

# Switches

NexLight low voltage switches offer more variety and are the easiest in the industry to install, program, label, change, move or reprogram.

Any button in the system can be programmed as the following:

## INDIVIDUAL

- This command allows for any single relay/dimmer to toggle ON/OFF
- ON or DELAY OFF timers also available
- The 256 Individual Addresses used are IND 0-1, 0-2, 0-3, 0-4, 1-1...63-4

## GROUP

- This command allows any or desired all relays/dimmers to toggle ON/OFF together
- The 127 Group commands are G1, G2, G3... G127

## PATTERN

- This command drives any or all desired relays/dimmers to a specific ON or OFF state
- Dimmers may be set to individual levels and incorporate the use of global fade rates of 0, 3, 6 or 120 seconds
- The 72 Pattern commands are P1, P2, P3... P72

The only thing difficult about NEXLIGHT switches is picking one of the styles for your customer's building!
