CAS no. 9003-31-0

##### 2. TITANIUM DIOXIDE

Concentration < 0.73 %

Other names / synonyms TiO<sub>2</sub>  
EC no. 236-675-5  
CAS no. 13463-67-7

##### 3. Sulfur

Concentration < 0.73 %

Other names / synonyms Sulfur  
EC no. 231-722-6  
CAS no. 7704-34-9  
Index no. 016-094-00-1

##### 4. Phenol, 4-methyl-, reaction products with dicyclopentadiene and isobutylene

Concentration < 0.7 %

Other names / synonyms Wingstay L  
EC no. 271-867-2  
CAS no. 68610-51-5

##### 5. Zinc oxide

Concentration < 0.35 %

Other names / synonyms Zinc Oxide  
EC no. 215-222-5  
CAS no. 1314-13-2  
Index no. 030-013-00-7

##### 6. 2-Mercaptobenzothiazole zinc salt

Concentration < 0.34 %

Other names / synonyms ZMBT  
CAS no. 155-04-4

##### 7. zinc bis(dibutyldithiocarbamate)

Concentration < 0.1 %

Other names / synonyms ZDBC

## SECTION 4: First-aid measures

### 4.1 Description of necessary first-aid measures

|  |  |
|--|--|
| General advice   | Users are advised against touching sensitive skin areas such as the eye, nose, lips and mouth after donning to minimize skin irritations on certain individuals. Because of its protective function, the product is unventilated except at the cuff. Users should replace the product frequently, wash and clean their hands prior to donning the product again to reduce skin fatigue and roughening on the areas in frequent contact with the product. |
| If inhaled   | n/a  |
| In case of skin contact                                | Wash off with soap and plenty of water.  |
| In case of eye contact                                 | Flush eyes with water as a precaution.   |
| If swallowed   | n/a  |
| Personal protective equipment for first-aid responders | none   |

### 4.2 Most important symptoms/effects, acute and delayed

Irritant contact dermatitis may result from prolonged contact with the product, the causative agents being residual surfactants, certain processing chemicals and inadequate post production processing. There are no evidence of any adverse effects from available information of sulfur, zinc oxide and titanium dioxide. However, presence of residual ZDEC, ZMBT and anti-oxidants on the product surface may cause delayed type IV hypersensitivity e.g. allergic contact dermatitis and chemical allergy. Reactions include itching, burning sensations, blistering, reddening and pain. In chronic cases, users may develop dry and thickened skin, cracks, peeling and crusting.

Natural rubber latex contains a small quantity of natural proteins which may cause an immediate type I hypersensitive reactions such as urticaria and anaphylaxis in a small percentage of the population. However, the process of chlorination to make the gloves powder-free also reduces the extractable protein on the glove surface to below 50µg per gram glove. At such low protein level, sensitization is extremely rare. In any event, a user who cannot tolerate latex gloves is advised to consider alternative non-latex gloves. Type I hypersensitivity is often accompanied by symptoms such as itching, hives, swelling, runny nose, wheezing and breathing difficulty. Other symptoms may involve nausea, abdominal cramps, increased heart palpitation, decreased blood pressure and anaphylactic shock.

### 4.3 Indication of immediate medical attention and special treatment needed, if necessary

If allergic reaction occurs, discontinue use immediately and consult a physician.

## SECTION 5: Fire-fighting measures

# Safety Data Sheet

## Qualatrilite Indy Latex 9" Powder Free Ambi Gloves

### 5.1 Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

### 5.2 Specific hazards arising from the chemical

No fire or explosion hazards are associated with these products. They will melt at elevated temperatures.

### 5.3 Special protective actions for fire-fighters

Use standard procedure for combustion material fires, including approved self-contained breathing apparatus.

#### Further information

No data available.

## SECTION 7: Handling and storage

### 7.1 Precautions for safe handling

Do not store gloves/fingercots where temperatures may rise above 40°C / 140°F. Store them in a cool place. Open boxes of gloves/fingercots should be shielded from exposure to direct sun or florescent lighting to prevent discoloration. Nitrile gloves/fingercots should not be stored in damp or high humidity areas.

## SECTION 11: Toxicological information

### Information on toxicological effects

#### Acute toxicity

The program did not find any acute toxicity classifications for components present above relevant thresholds in the product.

#### Skin corrosion/irritation

Could not estimate (did not meet thresholds).

#### Serious eye damage/irritation

None could be determined.

#### Respiratory or skin sensitization

No components included this classification.

#### Germ cell mutagenicity

No components included this classification.

#### Carcinogenicity

IARC carcinogen

Result: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

NTP carcinogen

Result: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by NTP.

OSHA carcinogen

Result: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by OSHA.

#### Reproductive toxicity

No components included this classification.

#### Summary of evaluation of the CMR properties

No data available.

#### STOT-single exposure

No components were found exhibiting specific target organ toxicity, single exposure Cats. 1 or 2, above the minimum cut-off values.

#### STOT-repeated exposure

No components included this classification.

#### Aspiration hazard

No components included this classification.
