Traceability Code Update Notice

Dear valued customer:

We would like to inform you that we will update the traceability code format for the products. Regarding the changing details please refer to the attached table. This update is refer to the trend of small package development, it standardizes our code format and improves our traceability. The original HKC logo would not be shown in small package products. In the new format, a unique code is assigned to each batch and all the detailed production information can be fully traceable. The HKC logo will be kept on the label in reel for all shipments. This update will NOT affect the product components, functions and reliability. This is a running change and will be effective in December 2015.

If you have any questions or need assistance, please don't hesitate to contact our sales representatives.

Authorized Person

Name: Kevin Chu
