## **Bring on the Color. The M605 has Arrived.**

**KIRKLAND, Wash. (February 2017)** – The best just got better! Icom's newest marine VHF transceiver has arrived. Designed with optimum visibility in mind, the new M605's large, bright display brings communication to life. It is full of advance safety features and configurations you will not want to be without.

The [M605](#) is not just a radio, it is a system, which allows for smooth operation throughout the vessel. Remotely control up to three controllers using all the M605 functions with the HM-195 series COMMANDMIC. The M605 will give boaters flexibility and never be tied to one place again while onboard.

The large 4.3 inch LCD color display provides nearly 180 degree viewing angle for easy viewing in any lighting condition, day or night. The intuitive interface comes with high-resolution characters and icons, along with directional keypad and soft keys.

**Additional Features Include:**

- Active noise cancelling
- Last call voice recording
- Integrated GNSS receiver
- Class D DSC
- Weather & alert channels
- AquaQuake® draining function

Icom is the choice when you want to take your safety at sea to the next level. For more information on the M605, contact an [Authorized Icom Dealer](#) or visit [Icom's website](#).

**About Icom America**

Icom America (part of Icom Incorporated) is a leading communications solutions provider. Icom began as engineering and manufacturing company, making advanced, compact solid-state radio equipment for use by amateur (ham) radio enthusiasts. Icom has since grown to become an industry leader with a product line that includes state-of-the-art communications equipment for land mobile, marine and avionics. Icom America was founded in 1979. With the exception of Cuba, Icom America is responsible for representing Icom products within the entire Western Hemisphere.
