

# JABIL AUSTRIA

**YOUR PARTNER FOR SOLUTIONS  
IN PRECISION MECHANICS**

# JABIL

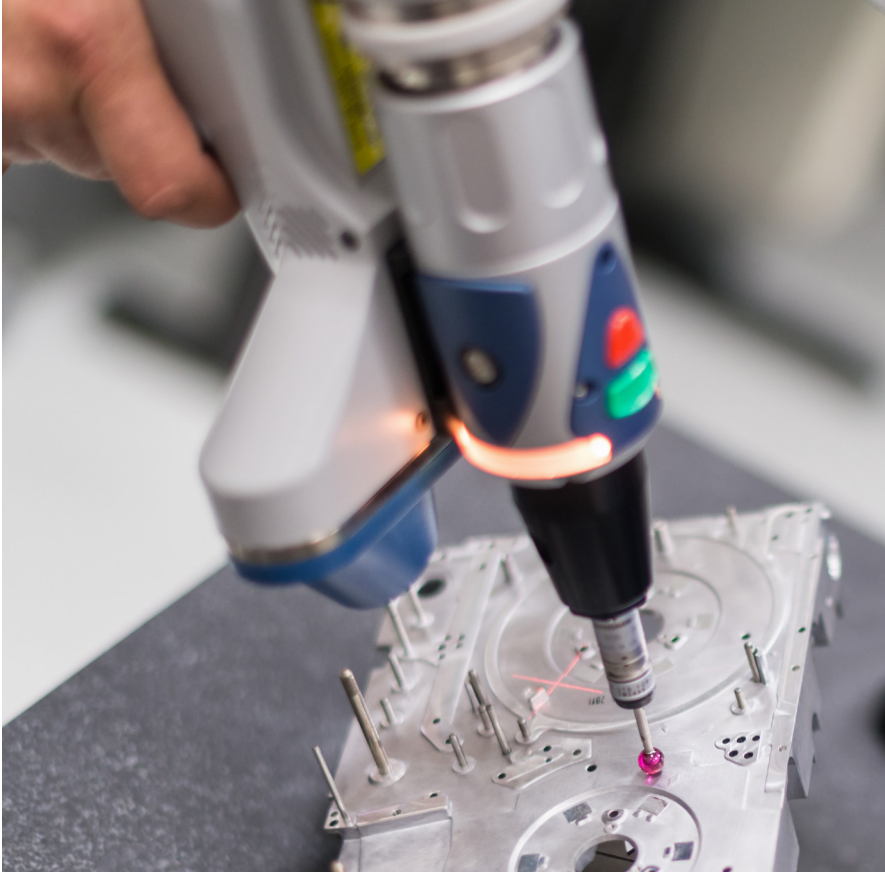

Jabil Austria specializes in precision mechanics which includes the following engineering technologies:

- Precise mechanics
- Mechatronics (mechanics and electronics)
- Kinematic systems
- Miniaturized systems

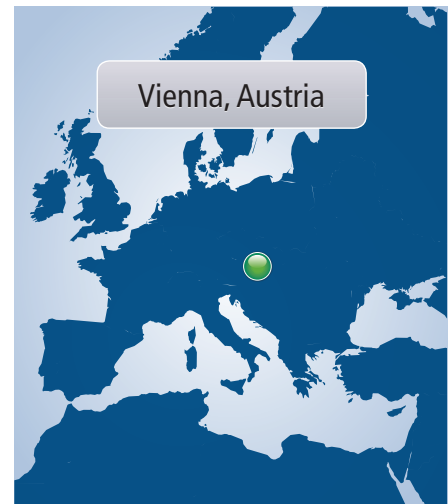

Jabil Austria provides a one-stop solution and offers best-in-class services in comprehensive design, manufacturing, supply chain management and industrialization. We meet and exceed the requirements of the most demanding industries including automotive, healthcare, enterprise storage solution and industrial applications. Our customers benefit from a dedicated multilingual team and access to our global resources for worldwide support and business solutions. With more than 30 years experience and in-depth knowledge of precision mechanics, Jabil Austria delivers customers tailored solutions even for the most complex projects.

## An Extension of Your Business

When you partner with Jabil, you have the advantage of a dedicated team of experts that acts as an extension of your business. This team of engineers, materials planning, procurement and supply chain managers is custom fit to your specific manufacturing needs and has full authority to make most decisions about pricing, location and investments to meet your production needs. Operating as a dedicated, autonomous business within Jabil, our business unit team is accountable for your satisfaction and contributes to your local and global business success.

# Jabil Austria

## About Jabil

Jabil's unique combination of global expertise, ingenuity, analytics and financial performance has contributed to the success of some of the world's best known brands. We help companies design, build and take their products to market quickly, affordably and efficiently. But more than that, Jabil helps customers intelligently design their supply chains to be agile, economical and effective even in uncertain times. We provide supply chain services to some of the world's most respected and trusted brands in a broad range of industries, including defense, aerospace, automotive, clean technology, computing, consumer, industrial, instrumentation, healthcare, networking, peripherals, storage and telecommunications.

## Certification

- Automotive: TS 16949
- Medical: ISO 13485
- Environment: ISO 14001
- ISO: 9001:2000

## Tools and Processes

- Lean thinking in all business processes
- Access to customer data at plant-floor level via online customized data reporting
- Continuous monitoring to ensure optimum performance standards
- Closed-loop planning supported by real-time traceability tools for products and raw materials

## Customer-Specific Solutions

Whatever your needs are, from specialized precision mechanics supply chain solutions to design support, Jabil Austria will work closely with you to find the right solution.

### Design Competence

- Design engineering for mechatronic, high precision and cosmetic design
- Electronics and software, including motors and sensors
- Product quality assurance (overstress, climatic, shock & vibration testing)
- Material quality assurance (functionality, process capability, gauge repeatability and reproducibility studies)
- Failure analysis lab, including material and process failure analysis on scientific basis
- Mechanical measurement lab, including optical submicron precision measurements
- Model shop / inhouse prototyping, including precision machining and soft tooling
- Design parameter analysis
- Technology development, including laser welding and functional coatings (hard coatings- and gluing processes)
- Process and technology engineering, including assembly line development and design for manufacturability
- Test development

### Supply Chain

- Suppliers with a global footprint to support customer-specific needs
- Highly specialized and experienced precision mechanics supply base in Asia and Europe
- Local suppliers for enclosures and housings
- Design-for-logistics

### New Product Introduction

- Launch and ramp-up of new products, including process debugging and optimization
- Development support, including prototypes, design-for-excellence, failure modes effect analysis
- Transfer management

### Manufacturing Services

- Precision mechanical products
- Advanced module and final assembly
- Printed circuit board assembly
- System configuration and testing
- High-complexity design experience

### Logistical Services

- Configure-to-order
- Direct fulfillment
