

INSTANT EYES™... PROVIDING REAL-TIME MOTION IMAGERY

Border protection demands real-time knowledge and security. You need “eyes-on” fast, accurately and easily. Your solution - Instant Eyes™.

Instant Eyes, a hand-launched Incident Awareness and Assessment system, was created to provide you with immediate, close-range situational awareness. Weighing less than one pound, Instant Eyes™ is a multi-purpose mini UAV that can be deployed in seconds. The smokeless unit quickly and quietly ascends to 2,500 feet before deploying its sensor package via parachute. In 20 seconds or less, you can access real-time images using laptop computers, smart phones or other authorized devices.

Simple, state-of-the-art technology. Very lightweight. Readily deployable. Instant Eyes™ gives you situational awareness at your fingertips.

INSTANT EYES™...

WHAT EVERY MISSION NEEDS

REAL-TIME DELIVERY AND DEPLOYMENT

- Images sent to handhelds within seconds after launch
- Multiple receivers can directly access images using Wi-Fi connectivity

Length: 11.73 inches
Weight: .84 lbs.
Diameter: 1.89 inches

MISSION FLEXIBILITY

- Use covertly or overtly
- Day or night conditions
- “Fire and forget” capability
- Lightweight and compact
- 12-month storage life

High-quality imaging

GPS accuracy

Fast-burning,
solid-rocket motor

- Mission time: 2 minutes
- Altitude: Up to 2,500 feet

L2 Aerospace was established in 2010 by USAF General (Ret.) Lance Lord. It is a growing, innovative company providing critical ground, air and space-based products and services to support today's dynamic aerospace markets. L2 Aerospace is comprised of three complimentary business units focused on delivering innovative Intelligence Surveillance and Reconnaissance (ISR) and Flight Systems, Engineering Services and Cyber Solutions at the speed of need. For more information about L2 products and services, visit: www.L2aerospace.com.
