VSAT/Remote Connectivity

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports customers in more than 100 countries and has approximately \$7.5 billion in annual revenue and 21,000 employees worldwide. The company is organized into four business segments: Communication Systems, Space and Intelligence Systems, Electronic Systems and Critical Networks.

With more than 600 employees and five major facilities, the company's UK operations are the hub of Harris' expanding European business. In 2016, Harris received the Innovation in Technology Award from UK Trade & Investment for contributions to the UK economy and our support for the UK Armed Forces.

The company has been a proud designer and supplier of the Bowman tactical communications system since 2001, and is partnered with UK industry in other advanced defence initiatives.

Harris has a diverse and broad-based capabilities set in the UK, including sales, research and development, engineering, manufacturing, sustainment, repairs and comprehensive support services.

DEFENCE

Harris is a leading designer and supplier of the UK Bowman tactical communication system, with more than 50,000 radios in service. Harris' UK-based manufacturing, testing, and R&D capabilities are key to the Bowman partnership, and to meeting critical communications needs for the UK and international customers. Harris is the #1 provider of Night Vision to the UK MOD and has provided in-country support for over 40,000 goggles. The company offers a full range of advanced defence-related technologies, including:

- Tactical Radio Systems, Night Vision
- Counter IED, Robotics
- Electronic Warfare, Avionics
- Intelligence, Surveillance and Reconnaissance Systems
- Undersea Systems, Radars

CIVIL AVIATION

From large-scale systems integration to customised air traffic management communications and situational awareness solutions, Harris provides highly reliable, products, systems and managed communications services worldwide. The company was selected by NATS to modernize the UK's air traffic management services with Harris' next-generation, cloud-based Voice Communications System for the 21st Century (VCS21). Harris Civil Aviation offerings include:

- Managed Telecommunications services
- Voice Communication Systems and Switches
- System Wide Information Management
- Weather Information Services
- Airport and Airline Operations Management

GEOSPATIAL SOLUTIONS

Harris Geospatial Solutions in the UK supports a complete range of requirements, from finished geospatial products to custom solutions, or data and analytics for a specific project. Advanced ENVI® analytics can be used to extract actionable information from geospatial data. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors. For other data types, the Harris Geospatial Marketplace provides access to the world's premier satellite, aerial, elevation and vector data. Harris experts can deliver custom products and solutions or provide in-person consulting to meet the project needs of customers.

- Nationwide Mapping (LiDAR)
- Enterprise Analytics
- Infrastructure, Utilities Planning, Forestry
- Custom Geospatial Software Solutions

VSAT/REMOTE CONNECTIVITY

Harris CapRock Communications is the world's largest provider of fully managed communications services to critical operations in remote and harsh environments. The business owns and operates a robust global infrastructure that includes teleports on six continents, five 24/7 customer support centres, a local presence in 24 countries and hundreds of global field service personnel. Harris CapRock employs more than 200 people in the UK. It primarily serves the energy market – focusing on oil and gas installations in the North Sea. Harris CapRock is also heavily involved with passenger vessel and international government markets.
