

The **HOLographic Weapon Sight (HWS)** is the first electro-optic sighting system that applies holographic technology to small and medium sized weapon platforms. When used in Close Quarter Battle environments, this revolutionary weapon sight delivers amazing speed and accuracy while retaining the user's peripheral vision and situational awareness. All 550 series sights are fully compatible with all generations of night vision devices. Once positioned in front of the night vision monocular, it turns the entire set-up into a completely passive and undetectable night vision aiming system. Covered by 1-year manufacturer warranty.

EOTech Holographic Sights Include:
