

 **Intellitec**

Keeping you moving since 1976

 **Assembled Solutions**

Design-Build-Deliver

An eminently flexible and customizable approach to meet any vehicle OEM challenge.

Intellitec have been providing assembled solutions to vehicle OEM`s and converters for over 25 years. The Intellitec sales engineering team work in conjunction with the OEM engineering & production team and deliver the ideal fully tested assembled system solution supplied under just one part number, ready to plug in and work.

Assembled Solutions

Assembled Solutions – what are the benefits

- Reduce lead times
- Save money
- Reduce direct labor costs
- Add capacity

Design-Build-Deliver

Our assembled solution option starts with a consultation with our sales engineering team, we will evaluate the project and get back to the customer with costed options within 10 days.

The next step in the process is to build a prototype Assembly and work with the customers engineering team on the installation and any necessary product training.

Subject to the customer being wholly satisfied we can be in production with the assembled solution within 6-8 weeks.

If you would like a consultation please do not hesitate to contact us.
