## **Laser Production Engineer**

Starting salary : £20,200  
£21,470 plus quarterly performance bonus after 6 months probation

Laser Quantum Ltd  
Emery Court, Vale Road, Stockport, Cheshire, SK4 3GL

An opportunity to help shape the future of a rapidly growing & innovative laser manufacturing company with sales offices in California, Europe and Japan, this role is responsible for all aspects of **laser assembly & testing within our laser manufacturing facility**. The successful candidate will ideally be educated to degree level; have a proven scientific or technical background; be able to work under pressure and to achieve deadlines; be self motivated and a team player; and will possess excellent communication and interpersonal skills. The main responsibilities of the role include:

- Manual build of lasers including: optical alignment, basic electronics and assessing reworks
- Continuous improvement of laser build processes
- Operation of key Goods In and Goods Out Quality Control procedures
- Performance of routine testing protocols and analysis on WIP product
- Assistance with ensuring key quality standards are complied with and reporting non-conformances
- Assistance with maintenance of Company Quality Documents
- Participation in periodic quality audits

This represents a truly exciting opportunity for a dynamic and ambitious individual with a track record of success to develop their career in a successful international business.
