HTML5 Web Development Specialist (f/m)

Job description

Do you want to shape the technologies of tomorrow? Are you an open minded person, willing and happy to learn new things? Are you able to work autonomously and independently and guide others? Are you good in explaining complex technical details as features customers can use? Then we have a great opportunity here at Infineon. We are looking for a HTML5/SAPUI5 Web Development Specialist to be part of a highly skilled and international team, being responsible for the design and implementation of HTML5/SAPUI5 applications.

As a HTML5/SAPUI5 Web Development Specialist you will be responsible for HTML5/SAPUI5 implementation for projects and change requests, configuration of tools and ensure technical guidance and quality assurance.

In your new role you will:

- Create **technical** and **graphical Web-designs, mockups and understand users needs**.
- Be responsible for the **development of HTML5/ SAPUI5 and optionaly Gateway Services applications**.
- Ensure **Go-live support** and **bug fixing for stabilization**.
- Provide **developer briefing on Infineon SAP systems**, interface landscapes and SAP Framework.
- Provide **trainings on SAPUI5/HTML5** development.
- Working on internal and external **proposed technical designs**, **specifications** and **effort estimations**.

Profile

With your hands-on mentality, your creativity and your excellent communication skills you are able to develop ideas, translate them into designs/ models, activities and set up sustainable relationships. At the same time you remain aware of the big picture even in complex situations and take actions despite uncertain circumstances. Your knowledge in human resource topics helps you to understand your customers and enables you to find innovative solutions for their needs.

You are best equipped for this task if you have:

- A **Bachelor or Master's degree** in **Computer/Information Systems Engineering** or **equivalent degree**.
- Proven experience in **HTML5/Javascript** development gained in an agency or an enterprise cooperation.
- **ABAP development** capability would be nice.
- High experience with performing **reviews of analysis- and design-results/documents**, **source code** and **technical documentation**.
- **Strong communication skills in English**.
