

We personally take care

Our sensors ensure your success

“With our large variety of products, a background of expertise when it comes to solving problems and a strong service mentality, we are unique as a top supplier in the field of industrial sensors.”

Dirk Neuhaus with Antje Wieners and Christian Fiebach, the management team at ipf electronic

We are the 'sensor' for your success

Personal service is a standard part of what we provide

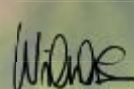

Your success is something we take personally! In the field of sensors, we offer a huge range of products, the outstanding expertise of our first class, qualified staff and the recognized knowledge of a specialist when it comes to solutions for industrial problems. After all, it all comes down to service.

As a family-run company, we place a great emphasis on satisfied staff, well looked after customers and a high level of product quality. ipf electronic also has a 'sensor' for your success!

We keep our promises!

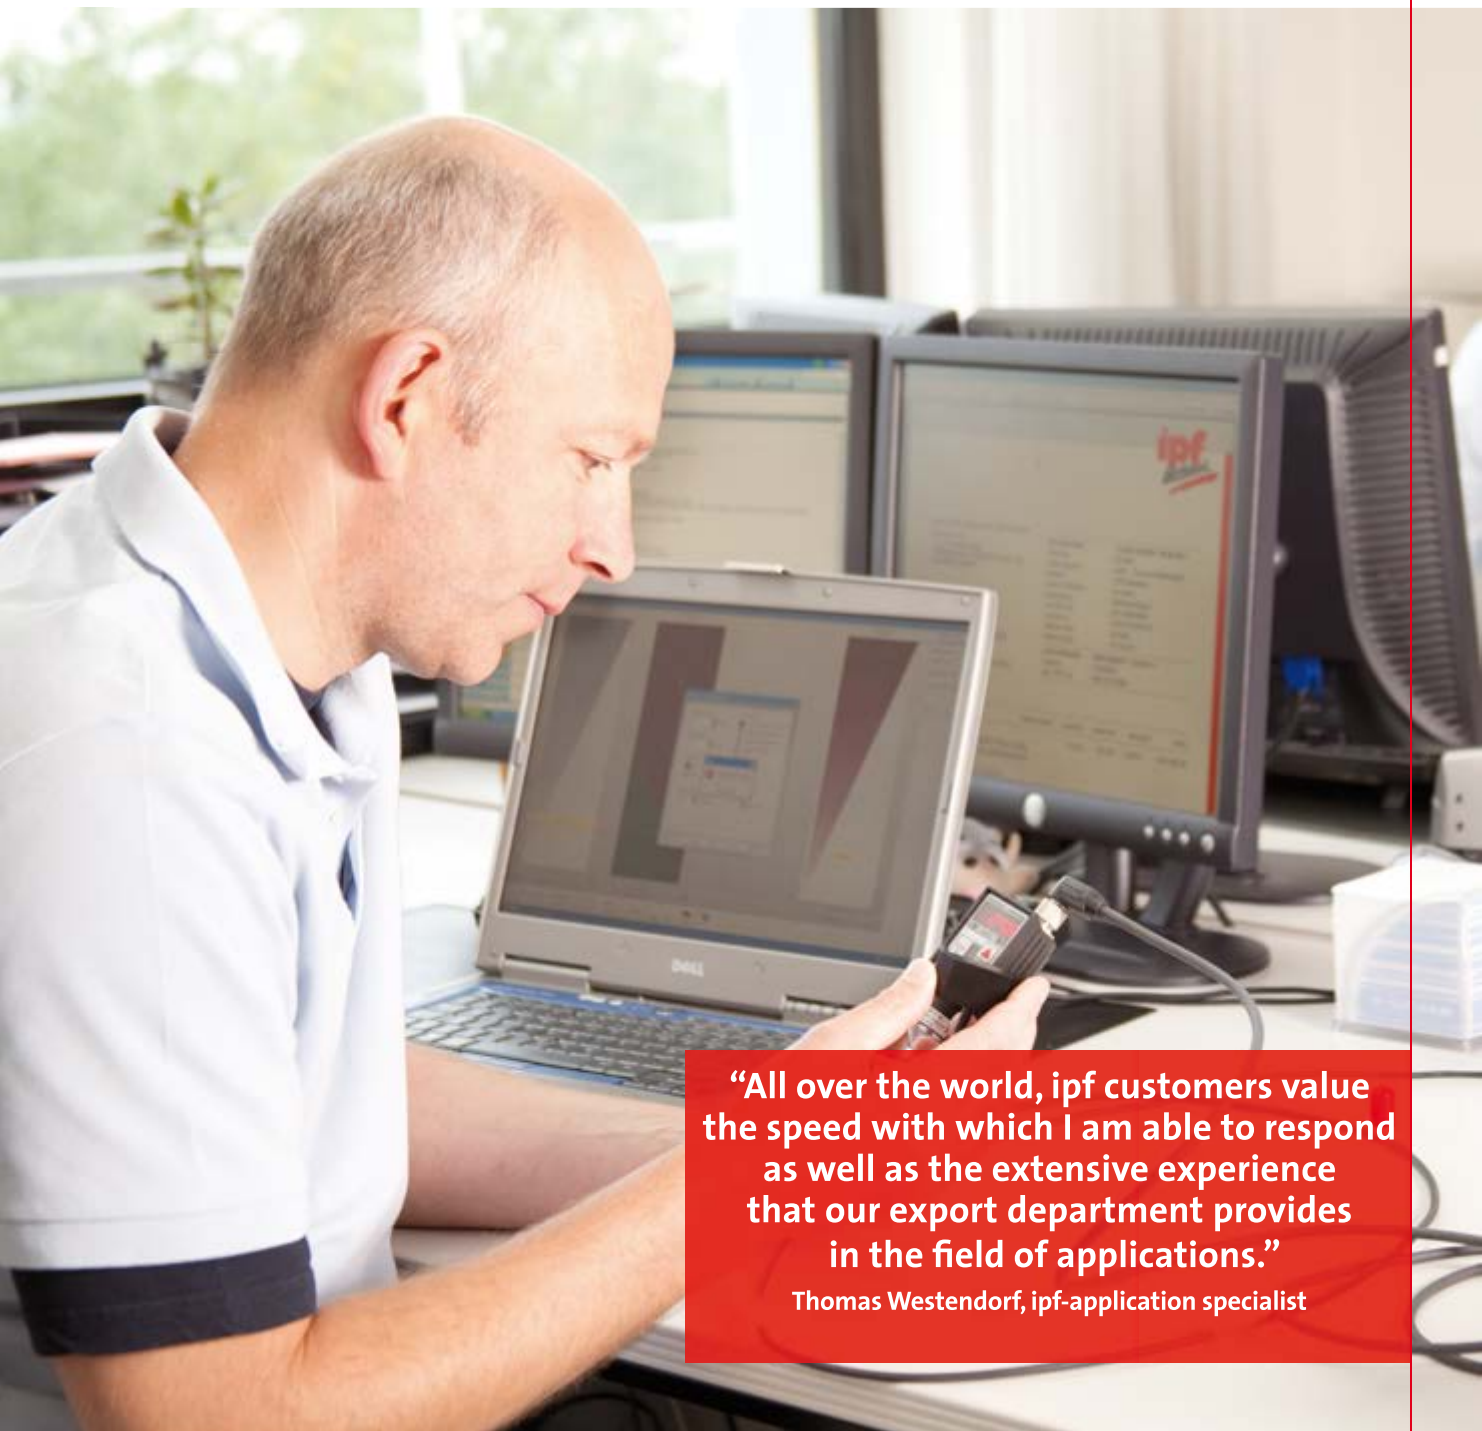

Dirk Neuhaus

Antje Wieners

Christian Fiebach

“All over the world, ipf customers value the speed with which I am able to respond as well as the extensive experience that our export department provides in the field of applications.”

Thomas Westendorf, ipf-application specialist

We find solutions which others cannot offer

High quality with maximum flexibility
are the secret factors to success

Problems are becoming more complex in nearly all industrial applications.

Often, the skills of an outside expert are needed. At ipf electronic,
our high level of expertise / ability to solve problems is made available to you.

We are happy to discuss tasks which may seem small with you.

For us, this is a matter of course!

You will recognize us as a well known supplier of industrial sensors.

Discover our readiness to provide service:

- Professional problem solving
- Test equipment is freely available
- Quick delivery
- We also work with small quantities
- Conversion of equipment from other manufacturers

ipf electronic is referred to as being reliable. It is a fact that is true! No customer enquiry is left unattended and no on site appointment with the customer is missed.

It is said that we are able to deliver everything in the field of sensor technology and maintain our reputation of being exceptionally flexible. We don't disagree. Our extensive range of products is unrivalled.

Variety, expertise, consultancy, flexibility: This is ipf electronic's formula for success.

For us, every order becomes an issue that we handle personally

Expert staff are always on hand to answer any questions

“My key concern is the individual care that is taken in addressing the needs of our international customers.”

Melanie Wohlpert, ipf-export

At ipf electronic we place a lot of emphasis on courteous help and care when it comes to customer service and order management. In so doing, your personal satisfaction is especially important for us. This is because we want you to feel relaxed in being able to recommend us at all times.

From the moment you get in touch with us, a personal contact is available to assist you. We will provide you with detailed consultancy services when it comes to selecting the right sensors. In doing so, we will offer approaches for problem solving. Furthermore we will continue to provide assistance after making the delivery.

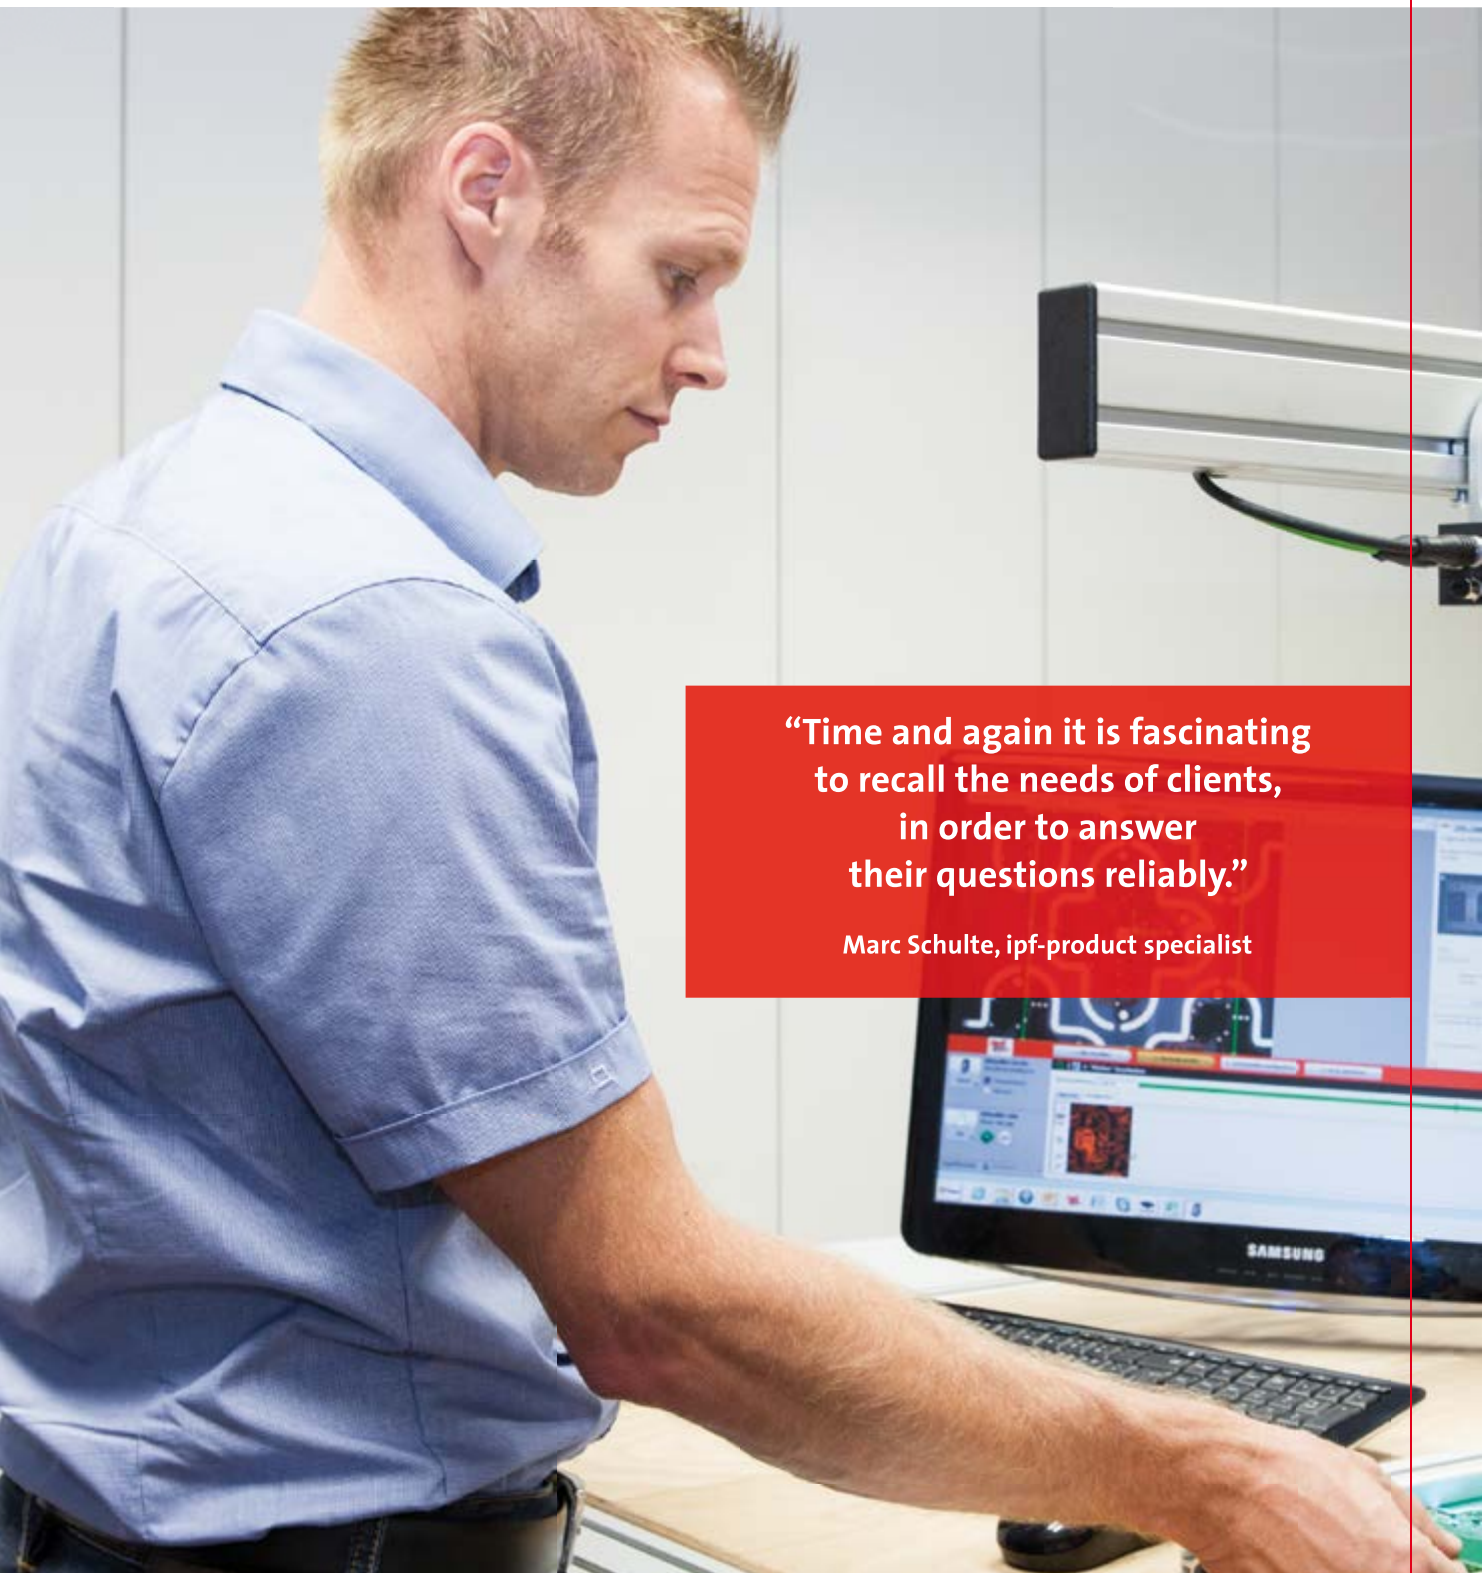

We will pay special attention to ensure that schedules are met. Our outstanding reliability is often praised. This adds to the planning reliability of our customers.

The close lasting relationships we have are often seen as something which is unusual. We are somewhat proud of this. Often, we are able to provide our customers with valuable assistance when it comes to questions beyond sensors.

The free and non-binding provision of test equipment is usual practice. We have earned a lot of respect from our customers, even when it comes to the sense of goodwill with which we resolve difficult issues.

In short, we are interested in developing a good and long term relationship with you.

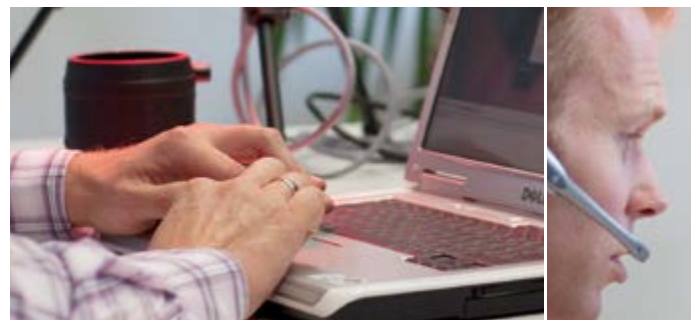

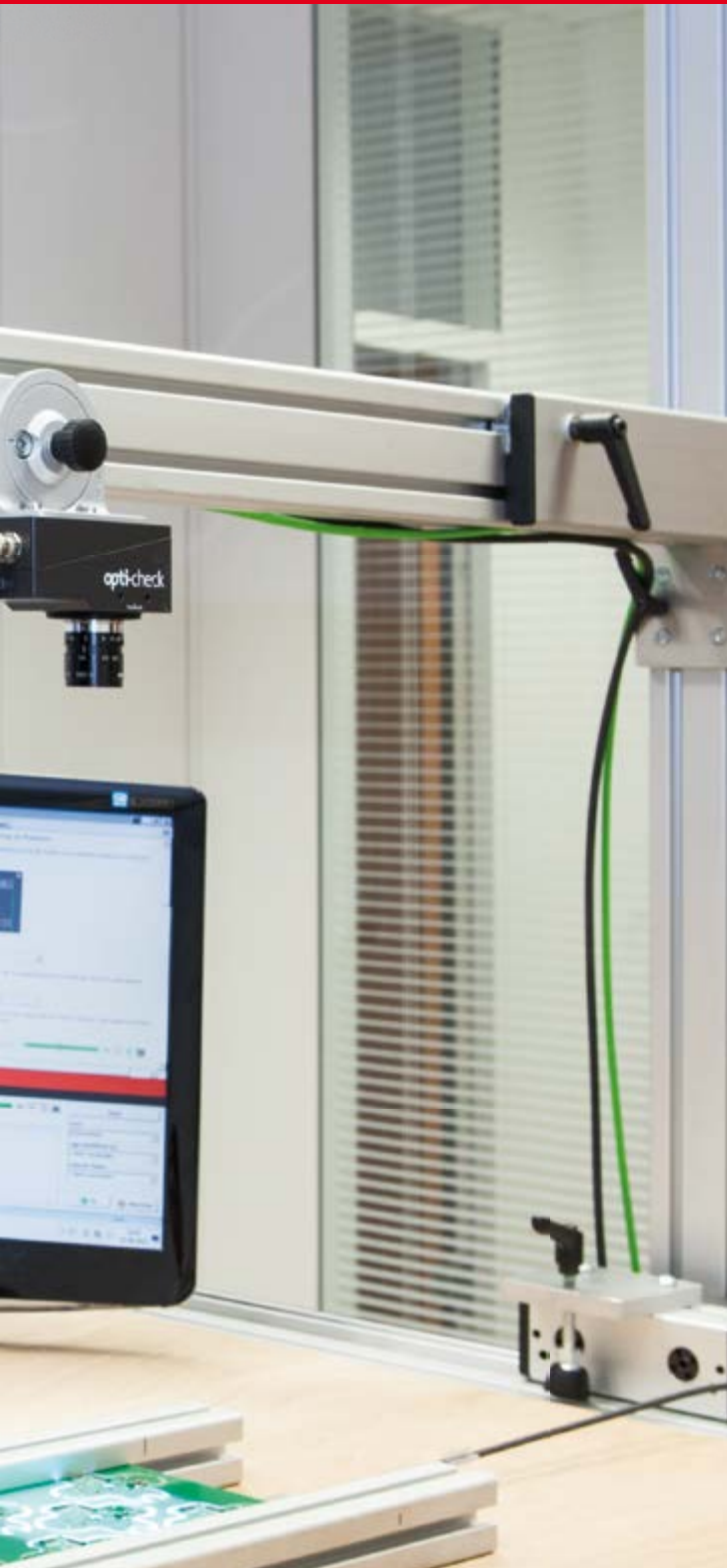

“Time and again it is fascinating to recall the needs of clients, in order to answer their questions reliably.”

Marc Schulte, ipf-product specialist

Efficient helpdesk for all questions

Technically experienced service staff will provide their detailed opinion

All calls are important! At the end of our technical hotline you will find experienced staff who will be able to answer your question reliably and with expertise. The aim is to provide you with efficient, effective advice which is free of charge – including telephone support.

Our hotline team is made up of seven adept, and specially trained staff. We are happy to call you back! Just fill in our callback form on our website www.ipf-electronic.com.

In addition, we have personal application specialists in the sales department who are on hand to answer any questions you may have. Internally, we coordinate each other. This way we can react and provide an answer to each call. Fast and competent.

**“Quality, performance and tradition –
We are somewhat proud to be one
of the leading, medium sized companies
involved in the field of industrial sensors.”**

**Gerhard Glenz, ipf-production manager
with Iris Laufer, ipf-quality management**

Quality supplier for over 30 years

A specialist in sensor systems for demanding automation technology

For almost three decades, our company has represented the very best in high performance sensors used in the field automation technology within the German speaking area. We place a lot of emphasis on the high quality of our goods and we continue to produce at our main offices in Lüdenscheid.

The role of ongoing R&D is just as important as the further education and advanced training of our staff and management.

Founded in 1982, our family-run company is now managed by the second generation.

We set particularly high standards in terms of environmental protection and the sustainable use of resources.

„Just a phone call – personal consulting, proximity and the resulting reaction rate are just spot-on. ipf electronic is an important partner within the sensor industry for us.“

Andrè Brandt
Executive Vice President, Mould Base Technology
HASCO Hasenclever GmbH + Co. KG

Quality and service are top

We look to ensure that customers are satisfied in every respect and that long term cooperation develops from this

Service, service, service! This is something that immediately occurs to minds of most customers when ipf electronic is mentioned.

The characteristic way in which we provide customer service is widely known.

As a supplier and a provider of expert consultancy, we concentrate solely on the individual requirements and wishes of our customers.

This is not just a promise, but a fact. The service we provide must fit the bill. Quality, consultancy, extensive testing and the level of flexibility that is required – these are the services and characteristics that customers value in us.

ipf electronic represents real partnership in the business of equipping machines with industrial sensor systems.

Many customers and business associates have worked with us for many years. In many cases, this has resulted in personal relationships which go beyond the level of a supplier-client relationship.

Here's to good cooperation!

“Time and again, I experience elated customers who are surprised that we can deliver the right sensors straight away, even for specialist subjects. That is definitely something special.”

Volker Grefe, ipf-product manager

We offer the right sensors for your application

Quality products for all industrial applications

Our large range of quality sensors is widely recognized.

As a top supplier of industrial sensors, we offer a carefully balanced value for money range.

The diverse range of products requires constant training and information. Our sales and consultancy staff receive regular further in-house training. In addition, we also invite our clients for product training sessions.

When new products enter the company catalog, we inform the team and customers straight away. These spontaneous messages concerning technical innovations are widely valued by customers and business associates alike.

Through wide-ranging consultancy services, we additionally increase the versatility of the quality sensors.

What types of sensor are best for your applications?

Why not ask us!

APP lause for the no. 1 – ipf electronic now fits into the trouser pocket

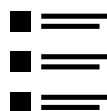

The newly developed, free ipf app provides help everywhere, always and straight away

Imagine you are standing next to the machine and you need technical data for the required sensors – here and now. Imagine you are on a construction site and would like to install the sensor, yet you have left the operating manual in the office?

www.ipf-app.com

ARTICLE SEARCH

Using the article function of our new ipf app you are able to call up product information simply and easily: Simply enter the article number and the operating manual or technical data sheet is there for you to access.

Download now the ipf-app for your smartphone or tablet!

CONTACTS

We are happy to help you on site. Enter your country, get to know your contact and feel free to get in touch with him.

SELECTOR

Want to find the right product in only two steps? This is no problem with the ipf ProductSelector! Simply select the product group and product characteristics and you will already receive the results.

Automatically ... for success

Sensors from ipf electronic

SERVICE

- Top quality, comprehensive consultancy services
- On site personal service and solutions for problems
- Competent technical help by telephone
- Reliable management of orders
- Quick delivery
- A wide range of quality sensors
- The range of sensors is available at all times
- Free of charge test equipment for all fields of application
- Helpful expert information surrounding new products and innovations

FOUNDATION

- Satisfied staff with a high level of expertise
- Regular further education / advanced training
- Decades of experience in application solutions
- Own research and development
- 'Made in Germany' production
- Flexible customer service
- Forward looking management of the company through a family of owners

Optical sensors

Through-beam sensors, retro-reflective sensors, diffuse reflection sensors with and without background suppression and high performance through-beam sensors

Fiber optic sensors

Fiber optic amplifiers, glass and plastic fibers

Camera sensors

opti-check

All-in-one devices, additional illuminations and lenses

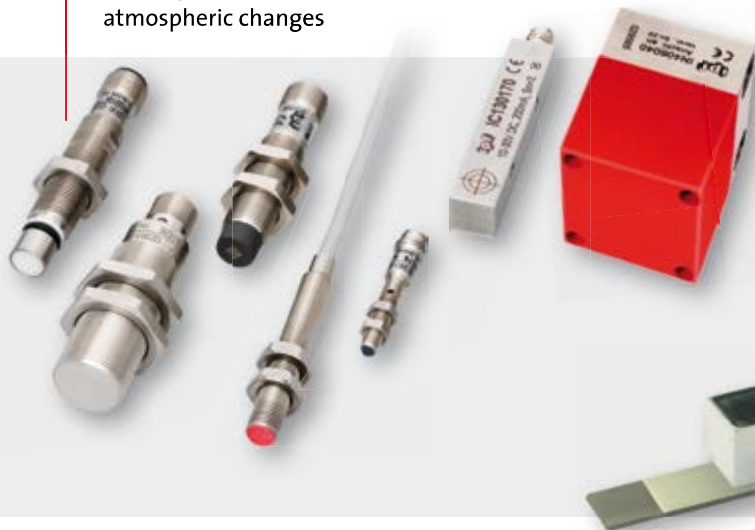

Power supplies

Switching power supply units 1/3-phase and stabilized power supply units

Inductive sensors

Norm and enlarged sensing ranges, all-steel, analog, high-temperature and ring-sensors, pressure proof, welding-proof and sensors that are unaffected by atmospheric changes

Filling level sensors

Capacitive sensors and mounting accessories, conductive filling level relays and probes

Linear measuring systems

Incremental and absolute magnetic linear measurement encoder and accessories

Integrated through-beam sensors

Fork, angle, frame and ring shaped

Evaluation systems

Multi-function, pulse and time counters, time delay relays, measuring transducers, coupling relays, multi-function, rotation speed, pulse and zero speed monitors

Laser sensors

Through-beam sensors, retro-reflective sensors, diffuse reflection sensors and measuring systems

Fluid technology

Electronic pressure sensors with display, flow sensors for gaseous media and liquids, thermal elements and electronic temperature displays

Magnetic sensors

Magnetic all-steel proximity switches, fully electronic cylinder sensors and magnetic high-temperature sensors

Capacitive sensors

Metal and plastic devices

LED machine lights

High operational reliability, energy efficiency, high luminosity, flexible due to various designs

Special optical sensors

Color sensors, luminescence sensors, line sensors and contrast readers

Safety systems

Safety light curtains, safety relays and accessories

Ultrasonic and radar sensors

Through-beam, retro-reflective and diffuse reflection sensors, furcate versions and radar motion sensors

Accessories

Cable sockets **ipf**-SENSORFLEX®, ready-to-be-assembled connectors and couplings, distributors, logic distributors and modules, sensor testers, mounting material and precision positive stops for proximity switches
