

FOCUS ON KITCHENS

Take your kitchen to the next level
Only imagination sets limits to how electric
movement can improve tomorrow's kitchen.

For the high-end kitchen

The fittest kitchen survives in the high end

The philosophy of tomorrow's kitchen is about making it fit the user's needs for functionality and movement.

While high-end kitchens of today are already multifunctional and designed in a pure and minimalist style, we are ready to help you take your kitchen to the next level.

LINAK® offers well proven products for kitchen environments that enable designers to invent yet unseen functionalities.

The perfection in motion solutions from LINAK is the ability to improve people's lives.

A Partnership Built on Knowledge

Multilevel cooperation with our customers is extremely important. It benefits both LINAK and the customers. The partnership is the driving force behind R&D, aftersales, logistics, manufacturing and marketing.

Compact, stationary and noiseless units add flexibility and motion to your high-end kitchen.

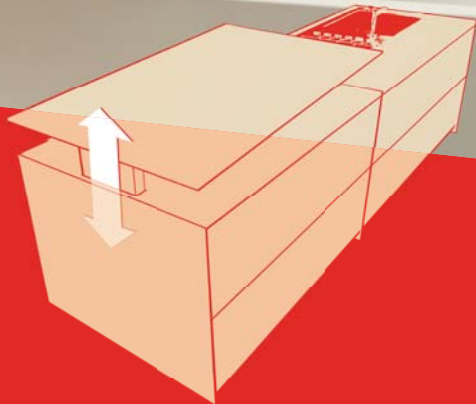

Imagination is the only limit. There are endless possibilities.

Examples of solutions

Easy access to wall cupboards

When handsfree opening or lowering of cupboards is required, LINAK has the solution. As cupboard doors are getting larger and heavier an actuator solution provides easy access.

Make kitchen tables fit the user

Different heights of users require different working heights. Experience the pleasure of adjusting and working at the right height.

Add comfort to activity tables

Tables in your kitchen fit many purposes, when the height is adjustable. Raise the table to a comfortable level while preparing a meal. And when the meal has been served, lower the table to your preferred position. The activity table is also ideal for family participation.

Hide the extractor hoods

Why destroy the view, when it is possible to store away the extractor hoods? Hiding of the extractor hoods offer new design opportunities. Extractor hoods are required, but they are often in the way. Store it away while not in use, and your kitchen reveals its best sides.

Allow new tools to your block kitchen

Raise parts of your kitchen island, and let it reveal new functions. It could for instance provide easy access to tableware. Use two lifting columns and experience how the block raises elegantly with a minimal sound.

Actuator solutions

HB10 RF handset

DPF1K Desk Panel

DPF1M Desk Panel

DPH Desk Panel

DPT Desk Panel

DL4 Lifting column

Max. thrust: 800 N

Max. speed: 43 mm/sec

DL5 Lifting column

Max. thrust: 800 N

Max. speed: 38 mm/sec

DL6 Lifting column

Max. thrust: 1200 N
Max. speed: 38 mm/sec

DL2 Lifting column

Max. thrust: 2500 N
Max. speed: 50 mm/sec

CBD4 Control Box

Voltage in: 220-
240/120V AC

LA31 Actuator

Max. thrust: 3500 N
Max. speed: 43 mm/sec
