

NYPRO SHANGHAI

END-TO-END SOLUTIONS FOR
HIGHLY COMPLEX PRODUCTS

NYPRO
A JABIL COMPANY

Nypro's manufacturing facility in Shanghai, China specializes in configurable product solutions for several industries. Our unique business model allows us to be true partners with our customers in targeted sectors: Healthcare, Analytical Instrumentation, Networking, Defense and Aerospace, Computing and Storage and Industrial Controls. Our highly skilled and experienced workforce provides exceptional responsiveness, efficiency and quality.

Nypro Healthcare offers the widest array of design and manufacturing capabilities in the industry. With 40 years of experience, highly specialized teams meet the complex demands of the healthcare and pharmaceutical markets by developing and manufacturing finished drug delivery devices, disposables, medical electronics, mechanics and system solutions that enable some of the world's leading brands to fulfill their market potential. Nypro delivers the innovation, expertise and peace of mind that helps our customers build products that sustain or improve people's lives.

Single Point of Contact

Being customer-centric is a core value at Nypro. Each customer, regardless of size, has one point of contact and a support team to ensure optimal performance locally and globally.

- Collaborative relationships
- Flexibility
- Proactive communication
- Customer-specific solutions
- Locally-focused operations
- Dedicated resources with a single point of contact

Nypro Shanghai

Manufacturing Capabilities

Design

- Product Design Assistance from conceptual through detail design phases
- Design for Manufacturability and Testability
- Design and Development of Test Processes

Prototyping and New Product Introduction Services

We provide new product introduction and rapid prototype services that promote a faster time to market through excellence in quality and engineering support. The benefits include:

- Extensive experience—in regulatory requirements, technologies and product complexity
- Flexible solutions—tailored to customer needs
- Seamless transition to production—promoting speed and knowledge transfers

Manufacturing of Complex Products

- Printed Circuit Board Assembly & Test
- Electrical-Mechanical System Assembly
- Backplane Assembly

System Integration

- Box Build, Device Build, BTO/CTO, DF
- Advanced Technologies & Global Test
- PCBA & EMD key-components
- Enclosure Integration, BTO/CTO, DF

Logistical Services

- Supply Chain Management
- Aftermarket Services
- Build-To-Order/Configure-To-Order
- Direct Fulfillment

Certifications and Experience

With more than 200,000 sq. feet of manufacturing and over ten years of dedicated experience, our focus has been to strategically develop the expertise needed in many demanding and regulated sectors.

Certifications

- SFDA China
- TL 9000
- AS 9100
- ISO 13485
- Environmental: ISO 14001:2004
- Regulatory Certificates: UL, CSA, TUV
- ESD S20:20
- FDA U.S.
- OHSAS 18001

Tools and Processes

- Lean Manufacturing – organized approach to reduce waste
- Six Sigma – disciplined methodologies for the total elimination of defects
- Access to customer data at the plant-floor level via online customized data reporting
- Continuous monitoring for optimum performance standards
- Closed-loop planning supported by real-time traceability tools for products and raw materials

About Jabil

Jabil's unique combination of global expertise, ingenuity, analytics and financial performance has contributed to the success of the world's most well known brands. We help companies design, build and take their products to market quickly, affordably and efficiently. But more than that, Jabil helps customers intelligently design their supply chains to be agile, economical and effective even in uncertain times.

We provide supply chain services to some of the world's most respected and trusted brands in a broad range of industries, including defense, aerospace, automotive, clean technology, computing, consumer, industrial, instrumentation, healthcare, networking, peripherals, storage and telecommunications.
