The Next Generation IDAS™ Radios have Arrived

KIRKLAND, Wash. (October 2016) – Icom America announces the arrival of the new IDAS™ product line. This next generation of IDAS takes you to a new level of “smart.” Not only is the look and design completely new, but it is full of functions and attention to detail only Icom can provide. The IDAS series includes the F3400D and the F5400D, solutions that will not only make you look smart, but work smart too.

Both the [F3400D](#) and the [F5400D](#) radios are Icom’s new flagship IDAS products. They include dozens of features like SD Card for voice playback, USB port for easy programming and data transfer and built-in GPS. The high-resolution LCD color display enhances the visibility in the dimmest of light to the brightest of sunshine.

Additional safety features have also been included in this series. Five emergency-related functions are available: man down, motion detection, stationary detection, lone worker and power OFF emergency function. For the first time in this land mobile product, built-in Bluetooth® is standard, allowing for hands-free communication.

First in Communications

Other Features Include:

- Digital Voice Recorder
- Intuitive User Interface
- AquaQuake™
- Text Messaging
- Active Noise Cancelling

Icom is the choice when you want to take your communications to the next level. For more information on the next generation of IDAS™, contact an [Authorized Icom Dealer](#) or visit [Icom's website](#)
