

DATASHEET

NYAG4653-L

Product Description and Application:

- NYAG4653-L phosphor is a yttrium aluminum garnet (YAG) based phosphor designed for white illumination devices.
- NYAG4653-L is ideal for use with long wavelength blue pump as a single phosphor solution for cool white displays with >70% NTSC, as well as for cool white >65 CRI illumination applications. For a warmer white, blend with Intematix red nitride phosphors.
- This phosphor has a highly crystalline and uniform particle morphology, thus offering the efficient and reliable performance characteristic of all Intematix NYAG phosphors.

Material Specifications:

Materials	Ce doped YAG
Density	4.8 g/cm ³
Particle Size	D50V ~ 12.5µm
CIE (1931)	x=0.458, y=0.526
Emission Peak	563nm
Excitation Range	430nm to 490nm
