How to install driver Manometer on Windows 8

Before installing the driver Manometer for LEO5 from KELLER you have to deactivate the digital driver signature in Windows 8. These steps has to be done only once at installation.

First, press the "windows" button on your keyboard + "i" to launch the charm bar, and click "Change PC settings" at the bottom.

Then, go to "General", and scroll to the bottom of the page, click "Restart now" button under "Advanced startup" section. **Remember to save all your work first before clicking it**

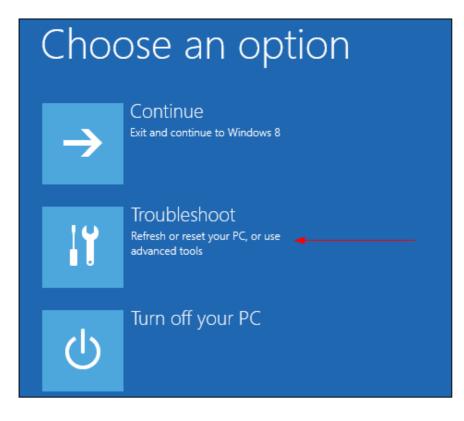

PC settings Personalize Users Notifications	Available storage You have 22.7 G8 available. See how much space your apps are using. View app sizes Refresh your PC without affecting your files If your PC isn't running well, you can refresh it without losing your photos, music, videos, and other personal files. Get started		
Search Share General	Remove everything and reinstall Windows If you want to recycle your PC or start over completely, you can reset it to its factory settings.		
Privacy Devices Ease of Access	Get started Advanced startup Start up from a device or disc (such as a USB drive or DVD), change Windows startup settings, or restore Windows from a system image. This will restart your PC		
Sync your settings	Restart now -		

Note that on Windows 8.1,

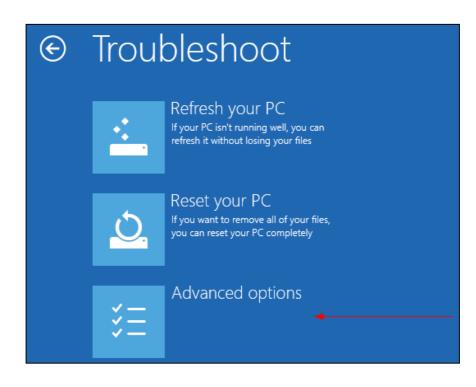

the Advanced startup option has moved to Update and recovery section under Recovery.

The computer reboots to a startup menu, in which click "Troubleshoot".

click "Advanced options" at next screen.

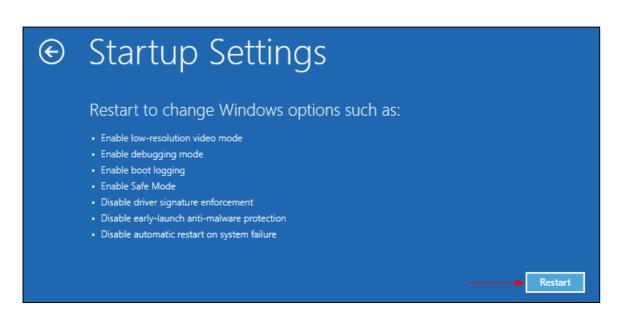

choose "Startup Settings" next

€	Adva	anced options		
		System Restore Use a restore point recorded on your PC to restore Windows	C:\	Command Prompt Use the Command Prompt for advanced troubleshooting
	•	System Image Recovery Recover Windows using a specific system image file	٢	Startup Settings Change Windows startup behavior
	< 0 >	Automatic Repair Fix problems that keep Windows from loading		

and click "Restart" button.

The computer reboots and prompts another menu to choose.

One of the items is to disable driver signature enforcement. Press number "7" or "F7" to continue booting to Windows 8 with digital sign enforcement disabled.

Startup Settings
Press a number to choose from the options below:
Use number keys or functions keys F1-F9.
 1) Enable debugging 2) Enable boot logging 3) Enable low-resolution video 4) Enable Safe Mode 5) Enable Safe Mode with Networking 6) Enable Safe Mode with Command Prompt 7) Disable driver signature enforcement 8) Disable early launch anti-malware protection 9) Disable automatic restart after failure
Press F10 for more options Press Enter to return to your operating system

Proceed the security task by pressing "Install this driver software anyway".
