Title: Metal Hood with Grommet

Page 1/2

Dear Customer,

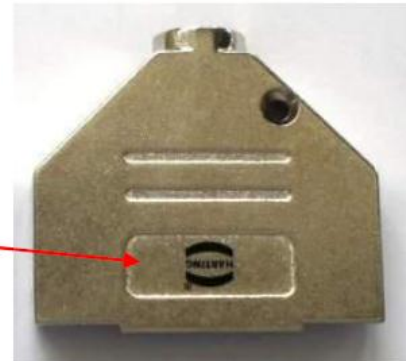

We are pleased to present the new metal hood range with the black grommets for our D-sub product range.

Modification Details:

- New position of the flat smooth plate for the HARTING logo.

Original position of the Logo

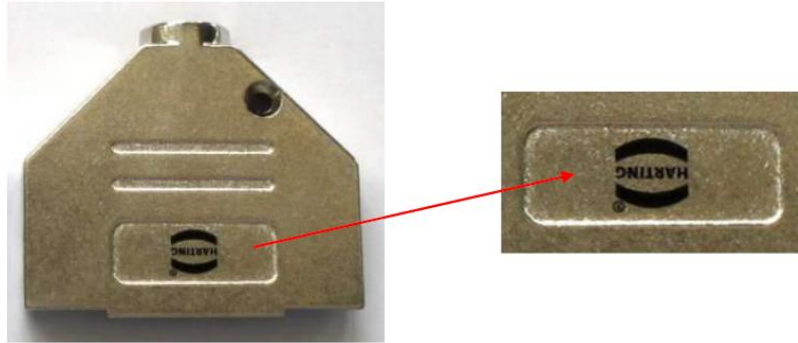

New position of the Logo

- New, perfectly smooth inner side surface.

- Reversed orientation of the HARTING logo.

Modification Benefits:

- New position of the HARTING logo eliminates the risk of the logo being erased after many mating and unmating cycles, since the area where the logo is located is never touched during those cycles.
- New flat surface of the inner side of the hood ensures better quality and functionality.
- New orientation of the HARTING logo ensures that you can clearly read the logo when the cable is mated.

Modification Implementation and Availability:

This modification, which was implemented few weeks ago, will take place progressively. There **will be no part number change** since they are form, fit and functionally compatible with the “old” design. Below are the first part numbers with the new changes implemented.

- 09 67 015 0333
- 09 67 009 0333
- 09 67 025 0343
- 09 67 025 0348

The complete shift to the new design will be finished by the end of March 2013.

Please don't hesitate to contact our technical support if you have any questions.
