

A higher level of performance

Application Reference

Reliable level measurement of plastic granule/powder silos and bins

Application problem:

The client had been looking for reliable level measurement in plastic granules and plastic powder silos that were pneumatically filled. The problem was during filling the existing level transmitters would lose their signal.

Solution:

We installed low frequency 20kHz and 15kHz transducers that penetrated the dust and turbulence during filling. We also installed high level Gladiator Vibration switches as a failsafe high switch.

Ordering information:

Sultan Level Part number:
AWRT1534XXXC15XX
AWR234SUXXX

Vibration Switch Part Number:
VS1100VSS11STN10XP150

Application guaranteed!

Hawk is a world leader in level, position and flow measurement, providing cutting edge equipment to the global industrial market. We have 30 years of experience and a record of success in a wide range of areas including mining/mineral processing, water supply/waste water, bulk material handling and chemical. Our on-going commitment is to provide industry leading technology and cost effective solutions.
