Title: GenderChanger M12 d-coded

Dear Ladies and Gentlemen,

Herewith, we inform you that the production of the actual type of the well-know GenderChanger M12-coded (2103 381 6405) will be discontinued at the 30th of September 2015.

We will switch completely over to the new design, which was already introduced into the market. The availability of the d-coded version was announced by PI/HARAX/14/33/ABCD.

Orders for the old design (2103 381 6405) can be placed in the system until the 1st of June. After that time we change towards the new design.

Reasons for this change is the more reliable and stable production process. Technical data remain the same, the outer dimensions became a little bigger. Please check the corresponding drawings as well.

The well-known p/n will change as follows:

2103 381 6401 is the follow-up for 2103 381 6405

2103 381 6405 will be deleted!

Schedule:

2103 381 6401 can be ordered since April 2014

2103 381 6405 can be ordered until the 1st of June 2015

With the update of the DeviceCon catalogue the old p/n as well as the old pictures will dissappear!

There is a last order option for the products. To exercise this option, please contact your distribution partner within two month of the notification issue date. Your distribution partner will also be happy to answer any other questions you may have regarding the notification.

Customers who get 2103 381 6405 as a brandlabel part will be handled separately!
