R&D, Marketing and Sales Engineers

The RF and microwave market has become highly competitive and is growing steadily, continuously presenting new challenges. Present test and measurement solutions lack the capability to solve in an efficient way the emerging R&D characterization, design and test needs for components and systems in a nonlinear mode of operation.

NMDG is a high-tech company, active in the high-frequency electronics market. NMDG wants to become a worldwide leader in selling products and services that facilitate, accelerate and improve the design and testing of **active** high-frequency components, circuits and systems. These devices are used in telecommunications, satellite communications, high-speed digital electronics, etc.

Last year NMDG secured a meaningful amount of venture capital. NMDG will be extending its team further in Belgium to increase its presence on key markets and to accelerate its revenue growth based on existing and new products. NMDG is looking for **R&D and Technical Marketing and Sales Engineers**, who dare to take a leading role in the present and future development of the market and product portfolio.

NMDG offers a flexible and dynamic working environment where initiative is appreciated. Growth opportunities do exist for you to play an important role in the future direction and expansion of the company.

If you are an RF or HF [Electrical Engineer](#) with experience and/or interest in any of these fields

- working in a highly motivated R&D environment
- working with and programming advanced high-frequency measurement systems
- conceptualizing, designing and productising RF and HF measurement systems
- designing high-frequency analogue circuits aimed at characterization
- designing high-frequency amplifiers, mixers etc.
- developing a new market places by educating customers extensively
- interacting with customers and solving high-frequency problems

If you want to make an impact in the high-frequency community,

If you want to be a driving force behind a high-tech company,

[NMDG wants to hear from you](#)
