

Aluminum Electrolytic Capacitors

Junzl

NF 无极性低耗品 (CD72型)

● 高低损耗, 高纹波电流.

Small loss at high frequency , high ripple current.

● 适用于电视机水平偏转电流校正电路.

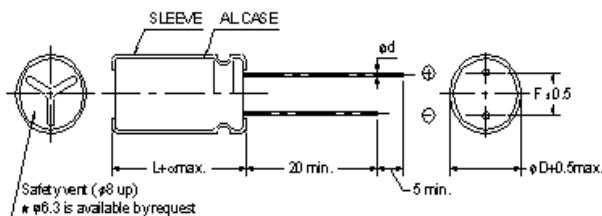

Used in Scorrrection of horizontal deffection current in TVs.

■ Specifications

项目 Items	特性 Characteristics	
工作温度范围 Operating temperature range	-40°C~+85°C	
额定电压范围 Rated voltage range	50V DC	
静电容量范围 Nominal capacitance range	1 μ F~100 μ F	
静电容量误差 Capacitance tolerance	P Grade: ±10% ; D Grade: ±20% (120Hz·20°C)	
漏电流 (20°C) leakage current(20°C)	I≤0.03CV or 5 μ A(whichever is greater) after 2 minute I: Leakage current C: Normal capacitance V: Rated voltage	
损耗角正切 Dissipation factor	P Grade: DF≤0.05 ; D Grade: DF≤0.15 (1KHz·20°C)	
高温负荷特性 Load Life	After applying rated voltage for 1000 hours at 85°C then resumed 16 hours:	
	Capacitance change	Within ±20% of the initial measured value
	tgδ	≤200% of the initial spectified value
	Leakage current	≤initial specified value
高温贮存特性 Shelf Life	After storage for 1000 hours at 85°C then resumed 16 hours:	
	Capacitance change	Within ±20% of the initial measured value
	tgδ	≤200% of the initial spectified value
	Leakage current	≤initial specified value
