**TAKE COMFORT IN
YOUR HONEYWELL
CONNECTED HOME.**

Comfort, safety, security.
It's in your hands.

TAKE COMFORT IN OUR EXPERTISE.

People all over the world have been taking comfort in Honeywell technology for more than 100 years.

We've made air travel safer, road travel more efficient and helped put a man on the moon. And now you can take comfort too, in the range of connected products we've developed for your home.

YOUR HONEYWELL CONNECTED HOME.

We know life can be hectic, and schedules sometimes unpredictable. That's why we've designed our products around the way real people live.

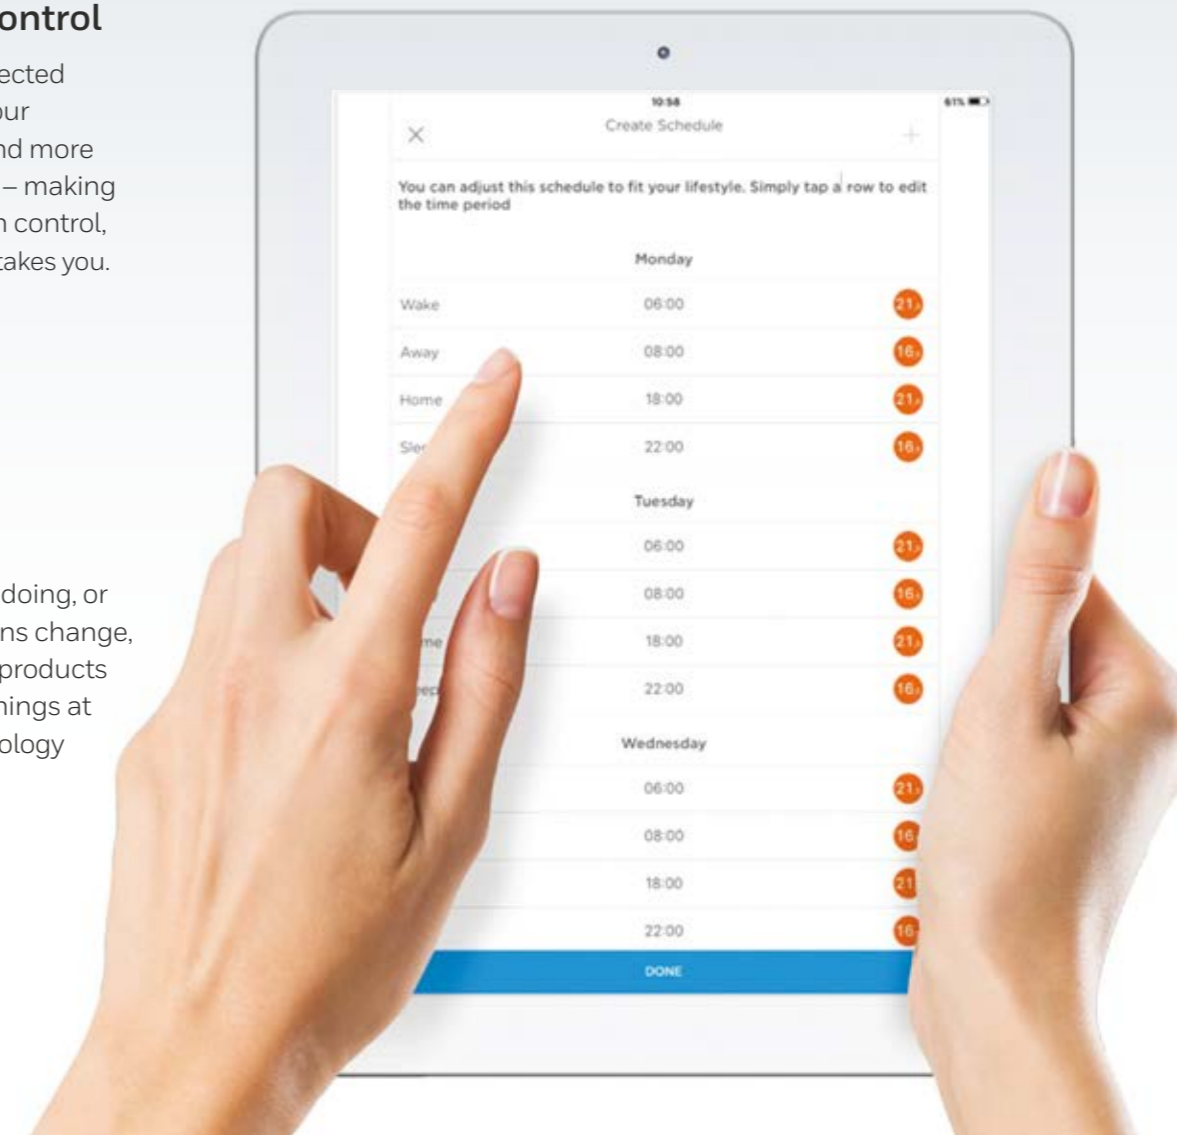

Putting you in control

Our wireless and connected products help make your home safer, smarter and more comfortable than ever – making it easy for you to stay in control, wherever your journey takes you.

Smarter living made simple

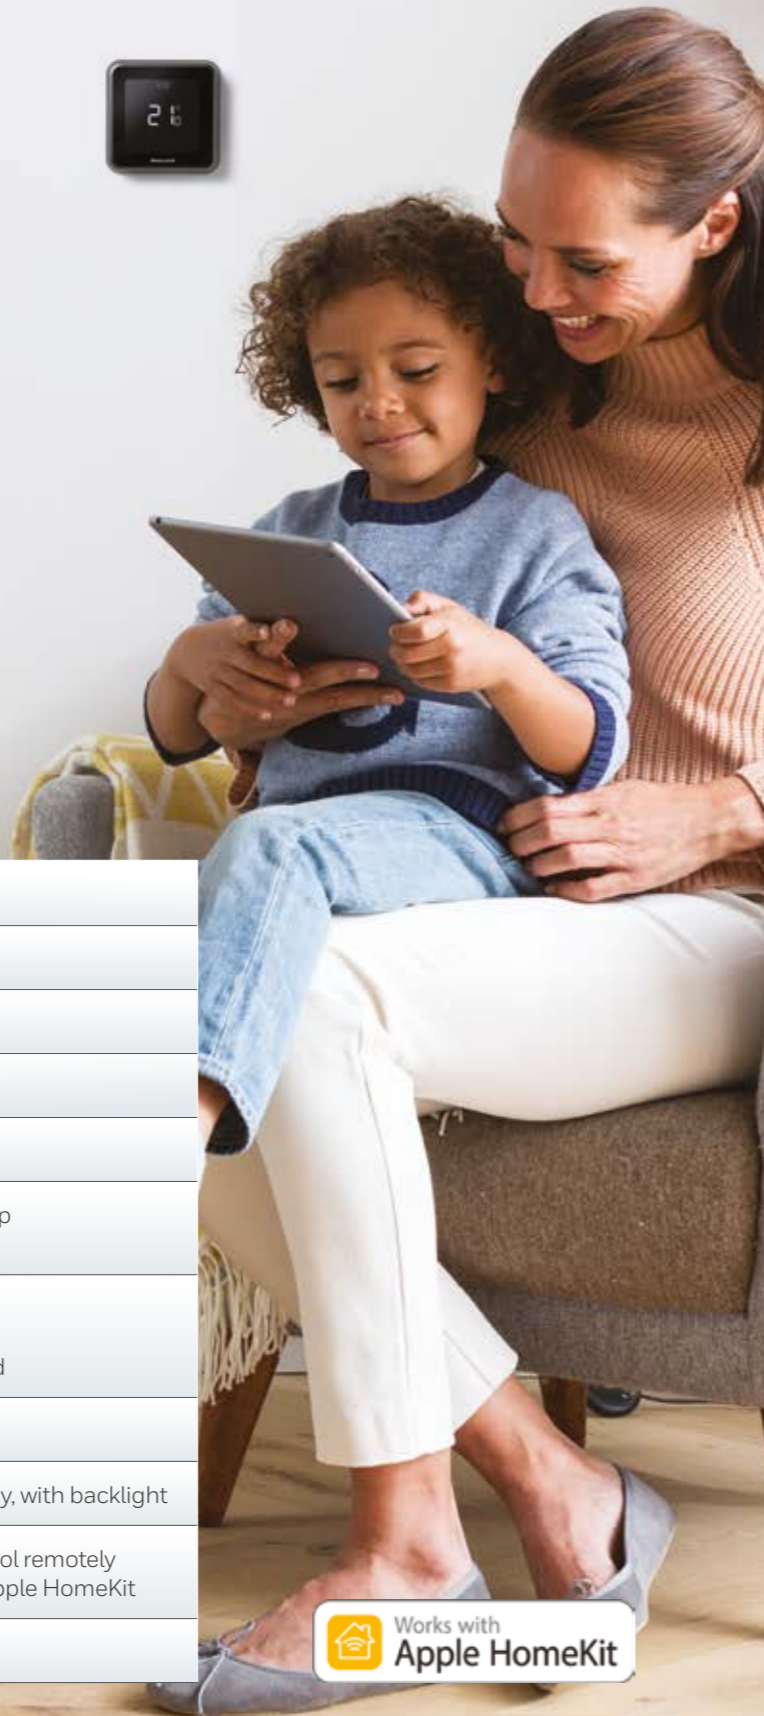

No matter what you're doing, or how suddenly your plans change, Honeywell connected products help you take care of things at home. It's smart technology that's simple to use.

LYRIC T6 AND T6R SMART THERMOSTAT.

The thermostat that adapts to you.

Heading home early? Out late with friends? Control your Lyric thermostat from anywhere using the Lyric app or Apple HomeKit.*

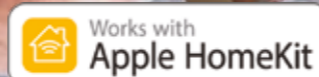

Works with Apple HomeKit

Apple HomeKit is a common language that smart devices can understand, support and control via Siri®, the Apple voice assistant. It is an efficient way of managing your smart home, rather than using multiple apps that only do one thing. It is likely to change your home, in a good way, forever.

We continually work with partners like Apple to make sure our smart technologies keep up with your connected home, day to day and year after year.

Lyric T6

Lyric T6R

Smart features

The Lyric thermostat knows how long it takes to get your home to the right temperature, removing the guesswork and saving you money on your energy bills. Its intelligent comfort control helps maintain the desired temperature when you need it. So your home will be comfy and cosy, whatever the weather.

Programmable, adjustable, adaptable

Like an ordinary thermostat, you can program the Lyric T6 and T6R Smart thermostat to switch on and off at times that suit you. If you'd rather control it manually, you can use the thermostat on the wall, connect to the Lyric app, or use Apple HomeKit. It will even adapt to your lifestyle, by responding to your location. Whatever you choose, you'll use less energy. Which means lower bills, and more money to spend on the things you love.

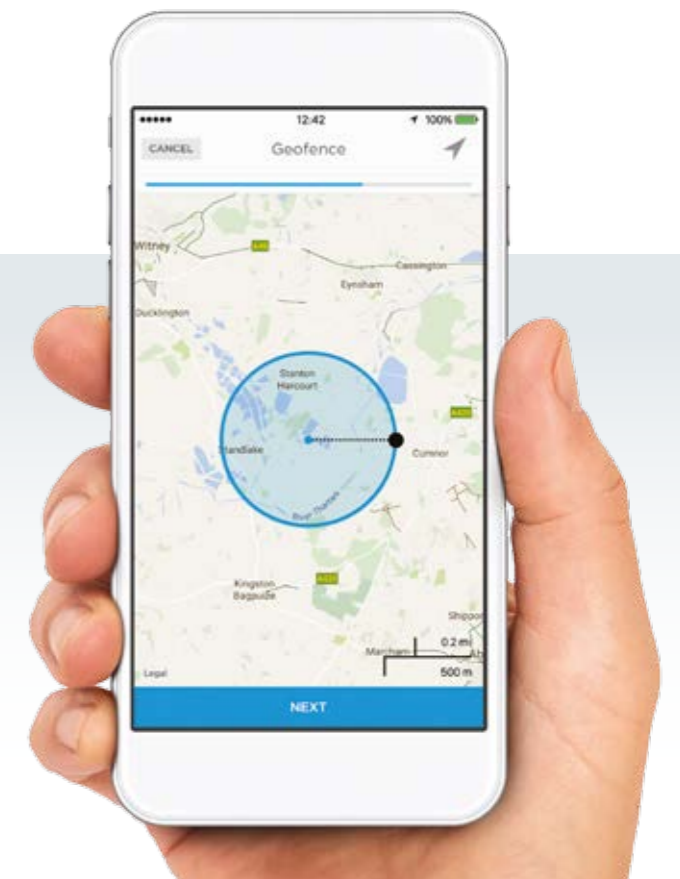

Simple to set up and easy to use

Setting up the thermostat is easy. Our app will guide you through each step, and you'll find an easy-to-follow user guide online. Visit getconnected.honeywell.com to find a Honeywell recognised installer to expertly fit it for you.

Location Based Temperature Control (Geofencing)

When you connect your thermostat to your smartphone, it uses your smartphone location to know where you are. It automatically knows when you're coming home and makes sure your heating is on when you arrive, turning it off when you leave again, saving you money.

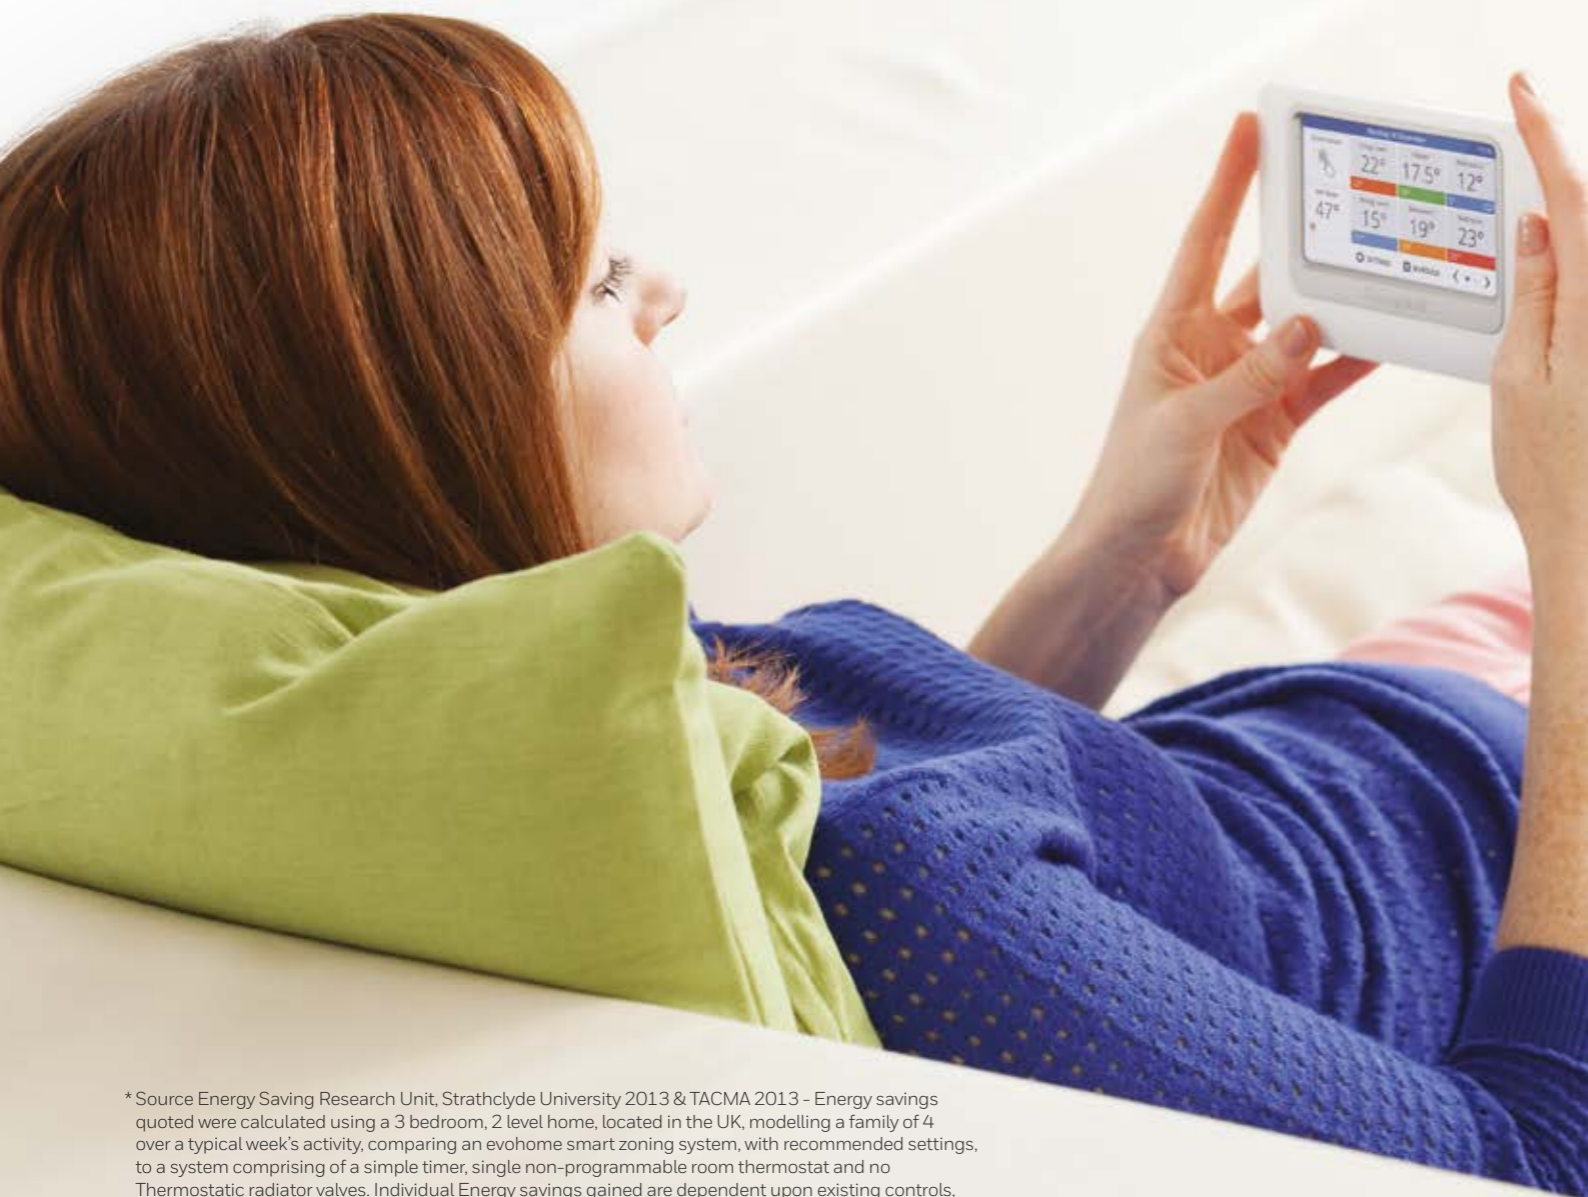

EVOHOME WI-FI.

Create the perfect Comfort zone.

evohome Wi-Fi lets you simply and effectively control your home temperature room by room.

Control and energy savings

Running late, or coming home ahead of schedule? With evohome you can turn your heating on and off, up and down, with our Total Connect Comfort app. By only heating where you need to, when you need to, using smart zoning you can save as much as 40%* on your energy bills.

* Source Energy Saving Research Unit, Strathclyde University 2013 & TACMA 2013 - Energy savings quoted were calculated using a 3 bedroom, 2 level home, located in the UK, modelling a family of 4 over a typical week's activity, comparing an evohome smart zoning system, with recommended settings, to a system comprising of a simple timer, single non-programmable room thermostat and no Thermostatic radiator valves. Individual Energy savings gained are dependent upon existing controls, environment and lifestyle.

Number of zones supported	1-12
Combi boiler support	Yes
OpenTherm boiler support	Yes (requires OpenTherm bridge)
Traditional boiler support	Yes
Stored hot water support	Yes
7 day scheduling and control	Yes, via app and evohome controller
Installation	Table stand or optional wall mount
Underfloor heating (hydronic) support	Yes
Display	Full colour wireless display
Remote Access	Built in Wi-Fi, control remotely via Total Connect Comfort app
User Interface	Touch screen

Smart zoning

It makes sense to only heat the parts of your home that you're actually using. With evohome you can create smart zones in your home – maybe all of the bedrooms, or the kitchen and dining room. So you can be comfortable in the rooms you're using, and turn the heat down in the ones you're not.

Optimise your comfort

Which rooms to heat? What temperature and when? It's all simple with evohome. It's not just about switching your heating on and off. It's about setting the temperature for different times of the day, for every zone, for the whole week. evohome lets you create your own heating schedule that reflects your lifestyle.

SINGLE ZONE THERMOSTAT.

Simple, affordable heating control.

Single Zone Thermostat takes care of your comfort, and helps save money on your energy bills, by allowing you to control your heating schedule no matter where you are.

Control and energy savings

Want to manage your heating when you're on the move? Simple. Just link your thermostat to a Honeywell remote gateway and you can control your home heating with our Total Connect Comfort app – wherever you are. So your home is always comfortable and you save money on your energy bills.

Number of zones supported	1
Combi boiler support	Yes
OpenTherm boiler support	Yes (requires OpenTherm bridge)
Traditional boiler support	Yes
Stored hot water support	No
7 day scheduling & control	Yes, via app only
Installation	Wall mounted wireless free installation (powered by 2x AA batteries)
Underfloor heating (hydraulic) support	Optional. Only in combination with evohome controller
Display	Mono display with backlight for night viewing
Remote access	Control remotely via gateway and Total Connect Comfort app
User Interface	Tactile dial

Fits perfectly in any home

Setting up is easy – with no wires connecting your boiler and your thermostat, you can mount it on a wall anywhere in your home. Its simple dial control and backlit display mean it's super easy to use – just turn the dial clockwise to turn your heating up, and anti-clockwise to turn it down again. Its clean, wireless modern design fits in with any style of home décor.

OpenTherm Support

Single Zone Thermostat can control the latest generation of OpenTherm boilers, ensuring precise control over your boiler temperature – helping to save you money and giving greater comfort.

EVOHOME SECURITY.

Smart, wireless security that keeps your home safe and secure.

evohome security connects you to your home, wherever you are. It monitors your home when you're away, with alerts and images sent to your smartphone. Simple to install and easy to control – wherever you are.

Protection, now and tomorrow

evohome security works just as well in a small apartment as a large house. Because it's modular, the system is designed to suit your home and can be easily adapted as your needs change. With a wide range of accessories to choose from, evohome security will fit perfectly with your needs.

Design your system

We know that every home is different. So evohome security is fully modular – simply choose from our range of accessories to create the right system for you. The security hub can work with up to 32 different items. This allows complex systems to be built using pet-friendly motion sensors, glass break sensors and indoor and outdoor alarms. These systems can then be controlled using contactless tags, wireless remote control key fobs or by using the Total Connect Comfort app. And if you have Honeywell evohome smart zoning or single zone heating, you can control your heating too, within a single app.

Simple to install, easy to use

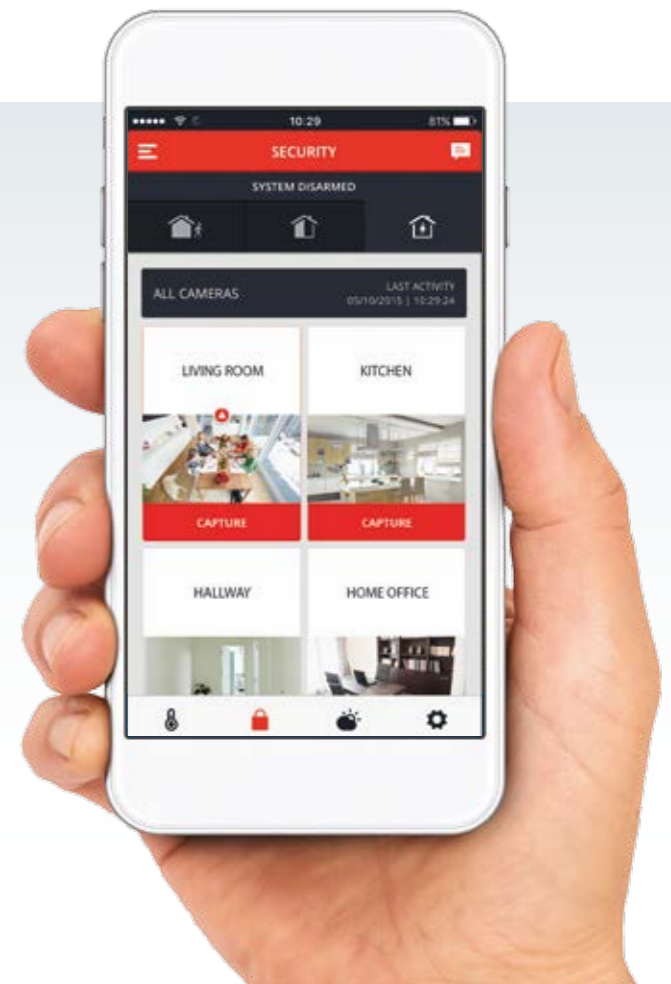

The system is completely wireless, so it's simple to install and easy to use. There are no codes to remember when users arm or disarm the system – wireless, contactless tags make life simple. The entire system is designed to suit your lifestyle and needs – you can even give access to family members and neighbours.

Security that's smart

The Total Connect Comfort app lets you know exactly what's happening at home – whether you're a few miles away, or on the other side of the world. From an intruder alert to a smoke alarm – carbon monoxide to an open window – it's got safety and security covered.

Arm the system when you leave, and your heating will turn itself off automatically, helping to save on energy bills. You can also partially arm the system from the comfort of your bed, or let a relative into your home while you're at work. And if you get a system alert while you're away, there's no need to rush home. A camera can send you a snapshot from inside your home, letting you decide how to respond.

GET CONNECTED.

Smarter homes are connected homes – better control, more comfort and bigger energy savings. Our Lyric and Total Connect Comfort apps allow you to use your smartphone to monitor and control your heating any time, anywhere.

Lyric app

With our Lyric app, you can control your Lyric thermostat from anywhere, or let it manage your comfort and savings automatically. It uses your phone's location services to determine when you're home or away and manages the temperature setting on your thermostat for savings and comfort.

- Control your heating from anywhere with your smartphone or tablet
- Location based temperature control
- Family access: multiple users across multiple devices who can control and monitor the household thermostat too
- Simple set up: just connect your thermostat to your smartphone or tablet and let the app monitor your heating, anytime, anywhere
- Use Siri commands to control your heating

Total Connect Comfort app

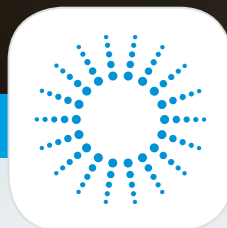

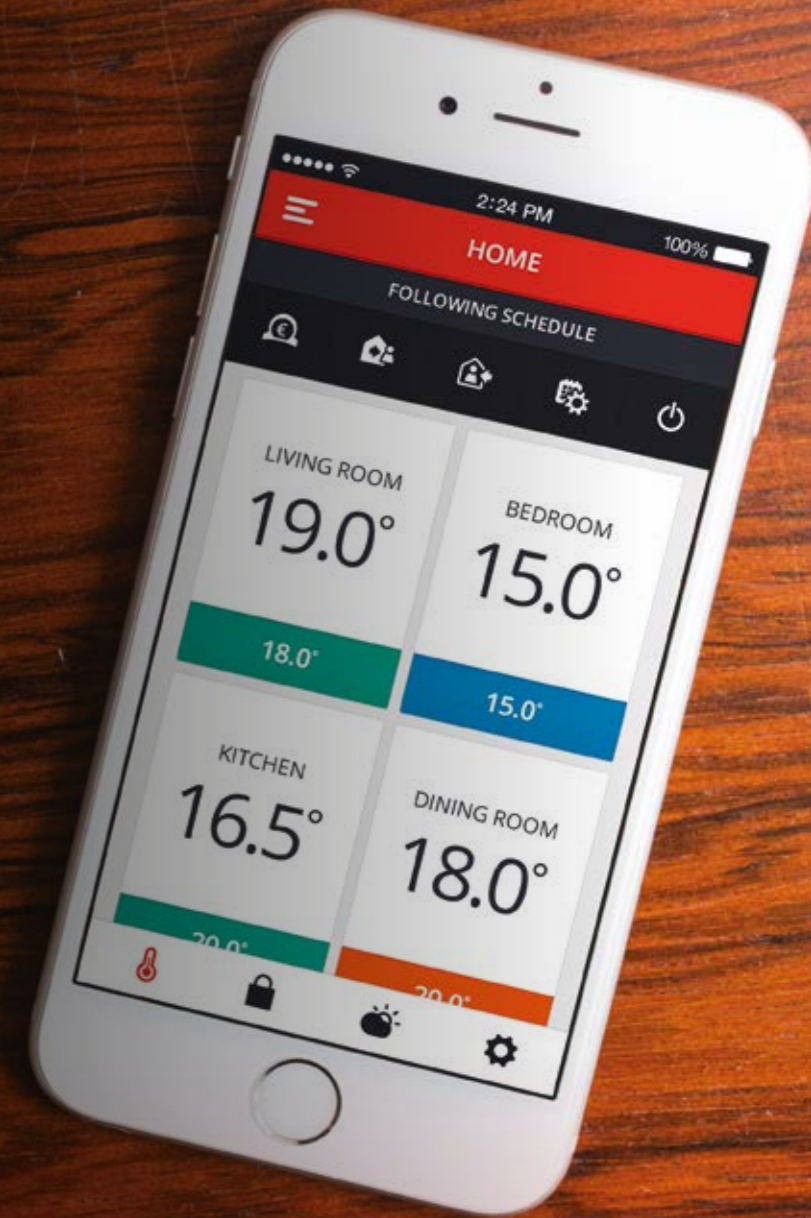

Total Connect Comfort brings you the peace of mind you need, knowing your home is safe, secure and under control.

Heating

- Control your heating from anywhere with your smartphone or tablet
- Manage multiple thermostats and security devices across many locations
- View and change temperature settings and heating schedule
- Activate quick actions and system modes
- See the current outdoor temperature and 5-day forecast

Security

- Arm, disarm, or check to see what's happening inside your home
- Get text or email alerts sent to your phone
- Automatic snapshots sent when a sensor is triggered
- Arm the system and if you have evohome smartzoning or the Single Zone Thermostat, your heating will turn itself off automatically

OUR CONNECTED HOME PARTNERS.

People all over the world have been taking comfort in Honeywell technology for more than 100 years.

We know the range of connected home products is growing every day, so at Honeywell we're working with key partners to join up our thinking and make sure our solutions work now and in the future.

With our connected products, your home comforts are taken care of – the simple, intuitive way. Your home is your own – and your Honeywell connected home is designed to adapt and grow with you, day to day and year to year. Apps and services that integrate with Honeywell products will further enhance the comfort, safety, and convenience of your Honeywell home, now and in the future.

IFTTT

evohome and Single Zone Thermostat work with IFTTT, allowing you to automate your home's heating around you and your life – in real time. Your system could be set to automatically turn your heating off when you're out of the home, or to switch back on if it snows. Energy savings, comfort, and control made easy.

Samsung SmartThings

SmartThings has everything you need to create and monitor your own smart home in no time. Once you've set up your Starter Kit, SmartThings lets you connect with hundreds of compatible smart devices for limitless possibilities.

Partner integration varies per product. Please check before purchase

Apple HomeKit

Apple HomeKit is a common language that smart devices from any manufacturer can understand and support and then control via Siri, the Apple voice assistant. It's a single way of managing everything – from heating, to lights to sensors and more – using just one app.

And with HomeKit technology, you don't have to buy everything at once. If you add new HomeKit-enabled devices in the future, it's designed to work with the HomeKit-enabled devices you already own. That means you can easily add more smart devices to expand your possibilities further as your needs or your situation changes. It adapts to you, rather than you to it.

Take comfort in Honeywell.
