Energy Solutions

Weather and Environmental Sensing

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports government and commercial customers in more than 100 countries and has approximately \$6 billion in annual revenue. The company is organized into three business segments: Communication Systems, Space and Intelligence Systems and Electronic Systems.

Harris has operations across the Middle East, where it has provided products and services for more than 50 years.

The company's broad-based capabilities set in the region includes sales, engineering, training, and customer support.

Longstanding partnerships reinforce the company's commitment to the region. Harris Atlas Systems, LLC – a joint venture between Harris Corp. and Atlas Telecom, a UAE-based technology leader – is at the forefront of delivering advanced capabilities for innovative intelligence solutions.

HARRIS INNOVATION IN THE MIDDLE EAST

DEFENCE

Harris offers a comprehensive, integrated family of digital battle management products providing real-time collaborative command, control and connectivity across all echelons.

Harris tactical radios deliver reliable, secure communications to warfighters and are the foundation for high-performance, networked, wideband systems. The company's night vision devices easily integrate with radios and tactical networks, allowing soldiers to receive texts, alerts, video and graphics directly into their goggle's display – feeds that can also be shared real time with commanders.

Customers in the Middle East also turn to Harris for integrated, multifunction, software-enabled electromagnetic spectrum protection to defend their borders. The Advanced Integrated Defensive Electronic Warfare Suite (AIDEWS) protects the air forces of Oman, Pakistan, Morocco and more.

- Tactical Radios, C4I Systems, Night Vision Equipment
- Electronic Support Measures (ESM) for surface and subsurface vessels
- Tactical Air Traffic Management and Precision Approach Radar Systems
- Border Security Systems
- Intelligence, Surveillance and Reconnaissance Systems

PUBLIC SAFETY & PROFESSIONAL COMMUNICATIONS

Harris is a leading provider of trusted communications solutions for those who defend, protect and serve. Harris provides advanced IP voice and data networks; secure, next-generation public safety grade LTE solutions and applications for voice, video and data; and industry leading multiband, multimode radios, including P25 radios.

- Radios, Dispatch Systems/Consoles
- Network Switching and Management
- Station and Site Equipment

GEOSPATIAL SOLUTIONS

Harris supports a complete range of geospatial requirements, from finished products to custom solutions, or data and analytics for a specific project. Advanced ENVI® analytics can be used to extract actionable information from geospatial data. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors.

- Nationwide Mapping
- Enterprise Analytics
- Value-Added Geospatial Services
- Custom Geospatial Software Solutions
- Wide Area Motion Imagery (WAMI) Technology

CIVIL AVIATION

From large-scale systems integration to customized communications and situational awareness solutions, Harris provides highly reliable products, systems and managed communications services for the global aviation community.

- Managed Telecommunications Services
- Voice Communication Systems
- System Wide Information Management

- Collaborative Decision Making Solutions
- Surveillance Technology and Network Infrastructure

ENERGY SOLUTIONS

Harris' HeatWave™ radio frequency heating technology powers the patented new Enhanced Solvent Extraction Incorporating Electromagnetic Heating (ESEIEH™) process. HeatWave™ applies radio frequency (RF) heating to extract heavy oil and bitumen. The process eliminates the need for water and operates at lower reservoir temperature and pressure.

WEATHER AND ENVIRONMENTAL SENSING

Harris designs advanced technologies that capture, analyze and visualize data from every altitude to improve understanding and prediction of weather and climate, and enhance Earth observation. Harris electro-optical sensors and payloads are on multiple next-generation weather systems.

- Spaceborne Weather and Climate Sensors and Payloads
- Ground Processing and Distribution
- Ground-based Greenhouse Gas Monitoring Systems
- Weather Data Analytics

LOCATIONS

Harris has six locations across the Middle East, staffed by highly trained and dedicated employees who understand the needs of customers in the region.
