PEP ecopassport®,

THE reference for environmental declarations of electrical, electronic and HVAC-R products.

AN INTERNATIONAL, RELIABLE, RECOGNIZED PROGRAM

PEP ecopassport®
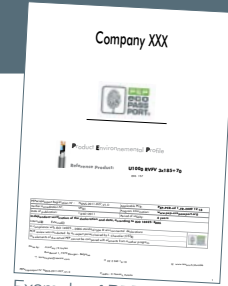

Example of PEP file

What is PEP ecopassport®?

- ▶ The product environmental identity card in **one single document**
- ▶ A reliable and recognized program
- ▶ An international program (ISO 14025, 14040 and 14044 international standards).

Who should use PEP ecopassport®?

All electrical, electronic and HVAC-R business players.

What is exactly defined by PEP ecopassport® program?

Rules to make a product environmental profile:
- ▶ by measuring its impact on air, water, soil and natural resources : 11 indicators
- ▶ During the whole product life cycle, from its manufacturing to the end of life, through distribution, installation and use.

How does a PEP ecopassport® look like?

Each product range has its PEP file, which can be sent upon request. Products with a PEP ecopassport are registered and you can download their PEP file through the official web site: **www.pep-ecopassport.org**.

Users' testimonies:

"PEPs contain really useful information. I wish every product had one of these as it would make my life so much easier. We should favor suppliers who can provide one of this level of information. It shows they have taken the time to properly assess the environmental impact of their operations."
Lend Lease Builders, electrical specialist and one of the main Building companies in Australia.

"As manufacturers, the PEP allows us to transform mandatory requirements into opportunities. That's a good way to anticipate the regulatory changes, being able to face the stakes of tomorrow."
Pierre-Yves Berthélémy, environmental manager in Groupe Atlantic, France.

The PEP, what to do with it?

THE PEP ECOPASSPORT® ALLOWS YOU TO	YES	NO
Have accurate, reliable and verified environmental indicators for your ecodesign approach	✓
