## FOR IMMEDIATE RELEASE

### GREENRAY'S NEW YH1420 SERIES OCXO OFFERS EXCELLENT STABILITY IN A MINIATURE PACKAGE

**Q1, 2009** – Mechanicsburg, PA – Greenray Industries has announced the availability of the YH1420 Series OCXO.

Greenray's new 1420 Series Ovenized Crystal Oscillators deliver excellent short-term stability from 10 MHz to 100MHz and feature a compact 20.32 x 12.70 x 9.40 mm (0.80 x 0.50 x 0.37 in.), ROHS-compliant, DIP package.

The YH1420 Series offers a choice of true sinewave output (Model 1421) or square-wave output (Model 1420) and either +5 or +3.3VDC supply voltage.

The YH1420 Series OCXO meets Stratum 3 requirements, and has been designed to serve as a stable reference source for telecommunications, instrumentation and radio communications applications.

Greenray Industries is a leading supplier of high precision, quartz-based oscillators for use in wireless, wired telephony, aerospace, military, satellite, and other communications applications. Information about the YH1420 Series OCXO and all Greenray products is available at [www.greenrayindustries.com](http://www.greenrayindustries.com) or via email at [sales@greenrayindustries.com](mailto:sales@greenrayindustries.com).
