Geospatial Solutions

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports customers in more than 100 countries and has approximately \$7.5 billion in annual revenue and 21,000 employees worldwide. The company is organized into four business segments: Communication Systems, Space and Intelligence Systems, Electronic Systems and Critical Networks.

The culturally and economically diverse Asia Pacific region shares many common challenges. These include securing thousands of miles of vulnerable coastline and borders, guarding against threats to safety and security, and developing the infrastructure essential for continued economic growth. Helping customers meet these needs is the mission of Harris Corporation's Asia Pacific (APAC) business.

With more than 350 employees, over 15 locations, and headquarters in Singapore, the company's APAC operations are easily accessible and available, forming the hub for Harris' expanding business in the region. These locations are managed and staffed by local individuals who have a comprehensive understanding of the unique needs and challenges of customers in the region.

# ADVANCED HARRIS SOLUTIONS FOR ASIA PACIFIC CUSTOMERS

Harris delivers high-value solutions across APAC with diverse, broad-based capabilities including sales, research and development, engineering, manufacturing, sustainment and comprehensive support services. The company is committed to operational and customer excellence as an integral part of its business strategy. Harris solutions are developed by local people for local markets:

## DEFENCE/MILITARY

- Army, Air Force, Navy and Marine Corps
- Maritime Domain Awareness
- Special Forces, Border and Port Security

## CIVIL/NON-MILITARY

- Air Navigation Service Providers (ANSPs)

## DEFENCE SOLUTIONS

Harris is a leading designer and supplier of defence systems to customers throughout the Asia Pacific region. The company's Harris Falcon® tactical radios deliver secure communications and create a foundation for high-performance, networked systems that address command and control, border security, counter-terrorism, disaster relief, narcotics interdiction and other applications. Night vision devices integrated with radios and tactical networks enable soldiers to receive texts, alerts or images directly into the goggle's display while allowing commanders to see what soldiers see. Customers also are turning to Harris for integrated, multi-spectral situational awareness solutions that blend radars, sonars, and sensors to help defeat current and emerging threats along maritime borders.

The company's range of advanced, defence-related products and systems includes:

- C4I Systems, Tactical Radios, Night Vision Equipment
- Border Security Systems
- Undersea Systems, Radars
- Electronic Warfare Systems
- Intelligence, Surveillance and Reconnaissance Systems
- Suspension and Release Systems

## MANAGED COMMUNICATIONS

Harris CapRock® Communications is the world's largest provider of fully managed communications services to critical operations in remote and harsh environments, including government, energy and maritime industries. CapRock® One is the industry's most intelligent managed communications service, providing an always-on, best connection unified platform that supports satellite, wireless and terrestrial connectivity.

## CIVIL AVIATION

From large-scale systems integration to customized communications and situational awareness solutions, Harris provides highly reliable products, systems and managed communications services worldwide.

- Managed Telecommunications Services
- Voice Communication Systems
- System Wide Information Management
- Collaborative Decision Making Solutions

## WEATHER AND ENVIRONMENT SENSING

Harris designs advanced technologies that capture, analyze and visualize data from every altitude to improve understanding of weather and climate, and enhance Earth observation. Harris electro-optical payloads and sensors are on multiple next-generation weather systems.

- Spaceborne Climate Sensors and Payloads
- Ground Processing and Distribution
- Weather Data Analytics

## GEOSPATIAL SOLUTIONS

Harris supports a complete range of requirements, from finished geospatial products to custom solutions, or data and analytics for a specific project. Advanced ENVI® analytics can be used to extract actionable information from geospatial data. Harris' Geiger-mode LiDAR sensor collects high-resolution data faster and more cost effectively than traditional sensors.

- Nationwide Mapping (LiDAR)
- Enterprise Analytics
- Value-Added Geospatial Services
- Custom Geospatial Software Solutions
