Amphenol Socapex capabilities for specific connector design

The metallic shell concept allows Amphenol to design numerous types of shells with various lengths and specific housings, providing:

- Insertion of specific contacts (RF, optical termini, power, high power)
- Modification of the height or type of signal contact terminations
- Customization of rack and panel shells or the addition of a ceramic plane for high-frequency filtering
- A variety of grid and footprint styles, to comply with density requirements
