

Professional cloud solutions for industry

PROFICLOUD

Industry trend towards cloud services

The cloud represents digital and Internet-based processes, and it networks products, people and companies.

Proficloud from Phoenix Contact provides you with professional, integrated cloud solutions for your automation – from infrastructure and platforms, all the way to software. This lets you utilize all the advantages and freedom during your transition into the digital age.

Make the right decisions today for your future and join us in the world of Proficloud.

Thanks to digital networking, you can predict failures and carry out targeted maintenance planning.

Needs-based display and evaluation of energy data across locations to determine potential areas of savings.

Expanded human-machine interaction through communication with smart devices.

Global status monitoring and control thanks to direct access to device data from the field level.

OFI CLOUD

Create flexible, secure cloud services for your application and use them around the world thanks to a software development kit.

Efficient, effective use of your data thanks to scalable databases with high availability.

Scalable process monitoring to determine optimization measures by comparing results.

In dialog with customers and partners worldwide

Phoenix Contact is a globally present, Germany-based market leader. Our group is synonym for future-oriented components, systems, and solutions in the fields of electrical engineering, electronics, and automation. A global network across more than 100 countries, and 14,500 employees ensure a close proximity to our customers, which we believe is particularly important.

The wide variety of our innovative products makes it easy for our customers to find future-oriented solutions for different applications and industries. We especially focus on the fields of energy, infrastructure, process and factory automation.
