

Technical Data Sheet Dripstop® 923

December 2009

Page 1 of 3

Product Description

Hernon® Dripstop® 923 is a single component, paste-like anaerobic pipe sealant compound. The product cures when confined in the absence of air between close fitting metal surfaces. This industrial grade sealant develops controlled low strength to facilitate disassembly.

Product Certification

NSF International Certified to ANSI/NSF Standard 61 for use in commercial and residential potable water systems not exceeding 82°C (180°F).

Typical Applications

Dripstop® 923 is recommended for sealing metal tapered pipe threads and fittings up to 2 inches (5cm) NPT for industrial applications in the chemical processing, petroleum refining, pulp/paper, waste treatment, textile, utilities/power generation, marine, automotive, industrial equipment, gas compression and distribution industries. It is also recommended for industrial plant fluid power systems.

Typical Properties (Uncured)

Property	Value
Resin	Methacrylate ester
Appearance	White paste
Viscosity @ 25°C, cP	200,000 to 400,000
Specific gravity	1.16
Flash point	See MSDS

Typical Properties (Cured)

Property	Value
Coefficient of thermal expansion, ASTM D696, K ⁻¹	80 × 10 ⁻⁶
Coefficient of thermal conductivity, ASTM C177, W / m ^o K	0.1
Specific Heat, kJ/(kg·K)	0.3
Pressure Resistance, psi	10,000
Temperature Range, °C (°F)	-55 to 150 (-65 to 300)

Typical Curing Performance

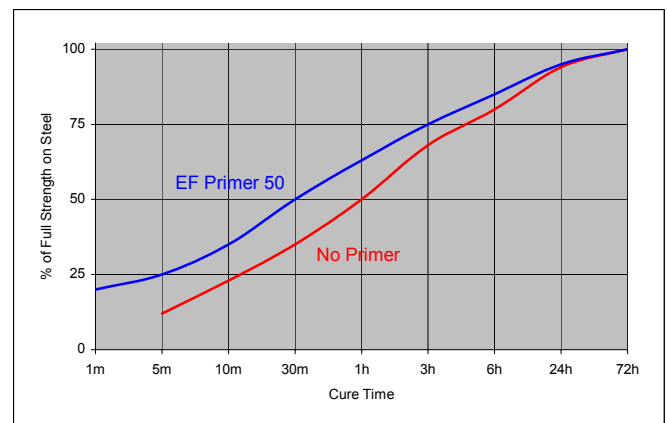

Cure Speed vs. Temperature

The rate of cure will depend on the ambient temperature. The graph shows the breakaway strength developed with time at different temperatures on 3/8 inch NPT steel pipe tees and plugs and tested according to ASTM D6396.

Cure Speed vs. Primer

When cure speed is unacceptably long (because of substrate, temperature or gap), performance may be improved by treating the surface with primer. The graph below shows breakaway strength developed with time using **EF® Primer 50** on 3/8 inch NPT steel pipe tees and plugs and tested according to ASTM D6396.

Typical Cured Performance

Breakaway Torque, ASTM D6396
3/8 inch NPT steel pipe tees and plugs

Cure Condition	N•m (In-lb)
72 hours at 22°C	5 (45)

Breakaway Torque, ISO 10964
3/8 x 24 steel nuts (grade 2) and bolts (grade 2)

Cure Condition	N•m (In-lb)
24 hours at 22°C	≥ 2.8 (25)
24 hours at 93°C	≥ 2.3 (20)

Shear Strength, ISO 10123
Steel pins and collars

Cure Condition	N/mm ² (psi)
24 hours at 93°C	≥ 1 (145)

Typical Environmental Resistance

Cured for 72 hours @ 22°C
Breakloose Torque, ISO 10964, pretorqued to 1.1 N•m
M10 steel nuts and bolts

Heat Aging

Aged at temperature indicated - Tested at (22°C).

Chemical/Solvent Resistance

Aged 720 hours at conditions indicated, tested at 22°C.

Chemical/Solvent	°C	% of Initial Strength
Motor oil	87	100
Unleaded Gasoline	87	100
Phosphate Ester	87	100
Isopropanol	87	100
Air	87	100
Distilled Water	87	100
Automatic Transmission Fluid	87	100
Brake Fluid	87	92

General Information

This product is not recommended for use in pure oxygen and/or oxygen rich systems and should not be selected as a sealant for chlorine or other strong oxidizing materials.

For safe handling information on this product, consult the Material Safety Data Sheet (MSDS).

Where aqueous washing systems are used to clean the surfaces before bonding, it is important to check for compatibility of the washing solution with the adhesive. In some cases these aqueous washes can affect the cure and performance of the adhesive.

This product is not normally recommended for use on plastics (particularly thermoplastic materials where stress cracking of the plastic could result). It is recommended to confirm compatibility of the product with such substrates.

Directions For Use

Assembly

- For best results, clean all surfaces (external and internal) with a **Hernon®** cleaning solvent and allow to dry.
- If the material is an inactive metal or the cure speed is too slow, spray all threads with **Hernon® EF® Primer 49 or 50** and allow to dry.
- Apply a 360° bead of product to the leading threads of the male fitting, leaving the first thread free. Force the material into the threads to thoroughly fill the voids. For bigger threads and voids, adjust product amount accordingly and apply a 360° bead of product on the female threads also.
- Using accepted trade practices, assemble and wrench tighten fittings until proper alignment is obtained.
- Properly tightened fittings will seal instantly to moderate pressures. For maximum pressure resistance and solvent resistance allow the product to cure a minimum of 24 hours.

Disassembly and Cleanup

- Remove with standard hand tools.
- In rare instances where hand tools do not work because of excessive engagement length, apply localized heat to nut or bolt to approximately 250 °C. Disassemble while hot.
- Once disassembled, cured adhesive can be removed with **Hernon® Gasket Remover 30**.

Storage

Dripstop® 923 should be stored in a cool, dry location in unopened containers at a temperature between 46°F to 82°F (8°C to 28°C) unless otherwise labeled. Optimal storage is at the lower half of this temperature range. To prevent contamination of unused material, do not return any material to its original container.

Dispensing Equipment

Hernon® offers a complete line of semi and fully automated dispensing equipment. Contact **Hernon® Sales** for additional information.

These suggestions and data are based on information we believe to be reliable and accurate, but no guarantee of their accuracy is made. HERNON MANUFACTURING®, INC. shall not be liable for any damage, loss or injury, direct or consequential arising out of the use or the inability to use the product. In every case, we urge and recommend that purchasers, before using any product in full scale production, make their own tests to determine whether the product is of satisfactory quality and suitability for their operations, and the user assumes all risk and liability whatsoever, in connection therewith. Hernon's Quality Management System for the design and manufacture of high performance adhesives and sealants is registered to the ISO 9001 Quality Standard.
