

## Overview

Niagara 32266 Hex Port Copper Gigabit Ethernet Server Adapter is built on Intel's Gigabit technology & Interface Masters' sterling design and customer service.

Niagara 32266 is designed with a built-in programmable bypass circuit to provide maximum uptime for the network. The bypass circuit takes the Niagara 32266 ports offline in case of either power or software failure. The bypass circuit works in absence of power.

Niagara 32266 Hex Port Copper Gigabit Ethernet NIC is designed to integrate with PCI Express compatible servers and high-end appliances providing high speed networking and bypass/failover capabilities for any mission-critical application.
