

Solvent Pen -- EW-ITW-5

The Electro-Wash® MX Pen from Chemtronics is specifically engineered for the precision cleaning of fiber optic connectors, splices and ribbons. This precision cleaner quickly and safely cleans the end faces of fiber optic connectors, while eliminating electrostatic charge which can attract airborne contaminants to the end face. The MX cleaning formulation is safe on most plastics and is residue-free. The non-pressurized container can be transported as a "Dangerous Goods in Excepted Quantity".

Electro-Wash® MX Pen Features

- Specifically formulated for cleaning all fiber optic connectors
- Removes handling soils, dust, oils, and airborne contaminants
- Completely portable and easily transportable
- Cleans and eliminates electrostatic deposits of airborne contaminants

Typical Applications

The Electro-Wash® MX Pen can be used for all fiber optic connector repair and maintenance applications, including:

- Connector end face cleaning
- Cleaning fiber and splice trays, pre-splice
- Cleans tools and meters
- Cleans cables
- Removes road tar and asphalt grime
- For all maintenance and repair spot cleaning

The Electro-Wash® MX Pen is the perfect size for the side holder on ViewConn. It is an excellent fluid to clean fiberoptic connectors, when dry cleaning is not sufficient.

If you use, remember always swipe from wet area to dry area on your ViewConn cleaning cassette. Also remember – less is better.

Lightel sells these pens only in packs of 5.
