stable quality through the case and the aluminium frame
- Exact guidance
- Thermocouple and fiber optic integrable

Receiver

Interface

Block Interface TSI-50-5000

Specification

- Suited to all fixtures with Pylon-Blocks (R&S , GenRad , ITA)
- Receiver interface extern customer specified
- Can be assembled to various cases
- Outside dimensions: 510 x 440 x 90 mm
- Max. number of testpoints 1700
- Low energy consumption through mechanically locking
- Stable quality
- Exact guidance through steel tacks (pins)
- Two vacuum ports incl.
- Various interface blocks available (must be ordered separately)

V. LED –Test

- 1. Colour Sensor**
- 2. GPS 3-5 Digital Colour Analyzer**

Accessories

LED Test

Specification:

The color sensor consists in three photodiodes, which are integrated in one chip. They are arranged as segments in a circle with a diameter of 2,0 mm. The color sensor allow signal frequencies up to the MHz range. In order to reach a low crosstalk, the individual sections were separated. The color sensors are sensitized with dielectric colour filters, especially for the primary colours red, green and blue.

Application:

- Quality control
- Production surveillance
- Control of production processes

Features:

- High transmission
- Low aging of the filter
- High temperature stability
- High signal frequencies
- Reduced crosstalk
- Small construction

Specification:

Power supply: 5 Volt max. 20mA
Measuring range: 0 - 5 Volt

| OUTPUT | LED whit | LED green | LED blue | LED red | LED yellow | non |
|----------|----------|-----------|----------|---------|------------|-------|
| Vout 1rt | 0.4 V | 2.4 V | 2.5 V | 0.0 V | 2.4 V | 2.5 V |
| Vout 2bl | 0.8 V | 2.3 V | 0.0 V | 2.2 V | 2.5 V | 2.5 V |
| Vout 3gn | 0.4 V | 0.0 V | 2.0 V | 2.0 V | 2.2 V | 2.5 V |
| Vout 4ge | 5.0 V | 5.0 V | 5.0 V | 5.0 V | 4.0 V | 2.5 V |

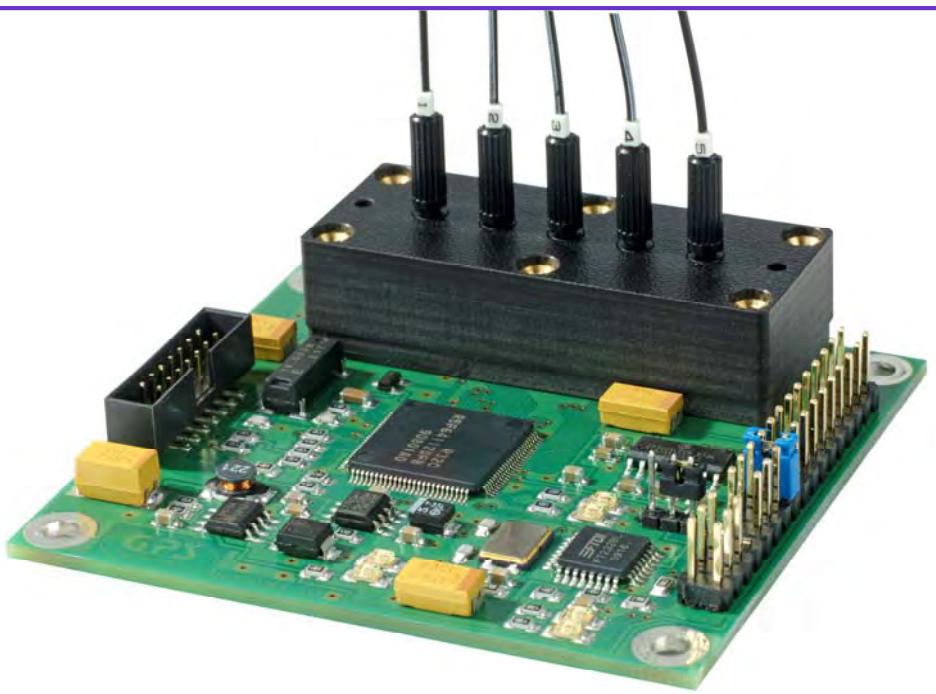

LED Digital Colour Analyzer

LED-Test

LED Digital Colour Analyzer 3/ 5 Channels

Specifications

The GPS Digital Colour Analyzer allows fast and automatic testing the Colour and Brightness (Intensity) of Light Emitting Devices (LEDs). Tests the full spectrum of visible LEDs from very dim to the brightest on the market. The new digital colour sensor allows unrivalled repeatability for colour and intensity testing.

The LED Analyzer is used in the following applications:

- PCB LED Testing
- Automotive Dashboard / Brake Lights, Daytime running lights / Interior
- Switches with LED Backlighting
- Mobile Applications - Cell Phones, Backlighting
- Industrial and Medical Instruments
- Signaling
- Architectural Lighting

Key Features:

- Designed for any test platforms
- Tests the full spectrum of visible LEDs
- Measures intensity from very dim to the brightest LEDs
- The digital sensor allows a colour depth of 12 bit resolution for the colours red, green and blue
- Unrivalled repeatability for colour and intensity readings
- Available with 3 or 5 channels
- Allows up to 495 LEDs to test simultaneously
- Ease of Use – Instant on
- Captures Puls-Width-Modulated (PWM) LEDs
- Measurement results in RGB, HIS Colour Wheel, CIE Diagram and colour temperature in °K
- Uses flexible plastic Optical Fibres of 1mm and 2.2mm diameter
- Designed for Testing Colour and White LEDs
- RS 232 and USB Interface
- Tests Bicolour and Tricolour LEDs
- Excellent Technical Support
- Free Drivers and Software
- Robust and reliable design

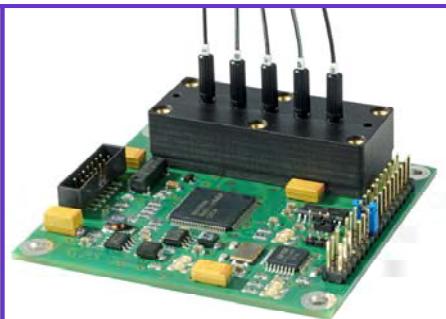

LED Digital Colour Analyzer

LED-Test

Specifications:

Physical:

| | |
|------------------------------|---------------------------------|
| Board Dimensions | 70mm x 65mm x 35mm (W x L x H) |
| Fiber Length | 600mm |
| Fiber Diameter | 1,00mm or 2,20mm |
| Number of Fibers | 3 or 5 |
| Minimum bend radius of Fiber | 10mm |
| Operating Temperature Range | 0C° to +50C° |

Electrical:

| | |
|----------------|----------------------------------|
| Supply Voltage | 5,0 V |
| Supply Current | 80 mA |
| Interface | RS232 (Serial) and USB Interface |

Optical:

| | | |
|----------------------------------|--------|------------------|
| Red Peak Efficiency Wavelength | 615 nm | ± 3 nm |
| Green Peak Efficiency Wavelength | 540 nm | ± 4 nm |
| Blue Peak Efficiency Wavelength | 465 nm | ± 3 nm |
| Total Operating Wavelength Range | | 450 nm to 650 nm |

Accuracy:

| | | |
|-------------------------------|---------|---|
| Chromaticity x, y (CIE 1931) | ± 0,01 | for x= 0,31 ; y= 0,35 for x= 0,35 ; y= 0,38 for x= 0,46 ; y= 0,43 |
| Dominant Wavelength | 550nm | ± 5 nm |
| Correlated Colour Temperature | 2856 °K | ± 200°K |

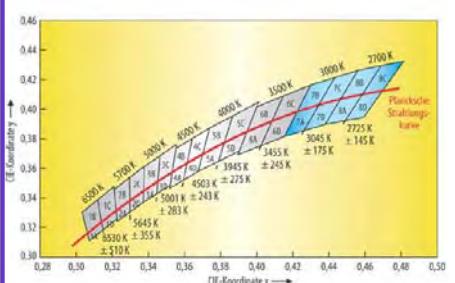

Repeatability:

| | |
|-------------------------------|----------|
| Chromaticity x, y (CIE 1931) | ± 0,0015 |
| Dominant Wavelength | ± 1 nm |
| Correlated Colour Temperature | 2856 °K |
| Hue | ± 50°K |
| Saturation | < 1% |
| Intensity | < 1% |

Calibration Service:

GPS Prüftechnik offers a service for the calibration of the LED Analyzer. In this process customers LEDs to be tested are measured with a proven calibrated spectrometer under a standardized process in our company. In the next step tristimulus values which have been measured with the LED Analyzer are adjusted to the values of the spectrometer. This takes place during uploading the firmware using a non-volatile stored offset.

Mainly white LEDs can be adjusted to the product parameters (Bins).

| Attachment for 1,00mm and 2,20mm fiber (Fiber Holder) Attachment for positioning the fiber with 1mm or 2,2mm outside diameter Order Number: Attachment E39-F9 1 Attachment E39-F9 2,2 | |
| 75 mil Socket with pressring 75 mil socket for positioning the thin fiber with 1mm outside diameter Order Number: GPS 075-SDN250N | |
| Serial Cable Order Number: GPS S - 1 | |
| USB Cable Order Number: GPS U - 1 | |

LED Digital Colour Analyzer

LED-Test

Setting an offset to calculate the tristimulus values x and y:

1. GPS Prüftechnik offers a service for the calibration of the LED Analyzer Board. In this process customers LEDs to be tested are measured with a proven calibrated spectrometer under a standardized process in our company. In the next step tristimulus values which have been measured with the LED Analyzer are adjusted to the values of the spectrometer. This takes place during uploading the firmware using a non-volatile stored offset.
2. In addition to that there is a possibility to integrate the LED Analyzer in an existing test system through an initialisation of the com-port. At this application an offset for each LED that has to be measured can be stored . However this is a volatile stored offset which get lost after switching off the board from the current source.
3. Furthermore an offset can be stored using the included software GPS LED Analyzer. This is, as described in point 2, a volatile storage space and get lost after switched off from the current source or the command "Reset board". By restarting the LED Analyzer the corresponding offset can be loaded via importing the test programm at any time.

Accessories

Counter Typ Omron

Counter

Fixture specification

- Battery-powered counter (changeable)
- Mounting hole: 45,0 x 22,2 mm
- Outside dimensions: 48,0 x 24,0 x 47,0 mm
- Reset of counter possible
- Display with 8, 4 or 5 digits
- Count rate 30Hz to 10 kHz

Accessories

Board Marker Probe

BMP-1

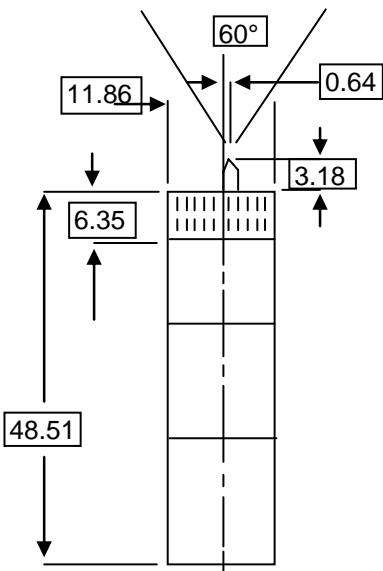

BMT-1

Specification

- Compact construction
- Marker tip spring-mounted
- Corrugated receptacle (with press ring)
- Cables and connectors incl.
- Short delivery time

- Rated Voltage: 15V DC
- Rated Current: 50 millamps
- Recomm. Duty Cycle: 1 second on min.
5 seconds off
- Full Marker Tip Travel: 1,6 mm
- Recomm. Working Travel: 1,3 mm
- Scribed Diameter: 1,3 mm
- Direction of Rotation: CCW
- Plunger Tip: Carbido
- Receptacle: Stainless steel
- Mounting Hole Size: 11,9 mm

Accessories

Changeable Box for Opens-Test

OWB-FS

OWB-TJ

OWB-TJ-C

OWB-OXP

Delivery without acrylic plastic lid

Technical specification

- Unit for a quick change of Multiplex-Boards (MUX-Board)
- Available for Agilent, Teradyne and GenRad
- Lower-cost due to a one-off purchase of the box and of the MUX-Board
- Low energy consumption by changing
- Box made of ESD material
- Easy change of the connectors (in case of wear)
- Standard wiring inside the box
- The locking take place with our proofed PAG-system
- Box with connector and two PAG arrester bolts
- Delivery without MUX-Board and wiring

Accessories

Opens-Change-Box

Accessories for OWB-xxx

| | | | |
|---|----------|--|----------|
| Specification: Opens-Change-Box Box with connectors and PAG-plugs, without FS-MB and wiring | OWB-FS | Specification: Opens-Change-Box Box with connectors and PAG-plugs, without TJ-MB and wiring | OWB-TJ |

| Specification: Wiring of the Change-Box | OWB-VER | Specification: Construction kit for the fixture,connectors and PAG-arrester bolts incl., (without wiring) | OWB-ADAP |
| | | | |

Accessories

Opens-Test Mechanic

OTM-25 to OTM-35

Fixture specification

- Plain Opens-Test -Mechanic, foldable
- Available in three different sizes (25, 32 and 35 mm)
- Size can be adapted individual
- Suited to Opens -Test sensor plates of Agilent, GenRad, IFR and Teradyne
- No additional locking necessary
- Gas spring, grip and cover incl.
- Delivery without sensor plates and MUX-board

Accessories

Hinged Cover

SWH-01 to SWH-09

Fixture specification

- GPS hinged cover standard for two side probing
- Parallel hinged frame (at the last 30 mm)
- Available in seven different sizes
- Free accessibility of the UUT after opening
- Lid and pin protecting plate made of ESD acrylic plastic
- Stable quality due to G10 material (GP quality)
- Guided from four guide pins and slide sleeves
- Wear part made of high-quality steel
- Gas spring, hinge and starter switch incl.
- Sealing with 4mm loop
- Gas spring arrangement can be set universally
- Can be incorporated into all vacuum fixtures
- Push down fingers are not incl.

Accessories

Vacuum Cover

**VH-01 to
VH-14**

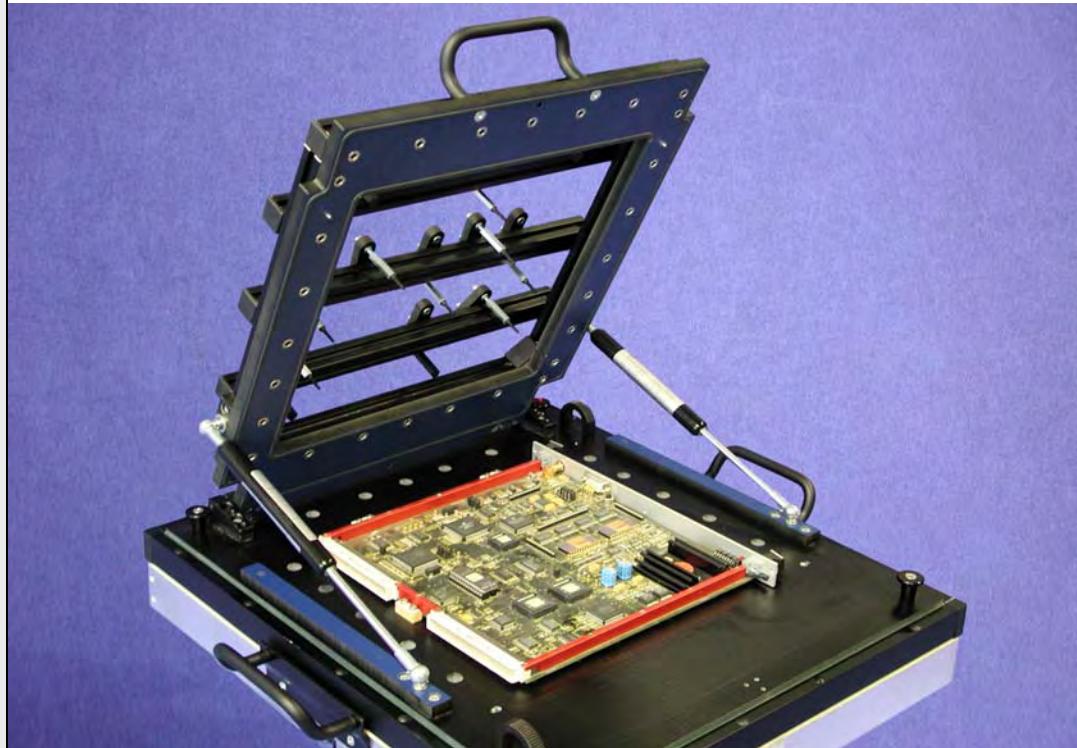

Fixture specification

- GPS Vacuum Cover standard
- Available in 14 different sizes
- Lid made of ESD acrylic plastic
- Height-adjustable through a frame system
- Frame with sealing cord, can be mounted separately (without gluing)
- Cover sealing with loop, 4mm
- Gas spring, hinge and mounting support incl.
- Ergonomically designed grip
- Can be used for all systems
- Pushdown finger is not included in the fixture kit

Accessories

Pressure unit for vacuum fixture

ADR-01

Fixture specification

- Pressure unit for vacuum-free zone
- Suited for non vacuum-tight boards
- Pushed down by vacuum
(additionally locking is not necessary)
- Free access to the board by pressed holdown element
- Stable quality through aluminium profiles
- Opens Test installation possible
- Can be set to all vacuum systems
- Pushdown crosheads and pushdown plate are not included in the unit

Accessories

Pressure unit for vacuum fixture

Accessories

Vacuum snap closure

VSV-1

Fixture specification

- Vacuum snap closure for systems without an own vacuum port
- Low-cost through an one-off purchase
- Simple fixing of the arrester bolts
- Onlocking through hooks
- Locking mechanism through two steel arrester bolts
- Vacuum port is available in all sizes
- Vacuum port straight or 90° angle

Semi Automatic Wiring System

GADWRAP-2001

Specification:

- Semi-automatic wiring system
- Software available for all common test systems
(Teradyne, GenRad, Agilent, Rohde & Schwarz, Digitaltest etc.)
- Process speed up to 120 wirings per hour
- Quick-acting clamping device for easy and fast fixture fixing
- Sizes: Width 1630 x Height 2000 x Depth 730 mm
- Traverse path: X 1250 mm Y 950 mm
- Weight: aprox. 120 kg
- Power supply: 240V
- Linear guiding over precision shafts (12mm) and ball screw drive
- Repetition accuracy +/- 0,02mm
- Stepping motors with up to 1500 rev/min (holding torque 160 Ncm)
- Incl. controll system with:
 - CNC controller for stepping motor
 - Power block
 - Interface board
 - Control board for the stepping motor
- Software, PC, tools etc. are not included (see price list)

Accessories for GADWRAP-2001
Specification:

The Gadas software is designed espacially for the semi-automatic wiring system with the following features.

Features:

- windows compatible
- easy to install
- user-friendly
- applicable to all test system
- accurate and fast wiring
- easy to learn
- quick data reading
- optical depiction
- can be turned and zoomed
- drawing up of component plans
- drawing up of wiring lists
- print of test points drawings
- customer specified interfaces
- customer specified adjustments can be stored
- great variety of defined interfaces
- depiction of the pin number, the component and the xy-coordinates
- two pre-definable text editors

System requirements:

IBM compatible with CPU-family PII or higher (min 200 MHz)
 MS Windows 95, 98 NT 3.51 or newer versions
 Main memory for Win 98, min. 64MB or Win NT, min.128MB
 Monitor 17" -19" recomended
