

BEST CABLE LOOM

QED

Reference Audio 40/Signature Revelation

THIS SPEAKER CABLE and interconnect pairing comes from well-regarded cable expert QED. The Reference Audio 40 is a silver-plated copper interconnect packed in a foamed polyethylene dielectric and fitted with QED's own Analoc plugs. The Signature Revelation speaker cable uses 10 silver-plated oxygen-free copper conductors, separately insulated and arranged according to the company's Aircore technology. On test, this cable combo was applauded for its smooth vocal sound and crisp, finessed treble. Moreover, it offers an open and even sound with a coherence and sense of balance that's rare at the price.
