Managed Communications

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports customers in more than 100 countries and has approximately \$7.5 billion in annual revenue and 21,000 employees worldwide. The company is organized into four business segments: Communication Systems, Space and Intelligence Systems, Electronic Systems and Critical Networks.

In Australia, Harris has a diverse, broad-based capabilities set that include sales, research and development, engineering, manufacturing, sustainment and comprehensive support services.

Harris is a proud designer and supplier of tactical communications technology and engineering services for the long-term modernization programs of Australia's Department of Defence.

Harris has served government and commercial customers across Australia for more than 25 years. Today, Harris has facilities in three cities, including a 10,000 square-meter communications logistics centre, and employs more than 150 professionals who understand the unique needs and challenges of customers in the region.

ADVANCED SOLUTIONS FOR AUSTRALIAN CUSTOMERS

DEFENCE SOLUTIONS

Harris is the leading supplier of tactical radio communications systems for Australia's military forces. The Falcon family of radios delivers reliable, secure communications to warfighters and create a foundation for high-performance, networked systems.

Harris night vision devices, integrated with radios and tactical networks, enable soldiers to receive texts, alerts or images directly into the goggle's display while allowing commanders to see what soldiers see.

Electronic Warfare technology from Harris provides electronic support measures (ESM) and electronic protect capabilities for the Royal Australian Navy and for the F/A-18 aircraft of the Royal Australian Air Force.

The Harris office in Melbourne, Australia, is the technology centre for the company's C4I business and the SwitchplusIP® product, which provides interoperable communications solutions in applications ranging from tactical environments to large, fixed-site national command and control centres.

Customers are also turning to Harris for integrated, multispectral situational awareness solutions that blend radars, sonars and sensors to help defeat current and emerging threats along maritime borders.

- C4I Systems, Tactical Radios, Night Vision Equipment
- Electronic Warfare Systems
- Undersea Systems, Radars
- Border Security Systems
- Intelligence, Surveillance and Reconnaissance Systems

GEOSPATIAL SOLUTIONS

Harris supports a complete range of requirements, from finished geospatial products to custom solutions, or data and analytics for a specific project. Advanced ENVI® analytics can be used to extract actionable information from geospatial data. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors.

- Nationwide Mapping (LiDAR)
- Enterprise Analytics
- Value-Added Geospatial Services
- Custom Geospatial Software Solutions

WEATHER AND ENVIRONMENT SENSING

Harris designs advanced technologies that capture, analyze and visualize data from every altitude to improve understanding of weather and climate, and enhance Earth observation. Harris electro-optical payloads and sensors are on multiple next-generation weather systems.

- Spaceborne Climate Sensors and Payloads
- Ground Processing and Distribution
- Weather Data Analytics

CIVIL AVIATION

From large-scale systems integration to customized communications and situational awareness solutions, Harris provides highly reliable products, systems and managed communications services worldwide. The company's Australia-based engineering workforce develops systems and software contributing to Harris' international voice switching solutions for civil air traffic control and to the company's public safety communications solutions. For example, Harris technology integrates all voice communications, and

alarm and telemetry monitoring for the Aviation Rescue Fire Fighting station at Newman Airport in western Australia.

- Managed Telecommunications Services
- Voice Communication Systems
- System Wide Information Management
- Collaborative Decision Making Solutions

MANAGED COMMUNICATIONS

Harris CapRock® Communications is the world's largest provider of fully managed communications services to critical operations in remote and harsh environments, including government, energy and maritime industries. CapRock® One is the industry's most intelligent managed communications service, providing an always-on, best connection unified platform that supports satellite, wireless and terrestrial connectivity.

LOCATIONS

Harris facilities in Australia support sales and program offices, system and vehicular integration, as well as training, maintenance and logistics services.
