

FPC/FFC/LVDS Connector

Technical Specs

FFC/FPC Connector

Pitch: 0.3mm ~ 1.0 mm

Pins: 4 ~ 65

Types: ZIF/ Non-ZIF / Easy on

SMT&DIP, S/T&R/A, S/R&D/R

LVDS Connector

Pitch: 0.4, 0.5 & 1.0 mm

Pins: 30, 40

Types: SMT, R/A

Height: 1.0, 2.25mm

Applications

DSC

PDA

Mobile phone

Notebook

LCD Monitor

TV

PalCONN, the Interconnect Division of Palpilot International, has developed a new series of FPC, FFC, and LVDS connectors.

The connectors have anti-tin wicking structure, front and backflip lock, and superior solder for the best soldering intensity.

These connectors are applicable to products that utilize a digital screen such as automotive infotainment systems, LCD monitors, printers/copiers, or medical patient monitors.

Our FPC 0.3mm pitch connector's contact retention can match 0.1N per pin, and are compatible with Japanese H brand product specifications.

PalCONN's FPC product can support your medical handheld devices, tablet, cellphone, e-book, and laptops.

We offer tape and reel packaging capabilities to fit your SMT process needs as well.
