

ANVS-2347

LONG-RANGE 5X NIGHT VISION BINOCULAR

ANVS-2347 long-range night vision binocular is built around standard AN/PVS-7 body and 5x catadioptric objective lens. It was specifically designed to meet the long-range observation needs of military and law enforcement personnel. It has a far better performance compared to a 5x afocal lens attachment often used to convert PVS-7 to a long-range binocular. ANVS-2347 is an ideal tool for covert surveillance, border patrol and spotting in low light conditions. Covered by one-year warranty.

ANVS-2347 Long Range Binocular Kit Includes:

Binocular, Demist Shield, Neck Cord, Shoulder Strap, Eye Cup, Daylight Objective Lens Cover, Carrying Case, Lens Cleaning Paper, AA Batteries, Operator's Manual

- High-grade 135mm catadioptric lens
- US Made Gen 3 Image Intensifier
- Automatic brightness control and automatic cut-off function
- High light cut-off
- Rugged construction
