

Weather Resistant Nylon12 Cable Ties

Nelco's fastening solution for use with solar panels in the solar field and other outdoor applications rated for 12-15 years

- Known for top performance and reliability, these ties have the lowest threading force of any one-piece cable tie, optimizing installation time.
- Metal wire ties can potentially cut into cables, the Nylon 12 material blend makes these ties not as abrasive to panel cables as metal or steel wire ties.
- Engineered of materials for high moisture, corrosive, and outdoor applications.
- Ideal for making attachments to galvanized surfaces.
- Used in low temperature indoor or outdoor applications.
- Nylon 12 Material has a UL relative thermal index rating of 194°F (90°C).
- Nylon 12 Material is resistant to most salts & chemicals.
- Material has low temperature toughness down to -40°F (-40°C) with a notched izod rating of 1.3ft lbs/inch at room temperature

Weather Resistant Nylon 12 Cable Ties Specifications:

Nelco #	Nominal Length	Actual Length Inches/mm	Max. Bundle Diameter Inches/mm	Width Inches/mm	Tensile Strength (Lbs.)
N-5-25-120	5"	5.6/142	1.38/35	.14/3.6	25
N-7-40-120	7"	7.4/188	1.88/48	.19/4.8	40
N-14-40-120	14"	14.5/368	4.00/102	.19/4.8	40
N-14-90-120	14"	14.5/368	4.00/102	.30/7.6	90
N-27-90-120	27"	27.6/701	8.00/203	.30/7.6	90
